1891.....	8,052,318	2,402,067	448,609	10,899,994
1892.....	8,052,318	2,402,067	448,609	10,899,994
1893.....	8,052,318	2,402,067	448,609	10,899,994
1894.....	8,052,318	2,402,067	448,609	10,899,994
1895.....	8,052,318	2,402,067	448,609	10,899,994
1896.....	8,052,318	2,402,067	448,609	10,899,994

\* Beginning with this year, gross receipts of the Pennsylvania Railroad division were included; previously only net receipts had been included.

It will be seen from the foregoing that as compared with the best previous years, namely 1883, 1892, 1893, aggregate gross receipts show a falling off of, roughly, two million dollars. But it will also be noticed that the whole of the loss has been in the receipts from sales of coal. These amounted to \$10,622,067 in 1888, to \$9,629,333 in 1892 and to \$9,939,648 in 1893, while the total for 1896, even after an improvement of \$409,000 over 1895, was only \$7,778,225. This decline of 2 @ 3 million dollars reflects the very unsatisfactory condition of the anthracite trade—the poor prices received and the relatively small quantities disposed of. On the other hand, the earnings from the railroads for 1896 are close up to the very best previous figures. These earnings were \$10,201,634 in 1896, against \$10,212,412 for 1893, \$10,356,443 for 1892, \$10,062,324 for 1891 and \$10,463,674 for 1890. Considering how deeply prostrated all industrial interests were in 1896, these large earnings from the railroad lines are quite remarkable, and indicate how the traffic of the lines is being developed in face of unfavorable conditions. If we compare with 1879, we find that receipts from coal have risen during the seventeen years only from \$5,764,477 to \$7,778,225, while receipts from the railroads have risen from \$3,748,503, (or if we allow for the difference in the method of computing the figures at that time from, say, 4½ million dollars) to \$10,201,634. The miscellaneous receipts call for little remark. The only deviation from the normal was in 1895, when the profit on the Rensselaer & Saratoga sale, as already explained, increased the amount between \$550,000 and \$600,000.

Extending now these comparisons to the income statements as a whole, the results are equally noteworthy. Herewith we present a complete synopsis of the income accounts for each year since 1877. We add also figures to show the company's tonnage in coal.

Years.	Coal from own Mines.	Transported for Others.	Gross Receipts.	Expenses.	Net Earnings.	Interest, Rentals & Taxes.	Surplus for Stock.

1896.....	3,054,892	357,673	9,570,866	6,416,690	3,154,176	3,331,767	\$7,591

\* Deficit.

The feature in the coal traffic is the great growth in the tonnage transported for others. In the coal from its own mines, meaning the tonnage from mines owned or leased, the increase over a period of seventeen years has been comparatively small, the total having risen only from 3,054,390 tons to 4,223,131 tons. But in the tonnage transported for others there has been an increase from only 357,673 tons in 1879 to 1,612,490 tons in 1896. The figures of gross receipts

in the table are the same as those in the first table above, already analyzed. It will be remembered that the 1896 total was found to be over two million dollars below the best previous amount. The 1896 aggregate of expenses, however, falls only \$357,000 below the largest previous total. This is significant as showing that, owing to the decline in rates, which makes it necessary to carry an increased amount of traffic to produce a given amount of revenue, it has been found impossible to reduce expenses to correspond with the falling off in earnings.

But the column which deserves study above all others is that showing the yearly amounts of the fixed charges, designated "interest, rentals and taxes." The aggregate here for 1896 is only \$3,087,631, against \$3,231,767 for 1878. In other words, the company's fixed charges now are actually smaller than they were eighteen years ago. This is just the reverse of what has happened in the case of other large companies. In fact, in the history of our transportation interests for the last twenty years no fact stands out so prominently as the great increase which has occurred in fixed charges everywhere. The Delaware & Hudson, then, in that particular is an exception to the rule. We may say, too, that the saving in the strictly fixed charges must have been greater than the figures given indicate. These figures include taxes, which most assuredly were much heavier for 1896 than for 1879, though we are without the data to show the exact extent of the increase.

The reason why the Delaware & Hudson holds this distinctive feature of lower charges is of course well known. It has pursued a policy different from all other large roads. It has not only not issued new bonds but it has retired old issues of bonds as they matured and replaced them with stock. Seventeen years ago (that is, on December 31 1879,) the company's stock was \$20,000,000, the outstanding bonds \$19,837,000; now the stock is \$35,000,000, the bonds only \$5,000,000. In other words the bonded debt in the seventeen years has been reduced nearly \$15,000,000, the stock being increased in the same amount. What other company in the whole land can point to such a record? Nor is this all. In the interval the company has acquired control of the Rutland Railroad at a cost of \$1,500,000, and has also acquired considerable other property. Hence, in considering the future prospects of the company this pre-eminent fact must always be borne in mind, that be the course of trade good or bad the position of the company is unusually strong by reason of the reduced debt and fixed charges.

Coming now to the New York & Canada affair—the issue during 1896 of a million dollars of debentures as announced in the CHRONICLE last week—is there not something grotesque in the suggestions that have been made regarding that transaction? Here is a concern, as we have seen, which has steadily and largely reduced its bonded indebtedness; it holds its lines in Pennsylvania, known as the Pennsylvania Railroad division, yielding 1½ million dollars net per annum, free from debt, except so far as the \$5,000,000 D. & H. bonds still outstanding are a lien on it. Yet we are asked to believe that this company so situated has been casting about for some plausible way of putting out new bonds, and finding nothing else available has hit upon the expedient of capitalizing deficiencies in revenue.

Still, now that such prominence has been given to the matter, it is best that it should be explained. Ac-

cording to the report for 1895 the D. & H. had, roughly, 4½ million dollars invested in the New York & Canada. About 3½ million dollars of this represented the original cost of acquiring the road, the other million (which has now been repaid through a new bond issue) represented advances made from time to time, not to meet deficiencies in revenues but for new construction work properly and legitimately chargeable, according to the management, to capital account. In addition to these outlays large amounts were spent for improvements and charged to expenses. All but about 10 or 15 miles of the 113 miles of road are now laid with 80-pound steel rails, and the cost of doing this, we are told, has been included in expenses; so also has the cost of ballasting the whole line and various other improvements.

The New York & Canada is considered the least valuable of the D. & H. leased lines. Its business has been hurt in recent years by the construction of the Mohawk & Malone and the other lines into the Adirondacks controlled by the New York Central, and also by the collapse of the iron industry in Northern New York. But latterly the property has been slowly recovering, the losses in the ore traffic being offset by gains in the pulp and paper traffic. As a result, the loss on the operation of the road, which had been \$165,281 in 1893, amounted to only \$8,508 and \$7,236 respectively in 1896 and 1895. The following shows the results for each of the last seventeen calendar years.

NET RESULT ON NEW YORK & CANADA.					
1896.....Loss..	\$8,508	1890.....Profit.	\$36,907	1884.....Loss..	\$70,840
1895.....Loss..	7,236	1889.....Profit.	72,361	1883.....Loss..	120,538
1894.....Loss..	140,201	1888.....Profit.	92,548	1882.....Loss..	51,794
1893.....Loss..	165,281	1887.....Profit.	64,158	1881.....Profit.	2,715
1892.....Loss..	70,346	1886.....Profit.	51,181	1880.....Profit.	19,379
1891.....Loss..	102,992	1885.....Loss..	43,571		
Net loss 17 years.....				\$392,053	

It will be observed that the net loss from operations in the whole seventeen years was only \$392,053, and this loss, as already stated, has been charged in its full amount against the income of the Delaware & Hudson, the deduction for each year having been the amount accruing in such year. The New York & Canada is only one of the leased lines. To show the record on these leased lines as a whole we give the following statement.

NET RESULT ON ALL LEASED LINES.					
1896.....Loss..	\$18,212	1890.....Profit.	\$417,534	1884.....Loss..	\$174,480
1895.....Loss..	24,647	1889.....Profit.	167,055	1883.....Profit.	1,905
1894.....Loss..	221,295	1888.....Profit.	130,111	1882.....Profit.	8,465
1893.....Profit.	11,414	1887.....Loss..	37,622	1881.....Profit.	26,182
1892.....Profit.	227,812	1886.....Loss..	21,695	1880.....Loss..	11,642
1891.....Loss..	121,564	1885.....Loss..	313,339	1879.....Loss..	316,066

Thus it will be seen that the result has varied greatly from year to year, 1896 showing a small loss. But whether there has been a loss or a gain the proper debit or credit has in each instance been made in the Delaware & Hudson income accounts. No one who took the pains to examine the D. & H. reports could be in doubt as to this. More than that, President Olyphant, in reply to a query from a representative of this paper, is emphatic in the statement that all other liabilities on endorsements and guaranties, of whatever description, are treated in the same way—that is, wherever there is a loss the amount is charged against D. & H. income. We may note, too, that the D. & H. has for a long time had what might not improperly be termed an audit of its accounts, the auditors being a committee from the board of directors. We do not know who will examine the accounts this time, but in the previous two years the committee was composed of Alexander E. Orr, Jas. R. Taylor and J. A. Roosevelt, and in the three years before that the committee

consisted of R. S. Grant, Wm. H. Tillinghast and A. Van Santvoord.

It may be asked why, if the D. & H. required the money, as it certainly did, the company did not issue its own bonds instead of those of the N. Y. & Canada. The answer no doubt is that with the D. & H., as with all concerns, it is deemed best and proper that each separate property should bear its own burdens. Besides this, the amount owing the D. & H. having reached over a million dollars, it was, we presume, thought fitting that a settlement should be made. During 1896 the Delaware & Hudson had greater need than usual for money. The reduced demand for coal left all the anthracite carriers with enlarged supplies of that product, and hence added greatly to the aggregate of advances required on coal. This was shown very strikingly in the report recently issued by the Lehigh Valley and is again shown in the report of the Lackawanna issued yesterday. The building of 27 miles of double track on the Albany & Susquehanna also called for funds which the D. & H. had to meet. Besides this the fact that dividends were 7 per cent, while current revenues equaled only 5 per cent, made a draft on cash to the extent of \$700,000. Dividends are always based on the earnings of the previous year, but necessarily they come out of the cash of the current year.

In these and other ways the company had accumulated a floating debt at one time during the year of \$2,298,500. The sale of the \$1,000,000 New York & Canada debentures at par has reduced the sum to about \$1,300,000, and this is the amount of loans now outstanding. Of course for a company of the size and standing of the D. & H. that is really an insignificant sum. Five years ago, when 7 per cent dividends were regularly paid, the company reported \$1,200,000 of loans payable, but these were all paid off before the end of the next year.

It is sometimes claimed that provision should be made in the income accounts for the ultimate exhaustion of the company's mines. Possibly there will be need for something of this kind hereafter. So far as the past is concerned, the managers have done what is equivalent to the same thing in the accumulation of a large surplus, which it now appears is not to be used to maintain the old rate of dividends. Besides, the coal lands stand on the books at a very low figure, and it is estimated that the present rate of production can be maintained for from sixty to seventy years. Taking the investment in the Northern Coal Company, the expenditures for mine improvements and fixtures, and \$1,700,000 for real estate owned in connection with the mines, the value of the mines on the books figures out only about 11 million dollars. The actual present value of the mines is estimated at from 25 to 30 million dollars.

#### THE LATE YEAR'S IRON PRODUCTION.

The statistics of iron production for the late calendar year which Mr. James M. Swank, of the Iron & Steel Association, has prepared with so much promptness reveal results that will no doubt appear somewhat surprising. Mr. Swank finds that our iron producers made no less than 8,623,127 tons of pig iron during 1896. This is only 823,181 tons less than the unprecedented output for 1895, and here have been but two other years (besides 1895) in the whole history of the country when the production was larger than that now reported for 1896.

The British statistics have not yet been compiled, and the output of the United Kingdom will not be known for some time. The indications point, however, to a yield very close to that for the United States—possibly a little larger, possibly a little smaller. But it is to be remembered that in Great Britain the year was one of considerable buoyancy, both in the internal and the external trade. In the United States, on the other hand, the year marked a period of great depression. It is a striking commentary on the growth and expansion which the iron industry has attained in recent times that in a year of exceedingly unfavorable conditions, as far as general business is concerned, we should have turned out as much iron as did Great Britain in a year of very favorable conditions.

We have said that the product was only 823,181 tons less than that for 1895. But that hardly gives an idea of the intense depression through which the iron industry passed during the twelve months. It will be remembered that in 1895, as the result of the revival in trade which followed the contract with the Morgan-Belmont Syndicate, an old fashioned boom developed in the iron trade. According to the monthly record kept by the "Iron Age," this culminated on Nov. 1 of that year, when the weekly product reached the unprecedented figure of 217,306 tons. After that a steady decline set in, which continued almost without interruption for a period of eleven months. Up to July 1 the contraction was comparatively small, the weekly capacity at that date being estimated at 180,532 tons, against the 217,306 tons for the previous November. With the nomination of Bryan in July the shrinkage assumed very large proportions, and on October 1 1896 the capacity of the active furnaces was estimated at only 112,782 tons per week against the 217,306 tons the previous November. To see the extent of the change, therefore, we must compare the results by half-years. The following shows the output for each six months of the last twelve years.

PRODUCTION OF PIG IRON IN HALF-YEARLY PERIODS.			
	Gross Tons.		Gross Tons.
1885—1st half.....	1,920,371	1891—1st half.....	3,388,107
2d half.....	2,124,154	2d half.....	4,911,788
1886—1st half.....	2,837,682	1892—1st half.....	4,709,683
2d half.....	3,045,642	2d half.....	4,887,317
1887—1st half.....	3,049,294	1893—1st half.....	4,562,918
2d half.....	3,367,854	2d half.....	5,581,584
1888—1st half.....	3,020,092	1894—1st half.....	2,717,983
2d half.....	3,469,646	2d half.....	3,939,405
1889—1st half.....	3,661,603	1895—1st half.....	4,097,558
2d half.....	3,942,039	2d half.....	5,358,750
1890—1st half.....	4,560,513	1896—1st half.....	4,976,236
2d half.....	4,612,190	2d half.....	8,648,891

It is the figures for the last three half-years chiefly that merit attention. In the six months to December 31 1895 we produced 5,358,750 tons of the metal, in the six months to June 30 1896 our output was 4,976,236 tons, and in the following six months we made only 3,646,891 tons. In brief, in the last half of 1896 our product was at the rate of only about 7½ million tons per annum, in the last half of 1895 it had been at the rate of nearly 10½ million tons per year. The depression which existed is also shown in the changes in stocks which occurred. During the calendar year 1895 the total of stocks not in makers hands intended for their own use diminished from 661,328 to 506,132 tons. On the other hand in 1896 there was an increase from 506,132 tons to 847,686. Some of the stocks held represent purchases made in a speculative way—that is, not for use, but for the purpose of making a profit out of an expected rise in the price of the commodity. The American Pig Iron Storage Warrant Company reported December 31 1896 200,700 tons of pig iron in its warrant yards, this including 64,663 tons still controlled by the

makers. Allowing for the changes in stocks, the following furnishes a comparison as to the amount of iron presumably consumed in the different years. We add a line to show the imports—not merely of the pig metal but of all kinds of iron and steel.

## IRON PRODUCTION, STOCKS, IMPORTS, &amp;C.

Tons of 2,240 Pounds.	1896.	1895.	1894.	1893.	1892.	1891.
St'k of pig beg. of yr.*	503,182	661,828	707,318	535,818	627,233	661,858
Product'n dur'g year.	8,623,127	9,448,308	8,657,388	7,124,502	9,187,000	8,279,870
Total supply.....	9,129,259	10,107,636	7,364,706	7,660,118	9,781,233	8,941,728
Stock end of year*...	847,686	506,132	661,328	707,318	535,818	627,233
Consump. of home pig	8,281,573	9,601,514	6,703,378	6,964,800	9,248,617	8,314,495
Imp'ts of iron & steel	1,300,000	378,208	309,249	438,495	494,468	557,882
Tot. consump., tons	8,581,573	9,979,712	7,012,627	7,391,295	9,743,085	8,872,377

\* Including 39,200 tons net held in the warrant yards of the American Pig Iron Storage Warrant Company Dec. 31, 1890, not under the control of makers; 62,937 tons Dec. 31, 1890; 30,900 tons Dec. 31, 1891; 29,500 tons Dec. 31, 1892; 45,260 tons Dec. 31, 1893; 63,640 tons Dec. 31, 1894; 61,800 tons Dec. 31, 1895 and 136,037 tons December 31, 1896. † Partly estimated

Thus the consumption in 1896 was only 8,581,573 tons, against 9,979,712 tons in 1895, but against 7,012,627 tons in 1894 and 7,391,295 tons in 1893. It is interesting to see how the make of iron is distributed according to the kinds of fuel used in its manufacture. It appears that during the twelve months of 1896 we actually made more charcoal pig than during the twelve months of 1895, the figures being 310,244 tons, against 225,341 tons in 1895. The iron made with anthracite or with mixed anthracite and coke aggregated a little less than in 1895, namely 1,146,412 tons, against 1,270,899, while the bulk of the loss occurred in the iron made with bituminous coal, of which the output was 7,166,471 tons, against 7,950,068 tons. Here is a table going back to 1891.

## PRODUCTION OF IRON ACCORDING TO FUEL USED.

Tons of 2,240 lbs.	1896.	1895.	1894.	1893.	1892.	1891.
Bituminous.....	7,166,471	7,950,068	5,520,224	5,390,181	6,822,266	5,536,718
Mixed anthr. & coke	1,145,112	1,270,899	911,712	1,097,646	1,568,093	1,560,281
Anthracite alone.....				49,858	229,020	305,827
Charcoal.....	310,244	225,341	222,422	396,789	537,621	676,964
Total.....	8,623,127	9,446,308	6,657,388	7,124,502	9,157,000	8,279,870

Great interest attaches to the results for the Southern States, where iron is made so cheaply that it has been found possible to ship it to Europe in competition with the iron of Great Britain and other countries, several shipments of that kind having been reported. We give a statement below comparing the product for all the leading States. It will be seen that Alabama in 1896 actually turned out more metal than in any previous year, her product having been 922,170 tons. Virginia made 386,277 tons, which also is in excess of any previous year. Kentucky likewise excelled its own best record, though the State's aggregate is not yet large, being 70,660 tons.

## PRODUCTION OF PIG IRON BY STATES.

Missouri.....	12,548	37,518	6,522	32,360	67,090	20,229	89,777
All others.....	57,164	68,833	82,841	66,566	86,893	67,187	72,834
Grand total.....	8,623,127	9,446,308	6,657,388	7,124,502	9,187,000	8,279,870	9,202,703

Taking all the Southern States together, the output was 1,834,451 tons for 1896, against 1,702,088 tons for

1895, 1,268,425 tons for 1894, 1,567,299 tons for 1893 and 1,890,167 tons for 1892. The latter is the only year able to show a heavier product for these Southern States than 1896, and the difference in its favor, it will be observed, is very small. Outside the South the losses appear to have fallen mainly on Pennsylvania, Ohio and Illinois.

It is hardly necessary to say that prices were unsatisfactory. The tendency was downwards except for a time towards the end of the year on an expected revival owing to the election. A feature in the closing months was the breaking up of a number of combinations in the trade which had previously held up prices. The following gives the yearly average prices for a number of leading articles of iron and steel.

## AVERAGE YEARLY PRICES OF IRON AND STEEL, 1889 TO 1896.

Articles—	1889.	1895.	1894.	1893.	1892.	1891.	1890.	1889.
Old iron T rails at Phila...ton.14 17	14 09	11 95	16 43	19 48	22 05	25 19	24 19	
No. 1 anthr.fdy.pig at Phil. "	12 95	13 10	12 66	11 62	15 75	17 52	18 40	17 75
Gray forge pig iron at Phil. "	11 09	11 49	10 73	12 73	13 54	14 53	16 82	15 48
Gray forge pig iron, Lake ore, at Pittsburg..... "	10 39	10 94	9 75	11 77	12 81	14 06	15 78	15 37
Bessemer pig iron at Pitts. "	12 14	12 72	11 38	12 87	14 37	15 93	18 85	18 00
Steel rails at mills in Pa. "	28 00	24 41	24 00	25 12	30 00	29 92	31 75	29 3
St'k billets at mills at Pitts. "	18 83	18 40	18 53	20 44	23 63	25 32	30 82	29 45
Best refined bar iron from store at Phila.....100 lbs.1 40	1 44	1 34	1 70	1 87	1 90	2 05	1 94	
All muck bar iron at Pitts. "	1 21	1 25	1 20	1 50	1 64	1 71	1 85	1 71

Thus the average price in 1896 was lower than in 1895 in all but three cases, two of these exceptions being steel billets and steel rails. But with the collapse of the steel combination, billets sold in December as low as \$16 00 per ton at the mills at Pittsburg, and the price of steel rails was in December reduced from \$28 00 per ton to \$25 00, the reduction to apply only on deliveries during 1897. At the beginning of 1897 iron and steel prices in nearly all lines were about as low as at any time during the existing period of depression.

## THE CROPS OF 1896.

The estimates of the country's crops the late year by the Agricultural Bureau at Washington have this time been very much delayed, the figures having made their appearance only on Monday of this week. These final totals, however, do not make any very essential changes from the results reached last October and November, based on the averages of yield per acre reported at that time. Taking the three leading cereals, the totals are in each case a little larger than the early approximations—wheat being estimated at 427 million bushels against 412 million bushels, corn 2,233 millions against 2,211 millions and oats 707 millions against 670 millions.

As already stated, these variations are not very important, and substantially the figures confirm the previously accepted estimates. The year, it is evident, was a very good one in point of yield. The corn crop, at 2,283 million bushels, exceeds by 132 million bushels the unprecedented crop of the previous year; the oats crop falls 117 million bushels below that for 1895, but is yet very large at 707 million bushels, and the wheat crop at 427 million bushels compares with 467 million bushels for 1895. In the aggregate of the three crops the yield does not differ very greatly from that for 1895, the total being 3,418 million bushels, against 3,442 million bushels. In 1894 the total had been only 2,335 million bushels, in 1893 2,654 million bushels and in 1892 2,805 million bushels. These comparisons show how very much better the harvests have been the last two years than in the years immediately preceding. Here is a comparison of the three crops for five years.

## CROPS OF WHEAT, CORN AND OATS

Total Production	1895.	1895.	1894.	1893.	1892.
	Bushels.	Bushels.	Bushels.	Bushels.	Bushels.
Corn .....	12,854,475,185	9,151,138,540	1,312,770,056	1,619,404,141	1,688,464,900
Wheat.....	427,544,347	427,102,947	490,947,416	396,181,725	515,949,000
Oats.....	707,346,431	944,443,537	612,081,484	684,551,550	661,035,000
Total.....	13,989,365,963	10,522,685,024	2,415,798,956	3,619,137,416	3,865,448,900

The wheat crop at 427 million bushels must be considered below the average. The loss of 40 million bushels as compared with 1895, has been chiefly in the spring wheat States of the Northwest, where the yield the previous year had been of really phenomenal proportions. Thus in Minnesota the 1896 product is estimated at only 46 million bushels, against 65 million bushels in 1895, and the product of North Dakota is placed at less than 30 million bushels against 61 million bushels. The decrease in these two States alone, it will be observed, reaches 50 million bushels, and this decrease has been the cause for some very heavy losses in earnings by the railroads in that part of the country. The winter-wheat yield has not been large, though a few million bushels better on the whole than that for 1895. Ohio, however, which is a winter-wheat State, had one of the smallest crops of wheat in its history—namely, only 21,800,000 bushels. Below we give the product in the leading producing States for five years.

In the case of oats the result has varied greatly in the different States. Iowa is the State which raises more oats than any other, and that State accounts for the bulk of the falling off in total yield as compared with the previous year—that is to say, the Iowa crop in 1896 is estimated at only 105 million bushels, against 182 million bushels in 1895, which latter, however, had been extraordinarily large. Here is a statement of the oats production in the principal States for each of the last five years.

## OATS CROP FOR FIVE YEARS.

The corn crop is of unprecedented dimensions, and the effect of two such large crops in succession on the general situation can hardly be over-estimated. The aggregate production for the two years has been but little less than 4,500 million bushels. In nearly all the leading States we are dealing with figures of great magnitude, and it is hardly worth while to mention each State specifically therefore. A few illustrations will serve to show how striking the improvement has been. Thus in Iowa the crop is 321 million bushels, against 298 million bushels in 1895, and but 81 million bushels in 1894, and in Nebraska the yield is 298 million bushels against 125 million bushels in 1895 and but 14 million bushels in 1894. On the other hand, in parts of the South and Southwest the harvest in 1896 was poor; Texas has a yield of but 32 million bushels, against 107 million bushels in 1895 and 69 million bushels in 1894, and Arkansas has a crop of but 29 millions against 50 millions and 38 millions respectively in 1895 and 1894.

Besides the large cereal crops, the cotton crop was a great improvement on that of the previous year, though we do not attempt to make an estimate of our own of the amount of the increase. The following carries the comparison in the leading crops back to 1879.

## CROPS OF WHEAT, CORN, OATS AND COTTON SINCE 1879.

Year.	Wheat.	Corn.	Oats.	Cotton.
	Bush.	Bush.	Bush.	Bales.

\* Indicated yield according to Agricultural Department's figures issued December 10.

With regard to prices, we noted in reviewing the harvest of 1895 that the situation had been very unsatisfactory in that respect as to all cereals, the prices being the lowest in years. The same remark, emphasized, applies to 1896 with one exception, namely wheat, where there has been a striking advance under the crop shortage in the other leading producing countries—India, Australia, Russia, Argentina, etc. In India an actual famine, as is known, developed and instead of that country being able to export wheat, the unusual occurrence was noted of purchases in this coun-

try for India account. The average of farm prices for wheat over the whole country is reported by the Agricultural Bureau at 72.6 cents for 1896, against only 50.9 cents for 1895, a large and very welcome addition. The averages on the other crops, however, are all lower, as will appear by the following:

AVERAGE PRICES RECEIVED BY FARMERS AND PLANTERS.

	1896.	1895.	1894.	1893.	1892.	1891.
	Cents.	Cents.	Cents.	Cents.	Cents.	Cents.
Wheat, per bushel	72.6	50.9	49.1	53.8	62.4	83.9
Rye, per bushel	40.9	44.0	50.1	51.3	54.8	77.4
Oats, per bushel	18.7	19.6	32.4	29.1	31.7	31.5
Barley, per bushel	32.3	33.7	44.2	40.6	47.2	54.0
Corn, per bushel	21.5	26.4	45.7	36.5	39.4	40.6

## Monetary & Commercial English News

[From our own correspondent.]

LONDON, SATURDAY, January 16th, 1897.

The announcement that the expected Treaty of General Arbitration between this country and the United States was signed at Washington at the beginning of the week has had surprisingly little influence upon markets. People here had made up their minds long ago that a war between the United States and the United Kingdom would be a crime, and consequently was impossible. They look upon the treaty, therefore, rather as an official confirmation of their opinions than as in any way altering the actual state of things.

The appointment of a new Russian Finance Minister in the place of Lobanof has also had little influence. The truth is that people in this country know too little of the new minister to form any kind of opinion as to how he will be likely to affect the policy of Russia, and therefore they take it as a mere piece of news without any special significance. In Germany the appointment is not altogether liked. It is warmly approved in France.

What has chiefly influenced the market at home and abroad is the long delay in effecting any kind of arrangement at Constantinople. For months past it has been stated semi-officially and officially in almost every capital of Europe that the Powers were agreed and that a settlement would be made, but we seem to be as far off from an arrangement as ever,

and people are asking if nothing is done what will happen? The new financial control is not taken very seriously. The delay of Spain, also, in arranging the Cuban difficulty is acting as a deterrent on the Stock Exchange. People had hoped that the good sense of the Spanish Government, the influence of the Powers, especially of Great Britain and France, and the example set by our own country in Venezuela, would all induce Spain to agree with the United States; but still nothing seems to be done. As a result there is a general unwillingness to engage in new risks. At the very beginning of the year the impression was general in the city that we should very soon witness an awakening of interest on all the stock markets. There is no sign of anything of the kind. The public is keeping aloof just as it has been doing for months past.

The loans due from the outside market to the Bank of England have nearly all been paid off, yet the market is well supplied and rates are easy. In the open market, three-months' bank bills are taken at a trifle under 3 per cent and short loans are made at from 2 to 2½ per cent; yet there is an impression that this state of things will not last. Firstly, because there is strong demand for gold in the open market for Russia and Japan, which prevents much of the metal from going into the Bank of England; secondly, because the railway dividends are now beginning to be paid, and that means accumulation of funds in the banks just before each important dividend is distributed, and consequently an uncomfortable shifting of money from house to house; and, thirdly, because in February the collection of the revenue is on an exceptionally large scale, transferring immense sums from the open market to the Bank of England.

The silver market is very quiet, and there is yet no very great demand for India Council drafts. The transfer of two crores of rupees from the Indian note reserve to the Treasury balances has enabled the India Council to raise the amount of bills and transfer offered for tender from 20 lacs a few weeks ago to 50 lacs next Wednesday, but the offer is greatly in excess of the demand. Last Wednesday, for example, 40 lacs were offered and less than 28 lacs were bought. Partly this is due to the fact that the exchange banks had already supplied themselves largely with exchange and partly to their feeling that they can have exchange when they require it. The Indian money market is less stringent this week, but the cause unfortunately is a check to trade owing to the extreme stringency for weeks past and to the plague in Bombay. The panic among the natives in that city is terrible. Immense numbers of the work people are leaving the city, and practically the import business has stopped. The plague has now broken out in Kurrachee, where it is reported to be as deadly as in Bombay.

As stated above, there is little doing in any department of the Stock Exchange. Trade proper is decidedly good, and the indications point to further improvement; but investment is not going on upon as large a scale as usual at this time of the year, and there is practically no speculation. In the American department the public holds aloof; perhaps they are disappointed because there has not been a magical recovery on the defeat of Mr. Bryan. No doubt, when sufficient time has passed to allow for an increase in the railway traffics and a general improvement in business, people will take a more reasonable view and investment will take place once more, but just now there certainly is no inclination to buy. In almost every department the same thing is to be observed. One exception has been presented by the Argentine market, which has been very strong. The latest news from Argentina, however, is unfavorable. It is stated that the harvest which is just now being gathered in is turning out much worse than had been anticipated, and that there will be very little wheat for export and still less maize. Upon the Continental bourses prices are well maintained, but there is little doing, and the South African department is neglected everywhere.

The dividends of English railway companies are now being declared. The two earliest of them have given much disappointment. The weekly traffic returns showed large increases, and it was hoped that there would be a marked augmentation in the dividends. It now turns out that the working expenses were heavier than any one expected, and the dividends in consequence are actually lower than those of 12 months ago. The Brighton was only 8 per cent against 8½, and the Sheffield only 1½ against 1¾. Since then, however,

the Great Eastern has announced a dividend of 4½ per cent against 4 per cent, and the South Eastern of 6½ per cent against 6 per cent. The fall, therefore, that occurred on the two first announcements has been recovered.

The rates for money have been as follows:

London.	Bank Note	Open Market Rates.						Interest allowed for deposits by

Messrs. Pixley & Abell write as follows under date of January 14:

Gold.—The inquiry continues without showing any signs of falling off. The bank has received £128,000 in sovereigns from the East. Arrivals: Brazil, £2,000; Capetown, £135,000; Australia, £162,000; China, £1,040; Bombay, £61,000; New Zealand, £140; Chili, £2,000; total, £444,000. Shipments: Bombay, £10,000; Japan, £20,000; total, £100,000.

Silver.—The price has remained unaltered since the 7th inst. The supply has been fairly good and business has taken place at both above and below the quoted figure. The price in Bombay to-day is Rs. 79. Arrivals: New York, £14,000; Brazil, £40,000; Chili, £16,000; total, £250,000. Shipments: To Bombay, £15,000. Mexican dollars.—These coins have slightly fallen in price but are still in good demand. Arrivals from New York, £20,000.

The quotations for bullion are reported as follows:

#### Commercial and Miscellaneous News.

NATIONAL BANKS.—The following information regarding national banks is from the Treasury Department:

##### INSOLVENT.

2,843—The Dakota National Bank of Sioux Falls, South Dakota, was on Jan. 20, 1897, placed in the hands of C. F. Zimmermann, receiver.

5,276—The First National Bank of Newport, Kentucky, was on Jan. 21, 1897, placed in the hands of George P. Wilsbire, receiver.

2,062—The German National Bank of Louisville, Kentucky, was on Jan. 22, 1897, placed in the hands of Robert H. Courtney, receiver.

IMPORTS AND EXPORTS FOR THE WEEK.—The following are the imports at New York for the week ending for dry goods Jan. 21 and for the week ending for general merchandise Jan. 23; also totals since the beginning of the first week in January.

##### FOREIGN IMPORTS AT NEW YORK.

For week.	1897.	1896.	1895.	1894.
Dry goods .....	\$2,463,479	\$3,911,517	\$2,990,966	\$1,700,978
Gen'l mer'dise .....	4,914,070	7,233,917	7,407,121	5,230,414
Total .....	\$7,377,549	\$11,145,434	\$10,398,087	\$6,931,392
Since Jan. 1.				
Dry goods .....	\$7,150,667	\$10,126,576	\$10,953,489	\$5,895,153
Gen'l mer'dise .....	20,834,805	21,286,993	20,985,505	17,583,175
Total 3 weeks .....	\$27,985,472	\$31,413,569	\$31,938,974	\$23,478,328

The following is a statement of the exports (exclusive of specie) from the port of New York to foreign ports for the week ending Jan. 25 and from January 1 to date:

##### EXPORTS FROM NEW YORK FOR THE WEEK.

	1897.	1896.	1895.	1894.
For the week .....	\$7,781,614	\$7,049,948	\$4,931,536	\$6,087,087
Prev. reported .....	17,834,853	17,614,809	17,403,207	15,189,536
Total 3 weeks .....	\$25,616,467	\$25,264,757	\$22,334,743	\$21,276,623

The following table shows the exports and imports of specie at the port of New York for the week ending Jan. 23 and since January 1, 1897, and for the corresponding periods in 1896 and 1895:

##### EXPORTS AND IMPORTS OF SPECIE AT NEW YORK.

Gold.	Exports.		Imports.	
	Week.	Since Jan. 1.	Week.	Since Jan. 1.
Great Britain .....				\$502
France .....				10
Germany .....				10
West Indies .....	\$17,000	\$115,000	\$5,205	128,165
Mexico .....				181
South America .....	9,100	10,300	32,396	50,905
All other countries .....				3,938
Total 1897 .....	\$26,100	\$125,300	\$37,782	\$181,520
Total 1896 .....	2,537,599	10,013,136	488,937	5,379,417
Total 1895 .....	7,322,000	19,241,136	119,400	351,236
Silver.	Exports.		Imports.	
	Week.	Since Jan. 1.	Week.	Since Jan. 1.
Great Britain .....	\$617,800	\$1,951,344	\$275	\$320
France .....	202,000	368,000		
Germany .....				
West Indies .....	530	530	14,768	19,626
Mexico .....				17,126
South America .....				67,527
All other countries .....				72,501
Total 1897 .....	\$830,330	\$2,317,874	\$89,694	\$176,783
Total 1896 .....	1,102,050	3,292,616	62,503	141,725
Total 1895 .....	744,454	2,301,642	6,122	105,500

Of the above imports for the week in 1897 \$3,375 were American gold coin and \$948 American silver coin. Of the exports during the same time \$26,400 were American gold coin.

WALL STREET, FRIDAY, JAN. 29, 1897 - 5 P. M.

**The Money Market and Financial Situation.**—Transactions of the week in Wall Street are confined largely to the purchase of high-grade bonds for investment and the speculative manipulation of stocks. The latter movement has been facilitated by results growing out of the unfortunate conditions which have prevailed for some time past in the bituminous coal trade. Recent efforts to improve these conditions are reported to have been in some degree successful, however, and an improvement is now looked for.

The foreign exchange market is regarded with interest. It has hardened as the week advanced, presumably as the result of a firmer money market in London and the more limited offerings of bills which have been held here by investors for sixty days or more.

A matter of great importance to all financial interests is brought into prominence by the announcement that the President elect has offered the Treasury portfolio to a prominent Western banker, and that the same has been accepted. The fact that the probable future Secretary of the Treasury is not a politician but a financier of long experience and marked ability is regarded favorably in all financial circles.

The money market continues to grow easier. Comment is made in some quarters that there is a lack of capital for the development of new enterprises, which, if true, is not surprising in view of the history of that class of investments made during recent years. Surely there is an abundance of capital available for all legitimate purposes.

The open market rates for call loans during the week on stock and bond collaterals have ranged from 1½ to 2 per cent. To-day's rates on call were 1½ to 2 per cent. Prime commercial paper is quoted at 8 to 3½ per cent.

The Bank of England weekly statement on Thursday showed an increase in bullion of £694,614, and the percentage of reserve to liabilities was 52.39, against 52.15 last week; the discount rate remains unchanged at 3½ per cent. The Bank of France shows an increase of 1,850,000 francs in gold and 925,000 francs in silver.

The New York City Clearing-House banks in their statement of Jan. 23 showed an increase in the reserve held of \$6,418,600 and a surplus over the required reserve of \$57,067,800, against \$52,172,525 the previous week.

	1897. Jan. 23.	Difference from Prev. week.	1896 Jan. 25.	1895. Jan. 26.
Capital	\$ 59,772,700		\$ 61,122,700	\$ 61,622,700

Surplus reserve	57,067,800	Inc. 4,895,275	37,678,500	45,880,450

**Foreign Exchange.**—The foreign exchange market, which was easy with lower rates during the early part of the week, has hardened towards the close on a more limited supply of bills. The offerings of hypothecated exchange have decreased in volume.

To-day's actual rates of exchange were as follows: Bankers sixty days' sterling, 4 84½ @ 85; demand, 4 86½ @ 87; cables, 4 87½ @ 87½.

The following were the rates of domestic exchange on New York at the under-mentioned cities to-day: Savannah, buying 1-16 discount, selling par; Charleston, buying 1-16 discount, selling 1-16 premium; New Orleans, bank, \$1 00 premium;

commercial, 25c. per \$1,000 discount; Chicago, 40c. per \$1,000 discount; St. Louis, 25c. @ 50c. per \$1,000 discount to par.

Posted rates of leading bankers follow:

	January 29.	Sixty Days.	Demand.
Prime bankers' sterling bills on London	1 85½ @ 86	4 88	4 88½
Prime commercial	4 84½ @ 84½

**United States Bonds.**—Government bonds have been in demand and the 4s coup., 1925, have steadily advanced to the highest quotations ever made for them except once, viz., July 10, 1895. Sales at the Board include \$633,000 4s, coup., 1925, at 123½ to 124; \$2,000 4s, reg., 1925, at 122½; \$18,000 4s, coup., 1907, at 112½ to 112¾, and \$10,000 5s, reg., at 113¾. The following are the closing quotations:

	Interest Periods	Jan. 23.	Jan. 25.	Jan. 26.	Jan. 27.	Jan. 28.	Jan. 29.
4s, 1907	reg.	Q-Mch. 96	96	96	96	96	96
4s, 1907	reg.	Q-Jan. 111½	111½	111½	111½	111½	111½

\* This is the price bid at the morning board, no sale was made.

**United States Sub-Treasury.**—The following table shows the daily receipts and payments at the Sub-Treasury during the week.

Date.	Receipts.	Payments.	Balances.		
			Coin.	Coin Cert's.	Currency.
Jan. 23	\$ 3,015,620	\$ 3,317,662	122,746,110	1,318,771	49,994,384
" 25	5,862,345	2,769,982	122,814,112	1,472,423	52,685,083
" 26	2,562,452	2,871,059	122,492,802	1,604,471	52,545,748
" 27	2,681,683	2,833,098	122,102,209	1,631,937	52,349,550
" 28	4,104,942	2,854,780	122,567,149	1,851,061	53,258,559
" 29	4,299,505	3,097,948	122,768,141	1,519,332	55,056,054
Total	22,726,647	17,744,429			

**Coins.**—Following are the current quotations in gold for coins:

Sovereigns	84 86	84 89	Fine silver bars	— 64½ @ — 65½
Napoleons	3 85	3 88	Five francs	— 93 @ — 95½
X & Reichmarks	4 74	4 78	Mexican dollars	— 50½ @ — 51½
25 Pesetas	4 77	4 81	Do uncomm'ial	— @ —
Spain. Doubloons	15 55	15 75	Peruvian soles	— 45½ @ — 47½
Mex. Doubloons	15 50	15 75	English silver	— 48 @ — 48½
Fine gold bars	par	2½ prem.	U. S. trade dollars	— 65 @ — 75

**State and Railroad Bonds.**—Sales of State bonds at the Board are limited to \$53,000 Virginia fund. debt 2-3s of 1901 at 62 to 62½ and \$5,000 Virginia 6s deferred trust receipts, stamped, at 6.

The demand for railroad bonds continues to be a prominent feature of the market. The Atchison and Northern Pacific issues have been in special request. Sales of these bonds aggregate a large amount; the Atchison adjustment 4s have advanced 3½ per cent and Northern Pacific con. 5s 2 per cent under the movement. Hooking Valley 5s were pressed for sale and declined to 68 on Wednesday, a loss of over 20 points since Jan. 1. These bonds rallied sharply on Thursday and to-day, closing at 76. Ore. S. L. & Utah No. con. 5s have advanced 3½ per cent, and San Ant. & A. Pass. 4s 1½ per cent within the week. The active list includes also Ches. & Ohio, Burlington & Quincy, Rock Island, Kansas Pacific, Mil. & St. Paul, Mo. Kan. & Texas, Ore. Ry. & Nav., Ore. Short Line, Reading, St. Louis & S. F., Southern Ry., Union Pacific and Wabash bonds.

**Railroad and Miscellaneous Stocks.**—The stock market has been dull, and, with the exception of the coal stocks, fluctuations have been narrow and unimportant. The bituminous coal shares continued weak under the lead of Hooking Valley, which sold on Wednesday at 7, a decline of 10 points within eight days. The securities of this company rallied sharply on Thursday, owing to the removal of pressure to sell, and the progress that is being made towards a settlement of the soft-coal difficulties. Strong efforts to depress the anthracite shares in sympathy with the bituminous stocks proved only partially successful, and there has been some reaction from the lowest prices made. Manhattan Elevated was a weak feature under persistent hammering by the bear element, and closes with a loss of 2½ points. Long Island has recovered 5¼ points of its recent decline. The grangers have been relatively strong, except Burlington & Quincy, which declined 1½ points, but has recovered a part of the loss.

Changes in the miscellaneous list are generally unimportant. American Tobacco declined 2½ points on the commencement of legal proceedings against officers of the company for maintaining a trust. Consolidated Gas rallied on rumors that no legislative action adverse to the interests of the company is likely to occur. Fluctuations in American Sugar have been narrow and the stock closed with a net fractional loss.

## NEW YORK STOCK EXCHANGE—ACTIVE STOCKS for week ending JAN. 29, and since JAN. 1, 1897.

# Investment AND Railroad Intelligence.

## RAILROAD EARNINGS.

The following table shows the gross earnings of every STEAM railroad from which regular weekly or monthly returns can be obtained. The first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the period from January 1 to and including such latest week or month.

The returns of the street railways are brought together separately on a subsequent page.

ROADS.	Week or Mo.	Latest Gross Earnings.		Jan. 1 to Latest Date.

\* Figures given do not include Oregon Ry. & Nav., Un. Pac. Denver & Gulf, Denver Leadville & Gunnison, Montana Union and Leavenworth Topoka & South western. † These figures include results on leased lines.

‡ Includes earnings from ferries, etc., not given separately. † Mexican currency. ‡ Includes only half of lines in which Union Pacific has a half interest.

‡ Includes operations of the Ohio, Burlington & Northern in both years.

§ Covers results for lines directly operated east of Pittsburgh.

‡ Includes results on affiliated lines.

‡ Covers besides the Atlantic System the Hodoton & Texas Central, Austin & Northwestern, Central Texas & Northwestern and Ft. Worth & New Orleans.

† Includes St. Louis Alton & Terre Haute for all periods.

**Latest Gross Earnings by Weeks.**—The latest weekly earnings in the foregoing are separately summed up as follows:

For the third week of January our preliminary statement covers 61 roads, and shows 5.08 per cent decrease in the aggregate over the same week last year.

Miscel. income not includ'g land sales..	45,802	100,828
<b>Total net income.....</b>	<b>\$592,820</b>	<b>\$3,467,127</b>

The operating expenses from Sept. 1, 1896, include a proportionate part of the estimated taxes and rail and tie renewals for the current fiscal year of the new company, being ten months to July 1, 1897.

#### STREET RAILWAYS AND TRACTION COMPANIES.

The following table shows the gross earnings for the latest period of all STREET railways from which we are able to obtain weekly or monthly returns. The arrangement of the table is the same as that for the steam roads—that is, the first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the calendar year from January 1 to and including such latest week or month.

\* Figures were exceptional in 1895 on account of Atlanta Exposition.

† Large business in Dec., 1895, due to boycott on competing lines.

‡ Decrease in earnings due to factories being shut down.

**Street Railway Net Earnings.**—The following table gives the returns of STREET railway gross and net earnings received this week. In reporting these net earnings for the street railways, we adopt the same plan as that for the steam roads—that is, we print each week all the returns received that week, but once a month (on the third or the fourth Saturday) we bring together all the roads furnishing returns, and the latest statement of this kind will be found in the CHRONICLE of January 28, 1897. The next will appear in the issue of February 20, 1897.

### Columbus Street Railway.

(Report for the fiscal year ending Dec. 31, 1896.)

President Emerson McMillin in the report says:

**General Remarks.**—During the summer an amusement ground known as Olentangy Park was opened to the public. Notwithstanding the business depression and unfavorable weather, the revenue derived from this source aided materially in placing our balance on the right side at the close of the year. All cars have been furnished with fenders or life guards, and the equipment is in good condition. The low cost of operation, the harmonious and kindly relations between the management and employees, and the satisfactory service rendered the public, are gratifying evidences of careful management.

**Construction and Equipment.**—During the year 1896 the expenditures charged to construction and betterment account amounted to \$43,629 and the expenditures on equipment, not charged to operating expenses, amounted to \$32,097.

**Car equipment.**—One hundred and twenty motor trucks, equipped with General Electric Company 8, R. G. and G. E. 80 motor, 50 open motor cars, 28, 31 and 36 feet over all; 103 closed cars, Brill, Brownell, Stephenson and Harney & Smith manufacture, 16, 18, 20, 22 and 24 feet inside; four electric sweepers, sand cars, etc.

**Statistics.**—The reports of the company show:

	1896.	1895.	1894.
Total passengers carried.....	13,910,455	13,441,869	12,676,018
Car miles run.....	3,860,540	3,592,333	3,225,746
Earnings per car mile.....	16.2 cents.	17.4 cents.	17.4 cents.
Expenses per car mile.....	8 cents.	8.7 cents.	8.4 cents.
Rate of operating expenses.....	49.2%	49.7%	47.8%

**Per car per mile—**

**American Soda Fountain.**—No Dividend in February 1897.—The company it is stated has decided not to pay a dividend this February on its common and first and second preferred stocks. Heretofore the first preferred (\$1,250,000) has received 6 per cent yearly in quarterly instalments and the second preferred (also \$1,250,000) has received 8 per cent. The common stock of \$1,250,000 received 10 per cent yearly to and including February, 1896, since which time the quarterly dividend has been 1½ per cent.—V. 62, p. 275.

**Atchison Topeka & Santa Fe Ry.**—Atlantic & Pacific RR.—Value of Bonds.—The securities which the Atchison Topeka & Santa Fe Ry. Co. has agreed to give in return for the A. & P. Western Division bonds in accordance with the recent settlement (see last week's CHRONICLE) ensures to the holder of each guarantee trust 4 per cent \$1,000 bond deposited with the committee at least \$447 in Atchison general mortgage 4s and \$489 50 in Atchison preferred stock. Of the total issue of guaranteed trust 4s (\$18,794,000) about 97½ per cent had at last accounts been deposited. If any of the bonds do not assent, their share in the Atchison securities will remain for distribution among the deposited bonds, causing a slight increase in the amounts above stated. In addition, the deposited bonds will receive whatever can be realized from the sale of the Central Division. The decree value of an undeposited guarantee trust bond is \$99 12.

**American Bondholders.**—The bonds deposited under the agreement of July 12, 1894, on Thursday voted to accept the proposition whereby the Atchison will purchase the Western Division. The action was merely formal, since the assent of the foreign holdings had settled the matter. Of the total issue of \$18,794,000, \$18,330,000 have been deposited under the agreement, and of these last \$16,271,000 voted in favor of the proposition, the holdings of one of the foreign committees being voted by the State Trust Co. and that of the other by Probst, Weitzel & Co. A protest by William Strauss on behalf of the income bondholders' committee was presented, expressing their dissent to the sale, but was not further considered. The new Atchison securities to be distributed under this arrangement among the holders of certificates of deposit for A. & P. Guarantee Trust 4s are being signed and will be issued at once.—V. 64, p. 179.

**Atlanta & Charlotte Air Line—Southern Ry.**—Extension of Maturing Bonds.—An agreement has been made with Wilson, Colston & Co., of Baltimore, for the extension of the \$500,000 Atlanta & Charlotte first preference 7 per cent bonds, due April 1 next. The extended bonds will bear 4 per cent interest and mature Jan. 1, 1907. The Mercantile Trust & Deposit Co., of Baltimore, will purchase at par any new bonds not exchanged at time of issue.—V. 62, p. 363; V. 63, p. 1011.

**Atlantic Coast Line.**—Proposed Consolidation of South Carolina Lines.—A bill is before the South Carolina Legislature to authorize the consolidation of the lines in South Carolina that belong to the Atlantic Coast Line system into one company. A legislative charter is desired in order that preferred stock may be issued. The Cheraw & Durlington and Manchester & Augusta are two of the companies which will be brought into the new corporation.—V. 61, p. 1063.

**Baltimore & Ohio RR.—Pittsburg & Connellsville RR.**—Extended Bonds Listed.—On the New York Stock Exchange have been listed \$2,536,000 Pittsburg & Connellsville first mortgage 4s, the portion of the original issue of \$4,000,000 seven per cent bonds that has been extended at 4 per cent till July 1, 1946, per agreement in V. 62, p. 1173. The extended bonds are payable, principal and interest, "in United States gold coin of the present standard of weight and fineness" and "without deduction from such principal or interest for any tax or taxes now or hereafter imposed thereon by the laws of the United States, or any State thereof, which the Pittsburg Company may be required by any such law to retain or deduct therefrom." The remainder of the loan will be similarly extended at or before maturity.

**Coupon Payment Feb. 1.**—The receivers state that the interest due Feb. 1 will be paid at maturity, namely the coupons on the consol 5s of 1887 and the gold 5s of 1885 (Pittsburg & Connellsville consols as collateral.)

**Car Trust Loan Extended.**—The Court has authorized the extension for three years at 5 per cent of the balance of \$250,000 due on the car trust loan of 1887. Locomotives and cars worth \$1,259,824 are pledged as security for the loan.

**Disbursement of Proceeds of Receivers' Certificates.**—Special Master Dunham has found correct the reports made by the receivers of the disbursement of the proceeds derived from the sale of the \$5,000,000 receivers' certificates authorized May 21, 1896. The disbursements in November amounted to \$245,474, of which \$98,949 was on account of claims, \$2,063 for new steel rails, \$3,836 for Little Seneca viaduct and \$140,620 for extraordinary repairs to equipment. The balance of the fund Nov. 30 was \$607,475.

**Statement as to 5 Per Cent Gold Bonds, Due 1925.**—Speyer & Co. and Speyer Brothers, as depositaries for the gold bonds of 1885, due 1925 (Pittsburg & Connellsville bonds as collateral), make through our advertising columns an interesting statement as to the present status of this loan and their efforts to protect it. Additional deposits are requested. The statement says in part:

There have been deposited with us, under the agreement dated April 10, 1896, a majority of the B. & O. bonds due Feb. 1, 1925. The certificates of deposit of the Union Trust Co. have been listed by the New York Stock Exchange. Our certificates for bonds deposited in London have been listed by the London Stock Exchange.

On July 1, 1896, with our co-operation, the receivers arranged for an extension of the \$4,000,000 Pittsburg & Connellsville first mortgage bonds, due July 1, 1898, which are a prior lien to the bonds of said company deposited to secure the loan of 1885 bonds. This extension will eventually effect a saving in interest charges to the amount of \$120,000 per annum.

We have had the property of the Pittsburg & Connellsville examined by Mr. William G. Reel, a well-known railroad president. His report shows that the railroad is of great value—if not indispensable—to the Baltimore & Ohio system, and that the earning capacity of this division would be enhanced by the completion of suggested improvements, including increased facilities at Pittsburg.

The receivers petitioned for leave to borrow \$650,000 for additional terminals at Pittsburg and Connellsville and for making other improvements. The Court authorized the issue of \$650,000 receivers' certificates, which are made the primary obligation of the receivers of the B. & O. and a charge upon its whole interest in the Pittsburg & Connellsville and only secondarily a charge upon the latter's property. This secondary charge, if enforced, will also rank ahead of the \$1,273,800 6 per cent consols of the Pittsburg & Connellsville.

Upon the hearing we were represented by our counsel, Messrs. Everts, Choate & Beaman and Seward, Guthrie & Steele, and we approved of the issue of these receivers' certificates, as the expenditure would be, in our judgment, advantageous to the bondholders.

The coupon due August 1, 1896, was promptly paid, and the receivers inform us that they expect also to pay promptly the coupon due February 1, 1897.

It is in the best interest of the bondholders that we shall continue to act for them until a reorganization of the Baltimore & Ohio R.R. Co. has been completed and the receivership terminated. Bondholders who have not yet deposited their bonds under above agreement should do so without delay.—V. 61, p. 180.

**Brooklyn Rapid Transit.—Brooklyn City R.R.—Bonds Due Feb. 1.**—The New Williamsburg & Flatbush 7 per cent bonds (\$200,000), maturing Feb. 1, will be purchased at par and accrued interest at maturity at the office of the Long Island Loan & Trust Co. or at the First National Bank of Brooklyn. Holders may have their bonds extended at 4½ per cent, to mature in 1941, if they so desire.—V. 64, p. 41, 80.

**Buffalo Rochester & Pittsburg R.R.—Quarterly.—Earnings for the quarter and the six months ending December 31:**

3 mos. end. Dec. 31.	Gross earnings.	Net earnings.	Other income.	Interest, taxes, etc.	Balance, surplus.
1896.....	\$839,588	\$294,294	\$1,041	\$216,915	\$90,418
1895.....	791,097	203,863	11,709	212,654	2,718
6 mos.					
1896.....	\$1,740,933	\$584,226	\$25,049	\$433,250	\$176,025
1895.....	1,617,894	479,791	19,141	429,009	69,923

—V. 63, p. 838.

**Central National Bank, New York.—Listing of New Certificates.**—The capital stock having been reduced from \$2,000,000 to \$1,000,000, the new certificates have been listed in place of the old certificates.—V. 63, p. 1114.

**Central Pacific R.R.—Status of Debt to Government.**—The Attorney-General, in making his statement regarding the Union Pacific, says: "The course to be pursued with respect to the Central Pacific has not yet been determined."

General Thomas H. Hubbard, counsel for C. P. Huntington, President of the Central Pacific, is quoted as saying:

"Nothing is being done by Mr. Huntington or the Central Pacific R.R. in connection with the debt of the road to the Government, for the simple reason that the Central Pacific is not in default to the Government. In accordance with the act of 1862, under which the Government bonds were issued, the railroad company was not to be responsible for interest as it fell due. Therefore the company will not be in default until the principal, upon which the interest has been paid by the Government, but which has not been provided by the company, has matured. The credit items for Government transportation and other sums paid by the railroad, now in the sinking fund, amount to \$15,507,055. The interest on that part of the original debt which has matured to date, with the principal added, amounts to a trifle over \$14,000,000. The dates of maturity of the principal [including the Western Pacific lien, due \$320,000 Jan. 1, 1897, and \$1,650,000 Jan. 1, 1899.—Eds.] are as follows: Jan. 1, 1895, \$2,332,000; Jan. 1, 1896, \$1,640,000; Jan. 1, 1897, \$3,432,000; Jan. 1, 1898, \$10,614,120; Jan. 1, 1899, \$10,847,560; total matured and unmatured, \$27,835,680. The interest which the Government had paid to Dec. 31, 1896, amounted to \$46,593,478."—V. 64, p. 136.

**Chesapeake Ohio & Southwestern R.R.—Illinois Central R.R.—Payment of Paducah & Elizabethtown Bonds on Feb.**

1.—The first mortgage bonds of the Paducah & Elizabethtown R.R. Co., secured by mortgage of Feb. 1, 1877, will be paid by the Illinois Central R.R. at par and accrued interest to their maturity Feb. 1, 1897, upon their presentation at No. 214 Broadway, New York.—V. 63, p. 227, 1064.

**Chicago Great Western Ry.—Meeting in London.**—At a meeting of the security holders in London Jan. 13 the Right Hon. W. Lidderdale, who presided, said in part:

The accounts for the six months to the 31st ult.—the last month estimated—do not on their face present as favorable an appearance as those for the same period in 1895, the surplus beyond debenture interest being only \$10,619, against, in 1895, \$94,043; but, looking at the great reduction of business caused all through the United States by the Presidential election and at the extra outlay forced on the company by severe storms, the statement is decidedly encouraging.

The surplus, after paying debenture interest for 1895-96, was \$161,993. To this must be added about \$10,000 for the past six months. Had this stood alone, it would have been difficult to resist the claims of holders of "A" stock to an immediate dividend, but as in 1894-95 there was a deficit of more than double the amount, there is clearly no case yet for distribution. The deficit is now about \$198,000, which should be considerably further reduced by June 30 next. A charge is made monthly to operating expenses, which, before long, should effect a steady reduction in the balances at debit.

We began the year 1897 with the railroad in improved condition, and with the certainty of a still greater improvement being effected before the next harvest. The financial position of the company, although still far from what we hope to see it, is also very much improved. The line has secured a very considerable amount of public support, and there are distinct signs of increase in its local traffic.

We have no proposals to make for raising fresh money, but we must warn you that the more general business improves, the more certainly will you be called on for consent to further demands on capital account if we are to continue to get our full share of traffic.—V. 63, p. 968.

**Chicago Milwaukee & St. Paul Ry.—Iowa & Minnesota 7s.**—The Iowa & Minnesota division 7 per cent bonds which mature on July 1 may be exchanged for preferred stock of the company at any time within ten days after the April dividend on the preferred stock shall be payable. After the expiration of this period no further conversions will be possible, and the holder must accept par and interest for his bond at maturity. It will be remembered that a few years ago the holders of maturing convertible bonds to a large amount let the conversion period pass and so suffered loss.—V. 63, p. 461.

**Chicago St. Paul Minneapolis & Omaha Ry.—First Dividend (2 per cent) on Common Stock.**—The Executive Committee of directors on Thursday declared a dividend of 2 per cent for the year 1896 on the common stock, and also the usual 3½ per cent on the preferred, both payable Feb. 20. This is the first dividend the common stock has received. As the Chicago & North Western owns \$9,326,000 common, the 2 per cent dividend will bring it \$186,400. The advance statement for the late fiscal year is given under the heading "Annual Reports."—V. 63, p. 1114.

**Cleveland Cincinnati Chicago & St. Louis Ry.—Payment of Maturing Bonds.**—The bonds of the Indianapolis Cincinnati & Lafayette R.R. Co. maturing Feb. 1, 1897, will be paid on presentation on and after that date at the office of Messrs. J. P. Morgan & Co., New York.—V. 63, p. 561.

**Columbus & Cincinnati Midland R.R.—Notice to Bondholders.**—Holders of the 4½ per cent bonds are notified by Owen Daly & Co. and Middendorf, Oliver & Co., of Baltimore, that they will furnish any information in reference to the status of said bonds, with a view of taking whatever steps may be deemed necessary for the protection of their interests.—V. 64, p. 180.

**Columbus Sandusky & Hocking R.R.—Receivers Discharged.—Damage Suit.**—Judge Slough, at Lancaster, on Jan. 26, granted the application of the directors of the company to take the property from the hands of the receiver appointed by Judge Wright at Logan last week. At Columbus, O., on Jan. 27, Judge Badger, of the Franklin County Common Pleas Court, allowed a temporary restraining order prohibiting any further effort to secure the appointment of a receiver without notice to the company. At the same time counsel for the road filed a damage suit for \$200,000 against D. L. Sleeper, E. M. Poston, George W. Saul, Morris W. Donahue and Herbert Butler for having secured the appointment of the receiver through proceedings alleged to be false and malicious.—V. 64, p. 134.

**Duluth Gas & Water Co.—Majority of Bonds Controlled.**—The bondholders' committee in London, has now secured a majority of the first consols. After Jan. 31, all additional deposits will be subject to penalty.—V. 63, p. 1115.

**Edison Electric Illuminating Co. of Brooklyn.—New Securities Listed.**—On the New York Stock Exchange have been listed additional stock, \$250,000, making total amount listed \$4,000,000, and additional issue of first mortgage 5 per cent gold bonds, \$250,000, making total amount listed \$1,250,000. The purpose of the new issues was stated in the CHRONICLE, of Jan. 16.—V. 61, p. 134.

**Fall Brook Railway.—Quarterly.—Earnings for the quarter and the six months ending December 31 have been reported as follows:**

3 mos. end. Dec. 31.	Gross earnings.	Net earnings.	Other income.	Interest, taxes, etc.	Balance, surplus.
1896.....	\$186,182	\$94,136	\$78,853	\$10,075	\$166,714
1895.....	211,007	129,574	93,957	11,521	212,010
6 mos.					
1896.....	\$357,829	\$190,081	\$152,873	\$14,580	\$329,354
1895.....	394,133	219,871	160,019	19,069	360,821

—V. 63, p. 794.

**Pittsburg RR.—Refunding Bonds Sold.**—The company has sold \$2,750,000 of 4 per cent 30-year bonds to Lee, Higginson & Co. of Boston. These bonds were authorized by stockholders Sept. 30, 1896, to provide for the payment of \$500,000 of 6s due Oct. 1, 1897, and \$2,250,000 of 4½s due Sept. 1, 1897.—V. 63, p. 833.

**Little Rock & Memphis RR.—Memphis Little Rock & Pacific RR.—New Company.**—The Memphis Little Rock & Pacific RR. has been incorporated by H. L. Brinkley, D. T. Porter, W. B. Mallory, John Overton, Jr., T. B. Turley and Celton Greene, of Shelby County. The charter authorizes the operating of a line of railroad from Memphis via Little Rock, Ark., to a connection with the Choctaw Oklahoma & Gulf RR., at or near Wister, in the Indian Territory. The Little Rock & Memphis road is to be sold in foreclosure March 17, and it is therefore supposed that the new company is being organized to carry out the plan of the reorganizers for an extension to a junction with the Choctaw road. Col. Brinkley's father, it is stated, was the main promoter of the Little Rock & Memphis.—V. 63, p. 880.

**Long Island RR.—Purchase Completed.—Official Statement.**—The United States Mortgage & Trust Company has completed the purchase of the Corbin Stock for the account of the syndicate. This stock, added to that now owned by C. M. Pratt, a member of the syndicate, is a controlling interest. Mr. Stephen Little's report on the finances of the company and Mr. H. H. Vreeland's report of the physical condition of the property were of such a character that the syndicate immediately closed the transaction, and the actual transfer was made yesterday afternoon. Mr. Little's examination covers a period from June 30th, 1888, to August 31, 1896. He commends heartily Mr. Baldwin's methods of readjusting the accounts and adds substantially the following:

Generally speaking, all that has been permitted to remain in capital account during these years has been limited to expenditures for the double-tracking of the road, permanent fixtures and improvements at terminals, the acquisition of additional land to a large amount, the block system and like permanent improvements. Nevertheless the road has within the same period been in great measure reconstructed, and the cost thereof charged to income as previously explained. With these reductions made I find that the conclusions reached by Mr. Farrington in his report as to the net earnings of the company for the past eight years are substantially correct, and that the railroad hereafter, with only the average gross earnings of these past years, will be more than self supporting.

Over a million of dollars has been expended in new equipment during the past eight years, which, together with the other equipment of the road, I am informed by Mr. Vreeland, is in good serviceable condition. The road has substantially been rebuilt during this period, and its physical condition is such as to need, according to Mr. Vreeland, no extraordinary expenditures for a term of years, and the facilities now existing are capable of accommodating a large increase in business without a corresponding outlay in expenditures. Anything by way of improved or additional terminal facilities or natural increase of travel, which will add to the gross returns of the railroad company, should, therefore, add substantially to its net returns under intelligent management. Some statements regarding the plans of the syndicate were in V. 64, p. 180.

**Louisville & Nashville RR.—Charleston & Augusta RR.—South Carolina Extension.**—The South Carolina Legislature has amended the charter of the Charleston & Augusta RR., extending the time within which its road may be built. The amendment was passed at the instance of the Louisville & Nashville, which desires to retain its right to build an extension from its leased line, the Georgia RR., at Augusta to tidewater at Charleston. The projected line has been surveyed and partly graded.—V. 64, p. 131.

**Louisville New Albany & Chicago Ry.—Foreclosure Sale March 10.**—The foreclosure sale has been ordered for March 10 at Louisville, Ky., the upset price being fixed at \$2,500,000 for the road and \$500,000 for the equipment. The consolidated mortgage, general mortgage and equipment mortgage are all being foreclosed. St. John Wyle, of Louisville, representing Richmond, Nicholasville, Irvine & Bentville bondholders, was given leave by the Court to file an intervening petition relating the facts as to the guaranteeing of their bonds by the L. N. A. & Chicago.

**Coupon Payment.**—Coupons due Feb. 1 on the Chicago & Indianapolis Division bonds will be paid at maturity at the Chase National Bank.—V. 64, p. 124.

**Maine Central RR.—Bill to Authorize New Stock.**—A bill is before the Maine Legislature to authorize this company to increase its capital stock in order to make extensive improvements. It is proposed to double track the road from Webster to Brunswick, over 100 miles, making a double track from Portland to Oldtown.—V. 63, p. 652.

**Metropolitan West Side Elevated RR. (Chicago)—Bondholders' Committee—Reorganization Plan.**—Frederic P. Olcott of the Central Trust Company, Walter G. Oakman and Samuel Thorne have consented to act as a committee for the protection of the first mortgage 5 per cent bonds and capital stock, and have prepared a plan of reorganization, copies of which may be obtained at the office of the Central Trust

Company on Tuesday, February 24. The holders of the bonds and stock are requested to deposit their securities with the Central Trust Company, No. 51 Wall Street. Negotiable certificates of that company will be issued.—V. 64, p. 181.

**New York Brooklyn & Manhattan Beach Ry.—Refunding Bonds Listed.**—On the New York Stock Exchange have been listed the \$500,000 first consol 5s which were issued to refund a like amount of 7 per cent bonds of the New York & Manhattan Beach RR. maturing Jan. 1. The new consols were sold to Redmond Kerr & Co., as already stated in this column.—V. 63, p. 1116.

**New York & Canada RR.—Delaware & Hudson Canal.—The Guaranteed Debentures.**—As to the guaranteed debentures mentioned last week, President Olyphant, of the Delaware & Hudson, says:

The New York & Canada bonds were not issued to capitalize any part of income, or profit and loss account. They were issued to represent new money actually expended on the capital account of New York & Canada by Delaware & Hudson and most of the expenditures were made many years ago. We did not make the issue until the amount reached \$1,000,000. We might have sold these bonds had we thought best at any time during the past five years with exactly the same authority and legality as now.

The balance of \$3,774,865 referred to in our previous issue as remaining to the credit of the D. & H. on account of the New York & Canada represents the D. & H. company's original investment in the stock of the road. The advances now capitalized, on the other hand, were for permanent improvements made from time to time in the way of construction. The losses to the D. & H. under the lease, when any have occurred, have been charged off by the D. & H. and have not been carried as an asset. Some further remarks on this matter are in our editorial columns.—V. 64, p. 131.

**New York & Queens County Ry.—Quarterly.**—This company is a consolidation of the street railways of Long Island City, etc., and was incorporated June 26, 1896. Earnings for the quarters ending September 30 and December 31 have been reported as follows:

	1896,	Gross	Net	Other	Interest,	Balance,
	3 mos. ending	earnings.	earnings.	income.	taxes, etc.	sur. or def.
Sept. 30.....	\$134,907	\$52,709	\$12,163	54,242	sur. \$10,633	
Dec 31.....	83,168	19,057	5,660	54,464	def. 29,747	
Total 6 mos.....	\$220,165	\$71,766	\$17,828	\$108,706	def. \$19,114	

—V. 63, p. 880.

**Niagara Falls Power—Cataract Construction—Acetylene Heat, Light & Power—Capacity of Plant to be Increased.**—The following statement from the "New York Times" is pronounced substantially correct:

Preparations are making for an important extension of the Cataract Construction Company's plant at Niagara Falls. At a recent meeting of the directors contracts were approved which will about double the present capacity of the plant, and will necessitate the expenditure of more than \$500,000. An extension of the big power house is to be built, and the directors were authorized to make contracts with the J. P. Morris Company of Philadelphia for five 5,000-horse-power turbines, and with the Westinghouse Electric Manufacturing Co. of Pittsburgh for five 5,000-horse-power dynamos. Both turbines and dynamos are to be identical with those already installed.

An agreement has been signed by which the Acetylene Heat, Light & Power Company becomes the largest consumer of electric power generated by the Cataract Construction Company. The last-named corporation has just contracted to furnish 4,000 additional horse-power to the Acetylene Company in instalments during the year. It is furthermore expected that before the close of 1897 all of the street railway lines in the City of Buffalo will be operated by electric power supplied from Niagara Falls.—V. 63, p. 1114.

**Norfolk & Western RR.—New Securities About Ready.**—The new securities to be issued under the reorganization plan will be ready for delivery in a few days—probably next week.—V. 63, p. 1010.

**North Chicago Street RR.—Sale of Bonds.**—North Chicago City Ry. second mortgage bonds for \$650,000 which were in the treasury have been sold to Vermilye & Co., making the total \$2,500,000 outstanding.—V. 64, p. 176.

**Ohio Coal Roads.—Proposed Agreement as to Rates.**—At the meeting of the Ohio Coal Traffic Association at Columbus Jan. 27 it was decided that an apportionment of percentages of traffic should be made by a committee appointed for that purpose. The committee will meet in New York on Monday, and it is understood that the Columbus Sandusky & Hocking Co., which has stood out for an allowance of 15 per cent as its share of the total traffic, will agree to a compromise for the sake of harmony.—V. 64, p. 181.

**Old Colony RR.—Refunding Bonds.**—The Massachusetts Railroad Commissioners have approved an issue of \$2,200,000 of 4 per cent 30 year bonds to be used for refunding the \$2,000,000 6 per cent bonds due in August, 1897, and the \$200,000 of 4½ per cents due Dec. 1, 1897. These new bonds were included in the \$3,000,000 authorized by the stockholders on Sept. 29 (see V. 63, p. 692). R. L. Day & Co., of Boston, have purchased \$100,000 fours due 1925, \$200,000 of which retires 15-year 5 per cent notes maturing in March, and the balance take up the notes given to take up 6 per cent bonds maturing last September.—V. 64, p. 42.

**Oregon Short Line & Utah Northern Ry.—Oregon Short Line RR.—New Company.**—The Oregon Short Line RR. Co., which will succeed the old Oregon Short Line & Utah Northern, for-closed, will be incorporated at once under the Revised Statutes in Utah, where more than 400 miles of the company's lines are located. Samuel Carr, of Boston, we learn, will be President, and George P. Butler, of New York, Secretary and Treasurer. The new board has been agreed

upon as follows: Oliver Ames, Samuel Carr, Oliver W. Mink, Henry G. Nichols, Boston; Alexander E. Orr, E. Ellery Anderson, Francis S. Bange, New York; Thomas R. Jones, Salt Lake City; Gordon Abbott, Boston; Charles H. Coster, New York; T. Jefferson Coolidge, Jr., Boston; Gardiner M. Lane, Boston; Walter G. Oakman, New York; Nathaniel Chayer, Boston, and Walter E. Glynn, New York. The financial headquarters of the new company will be in Boston. The new company will take over the property in March and the new securities will be issued soon after.—V. 64, p. 181.

**Peoria Decatur & Evansville R.R.—Foreclosure Suit.**—At Springfield, Ill., Jan. 25, Judge Allen, in the United States Circuit Court, heard the application of the Central Trust Company of New York and William A. Hillman, of Evansville, Ind., the mortgage trustees, to foreclose the second mortgage. A press despatch says:

The railroad company alleges that the second mortgage bonds are invalid and that they were issued pursuant to an alleged conspiracy in the interest of D. J. Mackey, President of the road, who held a large amount of 6 per cent income bonds, by which conspiracy these bonds were exchanged for \$2,000,000 of second mortgage bonds, drawing 5 per cent interest, to be paid whether earned or not. The trustees for the second mortgage bondholders claim the stockholders, at a subsequent meeting, ratified the issuance of the second mortgage.

The Court took the matter under advisement.—V. 61, p. 42.

**Philadelphia Reading & New England R.R.—Notice from Fletcher Committee.**—The Fletcher Committee has issued the following notice to the first mortgage bondholders:

The undersigned, who have been acting as a committee in your interest during the past three years, would strongly recommend that no steps be taken at this time for the foreclosure and reorganization of the road. There is no present exigency calling for such reorganization. The road is being economically run in the interest of the bondholders by the receiver, and, at the same time, its physical condition is well maintained. A foreclosure sale in the near future, without previous adoption of a plan of reorganization, might be seriously detrimental to the interests of the bondholders.

Bondholders who desire information are requested to send their names and addresses to the office of counsel for the committee, 501 Drexel Building, Philadelphia. [Signed by Committee.—Eds.]

The statement of the Wilson Committee in opposition to the above policy was in the CHRONICLE of last week.—V. 64, p. 181.

**Portland & Rumford Falls Ry.—New Bonds.**—This company has executed a mortgage for \$1,000,000, bearing date Nov. 2, 1896, running to the Old Colony Trust Co. of Boston, Mass., as trustee, to secure the issue of 4 per cent consolidated first mortgage thirty-year gold bonds for a like amount. This loan will retire all previous issues, viz., \$433,000 first mortgage bonds, due Feb. 1, 1912, but optional after Feb. 1, 1897; \$200,000 second mortgage bonds due Oct. 1, 1912, but optional after Oct. 1, 1897, and \$100,000 5 per cent bonds of 1894, due June 1, 1904, but optional after June 1, 1895. The company has for several years paid regular dividends on its capital stock at the rate of 5 per cent per annum, the same payable quarterly in March, June, September and December. The present amount of capital stock issued and outstanding is \$1,000,000, on which the company expects hereafter to pay quarterly dividends as above, but probably at the rate of 4 per cent per annum, or 1 per cent quarterly.—V. 63, p. 970.

**Reading Company—Payment of Coal and Iron Bonds.**—Bonds of the Philadelphia & Reading Coal & Iron Co. maturing Feb. 1, 1897, secured upon "Munson & Williams" lands, will be paid at maturity at the offices of J. P. Morgan & Co. or of Drexel & Co., Philadelphia. Registered bonds must be properly assigned.—V. 64, p. 183.

**Sandusky (O.) Electric Railway.—Receiver Appointed.**—On Jan. 23 this company was placed in the hands of Clark Rude as receiver for default in the interest upon its bonded debt. The indebtedness is stated to be about \$120,000.

**Seattle Traction Co., Seattle, Wash.—Reorganized Company.**—This company has been organized as successor to the Seattle Consolidated Street Railway, sold in foreclosure; capital stock \$1,000,000.—V. 63, p. 233.

**Second Avenue R.R.—Metropolitan Traction, New York.—Purchase of Control.**—William C. Whitney, Thomas F. Ryan and others, interested in the Metropolitan Traction Co., have bought a controlling interest in the stock of the Second Avenue Railroad. The purchase is a private affair, but later it is proposed to lease the road to the Metropolitan Street Ry.—V. 63, p. 881, 1063.

**Second Avenue Traction.—North Side Traction, Pittsburg, Pa.—Lease.**—The stockholders of the Second Avenue Traction Co. have voted to lease the property and franchises of the North Side Traction Co. for 999 years at a guaranteed rental of 5 per cent on the money invested.—V. 63, p. 794, 1064.

**Sharpsville R.R.—Receiver Appointed.**—G. W. Mellvane has been appointed receiver for this road, which extends from Wilmington Junction on the Erie to Sharpsville, Mercer Co., Pa., 9 miles. Receiver Murray, of the Baltimore & Ohio, which controls the road, petitioned for the receivership.

**Third Avenue R.R. New York.—King's Bridge Franchise.**—The Appellate Division recently decided in Catharine L. Beckman's suit that the sale by the city to the Third Avenue Railroad Company of the franchise for the King's Bridge extension of its road was invalid, but so modified Justice Truax's injunction as only to restrain the building of the road in front

of the plaintiff's premises. Justice Smith, in Supreme Court, Special Term, Thursday, following the law as laid down by the Appellate Division, gave judgment for the plaintiff in the taxpayer's suit brought by Thomas H. O'Connor, to have the sale of the franchise nullified, and to enjoin the city from treating it as valid; and also to restrain the Third Avenue Railroad Company from building any railroad under authority of that sale.—V. 63, p. 877.

**Union Pacific Ry.—Foreclosure Agreement.**—Late on Jan. 23 an official statement was issued regarding the agreement between Attorney-General Harmon, in behalf of the Government on the one side and the Fitzgerald Reorganization Committee on the other, in accordance with which the Union Pacific property is to be foreclosed under all the first mortgages and the Government liens, a syndicate guaranteeing to the Government a minimum bid of \$45,754,000. This bid, together with \$23,623,030 heretofore paid in cash and transportation, ensures to the Government a sum equivalent to the principal of the subsidy bonds, with interest at about 3½ per cent from their issue to their average maturity.

While the syndicate, which is headed by Kuhn, Loeb & Co., guarantees a bid of \$45,754,000, this sum will be offset by sinking fund assets of \$17,062,664, leaving the net amount to be provided \$28,691,336, of which \$1,500,000 has already been deposited with the United States Trust Co. If the foreclosure sale should be delayed the amount to be advanced will be somewhat less than \$28,691,336 in consequence of the accumulations of the sinking fund. All relations with the Government will be terminated by the foreclosure sale. General satisfaction is expressed that an arrangement so mutually advantageous to the security holders and to the Government should have been effected, and it is believed there will be nothing to prevent a speedy completion of reorganization.

**Official Statement by the Attorney-General.**—Regarding the above-mentioned agreement the Attorney-General, on Jan. 23, made substantially the following statement:

Upon the defeat of the funding bill in the House the President directed the Attorney-General to commence foreclosure proceedings against the Union Pacific Ry. Co., first making arrangements for the protection of the Government's interest. This protection is now assured by a guaranty that the Government shall receive at foreclosure sale on its lien on the aided portions of the Union Pacific and Kansas Pacific lines, including the sinking fund, not less than \$45,754,000. The sale will be public, so that the Government will receive the benefit of any higher bids up to the full amount of its claim, principal and interest. The sum of \$1,500,000 cash was on Thursday deposited with the United States Trust Co. of New York by General Louis Fitzgerald, chairman of the committee, as security, according to the terms of the agreement. The committee agrees to bid par for the sinking fund, if it is desired to sell it at any time before the foreclosure sale.

Bills in equity have been prepared, signed by the Attorney-General and Hon. George Hoadley, special counsel, and forwarded to St. Louis, where they will on Friday be presented to Judge Sanborn, who has jurisdiction in all the districts, the sale to take place under the Government's lien as well as under that of the first mortgage. The bills will be filed in the districts of Iowa, Nebraska, Wyoming, Colorado and Utah. Separate bills for the foreclosure of the lien on the Kansas Pacific are in course of preparation. These will be filed in Missouri and Kansas.

The proposed arrangement was submitted to the Government Directors before it was closed. They all recommended its adoption. Their general opinion was thus expressed:

The Government cannot prudently longer defer the settlement of this matter. The Union Pacific system has already been much curtailed and its revenues have been permanently reduced. Reorganizations of allied and neighboring properties have either been accomplished or are in train for early consummation, and the breaking up of the entire Union Pacific system has been and is steadily progressing. It therefore seems to us inexpedient, if not dangerous, to neglect this opportunity of realizing the sum offered and thus expose the Government to a continuous depreciation of its security.

The minimum of \$45,754,000 guaranteed the Government is in cash, so that all relations with the property will terminate upon the confirmation of the foreclosure sale.

The course to be pursued with respect to the Central Pacific has not yet been determined.

**Announcement by Reorganization Committee.—Possible Modification of Plan.**—The Fitzgerald Reorganization Committee makes the following announcement:

Having reached an agreement with the United States Government, steps have been taken to promptly proceed with the reorganization. No material modification of the plan appears to be necessary, except that the two classes of junior bonds—viz., Union Pacific sinking fund bonds and Kansas Pacific consolidated bonds may have to be offered a somewhat smaller allotment in new first mortgage bonds against an increased allotment of preferred stock, so as to enable the committee to limit the issue of new first mortgage 4 per cent bonds (which under the plan was first fixed at \$100,000,000) to \$75,000,000 for reorganization purposes, reserving the balance, under careful restrictions, for the future needs of the reorganized company, thus materially enhancing the standing and value of both the bonds and shares of the new company.

While modifications in the other features of the plan appear not to be required under present conditions, the committee deems it prudent to postpone the formal declaration that the plan shall become operative until it feels assured that the carrying into final effect of its arrangements with the United States Government will create no conditions other than now prevail.

Union Pacific sinking fund bonds and Kansas Pacific consols not heretofore deposited may be deposited with the Mercantile Trust Co., 120 Broadway, New York, and Old Colony Trust Co., Boston, until Feb. 25th next, subject to any modifications in the plan hereafter adopted by the committee, and in exchange for negotiable certificates of deposit. No deposits of these bonds will be received after February 25th.

**Payment of Coupons.**—The interest due February 1st on the collateral trust gold note 6s will be paid on and after that date at the office of J. P. Morgan & Co., trustees, or at the office of Jacob C. Rogers, 43 State Street, Boston.—V. 64, p. 182.

**Union Traction—Installment Payable March 1.**—The recently called installment of \$2 50 a share is payable March 1.—V. 64, p. 182.

**United States Car Co.—Majority of Bonds Deposited.**—The reorganization committee state that it has already received considerable support to their scheme, including a majority of the first mortgage bonds. They therefore decided that on and after Jan. 16 no securities will be received except subject to a penalty of 5 per cent on the assessments payable. The committee, it is stated, will not proceed with the reorganization unless at least 70 per cent of the new moneys are furnished under the plan.—V. 63, p. 1160.

**West End Street Ry., Boston.—Bonds Sold.**—The company has sold \$2,700,000 twenty-year 4 per cent bonds to Kidder, Peabody & Co. Of the new bonds \$700,000 are to refund 6 per cent bonds, due June 1 and July 1, 1897, and the remainder is issued for the following purposes: \$1,000,000 to pay the existing floating indebtedness incurred in building extensions, purchases of real estate, etc.; \$600,000 to defray the necessary cost of building extensions, and of new construction, equipment, lands, buildings and other permanent additions, which were in progress or had been contracted for on Dec. 1, 1896; \$300,000 to be applied to defraying the cost of the extensions or other permanent additions during 1897 and \$100,000 to defray the cost of equipping the subway.

An advertisement offering these bonds will be found on another page.—V. 63, p. 1117.

**Wheeling & Lake Erie RR.—Extension and Improvement Bonds.**—Until further notice Brown Bros. & Co., 59 Wall street, will receive, as depositaries, the above-mentioned bonds, with all unmaturing coupons attached, on the terms of an agreement in the course of preparation, for the purpose of protecting the interests of the bondholders. Under this agreement the undersigned will purchase at their face value the coupons, due Feb. 1, of the bonds deposited with them in case they shall not be paid by the receivers. Proper receipts will be issued for the deposited bonds. Messrs. Brown, Shipley & Co., of London, will receive the deposit of bonds in London.—V. 64, p. 182.

—Messrs. Ervin & Co., bankers, Drexel Building, offer for subscription at par and accrued interest a limited amount of Schuylkill Traction Company first mortgage 5 per cent 50-year gold bonds, due in 1943. The total issue of these bonds is \$500,000—secured by a first lien on the 22½ miles of road operated by the company and all its franchises, rolling stock, power house, car barns and other property of the company. The report of the company shows for the year 1895-96, ending Sept. 30, after the payment of all operating expenses, taxes and interest on the bonds, surplus net earnings 60 per cent in excess of the fixed charges. See the advertisement in this issue of the CHRONICLE.

—The forty-ninth annual statement of the U. S. Branch of the Liverpool & London & Globe Insurance Company, issued this week, shows the result of a very prosperous year, the surplus having increased to \$4,093,460, being an addition of nearly \$700,000 to the figures of the preceding year. Amongst the gilt-edged assets of the company there are \$1,843,000 in U. S. Government 4 per cent bonds, \$3,575,700 in loans on bond and mortgage and \$1,730,000 in real estate; the total assets amounting to \$9,339,545.

—The New England Mutual Life Insurance Company, Henry J. Ryan, General Agent, will, on the completion of the St. Paul Building, move into a handsome suite of rooms on the fourth floor, which will be the New York headquarters. Among those actively engaged with the new management will be Mr. William H. Case, at present Manager of a department in the house of Alfred Dolge & Son.

—Messrs. Kidder, Peabody & Co., Boston, offer for subscription \$2,700,000 of the West End Street Railway Co. 20-year 4 per cent gold bonds. Subscription lists will be opened Thursday, Feb. 4, and close on the following day. Particulars as to the issue, the earnings of the company, charges, etc., together with the terms of subscription will be found in our advertising columns.

—Messrs. Edward B. Smith & Co., Philadelphia, offer for sale \$250,000 four and one-half per cent consol. bonds of the Penn. & N. Y. Canal & RR. Co., guaranteed by the Lehigh Valley RR. Co. Price 101 and accrued interest. See particulars in advertisement.

—The Nederland Life Insurance Company reports \$15,412,189 of new business written in 1896, and 7,948 policies covering \$25,473,361 in force—a gain of \$7,125,268. Attention is directed to the statement of the company advertised in today's issue.

—Mr. F. J. Lisman is prepared to trade in Hocking Valley issues. See his advertisement.

## The Commercial Times.

### COMMERCIAL EPITOME.

FRIDAY NIGHT, Jan. 29, 1897.

There has been a considerable shrinkage in the volume of business transacted during the past week, as the severe weather experienced has had a tendency to check trade. The dissolution of a number of combinations whose purpose it was to maintain prices is having a disquieting influence in the lines of trade affected; values as a consequence have become demoralized and merchants naturally have shown hesitancy about placing orders in the face of declining prices. Particularly noticeable have been the breaks in the billet pool and the combination of manufacturers of carriage bolts, machine bolts, log screws, etc. It is reported that at a meeting of the soft coal lines at Columbus, Ohio, they practically reached an agreement regarding percentages. There has been rather a sharp break in wheat values. Crop conditions at the West have been promising and tired holders have been liquidating.

There has continued a quiet market for lard on the spot. Shippers have not been buyers and demand from the home trade has been slow. Prices have weakened slightly, closing at 4½¢ for prime Western, 3½¢ for prime City and 4½¢ for refined for the Continent. There was no trading in the local market for lard futures, and at the West the speculative dealings were quiet and prices weakened in sympathy with the depression of the grain markets. The close was quiet.

#### DAILY CLOSING PRICES OF LARD FUTURES.

	Jan.	Feb.	Mar.	Apr.	May	Jun.
January.....	4:25	4:23	4:20	4:12	4:15	4:15

Pork has had only a limited sale and prices have weakened slightly to \$8 25@8 00 for mess, \$9 75@9 75 for family and \$8 75@9 75 for short clear. Cut meats have continued in fairly active demand, and prices have been firm, closing at 4½¢@4½¢ for pickled bellies, 12@10 lbs. average, 4½¢@4½¢ for pickled shoulders and 8½¢@9¢ for pickled hams. Demand for beef has been quiet, but prices have held steady, closing at \$7 00@8 00 for mess, \$7 50@8 00 for packet, \$9 00@11 00 for family and \$13 00@14 00 for extra India mess. Beef hams have been steady at \$17 50@18 00.

Tallow has had only a very limited call and the market has weakened slightly, closing nominally at 3½¢. Oleo stearine has sold slowly and prices have declined to 4½¢. Lard stearine has been quiet and quotations for city have been reduced to 4½¢@4½¢. The demand for cotton-seed oil has been quiet and prices have weakened slightly to 20¢ for prime crude and 23¢ for prime yellow. Butter has had a moderate sale at full values, closing at 18@20¢ for creamery. Cheese has continued firm, closing at 8@11½¢ for State factory, full cream. Fresh eggs have advanced and closed firm at 19½¢ for choice Western.

Coffee of Brazil growth has had only a limited sale and at the close prices weakened slightly to 9½¢ for Rio No. 7, at which price a sale of 5,000 bags to be shipped was reported. Mild grades have been in moderately active demand and prices have been unchanged and steady, closing at 16¢ for good Cucuta and 22½¢@23½¢ for standard Java. There has been a quiet market for contracts and prices have weakened under selling by local traders. The close was at a slight decline.

The following were the closing prices:

Feb.....	9:35c.	May.....	9:40c.	Aug.....	9:50c.
March.....	9:35c.	June.....	9:45c.	Sept.....	9:50c.
April.....	9:40c.	July.....	9:50c.		

The demand for raw sugars has been dull, and importers have weakened in their views, closing with sellers of centrifugals 96-deg. test at 3 3½¢, and sales of muscovado 89-deg. test at 2½¢. Refined sugars have sold slowly, but no changes have been made in quoted values; granulated closed at 4½¢. Teas have been quiet, but steadily held.

Manufacturers have been more active buyers of the common grades of Kentucky tobacco, and business transacted has been at firm prices. Sales were 250 hhds. Seed leaf has continued in demand at full values. Sales for the week were 4630 cases, including: 250 cases 1895 crop New England Havana, 15@22c.; 200 cases 1895 crop, State Havana, 12@15c.; 1,700 cases 1894 crop, Zimmers, 10@12c.; 450 cases 1895 crop, Zimmers, 12@16c.; 300 cases 1895 crop, Wisconsin Havana, 7@10c.; 250 cases 1894 crop, Wisconsin Havana, 8@9½c.; 430 cases 1893 crop, Wisconsin Havana, 8@9½c.; 125 cases 1893 crop, Pennsylvania Havana, 12@13c.; also 580 bales Havana at 65c. to \$1 10 in bond, and 225 bales Sumatra at 65c. to \$1 75 in bond.

There has been a further advance in the market for Straits tin in response to foreign advices, but the close was dull and easier at 13½¢@13 65¢. Ingot copper has continued to meet with a moderate sale and values have further improved, closing firm at 12c. for lake. Lead has had only a moderate sale, but prices have been firm, closing at 3 07½¢@3 10c. for domestic. Spelter has been steady at 3 85¢@4c. for domestic. Pig iron has been quiet but steady at \$11@13 for domestic.

Refined petroleum has been steady, closing at 6c in bbls., 3-50c. in bulk and 6-70c. in cases; naphtha dull at 6½¢. Crude certificates have been neglected. Credit balances have been quiet at 85c. Spirits turpentine has sold slowly but prices have been unchanged and steady at 27½¢@28c. Rosins have been dull at \$1 70 for common and good strained. Wool has been in active demand at full values. Hops have had a fair sale at steady prices.

## COTTON.

FRIDAY NIGHT, January 29, 1897.

THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening the total receipts have reached 133,302 bales, against 151,811 bales last week and 193,537 bales the previous week, making the total receipts since the 1st of Sept., 1896, 5,540,093 bales, against 4,935,122 bales for the same period of 1895-6, showing an increase since Sep. 1, 1896, of 1,504,971 bales.

The principal feature of the market for cotton futures has been the absence of outside speculative interest. The trading has been confined almost exclusively to professional operations. The fluctuations in prices have been within the narrowest limits and the net changes for the week are unimportant. Saturday there was a slight weakening in values, as easier foreign advices prompted some selling by local traders. The market was slightly weaker during early 'Change on Monday as the estimated crop movement for the week did not show as large a falling off as was hoped for. Subsequently, however, there was some buying to cover contracts and the loss was recovered. There was a slight upward turn to values on Tuesday as stronger foreign advices and the continued interest shown by shippers in the spot markets stimulated buying, largely by local shorts to cover contracts. Wednesday, however, there was moderate selling for Southern account, and the market turned weaker, losing all of the previous day's advance. The market during early 'Change on Thursday was quiet, with prices holding about steady. Subsequently, however, owing to the absence of speculative interest and the receipt of a few selling orders from foreign and Southern markets, prices declined slightly. To-day the market opened unchanged to 2 points higher on reported purchases by Eastern spinners in the spot market. Later in the day, however, reports from New Orleans, stating that the estimated supply of cotton which came into sight for the week was larger than expected, prompted selling and prices declined 3 to 6 points. The close was quiet at a decline of 2 to 4 points for the day. Cotton on the spot has been quiet and on Monday prices were lowered 1-16. To-day the market was moderately active and steady, middling uplands closing at 7-16c.

The total sales for forward delivery for the week are 428,600 bales. For immediate delivery the total sales foot up this week 4,944 bales, including 2,800 for export, 1,194 for consumption, — for speculation and 1,000 on contract. The following are the official quotations for each day of the past week—January 23 to January 29.

rates on and off middling, as established Nov. 22, 1893, and revised Dec. 11, 1895, by the Revision Committee at which grades other than middling may be delivered on contract:

Fair.....	6 1/4	on.	Good Ordinary.....	6 1/4	off.
Middling Fair.....	7 1/8	on.	Good Middling Tinged.....	7 3/8	Even.
Strict Good Middling.....	7 1/2	on.	Strict Middling Stained.....	7 3/8	off.
Good Middling.....	7 1/8	on.	Middling Stained.....	7 3/8	off.
Strict Low Middling.....	7 1/8	off.	Strict Low Mid. Stained.....	7 3/8	off.
Low Middling.....	7 1/8	off.	Low Middling Stained.....	7 3/8	off.
Strict Good Ordinary.....	7 1/8	off.			

On this basis the prices for a few of the grades would be as follows.

Tinnevely Good, Liverpool.....	4 d.	4 1/2 d.	3 1/2 d.	4 1/2 d.

The imports into Continental ports the past week have been 132,000 bales.

The above figures indicate an increase in the cotton in sight to-night of 139,142 bales as compared with the same date of 1896, a falling off of 364,445 bales from the corresponding date of 1895 and a decrease of 480,724 bales from 1894.

AT THE INTERIOR TOWNS the movement—that is the receipts for the week and since September 1, the shipments for the week and the stocks to-night, and the same items for the corresponding period of 1895-96—is set out in detail below.

Movement to January 29, 1897.							Movement to January 31, 1896.						
TOWNS.	Receipts.		Shipments.	Stock Jan. 29.	Receipts.		Shipments.	Stock Jan. 31.

**RECEIPTS FROM THE PLANTATIONS.**—The following table indicates the actual movement each week from the plantations. The figures do not include overland receipts nor Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the outports.

Week Ending—	Receipts at the Ports.			St'k at Interior Towns.			Rec'ts from Plant'ns.		
	1896-97	1896-96	1894-95	1896-97	1896-96	1894-95	1896-97	1896-96	1894-95
Dec. 24 .....	277,615	223,919	312,797	580,748	596,822	609,004	292,582	235,430	352,972
" 31 .....	319,122	176,824	251,854	578,475	583,683	600,950	216,819	163,165	243,806
Jan. 8 .....	194,537	135,322	207,746	552,205	565,410	568,651	170,207	117,009	175,441
" 15 .....	151,841	119,837	209,806	532,119	552,808	530,024	131,755	107,035	171,170
" 22 .....	130,160	112,395	213,026	502,917	533,688	507,480	100,958	93,475	150,482
" 29 .....	138,302	122,902	199,835	171,186	505,875	490,801	106,571	95,002	152,156

The above statement shows: 1.—That the total receipts from the plantations since Sept. 1, 1896, are 5,890,685 bales; in 1895-96 were 4,508,300 bales; in 1894-95 were 6,650,831 bales.

2.—That although the receipts at the outports the past week were 138,302 bales, the actual movement from plantations was 106,571 bales, the balance being taken from the stocks at the interior towns. Last year the receipts from the plantations for the week were 95,092 bales and for 1895 they were 182,156 bales.

**OVERLAND MOVEMENT FOR THE WEEK AND SINCE SEPT. 1.**—We give below a statement showing the overland movement for the week and since September 1. As the returns reach us by telegraph late Friday night it is impossible to enter so largely into detail as in our regular monthly report, but all the principal matters of interest are given. This weekly publication is of course supplementary to the more extended monthly statements. The results for the week ending Jan. 29 and since Sept. 1 in the last two years are as follows.

January 29.	1896-97.		1895-96.	
	Week.	Since Sept. 1.	Week.	Since Sept. 1.
<b>Shipped—</b>				
Via St. Louis .....	11,298	384,651	8,647	382,168
Via Cairo .....	6,844	204,664	4,402	178,925
Via Parker .....	393	10,633	547	13,107
Via Evansville .....	1,537	1,537	2	47

Via Cincinnati .....	3,887	92,714	1,984	87,843
Via other routes, &c. ....	3,692	79,882	7,829	64,573
<b>Total gross overland .....</b>	<b>28,721</b>	<b>875,514</b>	<b>25,677</b>	<b>794,238</b>
<b>Deduct shipments—</b>				
Overland to N. Y., Boston, &c. ....	7,367	240,183	8,322	172,636
Between interior towns .....	17	2,841	3	2,405
Inland, &c., from South .....	510	23,238	1,559	29,930
<b>Total to be deducted .....</b>	<b>7,894</b>	<b>266,042</b>	<b>9,884</b>	<b>204,971</b>
<b>Leaving total net overland* ..</b>	<b>20,827</b>	<b>609,472</b>	<b>15,793</b>	<b>589,267</b>

\* Including movement by rail to Canada.

The foregoing shows that the week's net overland movement this year has been 20,827 bales, against 15,793 bales for the week in 1896, and that for the season to date the aggregate net overland exhibits an increase over a year ago of 20,305 bales.

In Sight and Spinners' Takings.	1896-97.		1895-96.	
	Week.	Since Sept. 1.	Week.	Since Sept. 1.
Receipts at ports to Jan. 29 .....	138,302	5,540,093	122,902	4,035,127
Net overland to Jan. 29 .....	20,827	609,472	15,793	589,267
Southern consumption to Jan. 29 ..	20,000	447,000	18,000	442,000
<b>Total marketed .....</b>	<b>179,129</b>	<b>6,596,565</b>	<b>156,695</b>	<b>5,066,389</b>
Interior stocks in excess .....	31,731	350,592	27,810	473,178
<b>Came into sight during week ..</b>	<b>147,398</b>	<b>6,947,157</b>	<b>123,845</b>	<b>5,539,567</b>
<b>Total in sight Jan. 29 .....</b>	<b>37,974</b>	<b>1,098,215</b>	<b>40,793</b>	<b>1,145,514</b>

\* Decrease during week.

It will be seen by the above that there has come into sight during the week 147,398 bales, against 123,845 bales for the same week of 1896, and that the increase in amount in sight to-night as compared with last year is 1,407,590 bales.

**WEATHER REPORTS BY TELEGRAPH.**—Advices to us this evening by telegraph from the South denote that the temperature has been much lower generally during the week, with snow in many localities. The movement of the crop has consequently suffered some interruption.

**Galveston, Texas.**—The weather during the greater portion of the week has been cold, with snow and sleet quite general throughout the State. The week's rainfall here has been nine hundredths of an inch, on three days. The thermometer has averaged 40, ranging from 21 to 59.

**Palestine, Texas.**—We have had rain on two days during the week, the precipitation reaching thirty-eight hundredths of an inch. The thermometer has ranged from 10 to 64, averaging 37.

**Huntsville, Texas.**—Rain has fallen on two days of the week, the rainfall being thirty-five hundredths of an inch. Average thermometer 37, highest 63, lowest 13.

**Dallas, Texas.**—It has rained lightly on two days, the rainfall reaching three hundredths of an inch. The thermometer has averaged 35, the highest being 61 and the lowest 9.

**San Antonio, Texas.**—Farm work has been retarded and early vegetation seriously injured by the cold weather. There has been light rain on two days the past week, the precipitation being thirteen hundredths of an inch. The thermometer has averaged 42, ranging from 18 to 69.

**Luling, Texas.**—The weather has been quite severe. We have had rain on one day of the week, the precipitation reaching six hundredths of an inch. The thermometer has ranged from 17 to 62, averaging 49.

**Columbia, Texas.**—Heavy sleet and snow on Monday and Tuesday. Rain has fallen on one day of the week, to the extent of eleven hundredths of an inch. Average thermometer 43, highest 66, lowest 20.

**Cuero, Texas.**—Snow fell on Tuesday. There has been rain on one day of the week, to the extent of ten hundredths of an inch. The thermometer has averaged 43, the highest being 69 and the lowest 18.

**Brenham, Texas.**—The weather the past week has been the most severe since 1895. Snow fell on Monday and Tuesday. We have had rain on one day of the week, to the extent of fifty hundredths of an inch. The thermometer has averaged 23, ranging from 15 to 63.

**Fort Worth, Texas.**—Rain has fallen on two days of the week, to the extent of four hundredths of an inch. Average thermometer 35, highest 62 and lowest 8.

**Weatherford, Texas.**—We have had light rain on two days of the week, the rainfall reaching six hundredths of an inch. The thermometer has averaged 35, the highest being 61 and the lowest 9.

**New Orleans, Louisiana.**—The week's rainfall has been fourteen hundredths of an inch, on one day. The thermometer has averaged 41.

**Shreveport, Louisiana.**—There has been rain on two days during the week, the precipitation being one hundredth of an inch, and there has been snow on two days to the depth of three and one-half inches. The thermometer has ranged from 13 to 64, averaging 33.

**Columbus, Mississippi.**—We have had no rain during the week, but an inch of snow has fallen. Average thermometer 30, highest 60 and lowest 9.

**Leland, Mississippi.**—There has been no rain during the week. The thermometer has averaged 33.5, the highest being 62 and the lowest 6.

**Vicksburg, Mississippi.**—We have had sleet and snow on two days during the week, the precipitation of which reached sixteen hundredths of an inch. The thermometer has averaged 34, ranging from 17 to 63.

**Little Rock, Arkansas.**—It has rained to an inappreciable extent on one day during the past week. The thermometer has ranged from 12 to 57, averaging 27.

**Helena, Arkansas.**—We have had light snow on two days of the week. Weather now moderating. Average thermometer 27, highest 54, lowest 13.

**Memphis, Tennessee.**—There has been snow on one day of the week, the precipitation reaching three hundredths of an inch. The thermometer has averaged 26.4, the highest being 54.6 and the lowest 10.

**Nashville, Tennessee.**—We have had rain on one day of the week, to the extent of eight hundredths of an inch. The thermometer has averaged 22, ranging from 3 to 53.

**Mobile, Alabama.**—We have had freezing weather since Sunday last, with rain and sleet on one day, the precipitation reaching twenty-eight hundredths of an inch. The thermometer has ranged from 18 to 53, averaging 39.

**Montgomery, Alabama.**—We have had rain on three days of the past week and light snow on one, the precipitation reaching sixty-seven hundredths of an inch. Cold weather still prevails, the mercury falling to 14 this morning. Average thermometer 39, highest 55, lowest 14.

**Madison, Florida.**—There has been rain on one day of the week, the rainfall being thirty hundredths of an inch. The thermometer has averaged 51, ranging from 29 to 68.

**Savannah, Georgia.**—We have had rain on two days of the week, the precipitation being forty-three hundredths of an inch. Average thermometer 44, highest 62, lowest 17.

**Augusta, Georgia.**—Rain has fallen on one day of the week, to the extent of twenty-eight hundredths of an inch. The thermometer has averaged 39, the highest being 61 and the lowest 12.

**Charleston, South Carolina.**—There has been rain on one day of the week, the rainfall reaching forty hundredths of an inch. The thermometer has ranged from 19 to 59, averaging 42.

**Stateburg, South Carolina.**—Rain has fallen lightly on two days of the week, the rainfall being twenty hundredths of an inch. Average thermometer 40.5, highest 61, lowest 13.

**Wilson, North Carolina.**—We have had rain, hail and snow on one day of the week, the precipitation being one inch. The thermometer has averaged 35, ranging from 16 to 53.

The following statement we have also received by telegraph, showing the height of the rivers at the points named at 8 o'clock January 28, 1897, and January 30, 1896.

	Jan. 28, '97.	Jan. 30, '96.
New Orleans.....	Above zero of gauge.	Feet. 5.2
Memphis.....	Above zero of gauge.	18.0
Mobile.....	Above zero of gauge.	9.4
Shreveport.....	Above zero of gauge.	7.0
Vicksburg.....	Above zero of gauge.	24.4

**JUTE BUTTS, BAGGING, ETC.**—The market for jute bagging has been devoid of animation the past week. The close to-night is at 4½¢. for 1½ lbs., 5¢. for 2 lbs. and 5½¢. for standard grades in a jobbing way. Car-load lots of standard brands are quoted at 4½¢. for 1½ lbs., 5¢. for 2 lbs. and 5½¢. for 2½ lbs. f.o.b. at New York. Jute butts are very quiet at 1.1-1.6¢. for paper quality, 1.7-1.6¢. for mixing and bagging and 1½¢. for spinning butts, all to arrive.

**INDIA COTTON MOVEMENT FROM ALL PORTS.**—The receipts and shipments of cotton at Bombay have been as follows for the week and year, bringing the figures down to Jan. 28.

**BOMBAY RECEIPTS AND SHIPMENTS FOR FOUR YEARS.**

Year	Shipments this week.			Shipments since Sept. 1.			Receipts.	
	Great Brit'n.	Continent.	Total.	Great Brit'n.	Continent.	Total.	This Week.	Since Sept. 1.
'96-7	1,000	8,000	9,000	7,000	132,000	139,000	46,000	471,000
'95-6	37,000	37,000	74,000	14,000	221,000	235,000	65,000	778,000
'94-5	1,000	1,000	2,000	2,000	41,000	43,000	46,000	301,000
'93-4	21,000	21,000	42,000	13,000	200,000	213,000	60,000	502,000

According to the foregoing Bombay appears to show a decrease compared with last year in the week's receipts of 19,000 bales and a decrease in shipments of 28,000 bales, and the shipments since Sept. 1 show a decrease of 96,000 bales. The movement at Calcutta, Madras and other India ports for the last reported week and since the 1st of September, for two years, has been as follows. "Other ports" cover Ceylon, Tuticorin, Kurrachee and Coconada.

	Shipments for the week.			Shipments since Sept. 1.		
	Great Britain.	Continent.	Total.	Great Britain.	Continent.	Total.
Calcutta—						
1896-97...	.....	1,000	1,000	4,000	18,000	22,000
1895-96...	.....	.....	.....	5,000	9,000	14,000
Madras—

1895-96...	.....	.....	.....	17,000	14,000	31,000
All others—						
1896-97...	1,000	2,000	3,000	13,000	38,000	51,000
1895-96...	.....	1,000	1,000	19,000	29,000	47,000
Total all—						
1896-97...	1,000	3,000	4,000	26,000	73,000	99,000
1895-96...	.....	1,000	1,000	41,000	51,000	92,000

The above totals for the week show that the movement from the ports other than Bombay is 3,000 bales more than the same week last year. For the whole of India, therefore, the total shipments since September 1, 1895, and for the corresponding periods of the two previous years, are as follows.

**EXPORTS TO EUROPE FROM ALL INDIA**

Shipments to all Europe from—	1896-97.		1895-96.		1894-95.	
	This week.	Since Sept. 1.	This week.	Since Sept. 1.	This week.	Since Sept. 1.
Bombay.....	8,000	139,000	37,000	235,000	2,000	43,000
All other ports	4,000	99,000	1,000	92,000	2,000	73,000
Total	13,000	238,000	38,000	327,000	4,000	116,000

**ALEXANDRIA RECEIPTS AND SHIPMENTS.**—Through arrangements we have made with Messrs. Davies, Benachi & Co., of Liverpool and Alexandria, we now receive a weekly cable of the movements of cotton at Alexandria, Egypt. The following are the receipts and shipments for the past week and for the corresponding week of the previous two years.

Alexandria, Egypt, January 27.	1896-97.		1895-96.		1894-95.	
	This week.	Since Sept. 1.	This week.	Since Sept. 1.	This week.	Since Sept. 1.
Receipts (candars)....	145,000	4,411,000	120,000	4,333,000	185,000	3,614,000
Shipments (bales)—						
To Liverpool.....	8,000	220,000	4,000	235,000	9,000	185,000
To Continent.....	6,000	179,000	6,000	186,000	6,000	187,000
Total Europe.....	14,000	399,000	10,000	421,000	15,000	375,000

\* A candar is 94 pounds 10½ of which is America. In 1894-97, 17,937 bales; in 1895-96, 37,123 bales; in 1894-95, 22,929 bales.

**MANCHESTER MARKET.**—Our report received by cable to-night from Manchester states that the market is steady for both yarns and shirtings. The demand for home trade is

good but for foreign markets is poor. We give the prices to-day below and leave those for previous weeks of this and last year for comparison:

	1896-97.					1895-96.

**SEA ISLAND COTTON MOVEMENT.**—We have received this (Friday) evening by telegraph from the various ports the details of the Sea Island cotton movement for the week. The receipts for the week ending to-night (Jan. 29) and since Sept. 1, 1896, the stocks to-night, and the same items for the corresponding periods of 1895-96, are as follows.

Receipts to Jan. 29.	1896-97.		1895-96.		Stock	
	This week.	Since Sept. 1.	This week.	Since Sept. 1.	1897.	1896.
Savannah.....	1,595	78,652	1,278	89,402	24,134	17,752
Charleston, &c.....	84	9,991	158	9,543	4,674	2,253
Florida, &c.....	355	5,787	163	4,738	3,260	1,534
Total.....	2,034	92,410	1,599	82,723	32,068	21,539

The exports for the week ending this evening reach a total of 5,390 bales, of which 5,155 bales were to Great Britain, 225 to France and — to Reval, and the amount forwarded to Northern mills has been 1,897 bales. Below are the exports for the week and since September 1 in 1896-97 and 1895-96.

Exports from—	Week Ending Jan. 29.			Since Sept. 1, 1896.			North'n Mills	
	Great Brit'n.	France &c.	Total.	Great Brit'n.	France &c.	Total.	Week.	Since Sept. 1.

Phila., &c.....	575	.....	575	575	102	677	.....	.....
Total.....	5,155	225	5,380	30,661	7,495	38,176	1,897	25,102
Total 1895-6	325	.....	325	27,011	5,447	32,458	1,065	29,111

A considerable portion of the Sea Island cotton shipped to foreign ports goes via New York, and some small amounts via Boston and Baltimore. Instead of including this cotton for the week in which it leaves the Southern outports, we follow the same plan as in our regular table of including it when actually exported from New York, &c. The details of the shipments of Sea Island cotton for the week will be found under the head "Shipping News," on a subsequent page.

Quotations Jan. 29 at Savannah, for Floridas, common, 9c.; medium fine, 11½¢; choice, 14½¢.

Charleston, Carolinas, medium fine, nominal; fine, 17½¢; fully line, 20@23c.

**EXCHANGES.**—The following exchanges have been made during the week:

Even 100 Jan. for Feb.	07 pd. to exch. 100 Feb. for Meh.
07 pd. to exch. 100 Jan. for Meh.	28 pd. to exch. 500 Feb. for June.
13 pd. to exch. 300 Meh. for May.	02 pd. to exch. 200 Feb. for Jan.
25 pd. to exch. 200 Meh. for Aug.	07 pd. to exch. 300 Apr. for May.

43 pd. to exch. 500 Oct. for Aug.	

**EUROPEAN COTTON CONSUMPTION TO JANUARY 1.**—By cable to-day we have Mr. Ellison's cotton figures brought down to January 1. We give also revised totals for last year that comparison may be made. The spinners' takings in actual bales and pounds have been as follows:

October 1 to January 1.	Great Britain.	Continent.	Total.
<b>For 1896.</b>			
Takings by spinners... bales	924,000	1,193,000	2,117,000
Average weight of bales, lbs.	503	486	493.4
Takings in pounds.....	464,772,000	579,798,000	1,044,570,000
<b>For 1895.</b>			
Takings by spinners... bales	893,000	962,000	1,855,000
Average weight of bales, lbs.	501	490	495.0
Takings in pounds.....	447,713,000	471,580,000	919,293,000

According to the above, the average weight of the deliveries in Great Britain is 503 pounds per bale this season, against 501 pounds during the same time last season. The Continental deliveries average 483 pounds, against 193 pounds last year, and for the whole of Europe the deliveries average 493.4 pounds per bale against 495.6 pounds last season. Our dispatch also gives the full movement for this year and last year in bales of 500 pounds.

Oct. 1 to Jan. 1. Sales of 500 lbs. each, 000s omitted.	1896.			1895.		
	Great Britain.	Continent.	Total.	Great Britain.	Continent.	Total.
Spinners' stock Oct. 1.	24.	277.	301.	67.	535.	602.
Takings in October...	249.	240.	489.	233.	227.	460.
Total supply.....	273.	517.	790.	320.	762.	1,082.
Consump. Oct., 4 wks.	256.	320.	576.	256.	316.	572.
Spinners' stock Nov. 1	17.	197.	214.	64.	446.	510.
Takings in November...	300.	407.	707.	298.	300.	598.
Total supply.....	317.	604.	921.	362.	746.	1,108.
Consump. Nov., 4 wks.	256.	320.	576.	256.	316.	572.
Spinners' stock Dec. 1	61.	284.	345.	106.	430.	536.
Takings in December...	381.	513.	894.	341.	417.	758.
Total supply.....	442.	797.	1,239.	450.	847.	1,297.
Consump. Dec., 5 wks.	320.	400.	720.	320.	391.	711.
Spinners' stock Jan. 1	122.	397.	519.	130.	452.	582.

The comparison with last year is made more striking by bringing together the above totals and adding the average weekly consumption up to this time for the two years.

Oct. 1 to Jan. 1 Sales of 500 lbs. each, 000s omitted.	1896.			1895.		
	Great Britain.	Continent.	Total.	Great Britain.	Continent.	Total.
Spinners' stock Oct. 1.	24.	277.	301.	67.	535.	602.
Takings to Jan. 1.....	930.	1,160.	2,090.	895.	644.	1,539.
Supply.....	954.	1,437.	2,391.	962.	1,470.	2,432.
Consumption, 13 weeks	832.	1,040.	1,872.	832.	1,027.	1,859.
Spinners' stock Jan. 1	122.	397.	519.	130.	452.	582.
Weekly Consumption, 000s omitted.						
In October.....	64.0	80.0	144.0	61.0	79.0	140.0
In November.....	64.0	80.0	144.0	61.0	79.0	140.0
In December.....	64.0	80.0	144.0	61.0	79.0	140.0

The foregoing shows that the weekly consumption is now 144,000 bales of 500 pounds each, against 143,000 bales of like weights at the corresponding time last year. The total spinners' stocks in Great Britain and on the Continent have increased 182,000 bales during the month, but are now 63,000 bales less than at the same date last season.

We have also received by cable the main facts contained in Mr. Ellison's "Annual Review of the Cotton Trade for the Year 1896," but they reach us at so late an hour that we are unable to compile them for this issue. They will be given in the editorial department of the CHRONICLE next week.

COMPARATIVE PORT RECEIPTS AND DAILY CROP MOVEMENT.—A comparison of the port movement by weeks is not accurate as the weeks in different years do not end on the same day of the month. We have consequently added to our other standing tables a daily and monthly statement, that the reader may constantly have before him the data for seeing the exact relative movement for the years named. The monthly movements since September 1, 1896, and in previous years, have been as follows:

Monthly Receipts.	Year Beginning September 1.					
	1896.	1895.	1894.	1893.	1892.	1891.
Sept'mbr.	912,486	393,986	518,702	377,408	405,355	676,823
October..	1,468,516	1,202,480	1,622,664	1,311,279	1,135,473	1,532,426
Novembr.	1,286,251	912,759	1,607,062	1,272,776	1,125,955	1,376,909
Decembr.	1,256,000	987,899	1,497,560	1,239,738	930,029	1,215,144
Total...	4,923,253	3,487,004	5,246,848	4,208,191	3,596,712	4,801,302
Percentage of total port receipts Dec. 31..	61.64	66.56	70.21	70.19	67.08	67.08

This statement shows that up to December 31 the receipts at the ports this year were 1,436,249 bales more than in 1895 and 323,395 bales less than in 1894. By adding to the totals to December 31 the daily receipts since that time we

shall be able to reach an exact comparison of the movement for the different years.

Total ..	5,510,093	3,995,458	6,116,377	4,939,837	3,991,014	5,427,540
Percentage of total port receipts Jan. 29	74.06	77.60	50.89	77.89	75.82	

This statement shows that the receipts since Sept. 1 up to to-night are now 1,511,655 bales more than they were to the same day of the month in 1896 and 576,231 bales less than they were to the same day of the month in 1895. We add to the table the percentages of total port receipts which had been received to January 31 in each of the years named.

THE EXPORTS OF COTTON from New York this week show a decrease compared with last week, the total reaching 10,492 bales, against 14,718 bales last week. Below we give our usual table, showing the exports of cotton from New York, and the direction, for each of the last four weeks; also the total exports and direction since Sept. 1, 1896, and in the last column the total for the same period of the previous year.

SHIPPING NEWS.—The exports of cotton from the United States the past week, as per latest mail returns, have reached 149,693 bales. So far as the Southern ports are concerned these are the same exports reported by telegraph and published in the CHRONICLE last Friday. With regard to New York we include the manifests of all vessels cleared up to Thursday.

Total bales.	
NEW YORK.—To Liverpool, per steamers Servia, 3,325.....	3,325

## BREADSTUFFS.

FRIDAY, January 29, 1897.

There has been a very tame and uninteresting market for wheat flour during the week under review. The volume of business transacted has been small, as buyers have been indifferent in their operations and have taken only such supplies as have been needed for immediate consumption. Prices have ruled easy, and for spring-wheat grades they have declined. Rye flour has had a slow sale, but no changes have occurred in quoted values. The demand for buckwheat flour has been flat and values have continued to drop. Corn meal has sold slowly, but prices have held about steady. To-day the market for wheat flour was quiet and unchanged.

There has been very little spirit to the speculative dealings in the market for wheat futures, and prices have declined. Saturday there was a fractional gain in values in response to steadier advices from Liverpool. Monday, however, the market turned weaker, prices losing  $\frac{1}{2}$  to  $\frac{5}{8}$  c. per bushel, and on Tuesday, Wednesday and Thursday the weakness became more pronounced, the decline in prices for the three days amounting to  $4\frac{3}{8}$  to  $5\frac{3}{8}$  c. The principal weakening feature was general liquidation by tired longs, prompted by favorable prospects for the growing crop; and quiet foreign advices. To-day the market was fairly active. During early change prices declined sharply, May selling at 79 $\frac{3}{4}$  c. under continued liquidating sales by tired holders. Toward the close, however, there was a sharp rally on reported large purchases by exporters, and on the curb there was a further advance in prices, May selling up to 81 $\frac{1}{2}$  c. In the spot market demand was quiet up to Thursday, when a fair business was transacted. To-day the market was exceptionally active, the purchases by shippers in this market amounting to 65,000 bushels; and at outports they took 490,000 bushels. The sales were principally No. 1 hard Manitoba and No. 1 Northern for delivery at the opening of navigation. Prices were private. No. 2 red winter was quoted at 97c. f. o. b. afloat; No. 1 hard Duluth at 92c. f. o. b. afloat, and No. 1 Northern at 87c. f. o. b. afloat.

May delivery.....c.	86 $\frac{3}{4}$	85 $\frac{1}{2}$	83 $\frac{3}{4}$	82 $\frac{3}{4}$	81 $\frac{3}{4}$	81 $\frac{1}{2}$
July delivery.....c.	83	82 $\frac{1}{2}$	80 $\frac{3}{4}$	80	78 $\frac{3}{4}$	78 $\frac{1}{2}$

There has continued a quiet market for Indian corn futures, and during the first half of the week prices weakened in sympathy with the decline in wheat values and a free movement of the crop. Subsequently, however, the continued activity of the export demand and heavy clearances from the seaboard offset the large crop movement and prices recovered. To-day the market advanced slightly on buying by shorts to cover contracts. In the spot market shippers have continued active buyers here and at outports, their purchases for the week amounting to about 2,000,000 bushels. To-day an advance in prices checked the demand. The sales included No. 2 mixed at 29 $\frac{3}{4}$  to 30c. delivered and 30 $\frac{1}{2}$  to 31 $\frac{1}{2}$  c. f. o. b. afloat.

### DAILY CLOSING PRICES OF NO. 2 MIXED CORN.

	Sat.	Mon.	Tues.	Wed.	Thurs.	Fri.
January.....c.	28 $\frac{1}{2}$	28 $\frac{1}{2}$	28 $\frac{1}{2}$	28 $\frac{1}{2}$	28 $\frac{1}{2}$	29
May delivery.....c.	30	29 $\frac{1}{2}$	29 $\frac{1}{2}$	29 $\frac{1}{2}$	29 $\frac{1}{2}$	31 $\frac{1}{2}$
July delivery.....c.	31	30 $\frac{1}{2}$	30 $\frac{1}{2}$	30 $\frac{1}{2}$	30 $\frac{1}{2}$	31 $\frac{1}{2}$

Outs for future delivery have continued quiet and prices gradually weakened throughout the week in sympathy with the downward tendency to wheat values. To-day, however, there was a slight recovery in prices, on a demand from shorts to cover contracts. In the spot market fair export sales were made early in the week for through shipment from the West as a result of a cut in rail freights, but at the close business

was quiet. To-day the sales included No. 2 mixed at 21½¢ @ 21¾¢. in elevator and No. 2 white at 23½¢ @ 24c.

## DAILY CLOSING PRICES OF NO. 2 MIXED OATS.

AGRICULTURAL DEPARTMENT REPORT ON CROPS OF THE YEAR.—The Agricultural Department's report for January was issued on January 26 as follows:

The estimates by States and Territories of area, product and value of the principal cereal crops of the United States for 1896, made by the statisticians of the Department of Agriculture, are as follows: Corn area, 81,027,000 acres; product, 2,283,475,000 bushels; value, \$191,007,000; yield per acre, 28.2 bushels; farm price per bushel, 21.5c. Winter wheat area, 22,794,000; product, 267,931,000; yield per acre, 11.8 bushels. Spring wheat area, 11,825,000; product, 159,750,000 bushels; yield per acre, 13.5 bushels; total wheat area, 34,619,000; product, 427,684,000 bushels; value, \$310,603,000; yield per acre, 12.4 bushels; farm price per bushel, 72.6 cents. Oats area, 27,868,000; product, 707,346,000 bushels; value, \$132,485,000; yield per acre, 25.7 bushels; farm price per bushel, 18.7 cents. Rye area, 1,331,000; product, 24,369,000 bushels; value, \$961,000; yield per acre, 18.3 bushels; farm price per bushel, 49.0 cents. Barley area, 2,951,000; product, 69,695,000 bushels; value, \$22,491,000; yield per acre, 23.6 bushels; farm price per bushel, 32.3 cents. Buckwheat area, 755,000; product, 14,090,000 bushels; value, \$5,522,000; yield per acre, 18.7 bushels; farm price per bushel, 39.2 cents. Potatoes area, 2,767,000; product, 25,236,000 bushels; value, \$72,182,000; yield per acre, 91.1 bushels; farm price per bushel, 25.6 cents. Hay area, 43,260,000; product, 59,242,000 tons; value, \$189,148,000; yield per acre, 1.37 tons; farm price, \$6.55 per ton. Tobacco area, 595,000 acres; product, 404,004,000 pounds; value, \$4,258,000; yield per acre, 678 pounds; farm price, 6 cents per pound.

The Minister to Argentina, Hon. William I. Buchanan, reports to the State Department under date of December 9:

"I have followed the news from the wheat districts very carefully for the past three months and have traveled through one of the wheat provinces. These observations lead me to believe that the quantity for export will be between 480,000 and 610,000 tons, probably nearer the first than the second figure. The amount exported during this year has been 564,359 tons."

For other tables usually given here see page 221.

## THE DRY GOODS TRADE.

NEW YORK, FRIDAY, P. M., Jan. 29, 1897.

The market has ruled quiet throughout the week in all departments. There has been a fair attendance of buyers, but their demands have been limited as before, in the great majority of instances to small quantities for immediate delivery. The continued conservatism of buyers in face of the low level of prices is a disappointing feature in the situation. Sellers believed that last week's reductions in bleached goods would release a considerable demand for these at least, but although there has been some increase in sales it has been of an unimportant character. Stocks in second hands are reported light in the aggregate, but this does not disturb buyers in view of the fact that first hand sellers are carrying abundant supplies of most descriptions of cotton goods, and there is nothing in sight at the moment to warrant expectations of any advance in quotations. Under these conditions there is an evident determination to let the manufacturers or their agents bear the burden of carrying merchandise until it is actually required for distribution to retailers and others. The woolen goods division shows a similar disposition on the part of the purchasing trades, a generally dull market being reported.

WOOLEN GOODS.—The reorder demand for light-weight woolen suitings and trousseings has been the best feature of the market during the past week. The orders coming forward are not large, but they are more numerous than usual for the time of year, and it looks as though the light-weight business would be prolonged beyond ordinary limits. The market is firm on most light-weight fancies, but staple goods are generally dull with some irregularity. The heavy-weight season is gradually getting under way so far as the display of new lines is concerned, but buyers are slow in manifesting any greater interest than before. The price situation is still indefinite. Overcoatings are selling moderately in heavy-weight plain goods and but indifferently in rough qualities. Cloakings continue inactive. Fancy dress goods in low and medium-priced lines are being reordered pretty generally in small quantities. Flannels and blankets inactive and featureless.

DOMESTIC COTTON GOODS.—The exports of cotton goods from this port for the week ending Jan. 25 were 2,122

packages, valued at \$107,840, their destination being to the points specified in the tables below:

NEW YORK TO JANUARY 25.	1897.		1896.

From New England mill points direct.

The demand for brown sheetings and drills has again been dull this week and there are very few instances of sellers moving goods in quantity. The tone of the market is easy and prices irregular. Bleached cottons have shown a slight increase in sales since last week's price reductions, but there has not been the expected expansion in business and the market is still irregular. Business of fair extent has been done in wide sheetings in some quarters at low prices. Coarse colored cottons have ruled inactive and in favor of buyers in all descriptions. Cotton flannels and blackstuffs dull and featureless. Kid finished cambrics slow of sale and irregularly in favor of buyers. White goods sell more readily on re-order demand. Fancy calicoes have been in steady request for moderate quantities, as have fine printed specialties. Regular prints are dull and easy to buy. Staple ginghams slow and featureless. Dress styles dull. Print cloths have ruled firm all week in face of a limited demand. Extras quoted at 2½¢. No decision has yet been arrived at on the projected short-time movement.

The value of the New York exports for the year to date has been \$930,250 in 1897 against \$872,701 in 1896.

FOREIGN DRY GOODS.—There has been a fair amount of general business in spring lines of dress goods, silks, ribbons and fancy goods, but it has been secured through small orders, buyers purchasing conservatively. The foreign goods market is generally steady.

## IMPORTATIONS AND WAREHOUSE WITHDRAWALS OF DRY GOODS.

The importations and warehouse withdrawals of dry goods at this port for the week ending January 28, 1897, and since January 1, 1897, and for the corresponding periods of last year are as follows:

Imports Entered for Consumption for the Week and Since January 1, 1897 and 1896.	Week Ending Jan. 28, 1897.		Since Jan. 1, 1897.		Week Ending Jan. 30, 1896.		Since Jan. 1, 1896.

# STATE AND CITY DEPARTMENT.

## TERMS OF SUBSCRIPTION.

THE INVESTORS' SUPPLEMENT will be furnished *without extra charge* to every annual subscriber of the **COMMERCIAL AND FINANCIAL CHRONICLE**.

THE STATE AND CITY SUPPLEMENT will also be furnished *without extra charge* to every subscriber of the **CHRONICLE**.

THE STREET RAILWAY SUPPLEMENT will likewise be furnished *without extra charge* to every subscriber of the **CHRONICLE**.

THE QUOTATION SUPPLEMENT, issued monthly, will also be furnished *without extra charge* to every subscriber of the **CHRONICLE**.

TERMS for the **CHRONICLE** with the four Supplements above named are Ten Dollars within the United States and Twelve Dollars in Europe, which in both cases includes postage.

### Terms of Advertising—Per inch space.)

One time.....	\$3 50	Thr Months (13 times)...	\$25 00
One Month (4 times)...	11 00	Six months (26 times)...	43 00
Two Months (8 times)...	18 00	Twelve Months (52 times)...	58 00

(The above terms for one month and onward are for standing cards.)

**The purpose of this State and City Department** is to furnish our subscribers with a weekly addition to and continuation of the **STATE AND CITY SUPPLEMENT**. In other words, with the new facts we shall give, the amplifications and corrections we shall publish, and the municipal laws we shall analyze in the "State and City Department," we expect to bring down weekly the information contained in the **STATE AND CITY SUPPLEMENT** to as near the current date as possible. Hence every Subscriber will at all times possess a complete and fresh cyclopaedia of information respecting **Municipal Debts**.

**Bond Proposals and Negotiations.**—We have received through the week the following notices of bonds recently negotiated and bonds offered and to be offered for sale.

**Augusta, Ga.—Bonds Proposed.**—It is reported that refunding bonds of this city to the amount of \$62,000 will shortly be issued.

**Barnesville, O.—Bond Sale.**—It is reported that \$13,936 of bonds of this place have been sold at 107-917. The securities bear interest at the rate of 6 per cent and mature in from 1 to 15 years from date of issue.

**Bradford, Pa.—Bond Offering.**—Proposals will be received until 5 o'clock P. M. March 1, 1897, by George C Fagnan, Mayor, for the purchase of \$22,500 of 4 per cent bonds of the city of Bradford. Interest on the securities will be payable semi-annually and \$2,500 of the principal will mature in 1907, \$10,000 in 1917 and the remaining \$10,000 in 1927. A certified check for the sum of \$500 must accompany each bid.

*The official notice of this bond offering will be found elsewhere in this Department.*

**Buffalo, N. Y.—Bond Offering.**—Proposals will be received until 12 o'clock noon February 5, 1897, by City Comptroller Erasmus A. Knight for the purchase of \$500,000 of registered consolidated loan bonds, to be dated January 1, 1897, and mature at the rate of \$25,000 yearly, beginning January 1, 1898.

The Comptroller will also receive bids on the same date and at the same time for the purchase of \$55,000 of registered park loan bonds, to be dated January 1, 1897, and mature at the rate of \$2,750 each year, commencing January 1, 1898. Both loans will bear interest at the rate of 3½ per cent, payable semi-annually on the first days of January and July at the office of the Comptroller, or at the Gallatin National Bank, New York City. The bonds will be ready for delivery on or before February 10, 1897. Each proposal must be accompanied by a certified check for two per cent of the amount bid for.

The bonded debt of the City of Buffalo on the first day of January, 1897, less the amount held in sinking funds, was \$12,125,802 18. The assessed valuation of the taxable real estate of the city by the rolls of the year 1896 is \$225,485,795.

**Camden, N. J.—Bond Sale.**—It is reported that \$75,000 of park bonds and \$25,000 of refunding bonds have been sold to E. C. Jones & Co. of New York at 102. These securities all bear interest at the rate of 4 per cent. The park bonds mature in 25 years and the refunding bonds in 20 years from date of issue.

**Centerville, Mich.—Bonds Defeated.**—Town Clerk E. L. Clapp reports to the **CHRONICLE** that the people of Centerville have voted against the proposition to issue bonds for the purchase of water works.

**Charleston, S. C.—Bonds Authorized.**—J. O. Lea, City Treasurer, reports to the **CHRONICLE** that the city of Charleston has been authorized to issue bonds to refund 6 per cent bonds of 1898. The new securities will bear interest at a rate not exceeding 5 per cent.

**Chelmsford, Mass.—Note Issue.**—E. W. Sweetser, Treasurer, reports to the **CHRONICLE** that the town has authorized the issuance of notes for \$13,000 to pay the cost of an addition to the school-house. The loan will probably be placed in Boston at 4 per cent interest. The notes will be payable in ten years from date of issue at the rate of \$1,200 each year.

**Cincinnati, Ohio—Bond Sale.**—On January 23, 1897, bonds of this city to the amount of \$13,273 60 were awarded to Messrs. Irwin, Ellis & Ballman of Cincinnati. Below we give a list of the bids received for the loan:

Irwin, Ellis & Ballman.....	105-18
Western German Bank.....	104-95
W. E. Hutton & Co.....	104-80
George Eustis & Co.....	104-80
S. Kuhn & Sons.....	104-89
Rudolph Kleybolte & Co.....	104-87
German National Bank.....	101-75
Seamsgood & Mayer.....	104-72
H. K. Snodley & Co.....	104-30
Atlas National Bank.....	104-10
Citizens' National Bank.....	103-04
Citizens' Bank of Harrison.....	103-00
S. A. Kean.....	101-50

The securities will be dated Dec. 20, 1896, and will mature one-tenth yearly from Dec. 20, 1897. Interest at the rate of 5 per cent will be payable semi-annually at the offices of the City Treasurer. The proceeds of this sale will be applied to the improvement of Delta Avenue.

**Cleveland, Ohio.—Bond Sale.**—Proposals will be received at the office of the City Auditor, Cleveland, Ohio, until 12 o'clock M., Feb. 24, 1897, for the purchase of \$350,000 4 per cent city of Cleveland park coupon bonds, maturing April 1st, 1927. The securities will draw interest from July 1, 1896, payable semi-annually at the American Exchange National Bank, New York City, where the principal also will be payable. Each bid must be accompanied by a certified check for 5 per cent of the amount bid for. The denomination of the bonds is \$1,000.

**Coranopolis, Pa.—Bonds Unsold.**—W. J. Neison, Chairman of the Finance Committee, reports to the **CHRONICLE** that the \$22,000 of water bonds offered by the borough on January 25, 1897, have failed to sell, and that they are now open to private contract. The securities will be dated December 1, 1896, and will mature in thirty years, redeemable at the option of the borough after five years from date. Interest at the rate of 4½ per cent will be payable semi-annually. The bonds will be of the denomination of \$500.

**Elsinor, Cal.—Bond Election.**—A proposition to issue \$20,000 of water-works bonds will be submitted to a vote of the citizens of Elsinor on Feb. 4, 1897. The bonds, if authorized, will be serial bonds of the denomination of \$500 and dated July 1, 1897. Interest at the rate of 6 per cent will be payable semi-annually on the first days of January and July at the office of the City Treasurer, and the principal will mature at the rate of \$500 yearly. Principal and interest will be payable in gold. A special assessment will be levied each year for the payment of the securities.

**Far Rockaway, N. Y.—Bond Sale.**—The \$85,000 of street improvement bonds offered by this village on January 25, 1897, have been awarded to Bertron & Storrs, of New York, at 111 25. A list of the bidders is as follows: Bertron & Storrs, D. A. Moran & Co., C. H. White & Co., W. Stanton & Co., E. C. Stanwood & Co., Leland, Towle & Co., New York Mortgage & Trust Co.

The bonds will be of the denomination of \$1,000 and dated January 1, 1897. Interest at the rate of 5 per cent will be payable semi-annually, and the principal will mature at the rate of \$1,000 yearly on January 25 for twenty-four years from date of issue and \$61,000 on January 25, 1923.

**Flushing, N. Y.—Bond Sale.**—On January 26, 1897, street improvement bonds of this village to the amount of \$130,000 were awarded to the New York Security & Trust Company. A list of the bids received follows:

New York Security & Trust Co.....	Premium, \$858 25
Daniel A. Moran & Co.....	800 00
Walter Stanton & Co.....	480 00
Oletz, Denison & Prior.....	240 00
Leland, Towle & Co.....	216 50
George M. Hahn.....	218 00
Henwell & Everitt.....	150 00
People's Savings Bank (for \$20,000).....	312 00

The securities will be coupon or registered bonds of the denomination of \$1,000. Interest at the rate of 4 per cent will be payable semi-annually on April 1 and October 1, and the principal will mature at the rate of \$4,000 yearly on October 1 from 1919 to 1919 inclusive. Principal and interest will be payable in gold at the Seventh National Bank, New York City.

**Galen, N. Y.—Bond Sale.**—On January 16, 1897, bonds of this town to the amount of \$6,000 were sold to Chas. D. Ely, of Clyde, N. Y., at 106-75. Other bids received for the loan were:

Frank J. Webb, Syracuse, N. Y.	106-75
Daulet A. Moran & Co	105-00
Street, Wykes & Co., New York	104-50
Benwell & Everitt, New York	104-13
E. C. Delano, Sodus	102-10
Isaac W. Sherill & Co., Poughkeepsie, N. Y.	102-06
Bertron & Storrs, New York	101-99
Walter Stanton & Co., New York	101-49
Edward C. Jones Co., New York	101-916
Geo. M. Hahn, New York	101-78
W. N. Deady, Lyons, N. Y.	101-675

The securities will be of the denomination of \$500. Interest at the rate of 6 per cent will be payable annually on April 1, at the Briggs National Bank, Clyde, N. Y., and the principal will mature at the rate of \$1,000 yearly on April 1 from 1899 to 1904, inclusive.

**Glynn County, Ga.—Bond Issue.**—It is reported that this county will issue bonds to the amount of \$60,000 for the purpose of building a court house.

**Hastings, Neb.—Bonds Withdrawn.**—City Clerk E. A. Frances reports to the CHRONICLE that the \$9,000 of water-works extension bonds offered by the city of Hastings on January 25, 1897, will not be issued, as the election authorizing the bonds has been declared illegal. The securities were to bear 5 per cent interest and mature in twenty years from date of issue, with option of call after five years.

**Helena, Mont.—Bonds Proposed.**—It is reported that bonds of this city to the amount of \$1,000,000 for the erection of a new Capitol are under consideration.

**Indianapolis, Ind.—Bond Sale.**—On Jan. 25, 1897, the Board of School Commissioners of this city sold \$180,000 of school bonds to the Merchants' National Bank of Indianapolis at a premium of 5-14 per cent. The issue will be in the shape of notes dated Jan. 31, 1897, and payable June 30, 1897. One hundred and forty thousand dollars of this issue will be used for current expenses and the balance for building purposes.

**Kankakee, Wis.—Bond Sale.**—School bonds of this place amounting to \$15,000 have recently been sold to N. W. Harris & Co. at 101-69. The securities bear interest at the rate of 5 per cent and mature in six and seven years from date of issue.

**Knoxville, Tenn.—Bonds Authorized.**—Market house and school-building bonds of Knoxville to the amount of

\$50,000 have been authorized. The securities will soon be advertised for sale.

**Lehigh, Pa.—Bond Election.**—It is reported that the proposition to issue \$23,000 of electric-light bonds will soon be put to a vote of the people of this place.

**Madison, Minn.—Bond Election.**—Court-house bonds of this municipality to the amount of \$25,000 have been proposed, and an election will be held to determine the question of issuing the same.

**Middle Loup Valley Irrigation District, Sargent, Neb.—Bonds Unsold.**—Charles Nicolai, Secretary, reports that five bids were received on January 19, 1897, when \$100,000 of bonds of the above district were offered for sale, but owing to the small amount bid for, all offers were rejected. The securities will bear 6 per cent interest, payable semi-annually in January and July, and the principal will mature part yearly from 1908 to 1917, inclusive. The issue is for the purchase of an irrigation plant.

**New York.—Bond Legislation.**—The bill introduced at the instance of Comptroller Roberts exempting from taxation all bonds hereafter issued by the State was passed by the Senate on Thursday after considerable debate by a vote of 26 to 11. The bill now goes to the Assembly. If the result there is favorable, it is understood that the Comptroller will re-advertise the \$4,000,000 of canal bonds for which bids were received on January 12, 1897.

**Omaha, Neb.—Bond Sale.**—The \$316,000 of renewal bonds of this city which were not awarded on January 15, 1897, have been taken by R. Kleybolte & Co. at par and interest. The securities will bear interest at the rate of 4½ per cent and the principal will mature in ten years from date of issue.

**Philadelphia, Pa.—Bond Sale.**—On Jan. 26, 1897, bids amounting to over \$11,000,000 were received by the city of Philadelphia for \$2,400,000 of the subway loan and \$2,000,000 of Delaware Avenue bonds. These bonds were advertised to be sold on Jan. 15, but owing to a defect in the ordinance authorizing the bonds the bids were not opened until the date mentioned above. A list of the principal bids received follows. For the subway loan, \$2,400,000, Girard Fire & Marine Insurance Company, \$50,000 of any series, 4 per cent, 103-50.

## NEW LOANS.

**\$75,000**

**Town of Stamford, Conn.,**  
Funding 4% Gold Bonds,  
DUE 1927.

Proposals will be received by the Selectmen and Treasurer of the town of Stamford, Conn., until noon, Monday, February 15th, 1897, for the purchase in whole or in part of \$75,000 of the bonds of the town of Stamford, Conn.

These bonds will be issued to retire an equal amount of the floating debt of the town, contracted by expenditures for school houses, bridges and other permanent improvements, and are payable in gold upon February 1st, 1927. Interest payable in gold August 1st and February 1st at office of Treasurer. Bonds will be delivered on February 20th, 1897, when the price bid must be paid to the Treasurer by the successful bidders.

Proposals should be sealed and addressed to "The Town Treasurer, Stamford, Conn., and marked 'Proposals for Bonds,' and must be accompanied by a certified check for two (2) per cent of the amount. The right to reject any or all bids is reserved. Sinking fund provides for payment at maturity.

It is proposed to issue coupon bonds of the denomination of \$1,000. Bonds may be registered.

The bonds are issued under Sec. 140, Revised Statutes of the State of Connecticut, 1894, and by authority of a town meeting held January 13th, 1897. For further particulars address

W. D. DASKAM,  
Treasurer, Town of Stamford.

## BOND CALL.

**City of Sioux City, Iowa.**

Holders of Sioux City Improvement Bonds are hereby requested to present for payment at the Northwestern National Bank, Sioux City, Iowa, where payment will be made to holders (if sent to said bank) in New York or Chicago exchange, free of charge, the following described bonds:

"A" 195 to 261, both inclusive.

These bonds are dated at various dates from June 10th, 1890, to September 3d, 1891, and are optional five years from date of issue. They have been issued by the City of Sioux City, Iowa, for grading inter-sections.

Interest will cease February 15th, 1897.

JOHN HITTLE,  
City Treasurer.

**DEANS INTEREST TABLES**  
\$5 00. D. B. ELY, Laclede Building, St. Louis.

## NEW LOANS.

**\$6,000,000**

**Commonwealth of**  
**MASSACHUSETTS.**  
**3½% WATER LOAN.**

Sealed proposals for the purchase of bonds of the "Metropolitan Water Loan" for Six Million Dollars (\$6,000,000) will be received at this office until 12 o'clock, noon, on Monday, Feb. 8, 1897, at which time they will be publicly opened and read.

This loan will be issued in coupon bonds of \$1,000 each, dated July 1, 1895, payable July 1, 1935, with interest at the rate of three and one half (3½) per cent per annum, from Jan. 1, 1897, payable semi-annually on the first days of January and July in each year, and may be delivered as coupon or registered bonds at the option of the purchaser.

Principal and interest will be paid in gold coin of the United States of America, or its equivalent, at the office of the Treasurer of the Commonwealth in Boston.

The "Metropolitan Water Loan" is authorized by Chapter 484 of the Acts of 1895.

The right is reserved to reject any or all bids.

All bids must be accompanied by certified checks for 2 per cent of the amounts bid for.

E. F. SHAW,  
Treasurer and Receiver-General.

Western Saving Fund, \$100,000 series H, 3½ per cent, 101 76; \$100,000 series I, 3½, 101 85; \$100,000 series J, 3½, 101 94.

H. A. Brantigan, \$700 series O, 3½ per cent, 102 60. For the Delaware Avenue loan, \$2,000,000, Brown Brothers & Co. bid for the entire loan, all or none, at 3½ per cent, at premiums graduated from 101 760 to 103 060.

Drexel & Co. bid for the same, all or none, at 3½ per cent, and 104 37 99, the same figures as for the subway loan.

Frederick Taylor & Co. of New York bid for \$500,000 out of any series of 3½ per cent at premiums ranging from 101 200 to 103 170, according to the series from which the award is made.

The Fidelity Company bid for \$100,000, series A, 3½, at 100 and interest; \$100,000, series B, 3½, at 100 and interest, and \$50,000, series C, 3½, at 100 and interest.

The Northern Savings Fund bid for \$50,000, series A, 3½ per cent, at 100.

Several other bids were received for small lots. The bonds

were awarded to Drexel & Co. and Harvey Fisk & Sons on their joint bid of 104 37 99 for 3½ per cent bonds.

A further description of these bonds will be found in the CHRONICLE of January 9, 1897.

Pocahontas, Va.—*Bond Offering*.—It is reported that James A. Browning, Mayor, will receive proposals for the purchase of bonds of this place to the amount of \$5,000.

Rensselaer County, N. Y.—*Bond News*.—The \$33,000 of 4 per cent refunding coupon bonds to be issued by Rensselaer county will be dated February 1, 1897; interest will be payable semi-annually, and the principal will mature in nineteen years from date of issue, at the rate of \$2,000 each year. The denomination of the securities will be \$1,000. The total bonded debt of the county, excluding this issue, is \$850,000; the assessed valuation for 1896 is \$73,013,577, and the population in 1890 was 124,511.

Rye and Harrison Joint Union Free School District, N. Y.—*Bond Sale*.—On January 16, 1897, Wharton & Schlesinger of New York were awarded \$5,500 of 4 per cent 19 year bonds of this district for \$5,523 05. Three bids were received for the loan.

St. Albans, Vt.—*Bond Sale*.—On Jan. 27, 1897, \$36,000 of refunding coupon bonds of this village were awarded to the People's Trust Co. of St. Albans, at a premium of \$1,033 43. Nine bids were received. The securities will be dated Feb. 1, 1897; interest at the rate of 4 per cent will be payable semi-annually, and the principal will mature at the rate of \$5,000 annually. The denomination of the bonds will be \$1,000.

Wisconsin.—*Bond Legislation*.—It is reported that the Legislature of this State will shortly pass an act legalizing the incorporation of villages which were organized under a law that was declared unconstitutional by the Supreme Court about a year ago. Several of these villages have issued bonds and the purpose of the proposed act, it is declared, is to make these obligations valid.

Wilmington, Del.—*Bond Sale*.—The \$176,000 of 4 per cent refunding bonds offered by this city on Jan. 26, 1897, have been awarded to the Equitable Guarantee & Trust Company of Wilmington at a premium of \$3,625. Other bids received for the loan were as follows.

## NEW LOANS.

### SALE OF

## BALTIMORE CITY

### 3½ Per Cent Funding 1936 Loan.

Proposals will be received until noon, Monday February 1, 1897, at the Mayor's Office, for the purchase, in whole or parts, of \$1,453,300 of the stock of the City of Baltimore, bearing interest at the rate of 3½ per centum per annum, payable semi-annually on the first days of January and July in each and every year, interest commencing January 1, 1897.

This stock is issued by virtue of ordinance No. 112, approved July 2, 1896, authorizing the issue of an amount of stock not exceeding \$1,600,000 for the purpose of funding the floating debt of the City of Baltimore existing December 31, 1895, and is redeemable on the first day of July, 1935. The city does not tax its stock, but pays the State tax on this issue.

Proposals must be sealed and addressed to the Mayor as Chairman of the Department of Finance and marked "Proposals for Funding 3½ 1936 Loan." The right is reserved to reject any and all bids.

ALCAZAR HOOVER, Mayor,  
Chairman Finance Commissioners.

### THE FINANCIAL SITUATION.

The chief incidents of the week influencing affairs have been—the reporting back on Monday to the Senate from the Foreign Relations Committee of the general arbitration treaty with some unfortunate amendments which make the rumor highly welcome that its consideration at this session is “practically impossible”; the announcement of the sale to the Deutsche Bank and others, by the managers of the Bankers' Syndicate who underwrote the Northern Pacific's plan of reorganization, of two-thirds of the Northern Pacific's stock accruing to the Syndicate through the failure of the original holders to pay the assessment thereon; the announcement also of the sale, to certain banking and investment interests in this city by the German holders of the Oregon Railway & Navigation Company's 5 per cent bonds, of the preferred stock of the new company accruing to the holders of said bonds under the plan of reorganization, a sale which it is expected will result in the establishment of close and harmonious traffic relations between the Northern Pacific and the Great Northern and the Union Pacific Railroad managements; finally, the reduction of the discount rate of the Bank of England from  $3\frac{1}{2}$  to 3 per cent.

The above-mentioned sale of the Northern Pacific stock, also the sale of the Oregon Railway & Navigation Company's stock, and likewise the lower minimum interest rate announced by the Bank of England, have each had an influence on our foreign exchange market. We have been informed that the transaction which we first referred to called for about \$5,000,000 to be paid by Berlin and the second called for about \$3,000,000 to be paid by New York. Consequently these twin transactions have furnished not to exceed a net amount of about \$2,000,000 of exchange which has already been sold and absorbed by our market. Probably these transactions and the small movement of capital they caused were an influence in helping to give the weaker tone and the lower rates which prevailed for foreign exchange the greater part of the week. The lower rate of the Bank of England likewise acted in the same direction, for its effect was anticipated in the lower rates in the open market at London, and has taken away, at least for the time being, the last fraction of profit which existed in the business of purchasing exchange for investment.

It seems to be as certain now as any fact that has not yet been officially announced that there is to be an extra session of Congress, and that it will open about the 15th of March. If such a session is to be called, no doubt the earlier it begins the better it will serve business interests. This is an event which for a time will probably affect foreign exchange by increasing the inflow of foreign goods to secure the advantage of the lower duties. Indeed our merchandise imports have already begun to indicate the coming of a higher tariff. We say they indicate that because neither business nor values are in any shape to stimulate an expanding movement of foreign merchandise to the United States. It is not impossible that as a result there should be some outflow of gold from this side before summer sets in. If there is, there is every reason to suppose that it will not assume large proportions and cannot be at all disturbing; for we have plenty of gold and an outflow of the metal at about this time of the year when exports always fall off is wholly natural. Besides, it is possible that no such outflow will occur.

Many good judges think it will not; that the earnings of our railroads will by that time begin to show better results and induce foreign buying. When business begins to move, no industry will quicker feel the impulse than our railroads. Such arrangements as those announced this week and referred to above ensuring harmony in action between the roads instead of hostility as heretofore are a very encouraging preparation.

The net gold in the Treasury officially reported from Washington on Friday of last week was \$144,522,612. The amount so reported yesterday was \$145,214,238. Bankers report that as the week closes the movement of currency toward this centre has in considerable measure subsided, for the moment at least. They also say that they have been able to place some bank money this week on call at 2 per cent. It is regarded as probable that the bank loans will show a moderate increase in this week's return.

The December statement of earnings of the Pennsylvania Railroad is much better than the statements for the months immediately preceding, and thus it is evident that business is slowly growing in volume notwithstanding adverse conditions. Of course the comparisons with last year still show considerable losses, but these losses are much smaller than they were. On all lines east of Pittsburg and Erie the decrease in gross for December is \$552,600 and on all lines west of Pittsburg and Erie the decrease is \$627,100. This makes \$1,179,700 loss in gross on the combined system. In November the loss was as much as \$1,934,900. The striking feature this time is that there has been a very heavy contraction in expenses, amounting on the combined system to \$1,012,500 and leaving a loss of only \$167,200 in net. The following is a six-year comparison on the lines directly operated east of Pittsburg and Erie—the only part of the system for which we can make such a comparison.

Lines East of Pittsburg.	1896.	1895.	1894.	1893.	1892.	1891.

We have this week prepared our statement of bank clearings for the month of January, and it makes a more favorable comparison with last year than might have been supposed possible. The loss for the whole country

is only 2.6 per cent, though outside of New York the decrease is 7.1 per cent. It must be remembered, too, that the results this year are based on one less business day, there having been five Sundays in January 1897, against only four in January 1896.

## MONTHLY CLEARINGS.

Month.	Clearings, Total All.			Clearings Outside New York.		
	1896.	1895.	P. Ct.	1896.	1895.	P. Ct.
	\$	\$		\$	\$	
July.....	4,368,734,408	4,562,547,044	-4.4	1,853,344,718	2,035,290,149	-7.5
August.....	3,551,552,303	4,138,315,716	-14.2	1,580,980,199	1,821,502,672	-13.3
September.....	3,701,560,057	4,175,216,505	-11.3	1,638,825,984	1,802,235,498	-9.1
3d quar.....	11,617,146,768	12,876,078,265	-9.8	5,102,500,781	6,659,018,316	-9.8
October.....	4,591,556,715	6,233,792,576	-12.3	1,980,739,134	2,303,173,816	-14.0
November.....	4,608,478,935	4,739,193,703	-2.8	1,921,935,491	2,145,987,450	-10.4
December.....	4,707,831,207	6,075,378,431	-7.2	2,051,692,109	2,165,486,397	-5.3
4th quar.....	13,910,962,857	15,031,864,710	-7.6	6,954,066,737	8,614,617,683	-10.0
1897.				1896.		
January ..	4,509,217,476	4,629,142,094	-2.6	1,919,470,143	2,067,048,964	-7.7

Looking at the returns for the separate cities, it is found that New York, Boston and several of the other New England points actually show improved clearings and that it is owing to this fact that the comparison for the country as a whole is so encouraging. At the Western and Southern points there are general losses; in most cases, too, the losses are pretty heavy.

## JANUARY BANK CLEARINGS AT LEADING CITIES.

Money on call, representing bankers' balances, has loaned this week at 1½ and at 2 per cent, though generally at 1½ and at 1½ per cent, averaging about 1½ per cent. Banks have made liberal offerings at 2 per cent early in the day and in some cases have succeeded in placing small amounts. Later in the day offerings at 1½ and 1½ per cent have more than supplied the demand and the market has generally closed at the last-named rate, though in a few cases banks have then been able to loan at 2 per cent. The trust companies quote 1½ per cent

as the minimum. The inquiry for short-time money is small but there is a good demand for periods beyond four months. Rates are 2 per cent for sixty days, 2½ per cent for ninety days and 3 per cent for four, five and six months. Banks are quite anxious to place money for any period under four months and they offer liberal terms, but not below 2 per cent. The demand for commercial paper is fair and the supply good, with indications of a little firmer rates, and if these should advance doubtless more business would be done. Quotations are 3 per cent for sixty to ninety day bills receivable, 3½@4 per cent for first class and 4@5 per cent for good four to six months single names.

Two events of importance were announced this week. The cable on Thursday reported that at last the foreign representatives at Constantinople, acting in complete accord, have concluded a scheme of Turkish reforms and have agreed upon potential coercive measures, the ratification of which by the cabinets of their governments they are now awaiting. It is also announced that the plan for Cuban reforms was signed by the Queen Regent of Spain on Thursday, and the cable reports that there was some buying in London of Spanish securities for Paris account in the expectation that the Cuban troubles will be speedily ended. The Bank of England's minimum rate of discount was reduced on Thursday from 3½ per cent, at which it had stood since January 21, to 3 per cent. September 10 1896 there was an advance in the rate from 2 to 2½ per cent; on the 24th from 2½ to 3 per cent, and on October 22 from 3 to 4 per cent. On January 21 it was reduced from 4 to 3½ per cent and now we have a reduction to 3 per cent. The cable reports discounts of sixty to ninety day bank bills in London 1½ per cent. The open market rate at Paris is 1½ per cent and at Berlin and Frankfurt it is 2½ per cent. According to our special cable from London the Bank of England gained £201,886 bullion during the week and held £37,307,998 at the close of the week. Our correspondent further advises us that the gain was due to the import of £109,000 (of which £85,000 were from Egypt, £15,000 from Australia and £9,000 from China) and to receipts from the interior of Great Britain reaching £93,000 net.

The foreign exchange market has been irregular and lower the greater part of the week. The inquiry for long sterling for investment appears to have ceased, the low discount rates in London making such operations unprofitable. Bankers say that there have been no offerings of maturing sterling, and it is quite possible that more of these bills which have been carried here have been sent to London for payment. The range for posted rates on Monday was from 4 85 to 4 86 for sixty day and from 4 87½ to 4 88 for sight, there being no change compared with the range on Friday of last week. Rates for actual business closed on Monday one quarter of a cent lower than on Friday for long and short sterling, at 4 84½ @4 84½ for the former and 4 86½ @4 86½ for the latter, while cable transfers were half a cent lower at 4 86½ @4 87. The tone was weak during the day but steady at the close. On Tuesday the range for posted rates was from 4 85 @4 85½ for sixty day and from 4 87½ @4 88 for sight, and the market was steady without change in rates for actual business. On the following day the tone was easier though not quotably lower. On Thursday the only change made was an advance by Brown Bros. in the sixty-day rate,

which was then uniform at 4 85½, while the range for slight was 4 87½ to 4 88, and the market was quoted steady to firm at unchanged figures for actual business. Yesterday all bankers quoted 4 85½ and 4 87½.

### PRESIDENT ROBERTS AND THE PENNSYLVANIA RAILROAD.

The name of President Roberts, whose death occurred last Saturday, will always remain intimately associated with that of the Pennsylvania Railroad, no less intimately than the names of Thomas A. Scott and J. Edgar Thomson. This is so not because Mr. Roberts gave his whole life to the service of the road, but because he possessed in an eminent degree just the qualities needed in the executive head of the enterprise during the years when he administered its affairs. We question whether during those years any one better qualified for the task could have been found, and we are confident when the history of this wonderful undertaking comes to be written it will be acknowledged that to George B. Roberts belongs much of the credit for its strength and the unimpaired prosperity which it maintained at a time when so many other large railroad undertakings suffered so severely and some succumbed altogether.

The Pennsylvania was a great railroad system when Mr. Roberts succeeded to control—then as now in some respects the greatest in the world. It is evidence

of his ability and capacity that during the long term of his presidency it maintained this pre-eminence and even increased it. Scott and J. Edgar Thomson of course created the system, and to their genius the Pennsylvania Railroad owes much. The two men, as we have pointed out on some previous occasions, were admirably adapted to supplement each other's gifts, Thomson being excellent in planning, Scott in executing. Thomson was, perhaps, not less daring than Scott, but the spirit of conservatism was more fully developed in him, and no doubt he often held Scott in check. It was under such chiefs that Mr. Roberts received his training, and possessing administrative qualities of a high order he steadily advanced from one position to another, having entered the service of the road as a rodman in 1851, which sufficiently attests the character of the man. But we need hardly say that it is one thing to do excellent work under the guidance of others, quite another thing to map out and define a line of policy for one's self. In Mr. Roberts' case, too, new requirements had to be met.

Mr. Roberts assumed the incumbency of the President's office in 1880, on account of the ill health of Scott, who died the next year. Thus he was the executive head of the enterprise for a period of nearly seventeen years—a period in some industry. The trying in the history of the railroad industry when the country was in the midst of great prosperity, gold payments the year before having infused new life into all our industries. But this, as we know, was a period of short duration, and pretty soon the trunk lines were confronted with trials and struggles that were calculated to test their strength to the utmost. Thus a different order of talent was required from that which distinguished those great giants—Thomson and Scott of the Pennsylvania, Cornelius Vanderbilt of the New York Central, and John W. Garrett of the Baltimore & Ohio—in the period when they were controlling the destinies of their respective systems and were contesting for mastery. In those early days aggression and expansion were the watchwords. In this competition and rivalry the Pennsylvania retained its pre-eminence as the foremost system of the time. But its future was by no means free from doubt. After the panic of 1873 there came a trying period for the trunk lines. The Pennsylvania especially, felt the pressure and strain. It had been rather more venturesome than the others, taking larger risks and assuming heavier burdens. The doubts and misgivings of that period found expression in the appointment in 1874 of the celebrated Investigating Committee, whose report forms one of the classics of railroad literature. The company subsequently had to reduce its dividends, and in 1878 paid only two per cent. The Baltimore & Ohio, on its part, came down from 10 per cent per annum to 8 per cent and paid the dividends part of the time in scrip. The New York Central continued 8 per cent cash payments throughout the whole period.

As already said, when Mr. Roberts assumed the executive duties the company had passed safely through this somewhat critical period in its history—the country, and the railroads with it, had entered upon a fresh career of prosperity. But new problems quickly began to present themselves. We shall see presently how Mr. Roberts met these problems. First, however, it should be noted that the Pennsylvania owes much to him for the safe and conservative policy which he pur-

sued in the conduct of the property. One of the questions that must have come up very early in his management was whether, now that prosperity had returned, the old policy of aggression and expansion should be resumed and the confines of the system further extended, or whether the company should strictly limit itself to the old domain. The Investigating Committee already referred to had recommended that the bounds of the system be not extended. On the other hand, Mr. Roberts, as we have seen, had been brought up under Thomson and Scott and had their example in favor of a policy of expansion. Entirely apart from this, however, the temptation to pursue such a policy must have been very great. It was an era of consolidations and expansion, when everything was prospering, and when railroads appeared to be mines of wealth; and the scene of activity was chiefly in the West, beyond the boundaries of the Pennsylvania system. New railroad confederations of gigantic size were being created over night, and even the smallest lines were reaching out into new territory. It seemed almost certain that at least in point of mileage the Pennsylvania would have to yield up first place to some of these new combinations unless it, too, joined in the general movement. Then also the owners of its most powerful rival, the New York Central, had large interests in several of the systems west of Chicago, affording plausible reasons, if such had been desired, for extending the interests of the Pennsylvania in the same direction.

Under these circumstances a man of different temperament than President Roberts would almost certainly have been led into ventures that might have jeopardized the strength and greatness of the Pennsylvania system—enlarging its mileage and territory, while imperilling its security and prosperity. We may go further and say that very few persons situated as Mr. Roberts was, no matter what their strength of character, would have found it easy in contemplating the general policy of aggrandizement which then prevailed in the railroad world, and having at their command the Pennsylvania's large resources, its splendid credit and its wonderful earning capacity,—would have found it easy in such conditions to control their enthusiasm and refrain from leading the Pennsylvania, too, into a new policy of conquest. We question whether Scott himself had he lived would not finally have yielded to a desire to extend the system on to the Pacific coast. Yet Scott while aggressive was by no means reckless. President Roberts was eminently conservative and was never lured by visions. He recognized that success lay in developing the territory already acquired rather than in branching out into other territory, and he was never disposed to give favorable consideration to propositions looking to the crossing by the Pennsylvania of the Mississippi River, which has always marked the western boundary of the system. That this was, on the whole, the wisest policy to pursue must be evident to every one who reflects how poorly all the trans-Continental lines in the West have fared, and what tremendous losses have been incurred through the failure of so many of these lines.

This policy was best also in view of the new conditions which arose in the territory east of the Mississippi. Mr. Roberts's plan, as stated, was to develop to the utmost the opportunities for business within that area, which was the Pennsylvania's legitimate domain. In pursuit of that plan it became necessary to acquire some new lines and considerable branches and feed-

ers. Hence while a spreading-out process, which would have given the system merely a vast aggregate of mileage and nothing else, was rigidly discountenanced, it is yet true that the extent of the system was very greatly increased under his management, and it now embraces about 9,000 miles of road, against about 6,000 miles at the beginning of 1880.

In acquiring the additional mileage large sums of money of course were necessary, and at the same time heavy outlays were required for second track, equipment, sidings and other essentials. Thus the capital account of the company was very greatly increased. One evidence of this is found in the fact that the stock is now almost 130 million dollars, while in 1880 it was not quite 69 million dollars. In other words, the company has 61 million dollars more stock on which to earn a return besides having to provide for the increase in interest and rental charges which has occurred. But this happened at a time when the conditions as to rates were becoming steadily more unfavorable, making the situation doubly trying. On the lines east of Pittsburgh and Erie the average received per ton per mile in 1880 was 9.18 mills; in 1895 it was only 5.63 mills. The profit per ton per mile dropped from 3.78 mills in 1880 to 1.66 mills in 1895. In other words, in 1895 it took two and a-quarter tons of freight to earn the same amount of money net as was yielded by one ton in 1880. The extent to which the traffic was developed to overcome this loss in profit may be judged from the fact that on these lines east of Pittsburgh and Erie 8,152 million tons of freight one mile were carried in 1895, against only 3,239 million tons in 1880.

The latter circumstance shows how successful the management was in meeting the new conditions. Another fact shows this even more clearly: Through the whole of the period of depression since the panic of 1893, which depression the Pennsylvania felt more severely than any other system because it runs through the heart of the coal and iron districts, where the depression was most pronounced,—through the whole of this period the company has been able to maintain five per cent dividends on 130 millions of stock. It was able to do this even in 1894, when the gross earnings on the entire system east and west of Pittsburgh fell off no less than 16½ million dollars as compared with the year preceding. The dividend did not come out of accumulated surplus either, but was earned in the year in which it was paid. We may note, too, as showing the high credit maintained by the company through it all that in 1895 it floated a sterling loan bearing only 3½ per cent interest at par. How different the experience of some of the other systems has been under these trying conditions appears from the fact that the Erie, its most immediate competitor on the north, has but recently emerged from insolvency, and that the Baltimore & Ohio, its most immediate competitor on the south, is still in the throes of insolvency.

Such is the record and achievement of President Roberts—aided of course by his able lieutenants. When one looks back over the history of the property one is forcibly impressed with the fact that the Pennsylvania through its whole history has been very fortunate in its chiefs. It was the genius of J. Edgar Thomson and Thomas A. Scott that created the system, it was the high talent of George B. Roberts that preserved and perfected it. The same good fortune seems now to have attended it in the selection of Mr. Frank Thomson as

the successor to Mr. Roberts. Like Mr. Roberts, Mr. Thomson has "grown up" with the property and for many years has had a very active share in its management. Mr. Roberts had the faculty possessed by all men of great administrative talents of surrounding himself by persons of high ability and of impressing upon them his views and individuality. Frank Thomson, John P. Green, Charles E. Pugh, and others that might be mentioned, are all individuals of that order. Hence we are justified in saying that the same policy which controlled the Pennsylvania management while Mr. Roberts was alive will dominate it now that he is dead.

#### ARBITRATION AND THE SENATE.

After four weeks' consideration of the arbitration treaty the Senate Foreign Affairs Committee has reported the treaty to the Senate with amendments. During this period of deliberation there has been a notable demonstration of public opinion in favor of the treaty. Appeals for ratification have been presented from numerous commercial and religious bodies, from a very large number of private citizens, by enrolled petition or otherwise, and from several State Legislatures approving by formal resolution. Public sentiment, in short, has expressed itself emphatically; an exceedingly wholesome sign of the times. A few of these petitions have doubtless gone too far in upbraiding Senators for not voting assent at once. In a public matter of such magnitude, careful and reasonably prolonged deliberation is entirely proper; indeed, the Senate's function as a ratifying body imposes deliberation as a duty. Such tone of protest as existed had its origin, we believe, less in impatience over the mere fact of delay than in misgiving over rumors which were circulated regarding the Senate's alleged purpose to suppress the treaty. In any case, even the appeals which overstepped the limits of good judgment served to emphasize the verdict of the people.

The treaty, then, has been reported, but with amendments which restrict materially its scope of operation. The essential alterations are three in number. First, the agreement of the governments under the original treaty to arbitrate "all questions which they may fail to adjust by diplomatic negotiation" is narrowed by the new proviso so that no questions affecting foreign or domestic policy, or the relations of either party to any other State or Power, by treaty or otherwise, shall be thus submitted. Second, the original agreement, that when arbitrators in pecuniary cases fail to choose an umpire such choice shall be relegated to the King of Sweden, is stricken out, leaving no provision for settlement in case of deadlock. Third, the original agreement that pecuniary cases, when the arbitrators vote on motion that principles of general importance are involved, may be referred to the highest court of arbitration, is so amended as to authorize either Power, "at any time before the close of the hearing," to declare that grave general questions are involved, and thereupon to withdraw the case from arbitration.

The practical effect of these amendments is easy to discern. The first renders it feasible for either executive to refuse an arbitration on the plea, of the propriety of which that executive alone is judge, that questions of "home or foreign policy" are involved. This plea might readily be advanced in any case which could arise. The second amendment makes deadlock

always possible in arbitration of pecuniary cases, an outcome which would never have been possible under the original agreement. The third opens the way to withdrawal of any pecuniary case from arbitration at the will of either party, and at any time during the progress of the arbitration. The comment of the London press on these amendments to the treaty is that they "have left it valueless," that they "exclude every question of real importance." With this judgment, in the main, we regret to say that we agree. The treaty as amended will still, by the mere fact that permanent machinery exists for arbitration, afford a means of delaying action, of encouraging sober second thought, and of allowing angry passion to subside. This alone is an advantage not to be under-estimated. But there is not the least assurance in the amended treaty that an administration would not begin with a refusal to employ the court of arbitration. No power could force the administration's hand. The treaty as laid before the Senate required that the Executive, in such a case, should at least try arbitration first. The treaty as amended carefully provides that if he choose, he need not try it. We are therefore driven reluctantly to the conclusion that the Foreign Affairs Committee has undone nearly all of Secretary Olney's work.

It appears, from what can be learned of the Senate's proceedings in the matter, that two elements of opposition to the original treaty have existed. One of these factions is opposed to the treaty as a whole, and wishes to repudiate the entire negotiation. Such, at least, we assume to be the fact from last Saturday's division in the Foreign Affairs Committee, when a minority of four—Senators Morgan, Daniel, Cameron and Mills—voted against reporting the treaty to the Senate, even as amended. The second element of opposition consists of Senators who regard the treaty as committing the United States Government too far, and as not being surrounded with sufficient safeguards. The objections of these Senators are reflected in the amendments which we have already noticed. It has also been intimated, chiefly in newspaper dispatches from the Capital, that some Senators oppose the treaty simply because of hostility to the Administration. This suggestion we are unwilling to believe. There is undoubtedly a considerable element, in both houses of Congress, which harbors more or less feeling of resentment against the present Administration. This is particularly true of the free-silver-coinage Senators, whose legislative good-will the President has certainly been at no pains to win. But we should be loath to think that antagonism on a domestic fiscal question could lead a Senator of the United States to stand in the way of international peace, simply because the plan proceeds from an Administration which he personally dislikes. Such a motive would be worthy, not of a statesman, but of a peevish child. It has also been suggested that a portion of the Senators wish that such credit as may be derived from a successful arbitration treaty may inure to the next Administration. Obstruction based upon these motives we do not believe exists. It would be not only wrong but silly. Whenever this treaty is at length approved, and in whatever form, the American people will award the honor justly. The public man who eventually forces ratification will be properly esteemed and praised; but the credit for the inception, negotiation and completion of the work will rest then as it rests to-day, on President Cleveland, Secretary

Gresham, Secretary Olney and Sir Julian Pauncefote.

There is one argument, however, which has unquestionably played its part in the emasculating work of the Senate on the treaty. The theory that Great Britain will somehow get the advantage of the United States in the proposed arrangement has been publicly advanced. Some quoted remarks, from sources by no means irresponsible, have gone so far as to intimate that the whole negotiation is a trap contrived by artful European diplomacy from which it is the Senate's privilege to save the country. Had such a theory originated only in random newspaper discussion, we should be disposed under the circumstances to treat it with entire neglect. But it is fathered in more responsible quarters. Precisely this suggestion has been ascribed in published interviews to Senators who will have a vote upon the measure. It may have influenced the general opposition to the treaty as at first proposed. We certainly do not know what else could have induced the votes cast in committee against the entire scheme of arbitration.

In order, therefore, that the character of this argument may be properly understood, it is needful to notice briefly the negotiations of which the pending treaty is a product. The diplomatic correspondence opened on February 27 of last year with a note from Mr. Bayard, our Ambassador at London, to Lord Salisbury. This note and the British Ministry's reply on March 3 had reference to the Venezuela dispute, and did not discuss the problem of general arbitration. Two days afterwards however, the British Government carried the matter a step further, and the Premier instructed Sir Julian Pauncefote, Minister at Washington, to re-open the negotiations for a general arbitration treaty, which had been interrupted in May 1895 by the death of Secretary Gresham. It will thus appear that although, through Mr. Gresham's urgent labors in its behalf, the scheme of general arbitration originated with the United States, Great Britain made the first move for the resumption of the discussion.

Briefly summarized, Lord Salisbury's proposition, through his Minister at Washington, was as follows: Each Power was to appoint as permanent arbitrators two or more judicial officers. In every arbitrable case each Power should select as its arbitrator one of these permanent officers, the two selected arbitrators to choose an umpire. To this umpire all questions on which the arbitrators disagreed should be referred, and in default of their agreement on the general question the umpire's finding should be final. Under the jurisdiction of this court of arbitrators should be placed all pecuniary disputes, with, however, this reservation: that claims involving a greater sum than £100,000, or involving territorial rights and jurisdiction, should, on the appeal of the Government against whom the award is found, be reviewed by a special board of three Supreme Court Judges of Great Britain and three from the United States; but on such appeal a majority of five to one in the court of six was to be required to overrule objections. Moreover, the Salisbury scheme of arbitration closed with this significant exception: "Any difference which, in the judgment of either Power, materially affects its honor or the integrity of its territory, shall not be referred to arbitration under this treaty except by special agreement."

The text of this closing reservation of Great Britain is especially interesting, in view of the intimation that the binding provisions of the treaty as concluded were

a diplomatic trick. How far such allegation has a reasonable basis may be judged from the heads of the English proposition as we have summarized them. The Senate Committee, by its alterations in the concluded treaty, reverts almost exactly to the original proposition of the British Government. Both the Foreign Affairs Committee in its recent action, and Lord Salisbury in his preliminary plan, agree that an indefinite number of cases may, at the Administration's will, be excluded from the court of arbitration. The Senate amendment stipulates that "no question which affects the foreign or domestic policy of either of the high contracting parties \* \* shall be a subject for arbitration under this treaty except by special agreement." Lord Salisbury's note suggests that differences affecting national honor or territorial integrity "shall not be referred to arbitration under this treaty except by special agreement." The very phraseology is identical. The British Premier, who was believed last summer to have been forced by public sentiment into the final agreement on the matter, would be justified in indulging in some mirth over the talk of "English trickery."

The weakness of the Salisbury plan of arbitration, shared by the pending Senatorial amendments, was clearly discerned by the American Administration. Indefinite exceptions such as Lord Salisbury proposed, Mr. Olney pointed out, placed in the hands of the executive of either State decision as to what disputes were arbitrable. Either administration would be at liberty, at any time, to object that national honor was involved in any case at issue, and a partisan administration, Mr. Olney bluntly added, "is liable to view the honor of the country as not distinguishable from the good of the party."

Holding this view, the Secretary replied on April 11 to Lord Salisbury, proposing that all disputes, of whatever character or magnitude, should be defined as arbitrable. If a case were to be withdrawn from arbitration, it should be so withdrawn, not by the executive, but by Parliament or Congress. Furthermore, Mr. Olney objected to Lord Salisbury's stipulation of an appeal at will to a high tribunal where a vote of five to one should be required. The Secretary argued that such privilege of appeal signified virtually the power to overthrow any award in arbitration with which either government was dissatisfied. The Secretary urged, therefore, that territorial cases, if appealed as suggested by Lord Salisbury, should be decided by a plain majority on appeal, not by a stipulated vote of five to one. This arrangement the British Government refused. Lord Salisbury insisted on the requirement of a vote of five Supreme Court arbitrators out of six. This was in the end conceded by the American Administration; by way of compromise, however, England's negotiators agreed that with this very grave restriction, all cases, territorial or otherwise, should be submitted to the court. We have hitherto expressed our own opinion that the five to one requirement, shutting out final judgment unless two arbitrators out of three should vote against the case of their own nation, is so exacting as to give rise to doubt whether the arbitration plan, in a really serious case, would work at all. Similar doubt was suggested indirectly in the President's message of transmittal. The notion that submission of delicate disputes to a tribunal thus restricted would endanger national security and honor seems to us Quixotic in the extreme. The Venezuela boundary

question, over which hot-headed public men were ready to go to war a year ago, has already been referred to an arbitration board far less restricted in its scope of action than the proposed judicial body of the treaty, and the event is hailed as a safe and proper settlement. But the notion that the court could not be surely trusted is logical compared with the idea that the British Ministry deluded the American negotiators into a treaty where the interests of the United States were ignorantly jeopardized. The brief recital of facts which we have made from the official record proves that the binding provisions of the treaty as submitted to the Senate were the work of our own Administration, which overruled the reluctant policy of the English Premier. Had the policy of the American negotiators prevailed in all respects, the treaty would have been more binding even than in its unamended form.

If any party to the whole negotiation has served the wishes of the English foreign ministry it is not the State Department, but the Senate.

The present situation of the treaty negotiations is in fact not at all a matter in which the country can take pride. We are placed, for the time at least, in the position of a government which for three years has solicited a practicable pledge of amity, which has with much trouble persuaded foreign negotiators to accept its terms, and which now, in the eleventh hour, reject the very stipulations for which its agents have all along been arguing. As Ex-Senator Edmunds, a very high authority on such questions, intimates in a communication to this week's "Independent," the objections of the Senators amount to a claim for "a tribunal that is organized to decide in our favor." "If," Mr. Edmunds concludes, "we are really for arbitration at all, we must suppose it possible that we may be sometimes wrong in our pretensions, and that an impartial tribunal will, in such a case, decide against us." We cannot believe that the Senate means to bury this treaty permanently; if ratification fails for any cause in this Administration, we are confident that public opinion will demand and obtain acceptance in the next. In the meantime, however, we trust that both people and legislators will scan the amendments of the Foreign Affairs Committee as thoroughly as the committee scrutinized the treaty.

#### *PRODUCTION OF GOLD AND SILVER IN THE UNITED STATES AND WORLD.*

Never have the conditions been so favorable as at present for making an approximate early estimate of the world's production of gold. We have confirmation of this belief in the now proved accuracy of the statement we made a year ago. Our readers are aware that these annual compilations have been prepared by us the latter part of January or early in February for a long period. Indeed, we began to get together in the early part of each year these facts respecting the world's production of gold long before any other similar details were prepared in this country. In those early days the information was meagre, difficult to secure, and in most cases late in being made public.

A year ago we called attention to the circumstance that an important change with reference to the statistics of the yield of the precious metals, especially gold, had been developed the last few years. Gold mines everywhere were passing into the hands of large capitalists and under corporate management; that as a consequence producers were getting more and more in

the way of compiling and making public current facts. Consequently there never had been a time when an approximate estimate of the world's output of gold could be so easily and correctly reached soon after the close of the year as it could be at the present time. A January compilation for the whole world thereby became of increased interest. That does not mean that later and more complete returns became any the less needful. An official collection and compilation of the completed returns by which to revise the earlier results are as desirable as ever. It is satisfactory to know that our Mint Bureau fills that position admirably well. But for current uses what the public most of all needs with reference to gold production is early information intelligently arranged—the same character of information most eagerly sought after for all other of the world's products.

#### 1895—PRODUCTION REVISED.

We have stated above that our January review of a year ago for the 1895 product has proved to have been a very close approximation. The aggregate product for the whole world as we then made it up was 9,653,203 ounces, valued in sterling at £41,004,876 or in dollars at \$199,549,082. According to the figures of Mr. Preston, Director of the Mint, published in November 1896, the total product of the world in 1895 aggregated 9,688,821 ounces, valued at \$200,285,700. We have on this occasion gone over all the details of our 1895 estimate again and revised the figures throughout, and the result we now reach is 9,652,003 ounces, valued in sterling at £40,999,778 and in dollars at \$199,524,276. This final estimate, it will be noticed, is slightly less than our original estimate, and consequently is now 36,818 ounces less than Mr. Preston's total.

In correcting to-day our 1895 figures, the Australian return now made to us is a trifle larger than the Mint Bureau's report; but the chief point of difference compared with the Mint is the African result, in which case our total is 40,205 ounces the smaller. This latter difference is due wholly to accepting a different authority for the value of the ounce of gold mined by the Witwatersrand mines. The Witwatersrand Chamber of Mines has always in its annual reports given the value of the ounce in the output of each mine, and we have each year accepted its estimate. The Royal Mint, on the application of Mr. Preston, has for 1895 furnished him with an estimate of the average fineness of the "South African gold in 1895," which is about 52 cents more per ounce than the Chamber of Mines reports it. As the old figures for previous years were made up on the old basis of values, and as this "average fineness" is only for 1895, and can include only the portion of the South African gold which in that year reached Great Britain, we do not think it wise to adopt the new basis and thus disturb the accuracy of the comparison with previous years. These changes in our gold totals for the product of the whole world in 1895 will be found entered in the general table on a subsequent page in this article in which the annual production of the world is carried back to 1871.

As to the silver production we have had to make a considerable addition to the 1895 figures because of the latest estimate of the Mint Bureau for the United States. These latest figures are over 9 million ounces in excess of the early estimate and show that instead of there having been any decrease in the silver product of this country and of the world there has been a decided increase. We shall refer to this

feature below in our remarks with reference to silver.

#### **GOLD IN 1896—ESTIMATED PRODUCTION OF THE WORLD.**

The world's gold production in 1896 promises to prove somewhat of a disappointment. When the year opened every indication pointed to a more decided growth in the annual product than had yet been made in any recent twelve months. Every large producer, and as for that the most of the small ones, were at that time showing new activity in that department of the mining industry. Fortuitous circumstances—not permanent causes like an exhaustion of mines or a withdrawal of capital from that branch of industry—have been the disturbing factors disappointing early expectations. The less hopeful circumstances have arisen either from a lack or dissatisfaction of labor, from a lack or trouble about the water supply, or from political agitations and disturbances, and have in the main been confined to the two large producers, the United States and Africa, though Australia and one or two other smaller contributors to the gold supply have suffered somewhat. After, however, allowing for all drawbacks to progress, there remains still a material growth, though, as said, it is not as large as anticipated.

The reason for the large expectations in 1896 arose from the fact that in 1894, and more especially in 1895, all the important producers seemed to have at length united in vigorously pushing gold mining and to be meeting remarkable success. Prominent among these was the United States, and very likely the fact that we added in 1895 to our annual product 343,947 ounces, making the total output 2,254,760 ounces, did as much as anything to give currency to large ideas. It was not till 1893 that this country's gold mining industry changed for the better. Our mines yielded only 1,572,187 ounces in 1882 and the total was still about the same in 1892, being that year 1,597,098 ounces, having fluctuated within narrow limits during the intervening years. At this latest date, however, the new development began; in 1893 the product was 1,739,323 ounces, it rose to 1,910,813 ounces in 1894, and in 1895 surprised the public by the phenomenal movement which brought the total up, as already said, to 2,254,760 ounces. All this spoke very favorably for the future. Here was a progressive movement under way with a very decided development the last year. Added to that, too, was a further feature almost ensuring larger growth for the next twelve months: the fact that 1895 closed amid so great activity in new work that the outlook actually seemed to warrant the most sanguine expectations.

Hopeful signs and favorable conditions for mining, though, were not confined to the United States. Other countries encouraged the prevailing idea of still greater increases in the future. During recent years substantial investments had been made in Australian mining ventures which up to the close of 1895 had not afforded any satisfactory return. Large hopes for 1896 were consequently indulged with reference to the return from those colonies.

Then, too, an event of still more importance was the 1895 report from Russia. When the official figures were received the year proved to have netted a large excess over 1894. Most observers had expected no growth whatever. Heretofore Russia's contribution of gold to the world's supply had continued, year after year for a long series of years, to be quite regular. In no year other than 1895 since 1880 had the product got above

1,200,000 ounces except in 1893 and in 1885. In 1894 the total was only 1,167,455 ounces, whereas in 1895 the output reported was 1,397,767 ounces, or a gain of 230,312 ounces over 1894. This large addition in that year very naturally led many to assume that there was good promise of a further and larger addition in 1896. We have received no report from Russia, but are of the opinion from the character of the mining in that country and from the reason given for the increase in product for 1895 that at best there will be very little if any additional increase during the latest twelve months, and very likely the output will not be as large in 1896 as it was in 1895. In our general table of the gold product in the world which we give in this article at the end of the details with reference to gold, Russia's product for the year just closed is estimated the same as the yield in 1895.

The most disappointing result in 1896 has been the South African contribution to the world's gold supply. For several years that country has made a splendid record and wonderful progress. From a total of 727,912 ounces in 1891 its products increased to 2,115,138 ounces in 1895. What that increase means is best understood when put in connection with the increased yield in other countries, as is done in our general table below. For instance Australia's yield was 1,518,690 ounces in 1891 and 2,170,505 ounces in 1895; the United States was 1,604,840 ounces in 1891 and 2,254,760 ounces in 1895. In other words, in the four years Africa increased its annual product 1,387,226 ounces, Australia 651,815 ounces and the United States 649,920 ounces. But the important circumstance in its relation to the future is, that now when these three contributors have reached very nearly the same annual total, the United States has most unmistakably taken the first place. The increase in the annual product of the United States in 1895 was 343,947 ounces and in 1896 it was 363,479 ounces or a total of 707,426 ounces in two years; concurrently Africa has increased its annual product 249,600 ounces in 1895 and only 40,246 ounces in 1896 or 289,846 ounces in the two years. We shall give some reasons shortly under the head of Africa why this small increase in Africa in 1896 is not to be taken as indicative of a limit having been reached in the yield of that country. There were special influences at work in 1896 which prevented a full result. There is, however, apparently good reason to assume that hereafter Africa's product will not increase fast, and also that the United States will continue for a time at least to hold the first position among gold producers.

We now give the details as to gold production in 1896 of the United States, of Africa and of Australia, the only countries from which we have received estimates sufficiently complete to make a detailed statement practicable at this time. These details are followed by the general table already referred to, showing the world's gold product each year since 1871.

**UNITED STATES GOLD PRODUCT.**—As noted above, the United States in 1896 made further and material progress in gold mining, having, according to present estimates, added in that year 363,479 ounces to its annual product, against an addition of 343,947 ounces in 1895, thus bringing up the total annual yield of gold in this country from 1,910,813 ounces in 1894 to 2,254,760 ounces in 1895 and 2,618,239 ounces in 1896. This is a notable record, conspicuous for many reasons. It is conspicuous because the United States is an old mining field ploughed over nearly fifty years, and con-

sequently the richness of its deposits was supposed to have been worked out. Another reason that makes the record remarkable is that the development has been achieved without any stimulus from outside effort and without any considerable movement of capital from outside sources; home capital and home industry have produced the result. Had foreign capital been busy making investments in the mining States as it has been in Africa, in India and in Australia, the success would have proved even more clearly than it has that this country is the best in the world for such ventures; in that case, though, success would have been less wonderful.

Looking at the product of the different States, we find California, the old original, still in the lead as a gold producer and making steady gains. This last year more decided results have been reached simply because previous years' work has borne more fruit. Not unlikely a first impulse towards an increase in the gold output came from the prevailing conditions which have caused all the regular industries to pay poorly of late in California, fruit and grain raising as well as every other; probably it was as a consequence of this condition that prospecting for gold in that State has in recent years become more of a feature. In line with this movement also has been the opening of many mines long idle, the properties passing into new hands able to develop them. Altogether those who are best able to judge express the opinion that the gold product of California is sure to increase in the future, year by year, for some time at least.

Another State which has attained a very important position within two or three years as a gold producer is Colorado. Last year it gave promise of even taking the first place among the States, California having raised its output from \$13,570,397 in 1894 to only \$14,928,600 in 1895, while Colorado moved up from \$9,491,514 to \$13,305,100. This rapid increase of the Colorado product came mainly from the Cripple Creek district, and as there recently have been labor troubles there &c., with other set-backs, the present belief is that the State's product for 1896 will not pass the 1895 total. Colorado has, however, done marvelously well, having had very little help from outside capital; no State has a more promising prospect. One other feature of the gold product this year is that probably every producing State, with the possible exception of Colorado, is likely to return an increase. The preliminary estimate of the Mint Bureau by States for 1896 is given in the following table, to which we have added the previous two years for comparison. It should be said that much of the increase of the gold product in Montana and in some of the other States has been due to the increased production of copper mines.

GOLD PRODUCTION IN UNITED STATES.

Gold Production.	1894.		1895.		1896.	
	Ounces.	Value.	Ounces.	Value.	Ounces.	Value.

Michigan	3,150	64,144	2,075	42,000		
North States	11,715	242,100	15,000	310,000	14,781	300,000
Other States	1,105	20,000	1,000	25,000		
Totals	1,910,818	\$39,500,000	2,264,760	\$46,810,000	2,018,230	\$41,110,000

Mr. Valentine's estimate of the gold product of the United States in 1896 for the States west of the Mis-

souri is \$53,015,242, which would make the total with the other States added about the same as the Mint Bureau's preliminary figures.

**SOUTH AFRICA.**—As already remarked, a decided check has developed in gold mining in the Transvaal. Growth has not ceased entirely, but it has been very slight compared with preceding years, even with last year when the ratio of gain was less important than in any previous year since the opening of the fields. In the Witwatersrand district proper up to the close of November the aggregate amount of gold mined was actually less than in the corresponding period of 1895; but the December total—the heaviest monthly outturn with one exception of the season—served to turn the scale in favor of 1896. The increase though is only to the extent of 17,211 fine ounces, a very meagre increase compared with the excess of 207,365 ounces in 1895 or 416,622 ounces in 1894. In the earlier months the political complications which followed Dr. Jameson's raid into the Boer country had considerable to do with the decrease in product; but it is also to be noted that scarcity of labor, scarcity of water and shutting-down of mines because the ore does not pay to work are claimed as reasons for the poor showing. Each year we are greatly extending our means of obtaining reliable data as to the working of African mines and now receive monthly returns from all but a small percent of the producing territory. The Witwatersrand district being the most important, we first give a statement of its production for six years.

As we have before remarked, one of the chief difficulties to be contended with in the mines of South Africa is the lack of water. This applies with even greater force at points other than the Rand. Despite this adverse influence, however, production outside of the Rand increased during 1896 but much less rapidly than in 1895. Of the districts included the De Kasp makes the best exhibit, the Sheba Mine, its largest producer, having materially added to its product. Altogether the yield in these other sections is small comparatively and growth far from rapid. This cannot be better illustrated than by the subjoined table, in which we have reduced the entire African production to fine ounces from 1887 to 1896, both years inclusive, and give the value of the product as well as the ounces.

AFRICA'S GOLD PRODUCTION—FINE OUNCES.

Year.	Witwatersrand.		Other.		Total.

1896	1,862,319	7,910,884	298,035	1,244,755	2,160,354	9,155,630
Total	9,111,882	39,765,455	1,398,082	5,934,773	10,509,964	44,644,228

According to the foregoing the entire production of the African mines for the nine years since the first opening was made has been 10,509,964 fine ounces, valued at £44,644,228.

**AUSTRALASIA.**—Our reports show some increase in the output of gold in Australasia. The surprise is that the increase should not have been greater, for almost everything that could be done has been done to encourage and facilitate gold mining in those colonies. Of course the most interesting field at present is West Australia, for it is the one that is at the moment being worked most energetically by capitalists. Its chief drawbacks are lack of labor, lack of water and lack of communication. All these difficulties gradually are being overcome. Such rich finds of gold have been reported that capital is apparently encouraged to spend large sums, although hitherto results have come far short of expectations. Still, considering how new a field the section is and how many disadvantages any new gold field has to work against, the increase of about 50,000 ounces in 1896 is encouraging, for it is about double the increase in 1895. Victoria also has done well. Below we give tables showing the product of each colony, the first table in gross ounces and the second table in fine ounces. The figures are not final figures, but are believed to be close approximations. In obtaining the fine ounces 8 per cent has been deducted for base metal in 1894, 1895 and 1896, but for previous years the reduction is a trifle more, being made for each province on the basis of the official returns made to us.

**GOLD PRODUCT OF THE WORLD.**—Without further comment we now bring together the figures representing the world's gold production. The total product in 1896 has been large—nearly 10½ million ounces—but the year's increase is comparatively small, being in 1896 only 512,494 ounces, which compares with an increase of 996,781 ounces in 1895 and an increase of 979,986 ounces in 1894. Previous to 1894 the increases were small, almost wholly disappearing previous to 1891.

The ounces in the foregoing table may be turned into dollars by multiplying by 20·6718. The value in pounds sterling has been ascertained by multiplying the ounces by 4·2478. Thus according to the above the product in 1896 stated in dollars is \$310,118,349 and in sterling £43,176,750. That aggregate compares with \$199,524,276 and £40,999,778 in 1895, and \$178,919,018 and £36,765,652 in 1894.

**SILVER—PRODUCTION OF THE WORLD.**

When we made up our figures of silver production a year ago the estimates for 1895 indicated a decreased product in the United States, and so far as they were procurable from other sources of supply they seemed to point to a smaller total for the world. Silver never furnishes as reliable data as gold early in the year. Strange to say, however, it was the United States and Mexican forecasts on that occasion which were mainly in error. We presume in the matter of the United States the material misconception in the preliminary estimate grew out of the very large increase in the silver yield from copper mines. However that may be, the result was that instead of the United States producing only 46,000,000 fine ounces, the final Mint figures showed a total of 55,726,945 fine ounces. As to Mexico the trend in 1895, during the last six months particularly, was towards a smaller production, so that the year's aggregate fell a little below the previous year's, reaching 46,962,738 ounces. A larger decrease than we allowed for was also made in the Australian production; we had stated the total for 1895 at 14,500,000 ounces, against 18,073,440 in 1894, whereas the 1895 product proved to be only 12,507,335 ounces. For "other countries" our estimate of a year ago was very nearly correct, the figures we gave for 1895 being 53,000,000 ounces, while the later reports now at hand make the total 53,983,231 ounces.

Altogether it appears that the 1895 production of silver in the world amounted to 139,180,249 ounces, instead, as we estimated it a year ago, 165,500,000 ounces. This final total for 1895 compares with 167,752,517 ounces for 1894, and consequently the 1895 product is the largest outturn of silver which the world's mines have ever supplied. When it is remembered that the average price for silver in London was only 29½d. in 1895, that result is noteworthy. At the same time it is to be said in explanation of this enlarged yield that it does not prove that silver can be mined profitably at 29½l. per ounce. In Montana, for instance (according to a statement published in the Mint Report of Mr. E. B. Braden of the Assay Office at Helena), there were 8,828,146 ounces fine silver extracted as a by-product from copper ores, showing that of the total silver production of the State over 49 per cent was thus obtained. He adds this important and significant assertion: "Strictly speaking there were but few exclusively silver mines operated during the calendar year 1895, owing to the low price of the white metal."

The world's production of silver during 1896 cannot at the present time be indicated with accuracy. For the United States Mr. Valentine's figures for that year are published. They are given in commercial values at \$33,684,963, which, at an average of 67 cents per ounce

(the average stated in his circular), would make the United States product 50,276,064 ounces in 1896, a gainst the 55,726,945 ounces of the Mint Bureau in 1895. A preliminary estimate of the Mint makes the total 52,535,300 ounces for 1896. We accept that aggregate and have put it in our general table below, presuming it to be as close an approximation to the actual result as can be reached at this time. It is proper to state that Mr. Valentine's returns for silver a year ago were quite accurate, and may be the more correct now. Either authority at this date, we presume, has to depend upon estimates in some measure. The following statement of the United States product will be of interest. It is made up from the Mint reports and covers the production of silver since 1836. The division of the total for 1896 between the States named is of course merely estimated, based on information we have thus far been able to obtain. We add a column giving the average annual price of silver in London.

SILVER PRODUCTION IN THE UNITED STATES AND AVERAGE PRICE IN LONDON.

Calendar Year.	Colorado.	Montana.	All others.	Total.	Average Price.
1836*.....	20,000,000	16,035,300	16,035,300	52,070,600	3 1/4d.
1837.....	23,394,000	17,589,100	14,759,395	55,742,495	29 1/2d.
1838.....	23,281,399	12,420,031	13,398,520	49,100,000	28 1/2d.
1839.....	25,838,600	18,406,400	17,255,000	61,500,000	35 1/2d.
1840.....	26,632,400	19,039,800	17,424,900	63,100,000	39 1/2d.
1841.....	21,160,000	16,350,000	20,820,000	58,330,000	45 1/2d.
1842.....	18,800,000	15,750,000	19,866,300	54,416,300	47 1/2d.
1843.....	16,000,000	15,000,000	19,000,000	50,000,000	42 1/2d.
1844.....	14,695,313	13,148,437	17,936,250	45,780,000	42 1/2d.
1845.....	11,601,825	11,988,553	17,669,622	41,260,000	44 1/2d.
1846.....	12,375,280	9,590,842	17,473,878	39,440,000	45 1/2d.

\* Estimated.

As to the Mexican production of silver in 1896, we have no data which affords any help in making an estimate except Mr. Valentine's report, which for Mexico is for the year ending with June 30 1896. For that fiscal year the total does not vary materially from the previous fiscal year. Moreover the official figures for Mexico, it will be noticed, make the total in 1895 only a trifle less than it was in 1894. Altogether, therefore, we assume that a fair estimate for 1896 for Mexico will be to repeat the last year's total in our general table. The official figures issued by the Mexican Bureau of Statistics for the last three years are as follows.

MEXICO'S ESTIMATED SILVER PRODUCTION.

	1893.	1894.	1895.
Deposited at mints.			
To be coined.....	684,477-477	753,817-100	634,952-338
Exported.			
Silver ore, bars, &c.....	695,638-152	703,543-668	826,056-138
Total production, kilos..	1,380,115-629	1,457,360-768	1,461,008-476
Total production, ounces.	44,370,717	47,038,331	46,062,738

For Australasia we have the returns of the silver product of the Broken Hill Proprietary Company, and they show a further material decrease in the output. The great complaint is low-grade ores and the difficulty of profitably working them; for this reason some mines have had to shut down. The returns for the Broken Hill Company for 1896 and previous years are subjoined.

SILVER PRODUCT OF THE BROKEN HILL PROPRIETARY COMPANY.

Year—	Ore treated.	Silver Produced.	Average per ton.
1890.....	219,311	8,171,877	37-26
1891.....	243,960	9,553,008	39-70
1892.....	204,134	7,065,572	33-59
1893.....	438,792	12,494,301	28-48
1894.....	580,954	13,534,202	23-30
1895.....	468,061	10,162,929	21-71
1896.....	434,616	7,919,277	18-29

Here we see that the production in 1896 dropped to 7,949,277 ounces, or 2,213,652 ounces less than in 1895, a falling off of nearly 22 per cent; the ore treated being less rich in silver than in the previous year, fell off less than 8 per cent. In fact a glance at the table clearly demonstrates that deterioration has been constant. In 1890 the amount of silver secured from a ton of ore was fully 100 per cent greater than in 1896.

SILVER PRODUCT OF THE WORLD.—With these preliminary suggestions as to the production of the silver mines of the world, we bring forward our usual statement of the production of silver each year, beginning with 1871 and including an estimate for 1896.

SILVER.—WORLD'S PRODUCTION IN OUNCES AND STERLING.

Year.	United States.	Mexico.	Australia.	All Other Countries.	Total.	Value.
1871.....	17,864,778	19,657,968	151,593	14,770,001	52,444,333	13,210,788
1872.....	22,358,473	19,657,968	94,019	14,770,001	66,881,165	14,294,363
1873.....	27,650,000	19,657,968	117,531	15,166,490	62,572,004	15,447,463

Total '91-'95.....	287,056,945	213,596,878	74,621,983	213,761,340	789,036,946	117,912,195
1896 (est.).....	52,535,300	47,000,000	10,500,000	61,000,000	171,035,300	20,532,846

† Values of silver in this table are commercial values and are computed on the average price each year of silver as given by Messrs. Pixley & Abell, London. Value of £ in this table \$4-8665.

The figures in the above table for 1896 are of course estimated and incomplete. For 1895 the total production will be seen to be fully 169½ million ounces, of which the mines of the United States contributed a little less than one-third.

FAMINE AND PLAGUE IN INDIA—THE CONSUMPTION OF COTTON.\*

MANCHESTER, January 20.

Probably there is no subject which, at this moment, surpasses in interest and importance to the cotton trade of the world that of the famine and plague with which India is afflicted. In the issue of the CHRONICLE of November 14 it was stated in this correspondence under date of November 3: "It is now certain that there will be scarcity of grain food such as to justify, perhaps in a restricted sense, the use of the word 'famine' throughout a large portion of Northern and North Central India and a considerable tract in Upper Burmah." In the two and a-half months which have elapsed since then, and particularly in the last three or four weeks, the proportions of the calamity have become more evident, and it may now be affirmed that the present famine is, in some respects, the worst which has befallen the Indian people during the century.

A telegram dated to-day received from Bombay states that the number of persons dependent upon Government funds for support, either in the form of employment upon "relief works" or in that of gratuitous gifts, is 1,500,000, and it is certain that the number must go on increasing until the winter-grown crops are harvested, in March and April. It has already been explained that the origin of this trouble was the scantiness of the crops grown in the winter of 1895-96 over portions of Northern India. Nothing more than a substantial, though still moderate, rise in the prices

\* Communicated by our special Correspondent at Manchester.

of food grain resulted from this deficiency, and its effects would have entirely disappeared in September and October, if the "khair" or summer-grown crops had been abundant. Unfortunately, owing to a sudden cessation of the southwest monsoon rains early in August these crops were very short indeed over wide tracts in the northern half of the peninsula. It is to this disaster that the existing trouble is mainly attributable. Further suffering is before the people, due to the fact that the present winter crops cannot be of normal amount, because of the partial failure and tardy arrival of the October rains upon which the winter crops are sown. It is this latter misfortune which deprives us of all hope that the next spring harvest will be sufficient to do more than alleviate the famine. This, in a greater or less degree, must be reckoned with until the next summer harvest begins, in September.

The Indian Government is amply supplied with pecuniary means to provide for the saving of life, and its organization for ascertaining promptly where relief is needed and as promptly affording it is as nearly perfect as it could be. But voluntary relief is now forthcoming, not for the purpose of aiding in the proper work of the Government, but for affording succor of another kind. One of the worst effects of Indian famines is the enforced loss by cultivators and artisans of their cattle, implements and household possessions, which greatly hampers their industry and lessens the production of wealth when the seasons become more propitious, besides throwing into confusion the social and industrial organization of the districts affected. It is for the purpose of mitigating these consequential evils that voluntary contributions are now being made throughout the United Kingdom to the "Indian Famine Relief Fund." In Manchester the movement began yesterday, and already the amount subscribed is nearly £7,000. Contributions from all parts of the country will be distributed through a central committee, which has been established in Calcutta, just as the relief fund of 1877, which reached nearly £700,000, was distributed by the Madras Central Committee, the area of the famine of twenty years ago—the last great disaster of this kind—having been in Southern India. The entire cost of distribution on that occasion, including the expenses of the Madras and the provincial and local committees, was considerably less than 1½ per cent of the amount subscribed.

But famine is not the only calamity to which India is now exposed. The bubonic plague in Bombay, which began to assume alarming proportions more than a month ago, has now become a disaster of serious magnitude. It has spread to Kurrachee, and there is danger that it may infect other places, perhaps even Calcutta. From Bombay large numbers of people—probably more than 350,000—have fled to the country, and trade and industry in that city are to a large extent paralyzed. Telegrams received in Manchester from Bombay correspondents within the last two or three days estimate the number of spindles stopped in the cotton mills there variously at from one-half to two-thirds of the whole. For it is chiefly amongst the poorer part of the population that the panic prevails, the heads of the mercantile establishments, European and native, having usually remained at their posts. In many cases not only cotton mills but trading establishments, large and small, have been put into idleness through insufficiency of labor. In short, busi-

ness of all kinds in Bombay is to a great extent completely stopped.

A further impediment to trade in and with India arises from the continued scarcity of money, the result chiefly of the closure of the mints, the coinage of rupees having ceased since June 26 1893. A little relief was afforded about five weeks ago by an increase in the amount of currency notes issued on Indian Government securities, but this has not prevented further tightening of the loan market, the minimum rate of discount at the Presidency Bank of Bombay being 10 per cent, and the rates in the "bazaar," where the native dealers go for borrowings, are still higher.

Little reflection is needed to show that these various disturbances must have an important bearing upon the state of the markets for cotton and cotton goods for some time to come. When we try to think out the consequences, however, it becomes not less obvious that they are complicated and in some respects antagonistic. In the first place there can be no doubt that the distribution of cotton goods in India must be reduced, but it is likely to affect the lower qualities consumed by the poorer part of the people rather than the better ones. Indeed, we know already that even before the stoppage of the Bombay mills through scarcity of labor, the purely Indian demand for their products had perceptibly fallen off. The telegrams coming to hand from Calcutta and Bombay show also that, owing partly to recent large imports of English goods, and partly to the influence of the famine upon demand, not to speak of the great interruption of business in Bombay and Kurrachee caused by the plague, the practicable orders received in Manchester in recent weeks have decreased considerably. Shipments hence have kept up on a full scale to India until now, but they must shortly decrease, since looms in Lancashire usually employed in producing for the markets of the Dependency are being stopped for want of new contracts.

Other foreign departments of the Manchester market for cotton goods are also slack, and the prospect is just now far from being encouraging. This is indicated by the keen competition amongst manufacturers, and the exceedingly low and often unremunerative prices which they are willing to accept. So far, then, the outlook is unfavorable to a full consumption of cotton in this country. On the European Continent the mills are generally fully at work, but even there the state of the cotton industry is not so promising as it was a year ago, and it need hardly be insisted upon that there is not yet much visible improvement in the state of the industry in the United States.

On the other hand, so far as Manchester is concerned, a little advantage—not a very important one—has come from the stoppage of spindles in Bombay. Orders for increased quantities of the lower counts of yarns—16s to 24s—have been placed here quite recently for China, owing to the greatly diminished production in Bombay. For the execution of these, American cotton is chiefly required. It must also be noticed that the Indian cotton crop of 1896 is coming into Bombay very slowly, the receipts there from November 1st to January 14th having been only 323,000 bales, against 572,989 bales in the corresponding period of 1895-6. In that of 1894-5, however, they were not more than 190,927 bales. Indian cotton, particularly Broach, was at the latest telegraphic date being offered at prices relatively lower than their equivalents for American in Europe, owing mainly to the absence

of demand from the Bombay mills. Indian exported cotton is chiefly spun in the Continental mills, and it is still a question how far and in what way the Indian famine and plague may affect the consumption there of American. They may tend to check the use of the latter if the Bombay spindles now stopped remain long in that condition, thus inducing a larger flow of Indian growths to Europe. This is certainly the present tendency, and when it is considered in connection with the prospect of continued slackness in the Manchester market for goods and yarns, there does not seem to be the promise of a full consumption of American cotton in Europe in the near future.

ANTHRACITE COAL PRODUCTION IN 1896.

Since the Bureau of Anthracite Coal Statistics has stopped furnishing its monthly statements for publication, it has been very difficult to get reliable figures regarding the output of anthracite. We have however procured a statement of the production for the late calendar year, and the results are interesting in comparison with those for the preceding years. In the main the figures merely emphasize the unfavorable character of the year 1896, and the trying conditions with which all the anthracite interests had to contend.

In exact figures the shipments to market for the twelve months of 1896 were 43,177,485 tons, against 46,545,761 tons for the twelve months of 1895. Thus there was a falling off of somewhat over three and one third million tons. This seems large and is large. But at the same time it must be remembered that in comparing with 1895 we are comparing with the very heaviest output ever attained in any calendar year in the whole history of the anthracite trade. It thus happens that, notwithstanding the heavy decrease recorded, the 1896 total is in excess of that of any previous year with the single exception of 1895. When that has been said, it becomes evident why all the companies are obliged to report large stocks of unsold coal on hand and why the condition of the anthracite trade at the present time is reported so unsatisfactory. The companies pursued a policy of restriction, but they did not carry it far enough, and hence, as in other years, they mined coal greatly in excess of the demands of the trade. Here is a record of the yearly production (or more accurately the shipments to market) since 1884.

Year.	Tons.	Year.	Tons.
1896.....	43,177,485	1889.....	35,407,710
1895.....	46,545,761	1888.....	38,145,718
1894.....	41,391,200	1887.....	34,611,017
1893.....	43,089,538	1886.....	32,136,362
1892.....	41,893,320	1885.....	31,623,529
1891.....	40,448,336	1884.....	30,756,995
1890.....	35,855,174		

In considering the present accumulations of coal, the fact should not be overlooked that they arose out of totally different conditions from those which have so frequently existed in the past. They are not the outgrowth of a lack of harmony among the different producing interests, but are the result of a miscalculation as to the amount of coal that would be required for true needs. The reckless policy which marked the movement of the anthracite properties during other years, and under which every company mined practically without limit, was abandoned in January 1896, after its disastrous consequences had become apparent to all. It was then determined that the output of coal should be restricted so as to prevent the continued overstocking of the market, with its ruinous effect on prices.

The main purpose in view of course was to obtain better returns for coal. Previously coal had been mined at a positive loss. In pursuit of the new policy circular quotations were advanced several times during the year, and coincidentally the output of coal was very decidedly curtailed. But as it happened, the benefits expected from this policy were realized only in small part. In the first place, notwithstanding the advances in prices, the companies in many instances received for a considerable time but little more for their coal than they had previously been getting. This followed for two reasons: (1) the advances were made gradually, and (2) the companies had many contracts outstanding which had to be filled at the old low prices. Then also by adhering to the policy of restriction, each company's output was necessarily diminished. Finally, the expense of mining is proportionately heavier on a small production than on a large production.

All this had been expected during the first half of the year, and hence the results for that period did not cause surprise. But an improvement had been confidently looked for during the last six months. In this latter expectation the managers were altogether disappointed, and that is where all the trouble has come in. During January the shipments, according to a newspaper statement, had been 3,844,222 tons in 1896 against 3,063,334 tons in 1895, an increase, it will be observed, of over three-quarters of a million tons. It was towards the close of this month that the agreement to restrict production was reached, and during the succeeding five months curtailment was practiced with great vigor and determination, as will appear from the fact that the amount of coal mined for these five months of 1896 reached only 15,055,432 tons, against 17,600,622 tons in the corresponding five months of 1895. But having gone that far, the companies made the mistake of assuming that they could again mine full normal amounts of coal, and in July the shipments were 3,750,249 tons against 3,692,378 tons, in August 3,949,892 tons against 3,836,366 tons, and in September 4,001,571 tons against 4,005,514 tons. If it had not been for the silver agitation and the great depression in business resulting therefrom, the market might have been able to take these large amounts of coal after the previous heavy curtailment of the output. As it was, the depression became steadily more pronounced, the demand for coal kept declining, and the companies once more found stocks rapidly accumulating. In the latter part of the year restriction appears again to have been resorted to, but obviously not to a sufficient extent to meet the requirements of the situation.

Considerable interest attaches to the amounts of coal mined by the different interests, and on that point we are able to present the following comparison with the two years preceding.

	1896.		1895.		1894.	
	Amount.	P. Ct.	Amount.	P. Ct.	Amount.	P. Ct.
Phil. & Reading...	9,019,535	20.89	9,905,059	21.28	8,289,088	20.02
Lehigh Valley....	6,749,128	15.63	7,360,454	15.82	6,424,076	15.52

Under the agreement of January 1896 the Reading was awarded 20½ per cent of the output; its percent age, it will be observed, actually was 20.89, as against 21.28 per cent in 1895.

# INCOME STATEMENT OF CHICAGO & NORTH WESTERN.

We have obtained, as in other years, a statement of the earnings and income of the Chicago & North Western Railway for the twelve months of the calendar year. The company's fiscal year ends on May 31, and though monthly returns of the gross earnings are regularly given out, no returns of the net are furnished except in the annual reports. Hence the present figures bring the results down to a period seven months later than that contained in the company's last annual report.

Taking the twelve months of the calendar year, the showing is quite satisfactory; the final result is not as favorable as in 1895 but is yet very good. In 1895 the company had paid 4 per cent dividends on the common stock and had a surplus of \$1,909,505 above the amount required for the same. In 1896 dividends on the common shares aggregated 5 per cent, and the surplus is \$807,525. The balance remaining before the payment of dividends was \$5,035,221 in 1895 and \$4,325,283 in 1896. Examination of the accounts discloses that this falling off in the amount left for dividends has followed entirely from a decrease in the net earnings, and this decrease in the net has in turn followed entirely from a great augmentation in expenses. Gross earnings were \$32,177,153 in 1896, against \$31,558,629 in 1895, an increase of \$618,524, but expenses increased as much as \$1,473,123, the total being \$21,226,925, against \$19,753,802; as a consequence the net was only \$10,950,228 in 1896, against \$11,804,827 in 1895, a loss of \$854,599.

With reference to the enlarged expenses, we do not suppose it has any significance except that it indicates that the company is again spending money with ordinary freedom on betterment and renewal account, instead of rigidly contracting all its outlays as it was forced to do in some of the years preceding, and particularly during 1894. If the comparison is extended back to 1893, it will be found that the expenses are high only when contrasted with the low totals of 1895 and 1894. In 1893 gross earnings were \$32,472,219, in 1896 they were a little less at \$32,177,153; in the former year expenses were \$21,752,348; in the latter year \$21,226,925. It will be observed that there is a very close approach in the totals for the two years, the advantage in the case of expenses being in favor of 1896. Below is a summary of the income results for the last four years.

Twelve months ending Dec. 31.				
CHICAGO & NORTHWEST.	1896.	1895.	1894.	1893.
Miles road end of year	5,031	5,031	5,031	5,031

\* Up to August 31st mileage was 4,273 miles, the same as in preceding years; after that the operations of the Milwaukee Lake Shore & Western were included, raising the total to 5,031 miles.

† After allowing for a credit of \$350,000 for dividends received in February on holdings of Milwaukee Lake Shore & Western stock.

‡ Milwaukee Lake Shore & Western included for the whole twelve months.

§ After allowing for a credit of \$241,907 for income from investments in 1895 and \$257,909 in 1896.

The improvement here as compared with 1894 is of course very striking; but the fact that the exhibit for 1894 was extraordinarily poor is well known. In that

year the balance remaining for the stock was only \$2,054,334, and as \$3,711,332 was paid out in dividends, there was a deficiency in the large sum of \$1,656,998. In 1895 the balance for the stock, as already stated, was \$5,035,221; in 1896 \$4,325,283.

As the company's fiscal year ends on May 31, it is interesting to separate the results for the first five months from those for the last seven months. The first part of this period belongs to the old fiscal year, and was therefore included in the last annual report; the second part belongs to the new or current fiscal year. Arranged in that way quite a contrast in the results between the two periods is discerned. For the five months to May 31 gross is found to have been \$12,583,398 in 1896, against \$10,590,771 in 1895, an increase of \$1,992,627; expenses, \$8,556,398, against \$6,779,464, an increase of \$1,776,934; and net \$4,027,000, against \$3,811,307, an increase of \$215,693. Thus more than the whole of the gain in gross for the calendar year and more than the whole of the augmentation in expenses occurred during these five months.

In the seven months since June 1 there have been marked losses in both gross and net. In explanation of these losses it is only necessary to recall that comparison is with exceptionally heavy totals in the previous year. In 1895 the spring wheat crop in the Northwest, as we have so often pointed out, had been of phenomenal extent, and all the roads running through that section made very heavy gains in earnings in consequence; the benefits also extended in the same way through the early months of 1896. On the other hand the 1896 crop of spring wheat, though quite good, did not equal the extraordinary crop of 1895. Hence the roads during the later months of 1896 lost much of what they had gained during the same months of 1895. It follows from what has been said that a comparison with 1895 alone is unfair; one must also compare with 1894 to get a true view of the situation.

Taking first the gross, the amount is found to be \$19,593,755 for the seven months of 1896, against \$20,967,858 for the corresponding period in 1895, and \$17,569,771 for the seven months of 1894. It thus appears that while there is a loss of about 1½ million dollars as contrasted with 1895, there is a gain of over two million dollars as compared with 1894. The showing is the same in the case of the net, the amount at \$6,923,228 for 1896 comparing with \$7,993,520 for 1895, but with \$5,766,253 for 1894. The results for the separate months disclose a precisely identical feature. While there are losses as compared with 1895, there are, with one or two exceptions, gains as compared with 1894. Here are the details.

## MONTHLY GROSS AND NET EARNINGS.

CHICAGO & NORTH WEST.	Gross Earnings.			Net Earnings.		
	1896.	1895.	1894.	1896.	1895.	1894.
First 5 mos.....	\$12,583,398	\$10,590,771	\$11,549,591	\$4,027,000	\$3,811,307	\$3,242,381
June.....	2,935,957	2,489,592	2,446,755	818,693	858,015	616,025
July.....	2,860,307	2,644,715	2,213,673	905,000	932,838	707,302
August.....	2,755,723	3,075,098	2,753,672	880,118	1,277,900	933,040
September.....	2,848,647	3,257,420	2,747,045	1,120,167	1,319,496	938,093
October.....	3,316,847	3,780,844	2,909,071	1,461,113	1,080,784	1,007,868
November.....	2,482,894	3,091,059	2,442,763	842,538	1,061,937	792,184
December.....	2,393,428	2,622,058	2,055,612	743,321	855,650	681,191
Total.....	\$32,177,153	\$31,558,629	\$20,119,362	\$10,950,228	\$11,801,827	\$9,608,634

We may sum up therefore by saying that for the seven months to December 31 of the current fiscal year there has been a falling off in net of, roughly, a million dollars as compared with the net for the same period of the previous fiscal year. In this previous year, however, the company's annual report showed a

surplus of \$1,851,025 above the 5 per cent dividends paid. Whether this loss shall be diminished or increased in the results for the full fiscal year will depend on the outcome for the five months to May 31, and as to this no reliable forecast can be made. The revenue from the spring-wheat movement will doubtless be smaller, but the revenue on other grains may be larger; the extent of the merchandise traffic will be controlled by the course of trade and business. The company will have one source of income previously lacking, namely a dividend on the common shares of the St. Paul & Omaha. As the North West holds 93,200 of these shares, the two per cent dividend just declared will produce \$186,400.

### COTTON CONSUMPTION AND OVERLAND MOVEMENT TO FEBRUARY 1.

The marketing of cotton in January has been on a fairly liberal scale, although retarded slightly at the close of the month by unfavorable weather. The amount coming into sight during the month reached 680,513 bales, against 617,924 bales in January of 1896 and 981,289 bales in 1895. The aggregate amount of the crop of 1896-97 now visible is 6,978,277 bales, which compares with 5,539,567 bales at the close of January last year, or a gain of 1,438,710 bales. Spinners' takings have been slightly less during the month than in 1896, and their total takings for the five months fall below those for the same period of last year by 49,887 bales, and contrasted with 1894-95 the decline is very material.

#### OVERLAND MOVEMENT TO FEBRUARY 1.

The gross rail shipments in January have been 127,613 bales, against 119,780 bales last year and 186,173 bales in 1895. The increase over a year ago in the total for the season to date now reaches 92,478 bales, but contrasted with 1894-95 the decline is 396,655 bales. The net for the month has been 69,516 bales, or an increase over 1896 of 7,888 bales, the total then being 61,623 bales. In 1895 the net reached 96,092 bales and in 1894 was 88,963 bales. The aggregate for the five months records a gain over the like period of last year of 29,879 bales, but contrasted with two years ago the falling off is 303,786 bales. The details of the whole movement overland for three years are appended.

#### OVERLAND FROM SEPTEMBER 1 TO JANUARY 31.

	1896-97.	1895-96.	1894-95.
<b>Amount shipped—</b>

<b>Leaving total net overland.....</b>	<b>619,146</b>	<b>589,267</b>	<b>922,932</b>

\* This total includes shipments to Canada by rail, which alone September 1 in 1896-97 amounted to 45,562 bales; in 1895-96 were 49,124 bales, and in 1894-95 were 55,314 bales.

#### RECEIPTS, EXPORTS AND SPINNERS' TAKINGS.

At the outports the net receipts for the month have been greater than last year, but much less than in 1895, reaching a total of 635,878 bales, against 548,118 bales and 938,197 bales respectively. The total for the five months is 1,524,009 bales in excess of 1895-96, but exhibits a decrease of 625,714 bales from 1894-95. The exports to foreign ports have been of fair volume the outward movement for the month this year being 766,908 bales, against 587,934 bales in 1896 and 1,095,106 bales two years ago. For the season to date the total exports are 1,444,017 bales greater than in 1895-96, but record a falling off of 399,860 bales from 1894-95. Port stocks show a reduction since the first of January of 205,635 bales, but are 99,981 more than at the same date in 1896. Our usual table of receipts, exports and stocks is as follows:

Movement from Sept. 1, 1896, to Jan. 31, 1897.	Receipts since Sept. 1, 1896.	Receipts since Sept. 1, 1895.	EXPORTS SINCE SEPT. 1, 1896 TO—				Stocks Jan. 31.

\* Great Britain exports include to the Channel.

Using the facts disclosed by the foregoing statements, we shall find that the portion of the crop which has reached a market through the outports and overland, and the Southern consumption, since September 1, this year and the two previous years, is as follows.

	1896-97.	1895-96.	1894-95.
Receipts at the ports to Feb. 1.....bales.	5,559,131	4,036,122	6,184,445
+ Shipments overland during same time.....	619,146	589,267	922,932
<b>Total receipts.....bales.</b>	<b>6,178,277</b>	<b>4,625,389</b>	<b>7,107,377</b>
Less consumption since September 1.....	455,000	412,000	388,000
<b>Total to Feb. 1.....bales.</b>	<b>6,633,277</b>	<b>5,066,389</b>	<b>7,495,377</b>

The amount of cotton marketed since September 1 in 1896-97 is thus seen to be 1,566,888 bales more than in 1895-96 and 862,500 bales below the total for 1894-95. To determine the portion which has gone into the hands of Northern spinners during the same period we have prepared the following:

Total receipts to January 31, 1897, as above.....bales.	6,633,277
Stock on hand commencement of year (Sept. 1, 1896).....	70,990
At Northern ports.....	151,688
At Southern ports.....	222,678
At Northern interior markets.....	4,056
<b>Total supply to January 31, 1897.....</b>	<b>6,860,011</b>
Less supply there has been exported to foreign ports since Sept. 1, 1896.....bales.	4,194,750
Less foreign cotton included.....bales.	21,957
Less to Canada direct from West.....	43,582
Less North and South.....	2,138
<b>Stock on hand end of month (Jan. 31, 1897).....</b>	<b>351,743</b>
At Northern ports.....	737,733
At Northern interior markets.....	4,310
<b>Total takings by spinners since September 1, 1896.....</b>	<b>1,095,627</b>
Taken by Southern spinners.....	455,000
Taken by Northern spinners since September 1, 1896.....	1,095,627
Taken by Northern spinners same time in 1895-96.....	1,145,514
<b>Decrease in takings by Northern spinners this year.....bales.</b>	<b>49,887</b>

The above indicates that Northern spinners had up to Feb. 1 taken 1,095,627 bales, a decrease from the

corresponding period of 1895-96 of 49,887 bales and a loss from the same time of 1894-95 of 451,736 bales.

#### AMOUNT OF CROP NOW IN SIGHT.

In the foregoing we have the number of bales which has already been marketed this year and the two previous seasons. An additional fact of interest is the total of the crop which was in sight on February 1 compared with previous years. We reach that point by adding to the above the stock remaining at that date at the interior towns less stock held by them at the beginning of the season. In this manner we find the result for three years on February 1 to be as follows:

	1896-97.	1895-96	1894-95
Total marketed, as above....bales.	6,633,277	5,066,389	7,495,777
Interior stocks in excess of Sept. 1.	345,000	473,178	435,000
Total in sight.....bales.	6,978,277	5,539,567	7,930,777

This indicates that the movement up to January 1 of the present year is 1,438,710 bales more than in 1895-96 and 952,500 bales less than in 1894-95.

As it will interest the reader to see what has come into sight each month of the season during this and previous years, we have prepared the following, which shows the movement for the last four seasons.

Months.	1896-97.	1895-96	1894-95	1893-94.
September.....	1,222,287	542,394	663,703	511,273
October.....	1,891,582	1,722,122	2,116,630	1,637,555
November.....	1,634,210	1,321,097	2,197,167	1,704,608
December.....	1,549,705	1,338,030	1,971,988	1,613,603
January.....	680,513	617,924	931,289	750,991
Total 5 months.	6,978,277	5,539,567	7,930,777	6,214,030
Balance season..	.....	1,622,906	1,961,989	1,309,181

#### WEIGHT OF BALES.

To furnish a more exact measure of the receipts up to January 31 we give below our usual table of the weight of bales. We give for comparison the figures for the same time in the two previous years.

	Five months ending Jan. 31, 1897.			Same period in 1895-96	Same period in 1894-95
	Number of Bales.	Weight in Pounds.	Average Weight.	Average Weight.	Average Weight.
Texas.....	1,239,147	654,641,360	528.30	526.62	534.60
Louisiana.....	1,699,697	865,995,621	509.50	511.98	514.57
Alabama.....	237,746	119,823,984	504.00	499.00	508.00
Georgia.....	892,220	432,931,911	485.23	483.44	491.35
South Carolina.	402,047	194,980,733	484.97	478.25	490.84
Virginia.....	624,070	298,617,495	478.50	484.60	494.16
North Carolina.	223,166	109,177,271	490.22	499.31	494.61
Tennessee, &c..	1,315,184	655,619,224	498.50	500.03	498.80
Total.....	6,633,277	3,331,787,599	502.28	502.65	508.38

\* Including Florida.

It will be noticed that the movement up to January 31 shows a decrease in the average weight as compared with the same period of last year, the average this year being 502.28 lbs. per bale, against 502.65 lbs. per bale for the same time in 1895-96 and 508.38 lbs. in 1894-95.

#### DRY GOODS TRADE DURING JANUARY.

The month opened with exceedingly quiet conditions prevailing in all departments of the cotton goods market, but with expectations of a gradual improvement in business. It was known that jobbers and converters were as a rule lightly stocked with merchandise, and hopes were entertained that their imperative requirements would expand and so compel more liberal purchases at first hands. In printed fabrics for spring these hopes have been fairly realized, but in other directions they have met with disappointment, neither brown, bleached nor coarse-colored cottons moving at any time in other than small quantities in the way of general business. The tone on these has been weak. In the matter of bleached cottons quotations were

reduced on most 44 makes  $\frac{1}{2}$ c. per yard about the middle of the month, bringing leading makes to the lowest prices ever recorded for them without eliciting anything like an adequate response, whilst brown and coarse-colored, although rarely openly changed, are nearly all easier to buy at the close than when the month opened. Print cloths have ruled steady in price, with occasional active buying. Manufacturers have been endeavoring to bring about curtailment of working hours from 58 to 42 hours per week for thirteen weeks and have apparently succeeded in securing their object. The total stock of cloths decreased 382,000 pieces during the month

The above prices are—For cotton, low middling uplands at New York; for printing cloths, manufacturers' net prices; for sheetings and gingham, agents' prices, which are subject to an average discount of 5 per cent, except when otherwise stated; So other sheetings net.

#### BUSINESS IN ENGLAND IN 1896.

[Communicated by Our London Correspondent.]

LONDON, Saturday, January 16, 1897.

The past year has been marked by political apprehension more keen and widespread than for a very long time past. At the very beginning occurred the Jameson raid, an event which even to-day is not fully cleared up. The excitement caused by the Venezuelan message was only just dying out, and the massacres in Turkey were still causing fears of a re opening of the Eastern Question, when this inexcusable attack upon a friendly neighbor occurred. The message of the German Emperor evoked such indignation in the United Kingdom as astonished close observers at home and on the Continent, and in response to the public feeling the Government fitted out with hot haste the Flying Squadron. Fortunately the good sense of the German and British governments prevented untoward consequences, and although ever since then a portion of the German press has been unfriendly, the relations between the two countries have remained as before.

In South Africa the statesmanship of President Krüger restrained the Boers and averted collision with the British. The situation, however, remained strained for several months, and when the leaders of the National Union were condemned to death there was much fear of a reawakening of racial animosities. The policy pursued by Mr. Chamberlain and the ability of President Krüger, however, have availed to avert trouble, and in spite of the anger caused in the Transvaal by Mr. Rhodes's triumphal procession, there is un

doubtedly a much better feeling throughout South Africa now than there was twelve months ago. But the country has suffered through the failure of the crops owing to drought and from rinderpest. The Matabele insurrection for a time was the cause of anxiety to both the British and the Transvaal governments, but after a protracted resistance it has been completely suppressed, and the Bechuanaland rising does not seem to be very dangerous.

In the early spring the Italian defeat in Africa produced a great sensation throughout Europe. For a time there were serious fears of a revolution at home, and afterwards there were apprehensions that Italy would have to withdraw from the Triple Alliance and to reduce her fleet, and that thereby the balance of power on the Continent and in the Mediterranean would be completely altered. Italy, however, has been able to retain her place in the Triple Alliance, and has concluded peace with Abyssinia, and there are signs at last of a revival of trade.

Hardly had the worst fears respecting Italy passed away when renewed massacres in Turkey, the Armenian attack upon the Ottoman Bank, the slaughter of Armenians in the streets of the capital, called forth so much indignation in England that it looked as if the Eastern question would inevitably be re-opened. Prince Lobanof, who at the time directed the foreign policy of Russia, was strongly opposed to any intervention, and consequently it was apprehended that if England did interfere to protect the Armenians, a war with Russia would be the inevitable consequence. The death of Prince Lobanof has since modified Russian foreign policy. His death occurred just as the Czar was setting out upon his visit to the great European capitals, and as the Czar has only just filled the vacancy thus occasioned, he has been more completely his own Foreign Minister than before. His intercourse and communications with so many sovereigns and ministers have, no doubt, opened his eyes to many things not previously understood by him, and it is said that the indiscretion of one of the French ministers for a while lowered very considerably the influence of France with him.

Both in St. Petersburg and in Paris it is reported by persons who ought to know that the French Minister tried to induce the Czar not to resume specie payments. This was naturally offensive to the Russian Finance Minister as well as to the whole of the Russian ministers, and the immediate result was a cooling of the former very intimate relations. At all events Russia not only refused to join with France in certain financial proposals regarding Turkey, but has since been decidedly more in accord with English opinion. It is generally believed, indeed, that the principal result of the Czar's visits has been to impress him with the necessity of an intervention by all the powers at Constantinople.

Meanwhile, Spain was vainly endeavoring to recover her authority in Cuba and in the Philippines. She was unable to borrow abroad, but she raised a great loan at home, and she maintained, for her, a vast army in Cuba. As the year advanced the fear of intervention on behalf of Cuba by the United States grew stronger, and this fear was very keen just before President Cleveland's message to Congress. Since then strong hopes have been entertained that the Spanish Government would seize the opportunity afforded it to come to an arrangement with the United States and settle the Cuban question. There appears

to be no doubt that the Continental Powers generally have advised Spain to take this course.

For the first half of the year the credit of the Indian Government steadily improved. In the previous year the Government had been able to convert its rupee debt from 4 per cent into 3½ per cent, and last year it was able to raise a small loan in India at 3 per cent. Moreover the Government engaged in a policy of more active railway construction, and European investors were themselves more ready to engage in railway building without Government guarantees than formerly. Altogether the prospect until midsummer was very favorable. Unfortunately the monsoon rains failed and the consequence was a great deficiency in the food crops of the people.

There was likewise drought in South Africa and Australasia, and the consequence of all this was such a demand for wheat as in September sent up the price suddenly and unexpectedly. The more active railway construction, largely assisted by Government loans, and the preparations against famine have made money very stringent in India. The minimum bank rates in Bengal and Bombay have risen to 10 per cent, while 12 per cent is the usual charge in the native market. As yet, however, there are hopes that famine may be averted and that the stringency in the market will not bring on a crisis.

We have reserved for the last place in this brief review of the great political events which have exerted an influence upon markets, the Presidential campaign in the United States. It was watched throughout the United Kingdom with the keenest interest, not only because of the immense investments of the British people in the United States, but because also of the close kinship of the two peoples and the similarity of their institutions. While it continued it exercised a very depressing effect on the money market and the Stock Exchange, and it undoubtedly checked other business because of the uncertainty that was felt. The great victory of Mr. McKinley was hailed with satisfaction, and the hope grew as the year drew to an end that the United States was entering gradually upon a new period of prosperity. And although there has not been much investment as yet, and probably will not be for some time longer, the revival in the United States is being followed watchfully by all classes here.

Trade was exceedingly active and prosperous throughout the year. The value of the imports somewhat exceeded 441¾ pounds sterling, the largest total ever reached in the history of this country; 1891 was previously the year of largest import, but in that year much British money invested in other countries was being withdrawn in hot haste. The failure of the great house of Baring Bros. in the autumn of 1890 had affected the credit of most other houses in the city, and to strengthen themselves and guard against contingencies, almost everyone in business who had much money employed abroad called some of it home. Allowing for the fact, then, that much of the imports in 1891 represented capital withdrawn, and that prices were higher then, the import trade of 1896 very much exceeded that of 1891. The value of the exports of British and Irish produce and manufactures last year amounted to almost 240 millions sterling, an increase of nearly 14 million sterling compared with the year before. But the total was, nevertheless, smaller than that for 1890, which therefore remains the year of largest exports in our history. It is to be remembered, however, that as in the case of the imports prices were much higher in 1890, and besides, the great boom, which ended with the Baring collapse, operated to swell the foreign trade in 1890. Last year there was no boom; even the mining craze had come to an end.

Returning to the imports, we find a very marked increase in the raw materials for manufactures. The imports of cotton were on an immense scale, so were the imports of wood, and so also were the imports of iron. The food imports were

exceedingly large, but the quantity was only about the same as in the preceding year. The prices, especially of wheat, as already stated, rose very considerably in September. There was a marked increase likewise in manufactured articles, and particularly in silk. It would seem that the alarm reated in the United States by the nomination of Mr. Bryan checked in a remarkable way the imports of silk into the United States, and that silk makers, in consequence, sent an unusual quantity into the United Kingdom.

In the exports we find there was an extraordinary falling off in American purchases of our goods. On the other hand there was a very marked increase in the purchases of India, of the Australian colonies, of China and Japan, of Germany, of Argentina, and all the South African colonies and republics. The result is that, as already said, our exports increased largely compared with the year before, which also showed a great improvement on the year immediately preceding; but they are not yet quite as large as in 1890. The fact that there has been so marked an increase in the imports of the raw materials for manufactures is itself striking evidence of the belief of manufacturers throughout the United Kingdom that the new year will be even more prosperous than the past. And the reports from every direction are to the effect that there is less want of employment and more activity than there has been since the Baring crisis.

The home trade, as distinguished from the foreign trade, has been even more active and more prosperous. It has been noted with regard to the foreign trade that we have had to pay more for our imports generally, and especially for our imports of wheat and wool, because of the failure of the crops in India and Australia consequent upon the drought; but there has not been a corresponding rise in our exports. Although, then, the foreign trade has been on so large a scale, it has hardly been so profitable as in 1895. On the other hand the home trade has been exceedingly profitable as well as active. It is a notable fact that all through the depression that followed the Baring crisis the home trade continued good. During the past year it expanded, the evidence for the statement being the clearing-house returns, the railway traffic returns, trade returns and circulars, and the trade-union's statistics of employment.

Agriculture was undoubtedly better last year than in the year before. There was a long drought during the spring and summer, but in 1895 it continued so long that the green crops and the hay suffered very severely, and even some of the grain crops were affected. Last year rain came in time to prevent very grave damage to the green crops in general, and the second hay crop was good.

Perhaps the most active of all our industries was that of iron and steel, due in the first place to shipbuilding, in the second place to the bicycle boom and in the third to the demand for machinery and railway material for abroad. The demand for bicycles continued ahead of the supply from the very beginning to the very end of the year, notwithstanding large imports from the United States and some other countries; and there was an immense number of new companies started to satisfy this demand.

Shipbuilding, too, was exceedingly active. During the year the total output of the United Kingdom was 751 vessels, of 1,324,000 tons, in round figures. Of these, 55 vessels, of 164,000 tons displacement, were war ships launched at the Government and private yards. The trading steamships number 628, and the gross tonnage was 1,114,000; while there were only 68 sailing vessels, of 46,000 tons. The output exceeds that of 1895 by more than 208,000 tons, the increase being exclusively in steamers. The steam tonnage was larger than for any of the preceding eight years. More remarkable was the falling off of the sailing tonnage, which constituted as much as 24 per cent of the total in 1892, and was only 4 per cent last year. Of the tonnage of the steam vessels constructed last year it is worth notice that 99.3 were built of steel and only 0.65 of iron. As the iron steam tonnage was practically made up of trawlers and comprises no single vessel of more than 212 tons, it may be said that virtually all the vessels built were of steel. Of the sailing tonnage 96¼ per cent was of steel, the rest of wood. It would seem from all this that iron has gone out of fashion for shipbuilding.

Of the total tonnage of all kinds built last year, in round figures, 810,000 tons were for the United Kingdom, being

about 70 per cent. The remainder, measuring 350,000 tons, was for the colonies and foreign countries. The wrecks of United Kingdom vessels during the year were about 269,000 tons, and there were, of course, purchases of old vessels, both steamers and sailing vessels, by foreigners. Altogether it is estimated that the sailing vessels used in the United Kingdom decreased for the year by about 106,000 tons, while the steam tonnage increased by 323,000 tons; the net increase, therefore, for the United Kingdom is about 217,000 tons. Of the tonnage built in 1896 Germany was the largest single purchaser, having ordered from our shipbuilders vessels of about 118,000 tons, in round figures; Russia's second with 34,000 tons; Norway third, with 28,000 tons; Denmark and Japan come fourth, with over 24,000 tons each; and the British Colonies follow with 16,000 tons.

It is remarkable that after a year of such activity in shipbuilding the vessels under construction on December 31 were nearly 785,000 tons, being about 73,000 tons more than on the last day of 1895. At the present time Japan takes the lead among the foreign customers of British shipbuilders. During 1895 she acquired 68,000 tons of old British tonnage. Twelve months ago she had only 2,000 tons under construction. During 1896 the old tonnage sold to her was about 14,000. But at the present time 62,000 tons are under construction, besides two first-class battleships. There has likewise during the year been a very active demand for locomotives for foreign railways, for machinery, for textile manufacture and for mining machinery. South Africa had for some years been an exceedingly good customer for mining machinery; last year were added the demands of Western Australia, New Zealand, Tasmania and British Columbia.

In the textile trades the course of events has not been quite even. For example, in the linen trade Belfast has been complaining while Dundee has been prosperous. In the woolen trade, again, the failure of American orders caused a slackness during the latter part of the year in Yorkshire, while in other districts the mills were working full time. So, again, with regard to cotton, spinners have been very actively employed, and have done well, while weavers complain that the year was unprosperous. It has been observed above that silk was sent to this country in exceptionally large quantities, and the explanation given is that the market had dried up in the United States, and consequently everyone who had to sell shipped his goods to the United Kingdom. The woolen trade has had less prosperity likewise because of the state of things in the United States. The falling off in the American demand for raw wool was very marked. At the end of 1895 and the beginning of 1896 Americans bought actively, and also placed very large orders in Yorkshire. As the summer advanced the American demand fell off, and since the two great national conventions were held practically no orders were placed in this country.

On the other hand, the supply of Australian wool was very short. For two whole years now the Australian colonies have been suffering from drought. The mortality in sheep in 1895 and the beginning of 1896 was very great, and almost the whole of the young lambs were lost; consequently the clip was exceedingly small, and there was a reduction of the sales in London of as much as 200,000 bales. In cotton there was a rather rash speculation in the early part of the year; since then there has been a decided fall. Such spinners as had not engaged in the speculation have done exceedingly well, for the foreign demand has been very large, but weavers complain that they have not done so prosperously. The failure of the crops in India largely accounts for this, and it is to be feared that the losses of the weaving branch will be heavy during the present year. Not only is there the danger of famine in India, but the plague in Bombay and Kurra- chee has totally disorganized the import trade.

For the first eight months of the year the money market was quite as easy as it had been during the preceding two years. In April the rate of discount in the open market was as low as ½ per cent, while loanable capital was so plentiful that much of it could not be used, and throughout the first eight months the rate of discount in the open market seldom reached 1 per cent. The tension in the American market during the electoral campaign, and the great demand for wheat because of the failure of the crops in India and Australia, led to such a demand for gold for the United States that suddenly rates rose in London, and in September the

Bank of England advanced its rate of discount to  $2\frac{1}{2}$  per cent from 2 per cent, at which the rate had stood for two years and seven months, an unusually long period. An active demand for gold also sprang up for Russia, Germany, Egypt and South America; the principal drain, however, was all along for the United States and Russia. The Russian Finance Minister has for a long time been preparing for the resumption of specie payments in gold. During the past year he hastened his preparations, as it is understood that the plan he had drafted received the approval of the Czar, and he hoped at a very early date to put it into execution. Russia, therefore, drew upon Berlin and London for very large amounts. The Imperial Bank of Germany preceded the Bank of England in raising its rate, and the drain upon London proved so considerable that between the middle of August and the 21st of October the gold in the Bank of England was reduced by  $11\frac{1}{2}$  millions sterling. At the end of June the total stock in the Bank of England exceeded 49 millions sterling; on the 21st of October it was very little over 36 millions sterling.

Great as the drain was, and unexpected as it proved to be, the stock held by the Bank of England was sufficiently large to have prevented any considerable movement in the market, were it not that the Bank keeps for the Japanese Government a very large sum which that Government is free to take away when it pleases. The directors of the Bank have been very severely criticised because they did not make arrangements with the Japanese Government and so protect themselves from sudden large withdrawals. In any case, the fact that the Bank might be drawn upon by Japan while the drain from the United States, Russia, Germany, Egypt and South America was so large compelled the directors to raise their rate in little more than a month to 4 per cent, and created quite an unexpected apprehension in London. The election of Mr. McKinley in the United States, by restoring confidence, put an end to the demand for gold in that country, and as the year approached its close the drain upon the Bank of England from the Continent, Egypt and South America also ceased. But even now there is a good inquiry for gold in the open market for Russia.

The shipment of so much gold from London very naturally checked speculation and lessened the creation of new companies, yet the issuing of new companies has been on an enormous scale taking the whole year together. While the Bank rate was 2 per cent, and a large export to the United States was not anticipated, companies were formed in enormous numbers for all sorts of purposes. Bicycle companies were exceedingly numerous, so were Western Australia and New Zealand mining companies. South African companies, which had been so plentiful before the Jameson raid, were very much fewer last year.

The total capital offered for public subscription somewhat exceeded 150 millions sterling, against 105 millions sterling the year before, and as little as 49 millions sterling in 1893. But the issuing of new companies, or rather the capital asked for, was very much less than in either 1889 or 1890. In 1889, which was the year of greatest amount in recent times, the capital asked for, exceeded 159 millions sterling. After mining and bicycle companies the largest issues were for motor companies. Brewery debentures form a considerable item, and so does the amount raised for tea companies in India and Ceylon.

How much of the capital invited has really been subscribed by the public it is impossible to say. The practice of underwriting is now so general that most promoters who have influence and capital arrange in that way. It may be said, therefore, that most of the companies of any importance are underwritten, and that the underwriters have to find the capital if the public refuses to subscribe. Of course risks are incurred under this method unless the issuing house is powerful and the underwriters are wealthy. Nominally people may engage to take very large sums, but if the public refuses to subscribe, many of the underwriters may be unable to fulfill their engagements. It is safe to say, for all that, that not since 1890 has so much money been subscribed in any year as during 1896.

So far as trade is concerned the rise in discount and interest has not been injurious, but speculation has been very largely checked. Bankers, bill brokers and other lenders of money have benefited largely, of course, by the rise. The first half of the year was far from a prosperous one for

them, but during the second half they have made decidedly improved profits.

There was very little activity in the silver market during the twelve months. The price opened at  $30\frac{1}{2}$ d. per oz. and did not move very much until the victory of the silverites at the Chicago Convention led many people to hope that something might be done by the United States to rehabilitate the metal, and though there was no excitement the price advanced to 31 9-16d. Gradually, however, as the sound money party exerted itself the quotation declined, and since the defeat of Mr. Bryan and the failure of the crops in India there has been a fall to 29 13-16d.

During the year the price of consols rose to the highest point ever recorded. In January President Cleveland's Venezuelan message, the atrocities in Turkey, the Jameson raid and the German Emperor's telegram, together with the great break-down in the mining market, caused so much general apprehension that the quotation fell to  $105\frac{1}{4}$ . As soon, however, as it became apparent that there would be no serious quarrel, either with the United States or Germany, that the British Government did not intend to intervene in Turkey, and that President Krüger would be able to control the Boers, the price steadily advanced, and twice or three times during the summer reached 114, or a very small fraction under. There were some fluctuations during the summer, but in September the large gold shipments to the United States and the growing demand for the metal for Russia, Germany and other countries led to a sharp decline to about  $107\frac{3}{4}$ . At the close there was a recovery to about 112.

British railway stocks moved very much in sympathy with consols. They declined at the beginning of the year, rose rapidly as the political prospects cleared and declined again when money rates became stiff. The railway traffics have been exceedingly good, and there is every prospect that they will continue to improve during the new year. Indian Government stocks advanced with consols in the first half of the year. So good, indeed, was the credit of the Indian Government and so promising were the prospects of the country that a loan of 4 crores at the rate of 3 per cent was raised in India. Naturally the failure of the rains (and the consequent damage to the crops) has caused a considerable decline.

The bonds of the British Colonies and Dependencies moved like consols and British railways; all upwards in the early part and all downwards when money became dearer. The colonies, with the exception of Western Australia, did not borrow during the twelve months. Foreign government bonds were fairly steady, with the exception of Italian and Spanish. The Italian defeat in Africa caused a very sharp fall in the bonds to 76. The peace with Abyssinia and the decision of the Government to restore order in the finances led to a marked recovery. At the close of the year the bonds were  $92\frac{1}{4}$ .

The insurrections in Cuba and the Philippines caused Spanish bonds to fall to 59. On French and German buying they recovered in the summer to  $65\frac{1}{2}$ , but in September dropped to  $56\frac{1}{4}$ . At the close they had risen once more to 61. Turkish securities fluctuated widely. The "B" bonds, for example, at the opening were 30; in May they had recovered to 39; in October they fell to 32, and they closed a trifle above the latter quotation.

The chief feature in the South American market has been the steady and almost continuous rise in Argentine securities. Mining shares of all kinds fell heavily on account of the Jameson raid, but they recovered again, and there was very active dealing in Western Australian and New Zealand shares. During the summer a long period of quietness occurred, and in the autumn dearer money caused another fall. South African shares most particularly suffered; in some cases, the quotations were actually lower than at the time of the raid.

In the American department there was exceedingly little done until July, when the unexpected strength shown by the silver party created apprehension and caused a fall. The Chicago Convention sent prices down lower still, but after a while the energetic action of the sound money party renewed confidence and there was a gradual recovery. On the defeat of Mr. Bryan there was for a few days active dealing and a general advance, but the market gave way again, and practically at the close of the year quotations were about the same as at the beginning.

The complete trade figures of imports and exports to and from Great Britain for three years are as follows:

## EXPORTS AND IMPORTS.

	1896.	1895.	1894.
<b>EXPORTS.</b>			
Home products.....	239,922,000	225,890,000	216,194,239
Re-shipment of imports.....	56,466,000	59,942,000	57,966,484
<b>Total exports.....</b>	<b>296,388,000</b>	<b>285,832,000</b>	<b>274,160,723</b>
<b>IMPORTS.</b>			
<b>Total merchandise.....</b>	<b>441,807,000</b>	<b>416,689,000</b>	<b>408,505,718</b>
Exports of gold, silver &c.....	145,419,000	130,857,000	134,344,995

The quantities and values of textile exports from Great Britain for the last three years are given in the following table:

## EXPORTS OF TEXTILE FABRICS

YEAR'S EXPORTS.	1896.	1895.	1894.
<b>QUANTITIES.</b>			
Cotton yarn.....lbs.	246,510,700	251,989,000	236,121,000
Piece goods.....yds.	5,220,398,000	5,032,562,200	5,312,362,900
Woolen yarn.....lbs.	37,208,100	34,725,800	34,928,300
Piece goods.....yds.	257,137,700	254,679,600	233,431,700
Linen yarn.....lbs.	18,504,400	17,045,600	15,540,100
Piece goods.....yds.	174,153,900	203,587,600	156,254,000
Woolen yarn.....lbs.	62,258,100	61,070,900	53,015,600
Woolen tissues.....yds.	61,198,000	57,657,100	40,922,000
Worsted tissues.....yds.	136,829,400	164,438,600	110,674,100
<b>VALUES.</b>			
Cotton yarn.....	10,047,568	9,291,195	9,285,645

\*Feb. 22, 1894. †Sept. 10, 1896. ‡Sept. 24, 1896. §Oct. 22, 1896.

In the subjoined statement we show all the changes in the Bank rate in each year from 1888 to 1896, inclusive:

## COTTON SUPPLY AND CONSUMPTION IN EUROPE.

Mr. Ellison's "Annual Review of the Cotton Trade for the Year 1896" was issued in Liverpool on Friday of last week, but our cable covering the statistics and other matters of interest contained therein arrived at so late an hour that we were compelled to defer any reference to them until this week. Following our usual custom, we have received all the data Mr. Ellison has prepared bearing upon supply and consumption for the calendar year just closed, and also the estimates of imports, consumption, &c., for the remainder of the cotton season of 1896-97—the period from January 1 to September 30 1897.

So far as the calendar year 1896 is concerned the figures indicate that there has been only a very moderate increase in the consumption of Great Britain, and that on the Continent the addition has not been so material as in either 1894 or 1895. The actual results for 1896, stated in bales of the uniform weight of 500 lbs., have been as follows:

SPINNERS' TAKINGS, CONSUMPTION AND STOCKS IN 1896.

In 500-lb. Bales.	Gr. Britain.	Continent.	Total.
Stocks January, 1 1896.....	130,000	452,000	582,000
Takings.....	3,268,000	4,118,000	7,386,000
Supply.....	3,398,000	4,570,000	7,968,000
Consumption.....	3,276,000	4,173,000	7,449,000
Stocks January 1 1897.....	122,000	397,000	519,000
Weekly consumption.....	63,000	80,250	143,250

According to the foregoing the mills in Great Britain have consumed on the average 63,000 bales of 500 lbs. each per week during the season, a gain of 385 bales per week over 1895, and on the Continent consumption has reached 80,250 bales per week, or an increase of 2,000 bales per week as compared with the previous season. The surplus stocks at all European mills at the close of the year are estimated at 519,000 bales of 500 lbs. each, or 63,000 bales less than were carried over at the close of 1895. As our readers fully understand, the above statement covers the results for 1896 only; so we have prepared the following to bring out clearly the relation the figures for a number of years bear to each other, embracing in the tables the figures for the seasons from 1889 to 1896 inclusive.

Bales of 500 Lbs.	Spinners' Stock Jan. 1.	Takings.	Supply.	Consumption.	Spinners' Stock Dec. 31.	Weekly Consumption.
<b>Gr. Britain.</b>						
1896.....	130,000	3,268,000	3,398,000	3,276,000	122,000	63,000

1889.....	118,000	3,322,000	3,440,000	3,297,000	143,000	63,400
<b>All Europe.</b>						
1896.....	582,000	7,386,000	7,968,000	7,449,000	519,000	143,250
1895.....	581,000	7,326,000	7,907,000	7,325,000	582,000	140,865
1894.....	314,000	7,382,000	7,697,000	7,116,000	581,000	136,816
1893.....	397,000	6,575,000	6,962,000	6,648,000	314,000	127,846
1892.....	398,000	6,696,000	7,094,000	6,707,000	387,000	128,985
1891.....	386,000	6,993,000	7,379,000	6,981,000	398,000	134,245
1890.....	297,000	6,907,000	7,204,000	6,913,000	386,000	131,107
1889.....	197,000	6,457,000	6,654,000	6,357,000	297,000	122,246

A glance at the above enables the reader to quickly discern how slight has been the increase in consumption in Great Britain in recent years. In fact, although compared with either of the four preceding years, 1896 shows some addition, if we go back to 1891 or 1890 we find that the current rate of consumption actually exhibits a decrease. On the Continent, however, extension of cotton-manufacturing has been constant. To be sure, it has been less rapid the past season than in some earlier years, but since 1889 the number of bales consumed weekly has risen from 63,400 to 80,250 of

the average weight of 500 lbs. each, or a gain of over 26½ per cent. During the like period the increase in Great Britain reached but little in excess of 7 per cent. In 1886 Great Britain's weekly consumption exceeded that of the Continent by 2,700 bales of 500 lbs. each, while in 1896 the Continent was in the van by 17,250 bales per week.

From the point of view of the manufacturer the year has been a fairly satisfactory one. There has not been so wide a margin for profit as during the period from 1887 to 1890, but neither has there been such a lack of profit as during 1892 and 1893. From time to time there have been reports of stoppage of looms in the manufacturing districts of Great Britain, but on the whole the stoppage has not been important. At the same time it is quite clear that spinners have as a rule been better situated than weavers so far as prices are concerned. Our cable states that 92 companies in the Oldham district made a combined profit of £46,772 in 1896 or an average of £508 per mill, which compares with a profit of £667 per mill in 1895 and a loss of £177 in 1894. The financial results to these mills since 1883 have been as follows:

1896.....	92 Companies—Profit, £46,772.	Profit per mill, £508
1895.....	95 " " 63,329.	" " 567
1894.....	93 " Loss, 15,837.	Loss " 177
1893.....	93 " " 72,768.	" " 782
1892.....	90 " " 101,434.	" " 1,127
1891.....	93 " Profit, 10,763.	Profit " 118
1890.....	90 " " 376,041.	" " 4,17
1889.....	86 " " 220,587.	" " 2,565
1888.....	85 " " 250,932.	" " 2,952
1887.....	88 " " 85,810.	" " 975
1886.....	90 " Loss, 61,718.	Loss " 686
1885.....	87 " " 2,730.	" " 31
1884.....	60 " Profit, 125,000.	Profit " 2,083

The exports of yarns and goods from Great Britain in 1896 were heavier than in any previous year and exceeded the total for 1895 by 32,478,000 lbs. These exports in detail by months and quarters for 1896 and 1895 were set forth in the CHRONICLE of January 23, page 194.

Mr. Ellison's estimates of imports, consumption, etc., for the remaining nine months of the season 1896-97 are also given in the cable. He estimates that the yield in America for 1896-97 will be 8,650,000 bales. For the nine months from January 1 to September 30 1897, he places the aggregate imports at 4,582,000 bales of ordinary weights, made up of 3,389,000 bales from the United States, 709,000 bales from the East Indies, 390,000 bales from Egypt and 141,000 bales from Smyrna, Brazil, West Indies, etc. Presented in tabular form, the estimate is as follows, comparison being made with revised results for 1896 and 1895.

IMPORTS JANUARY 1 TO SEPTEMBER 30.

	Estimated. 1897.	Actual. 1896.	Actual. 1895.
American.....	3,339,000	3,073,000	4,097,000
East Indian.....	709,000	944,000	724,000
Egyptian.....	390,000	340,000	351,000
Smyrna, &c.....	144,000	35,000	29,000
Brazil, W. I., &c.....		97,000	102,000
Total.....	4,582,000	4,495,000	5,303,000
In bales of 500 lbs.....	4,455,000	4,276,000	5,114,000
Stock in Europe's ports, bales 500 lbs.....	1,498,000	1,698,000	1,907,000
Stock at mills, bales 500 lbs.....	519,000	582,000	581,000
Total, in bales 500 lbs.....	6,472,000	6,556,000	7,602,000
Consumption, 39 weeks.....	5,564,000	5,577,000	5,500,000
Stock at ports and mills Sept. 30.....	908,000	979,000	2,102,000
Of which at the mills.....	300,000	301,000	602,000
Leaving at the ports, bales of 500 lbs.....	608,000	678,000	1,500,000
In actual bales.....	630,000	691,000	1,553,000

On the basis of these estimates the combined stocks at ports and mills in Europe at the close of the season of 1896-97 will be only 908,000 bales of 500 lbs. each, or a decrease of 71,000 bales from September 30 1896 and a falling off of 1,194,000 bales from 1895. In fact not since 1889 has the European supply on September 30 been so reduced as this estimate indicates.

## DEBT STATEMENT JANUARY 30, 1897.

The following statement of the public debt of the United States on January 30, 1897, is made up from official figures issued on that day. Lower down we give an interesting exhibit of the bonds issued in aid of the Pacific Railroads, and the Treasury cash holdings, all of the same date.

## INTEREST-BEARING DEBT JANUARY 30 1897.

Title of Loan—	Interest payable.	Amount issued.	Registered.	Amount outstanding.	Total.
4 1/2% Fund. loan, 1891.	Q—M.	250,000,000	25,364,500		25,364,500
Continued at 2 p.c.					
4% Funded loan, 1897.	Q—J.	730,000,150	490,421,900	69,217,200	559,639,100
4% Refund cert. of 1891.	Q—J.	40,012,750			45,750
5% Loan of 1904	Q—F.	100,000,000	59,941,250	40,058,750	100,000,000
4% Loan of 1925	Q—F.	162,315,400	101,583,850	60,746,550	162,315,400
Total, excluding Pac. RR Bonds		1,293,228,800	677,290,500	170,019,500	847,304,750

NOTE.—The denominations of bonds are as follows: Two per cents (registered only), \$50, \$100, \$500, \$1,000, \$5,000, \$10,000, \$20,000, \$50,000; 4s of 1907, registered, \$50, \$100, \$500, \$1,000, \$5,000, \$10,000, \$20,000, \$50,000; coupon, \$50, \$100, \$500, \$1,000; 4s, refunding certificates, \$10; 5s of 1901, registered, \$50, \$100, \$500, \$1,000, coupon, \$50, \$100, \$500, \$1,000; 4s of 1925, registered, \$50, \$100, \$500, \$1,000, coupon, \$50, \$100, \$500, \$1,000.

## DEBT ON WHICH INTEREST HAS CEASED SINCE MATURITY.

	Dec. 31, 1896.	Jan. 30, 1897.
Funded Loan of 1891, matured September 2, 1891.	\$167,250 00	\$167,250 00
Old debt matured prior and subsequent to Jan. 1, '91.	1,215,890 26	1,215,890 26
Debt on which interest has ceased.	\$1,383,070 26	\$1,383,070 26

## DEBT BEARING NO INTEREST.

United States notes.	\$346,681,016 00
Old demand notes.	54,347 50
National Bank notes—Redemption account.	20,997,189 50
Fractional currency.	\$15,264,438 14
Less amount estimated as lost or destroyed.	8,375,934 00
	6,890,504 14

Aggregate of debt bearing no interest. \$374,628,057 14

## RECAPITULATION.

Classification of Debt	Jan. 31, 1897.	Dec. 31, 1896.	Increase or Decrease.
Interest bearing debt.	847,364,750 00	847,364,690 00	Inc. 60 00
Debt, interest ceased.	1,382,030 26	1,383,070 26	Dec. 10 00
Debt bearing no interest.	374,623,057 14	372,502,201 14	Inc. 2,120,856 00
Total gross debt.	1,223,370,737 40	1,221,249,961 40	Inc. 2,120,776 00
Cash balance in Treasury.	\$15,369,420 73	\$23,320,579 95	Dec. 12,957,059 22
Total net debt.	1,008,001,316 67	997,929,381 45	Inc. 10,071,935 22

The foregoing figures show a gross debt on January 30 1897 (interest-bearing and non interest-bearing) of \$1,223,370,737 40 and a net debt (gross debt less net cash in the Treasury) of \$1,008,001,316 67.

Pacific Railroad bonds are never included in the official total of the Government debt. The status of these obligations to-day is as below. Methods of book-keeping make the official record unintelligible to most readers, and hence we have brought together in our compilation the leading facts relating to the subject.

## BONDS ISSUED IN AID OF PACIFIC RAILROADS.

Name of Railway.	Bonds issued and accumulated int. Principal.	Interest.	Bonds paid, or date of maturity.	Due Jan. 1, 1898.	Due Jan. 1, 1899.
Central Pacific.	25,885,120	35,563,400	6,074,000	10,614,120	9,107,000
Kansas Pacific.	6,303,000	6,704,252	4,880,000	1,423,000	
Union Pacific.	27,238,512	30,446,377	9,161,000	16,910,512	3,157,000
Cent. Br. U. P.	1,800,000	9,153,430	1,250,000	320,000	
Western Pacific.	1,070,500	3,255,036	320,000		1,650,500
St. Louis & Pac.	1,023,320	2,529,455		1,023,320	
Total.	64,623,512	80,768,000	20,714,000	29,004,952	14,004,500

The cash holdings of the Government as the items stood January 30 we take from the Treasury statement of that date. The net cash balance given below is the same as deducted above in reaching the net debt.

## CASH IN THE TREASURY.

Gold—Coin.	\$130,100,343 43
Bars.	\$2,286,754 50
Silver—Dollars.	\$8,617,245 00

Gold reserve.	\$100,000,000 00
Net cash balance.	115,362,420 73
Aggregate.	\$888,553,910 21
Net cash balance in the Treasury December 31, 1896.	\$228,320,379 05
Net cash balance in the Treasury January 31, 1897.	\$215,362,420 73
Decrease during the month.	\$12,957,059 22

Clearings by Telegraph.—Sales of Stocks, Bonds, &c.—Stock Exchange Clearing-House Transactions.—The subjoined statement, covering the clearings for the current week, usually appears on the first page of the CHRONICLE, but on account of the length of the other tables is crowded out once a month. The figures are received by telegraph from the leading cities. It will be observed that as compared with the corresponding week of 1896 there is an increase in the aggregate of 5.6 per cent. So far as the individual cities are concerned New York exhibits an increase of 10.7 per cent, and the gains at other points are: Boston, 26.6 per cent; Philadelphia, 0.3 per cent; St. Louis, 9.2 per cent, and Baltimore, 30.8 per cent. Chicago records a loss of 13.3 per cent and New Orleans, 19.6 per cent.

## CLEARINGS.

Returns by Telegraph.

Week Ending February 6.

	1897.	1896	Per Cent.
New York.	\$515,316,007	\$465,894,930	+10.7
Boston.	86,583,291	68,377,876	+26.6
Philadelphia.	59,132,230	58,933,556	+0.3
Baltimore.	15,423,042	11,799,958	+30.8
Chicago.	62,798,213	72,395,196	-13.3
St. Louis.	22,385,604	20,498,130	+9.2
New Orleans.	7,310,750	9,091,224	-19.6
Seven cities, 5 days.	\$768,937,137	\$706,810,870	+8.8
Other cities, 5 days.	132,416,398	135,108,926	-2.0
Total all cities, 5 days.	\$901,353,535	\$841,919,796	+7.1
All cities, 1 day.	166,823,461	169,357,544	-1.6
Total all cities for week.	\$1,067,976,996	\$1,011,277,340	+5.6

Another table, our usual monthly detailed statement of transactions on the various New York Exchanges, has also been crowded off of the first page. The results for the month of January are, however, given below and for purposes of comparison the figures for the corresponding period of 1896 are also presented.

Description.	January, 1897.			January, 1896.		
	Par Value or Quantity.	Actual Value.	Average Price.	Par Value or Quantity.	Actual Value.	Average Price.

NOTE.—Iron, woodens and cottons include all the branches of these industries; machinery includes implements and tools; hosiery includes socks, underwear and door mills; crockery and coopers; clothing includes millinery and furnishings; hats include furs and gloves; chemicals include drugs, fertilizers, paints and oils; printing and books include engraving and maps; milling includes baking; leather and shoes include makers of harness, saddlery, trunks and rubber goods; liquors include tobacco, wines, brewers and beer; glass includes earthenware, pottery, brick, lime and cement; groceries include meats and fish; hotels and restaurants; dry goods include carpets and curtains; furniture includes crockery; hardware includes stoves and tools and jewelry includes clocks and watches. Brokers include all real estate, note, insurance or produce dealers whose main business is not the handling of actual products, with mortgage and other loan concerns, and transporters include all except incorporated railway companies.

# Monetary and Commercial English News

[From our own correspondent.]

LONDON, SATURDAY, January 23rd, 1897.

There has been very little change either in the political or economic condition of affairs here since last week. Parliament was opened on Tuesday, but very little fresh information has been given to the world, either in the Queen's speech or in the speeches of Ministers. The only real addition to our knowledge is the statement made by Lord Salisbury that the Powers are all at one that some kind of compulsion must be applied to the Sultan, but that they cannot agree how far the compulsion is to be carried. Privately, the writer learns that Russia proposed to bribe the Sultan by helping him to get a loan of 4 millions sterling, but then she hesitates to give the full guarantee, offering what is described as a moral guarantee.

The plague in Bombay and Kurracbee is growing worse. The mortality is frightful and people are flying from the towns in multitudes. The distress, too, in consequence of the failure of the crops is becoming severer, and every day the number employed on the relief works is increasing largely. The Lord Mayor has opened a fund for the relief of the sufferers, which is being subscribed to very liberally, but the fund is only to supplement the action of the Government. The Government undertakes to give work to every person in need of it and to pay such wages as will enable all in want to get the requisite food; but it will not go further, and the fund now being raised is for providing things which the Government thinks ought not to be given out of taxes raised compulsorily.

In Australia, on the other hand, rains have fallen abundantly, except in the extreme west of New South Wales. It is hoped that the long drought has come to an end, and that the colonies are about to enter upon a better time. In South Africa the failure of the crops and the rinderpest have plunged the natives into such distress that they are everywhere restless and disposed to rebel. Troubles are feared both in Basutaland and Griqualand. No progress has as yet been made in the negotiations between the great mining capitalists and the Boer Government for the purchase and annulment of the railway and dynamite monopolies.

The Bank of England on Thursday reduced its rate of discount from 4 per cent to 3½ per cent. A couple of days previously the Imperial Bank of Germany had lowered its rate from 5 to 4 per cent. The feeling here is that money will now become cheap and abundant, and will continue so throughout the first half of the year. The Russian Government, through its financial agents, gives assurances that it will not require gold for the present, and the Japanese Government also reassures the city by the statement that nearly all the gold required has now been taken. There is little probability that the Indian Government will borrow gold. If then neither Russia, Japan nor India takes exceptional amounts, it is reasonably probable that money will accumulate here in London and upon the Continent, although during February and the first half of March the outside market here will be stripped bare by the large collection of the revenue. That, however, will be a very temporary affair.

In the silver market there is very little doing, and in spite of the great stringency in the Indian money market the India Council is still unable to get the price for which it holds out for its bills. It offered for tender on Wednesday 50 lacs and sold very little over 5 lacs, at a trifle above 1s. 31. per rupee. This does not mean that money is growing easier in India. It means that the exchange banks had provided themselves very largely with exchange, and consequently are unwilling to give the price which the India Council is insisting upon.

There has been more activity in the American market this week than for a long time past. The public, as yet, is not taking part to any very great extent, but it is noticeable that good bonds have been bought more largely than for a long time past, and even second class bonds are not being altogether neglected. It can hardly be said that there is very much investment in the latter class, but there is a good deal of inquiry as to their prospects, indicating that the general public here is only waiting to be assured that the new Administration and the new Congress will pursue a wise policy in order to begin to buy once more upon a considerable scale. The hope is very strong that the arbitration treaty will be ratified, so that

every question that may arise between the two countries may be settled peaceably and in a friendly spirit in the future. The reduction in the Bank rate has encouraged the buying of consols and other first-class securities, but there is not very much investment, either in British railway stocks or in the minor industrial securities.

The later news from Argentina is unfavorable. It was first stated in the autumn that locusts and heavy rains had seriously injured both the wheat and maize crops in the provinces of Santa Fe and Entre Rios and in the northern part of Buenos Ayres. Then it was alleged that the first statements were greatly exaggerated and that the crops would nearly be as large as last year. Now it is again reported that the damage done is very great. Unfortunately the latest news seems to be true. Uruguayan securities have also given way, as political troubles are apprehended. The Continental bourses are quiet but fairly firm. Everywhere it is expected that the Turkish question will be settled, and when it is, everyone looks for a great increase of activity.

The only department in which there can be described really good business is that for copper shares. There is a very great demand for copper, and it is now believed that copper shares will go very much higher than they are. The belief is of course leading to speculation, which tends to verify expectations. Undoubtedly the great armaments of all the Powers, the shipbuilding that is going on so actively, and the increase in electrical works of all kinds, are causing an immense consumption of copper.

The bank dividends have been exceedingly good for the last half of the past year. Taking twelve of the principal institutions, nine pay higher rates than this time 12 months, and the remaining three distribute the same rates. Of the nine that distribute more, two pay as much as 2 per cent more than this time last year, and two from 1½ to 1 per cent more. The others pay from ½ per cent to 1 per cent more. The railway dividends are likewise better this week. Last week, it will be recollected, some were good and some were bad. This week they are decidedly better. The London & Southwestern, for instance, which serves Southampton, distributes 8½, against 7½ last year, and the Metropolitan, a purely London line, pays 3½, against 3 per cent last year. Both banks and railway companies carry forward large balances.

The following return shows the position of the Bank of England, the Bank rate of discount, the price of consols, &c., compared with the last three years:

	1897. Jan. 20.	1896. Jan. 22.	1895. Jan. 23.	1894. Jan. 24.

—Corporations desiring bonds of suretyship for their officers or employees are referred to the twenty-fourth annual statement of the Guarantee Company of North America, published among our advertisements to-day. This company, "the original company in America," confines its business strictly to issuing these bonds, and it has accumulated for its shareholders a surplus of over 125 per cent from this business alone, and not in any way by contributions from them either by way of assessments or premiums on new issues of stock. The resource for security of the insured amount to about a million and a quarter dollars.

—Attention is called to a list of investment bonds advertised in another column by Messrs. Wood, Huesis & Co., 31 Pine Street.

**Breadstuffs Figures Brought From Page**—The statements below are prepared by us from the figures of the New York Produce Exchange. We first give the receipts at Western lake and river ports, arranged so as to present the comparative movement for the week ending Jan. 30, 1897, and since August 1, for each of the last three years:

Receipts at—	Flour.	Wheat.	Corn.	Oats.	Barley.	Rye.

—Attention is called to the offering of the five per cent 30-year gold first mortgage bonds of the Richmond Traction Co. at 98 and accrued interest. In the advertisement on another page will be found very full particulars regarding this company; see also statement and map on pages 74 and 76 of the November issue of our STREET RAILWAY SUPPLEMENT. The Richmond Traction Co. opened for business June 19, 1896. The gross earnings to Dec. 31, 1896, are reported at \$62,162; operating expenses, taxes, etc., \$37,387, leaving net earnings of \$24,775. It is pointed out that the company has in the first six months of its business, with only a portion of its lines in operation, earned practically the entire year's interest on its authorized issue of \$500,000 bonds. The bonds are offered by Messrs. Middendorf, Oliver & Co., Baltimore, and John L. Williams & Sons, Richmond, who recommend them as among the best and safest street railway bonds in the market.

—The attention of our readers is directed to the selected list of investment securities advertised in this issue by Messrs. Redmond, Kerr & Co.

—B. L. Smyth & Co. offer the Chicago & Alton 8 per cent common stock at a price to net investors 4 80 per cent.

WALL STREET, FRIDAY, FEB. 5, 1897—5 P. M.

**The Money Market and Financial Situation.**—In the absence of other features of importance Wall Street has been considerably interested this week in matters pertaining to the Northern Pacific Railway and the transfer of a large block of its securities to European purchasers. Simultaneously with this transfer there has been an active market for the securities of other trans-Continental and reorganized companies. Attention is also turned to this class of securities because of the limited supply of high-grade issues and the large volume of money seeking investment.

Since the opening of the year the European money markets have gradually assumed more normal conditions than previously existed, and on Thursday the Bank of England reduced its rate from 3½ to 3 per cent. There have been no developments of importance in the foreign exchange market. The demand for bills is more limited since the discount rates abroad have been reduced, and if the supply is in excess of the demand there is no disposition to crowd the excess upon the market and depress rates.

Recent reports of railway earnings are in some cases more favorable than they have been, but there is still large room for improvement in this direction. It is an encouraging fact, however, that the New York Central has been obliged to enlarge its force for handling the increasing freight traffic at its Western terminus.

Notwithstanding the absorption of investments, which is not now confined to the highest grades of securities, as noted above, the supply of money is largely in excess of the demand.

The open market rates for call loans during the week on stock and bond collaterals have ranged from 1½ to 2 per cent. To-day's rates on call were 1½ to 2 per cent. Prime commercial paper is quoted at 3 to 4 per cent.

The Bank of England weekly statement on Thursday showed an increase in bullion of £201,886, and the percentage of reserve to liabilities was 52.45, against 53.39 last week; the discount rate was reduced from 3½ to 3 per cent. The Bank of France shows an increase of 1,750,000 francs in gold and 1,450,000 francs in silver.

The New York City Clearing-House banks in their statement of Jan. 30 showed an increase in the reserve held of \$2,013,500 and a surplus over the required reserve of \$59,148,250, against \$57,067,800 the previous week.

	1897. Jan. 30.	Difference from Prev. week.	1896. Feb. 1.	1895. Feb. 2.

**Foreign Exchange.**—The foreign exchange market has been easy and generally steady on a small volume of business. A limited amount of bills drawn against sales of railway securities in Europe have been offered, and grain bills are in fair supply.

To-day's actual rates of exchange were as follows: Bankers sixty days' sterling, 4 84½ @ 4 84½; demand, 4 86½ @ 4 86½; cables, 4 86½ @ 4 87.

Posted rates of leading bankers follow:

February 5.	Sixty Days.	Demand.
Prime bankers' sterling bills on London..	4 85½	4 87½
Prime commercial.....	4 84 @ 4 84½	—
Documentary commercial.....	4 83½ @ 4 83½	—
Paris bankers' (francs).....	5 19½ @ 5 18½	5 17½ @ 5 17½
Amsterdam (gilders) bankers.....	40 @ 40½	40½ @ 40½
Frankfort or Bremen (reichmarks) b'k'ers	85 @ 85½	85½ @ 85½

The following were the rates of domestic exchange on New York at the under-mentioned cities to-day: Savannah, buying 1-16 discount, selling par; Charleston, buying 1-16 discount, selling 1-16 premium; New Orleans, bank, \$1 00 premium; commercial, 25c. per \$1,000 discount; Chicago, 40c. per \$1,000 discount; St. Louis, par @ 25c. per \$1,000 premium.

**United States Bonds.**—Sales of Government bonds at the Board include \$172,000 4s, coup., 1925, at 122½ to 124; \$34,000 4s, coup., 1907, at 112½ to 112¾, and \$20,000 4s, reg., 1907, at 111½ to 111¾. The following are the closing quotations:

" 4	3,632,011	2,991,862	122,984,782	1,900,438	57,235,778
" 5	4,622,122	3,475,933	123,025,148	2,046,003	58,276,516
Total	22,922,718	18,983,578	.....	.....	.....

**Coins.**—Following are the current quotations in gold for coins:

Sovereigns.....	\$4 86 @ 4 89	Fine silver bars....	— 64½ @ — 65½
Napoleons.....	3 85 @ 3 88	Five francs.....	— 93 @ — 95½
X & Reichmarks.....	4 74 @ 4 74	Mexican dollars....	— 50½ @ — 51½
25 Pesetas.....	4 77 @ 4 81	Do uncoined.....	— @ —
Span. Doubloons.....	15 55 @ 15 75	Peruvian sols.....	— 45½ @ — 47½
Mex. Doubloons.....	15 50 @ 15 75	English silver....	— 4 83 @ 4 87
Fine gold bars....	par @ ¼ prem.	U. S. trade dollars	— 65 @ — 75

**State and Railroad Bonds.**—Sales of State bonds at the Board include \$45,000 Virginia fund. debt 2-3s of 1891 at 62½ to 63½ and \$20,000 Virginia 6s deferred trust receipts, stamped, at 6½, and \$2,000 Tenn. Settlement 3s at 79 to 80.

The volume of business in the railway bond market continues large and well distributed. This is due chiefly to the purchase of high-grade issues for investment, and to the favorable condition of several of the newly reorganized companies, including Northern Pacific, Oregon R. & N., Oregon Short Line & U. N., Atchison and St. Louis & San Francisco. Of these the No. Pacific has been most conspicuous and advanced an average of about 2 per cent. Ore. S. L. & U. N. have continued the movement noted last week and made an additional advance of nearly 3 points. St. Louis & S. F. 4s and gen. mort. 5s have been in demand and have advanced about 2½ points and 1 point respectively. Ft. Worth & D. City are over 3 per cent and Erie gen. lien 3s are 2 per cent higher than our last quotations. The Hocking Valley issues have declined from 1 to 3 points. The active list includes also Ches. & Ohio, Chic. & No. Paco, Burlington & Quincy, Rock Island, Cent. of Georgia, Mo. Kansas & Texas, Rio Grande West., St. Paul, San A. & A. Pass, Southern Ry., Union Pacific, Texas & Pacific, Wabash, West Shore and Wis. Central bonds.

**Railroad and Miscellaneous Stocks.**—The stock market as a whole has been unusually narrow and uninteresting during the week. Of the railway list Northern Pacific has been conspicuous on the large sale of its securities abroad. The common and preferred have advanced about 3 and 6 points respectively during the present movement. New Haven dropped 14 per cent on the offering of a few shares, but has recovered more than one-half the decline. Long Island has fluctuated between 48 and 52½, closing at 50. The coal shares have continued weak, although the offerings have been small. The grangers have been relatively strong, fractional advances and declines in the group being about equal. The Atchison and St. Louis & San Francisco shares were more active than usual in sympathy with the bonds, and advanced nearly a point.

As usual the miscellaneous list has been subject to speculative manipulation and changes are largely due to that influence. American Sugar, which sold on Monday at 117½, declined to 114½ on Thursday and closes at 113½. Disappointment in regard to a rumored extra dividend on U. S. Leather preferred is given as one reason for a decline of 2½ points in that stock. Western Union lost 2 points on the announcement of an adverse legal decision which was afterwards pronounced to be of no significance. General Electric and Tenn. Coal Iron & Railway have been among the strong features of the group.

# Investment AND Railroad Intelligence.

## RAILROAD EARNINGS.

The following table shows the gross earnings of every STEAM railroad from which regular weekly or monthly returns can be obtained. The first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the period from January 1 to and including such latest week or month.

The returns of the street railways are brought together separately on a subsequent page.

Net decrease (5.12 p. c.)	.....	.....	.....	322,675

For the month of January 57 roads (all that have furnished statements for the full month as yet) show aggregate results as follows:

Month of January.	1897.	1896.	Decrease.	Per Cent.
Gross earnings (57 roads)	20,786,449	22,098,861	1,312,412	5.94

It will be seen there is a loss on the roads reporting in the amount of \$1,312,412, or 5.94 per cent.

**Net Earnings Monthly to Latest Dates.**—The table following shows the net earnings of STREAM railroads reported this week. A full detailed statement, including all roads from which monthly returns can be obtained is given once a month in these columns, and the latest statement of this kind will be found in the CHRONICLE of January 23, 1897. The next will appear in the issue of February 20, 1897.

STREET RAILWAYS AND TRACTION COMPANIES.

The following table shows the gross earnings for the latest period of all STREET railways from which we are able to obtain weekly or monthly returns. The arrangement of the table is the same as that for the steam roads—that is, the first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the calendar year from January 1 to and including such latest week or month.

\* Figures were exceptional in 1895 on account of Atlanta Exposition.  
† Large business in Dec., 1895, due to boycott on competing lines.  
‡ Decrease in earnings due to factories being shut down.

Street Railway Net Earnings.—The following table gives the returns of STREET railway gross and net earnings received this week. In reporting these net earnings for the street railways, we adopt the same plan as that for the steam roads—that is, we print each week all the returns received that week, but once a month (on the third or the fourth Saturday) we bring together all the roads furnishing returns, and the latest statement of this kind will be found in the CHRONICLE of January 23, 1897. The next will appear in the issue of February 20, 1897.

Chicago & North Western Railroad.

(Statement for calendar year 1896.)

In our editorial columns will be found a statement covering the operations of the company for the late calendar year.—V. 63, p. 289, 309, 311.

Central Railroad Company of New Jersey.

(Report for the year ending Dec. 31, 1896.)

The annual report, like that issued last year, is merely a four-page circular, President Maxwell's remarks being confined to the following:

"The gross earnings for the year aggregated \$13,117,350, as against \$13,568,023 for the year 1895, a decrease of \$450,673, which, together with an increase of \$23,514 in the cost of operating, has resulted in a decrease in the net earnings of \$474,187 as compared with the preceding year. The operating expenses, as heretofore, cover all expenditures for repairs, charges for reduction in value of equipment and other property, and also include expenditures for renewals of bridges, buildings and wharves, substitution of heavier rails and other construction. The charges to capital account for the year amounted to \$658,704, representing disbursements for construction of new railroad, sidings and connections, and purchases of land, equipment, etc. The net result of the business of the year, including income from investments, after providing for the payment of 5 per cent in dividends on the capital stock, was a credit to profit and loss account of \$271,415."

Results for four years and general balance sheet have been:

SUMMARY OF EARNINGS AND EXPENSES.

(Including New York & Long Branch Division.)

	1896.	1895.	1894.	1893.
Receipts—

—V. 63, p. 1118.

## Baltimore Chesapeake &amp; Atlantic Railway Company.

(Report for the year ending Aug. 31, 1896.)

President John E. Sharkey says in part:

"The business on the Peninsula has been largely curtailed, not only by the universal dullness in trade, but particularly owing to the extremely low prices for produce, which constitutes the bulk of our business. The crops, with the exception of fruit, have been generous, but during a large part of the season prices were so low that the crops were in many instances left upon the ground. There is still in the lower Peninsula sweet potatoes enough to load our steamers full for two months or more, but at 40c. to 50c. per barrel, the price at which they have sold this season on the wharf at Baltimore, there is no inducement to ship them. With normal values the business of the company would have shown a very large increase over the preceding year.

"The entire equipment has been maintained in first-class condition, while the railway is in better condition than a year ago. Improvement in general business, and especially an improvement in the prices of market produce, must increase very materially the company's receipts without corresponding increase in the expenses."

**Earnings**—The earnings, balance sheet, etc., have been compiled for the CHRONICLE as follows:

## EARNINGS, EXPENSES AND CHARGES.

	1896.	1895.
<b>Earnings—</b>		
Passengers	\$166,463	\$162,177
Freight	271,660	244,611
Mail, express, etc.	59,581	57,870
<b>Total</b>	<b>\$497,707</b>	<b>\$464,658</b>

## National Railway Company (St. Louis).

(Report for the year ending Dec. 31, 1896.)

"Chicago Economist" quotes the report in part as follows:

Notwithstanding the great depression of business which has generally affected almost railway properties, causing a shrinkage in receipts, we report an increase of 4 per cent over 1895. This in a measure was caused by the operation of one line for twelve months in 1896 and only five months in 1895.

The results from the Missouri Railway fully demonstrate the wisdom of changing from cable to electricity. There was expended for betterments and additions \$159,000. The equipment and track of this line are not excelled in the whole country. On the Cass Avenue & Fair Grounds line \$6,436 was expended for betterments and additions. Its cars and track have been thoroughly renovated and repaired and the cost has been included in operating expenses. On the Broadway line there was no charge to the credit of the betterment account. The tracks and cars were thoroughly repaired and the cost included in operating expenses. The Southwestern Ry. line was temporarily crippled by the cyclone, but notwithstanding this loss sustained its interest has been paid and a small profit earned. The St. Louis & St. Louis RR. showed a reasonable increase, with every prospect for better results.

The surplus over the amounts paid for dividends by the several companies has been used partly toward the payment of betterments and partly in cash and bonds in the treasury. Except the amount of \$35,334 paid for betterments and additions all other expenditures on the properties have been charged to operating expenses. There has been no amount apportioned that could be used for putting back the property in first-class condition, both the track and equipment.

There is still in the treasury 20 1/2 shares of the capital stock of the National Company, and there are outstanding 24,795 shares.

**Earnings.**—The earnings, etc., have been as follows:

	1896.	1895.	1894.	1893.
Passengers carried	30,379,869	28,029,177	27,006,835	28,313,504
Car miles	12,324,246	11,445,075	11,444,990	11,844,031
Gross receipts	1,522,273	1,404,917	1,353,136	1,416,817
Expenses	893,518	821,315	776,552	851,951
<b>Net</b>	<b>628,755</b>	<b>582,642</b>	<b>576,584</b>	<b>564,866</b>
Int., taxes, insurance	377,413	368,587	337,653	309,888
<b>Surplus gains</b>	<b>251,342</b>	<b>214,055</b>	<b>238,939</b>	<b>255,282</b>
Profit on stock controlled	209,092	179,141	193,859	199,947
Other income	19,565	13,565		
<b>Total</b>	<b>228,657</b>	<b>194,708</b>	<b>196,859</b>	<b>199,947</b>
Dividends paid	14,770	148,770	154,000	154,000
<b>Surplus</b>	<b>78,487</b>	<b>49,938</b>	<b>42,859</b>	<b>45,947</b>
Earned on outstanding stock	9.22%	8.0%	8.85%	9.08%

The statistics of operation are as follows:

	P. et. of Op. Exp. (Cable.)	Electric.	Exp. per Car Mile.	Electric.
1896	57.2	59.4	8.00 cts.	14.72 cts.
1895	56.8	59.5	8.41 cts.	11.90 cts.

—V. 62, p. 274.

## Chicago Peoria &amp; St. Louis RR. Co.

(Statement for the year ending Dec. 31, 1896.)

The annual meeting was held at the Chicago offices of the company, Monadnock Building, Feb. 1. The following officers were re-elected for the ensuing year: F. W. Huldikoper, President; C. H. Bosworth, Vice-President and General Manager; Charles D. Moyer, Secretary and Treasurer; Cravath & Houston, Counsel; Blaford Wilson, General Solicitor.

The following statement shows the results of operation for the twelve months ending Dec. 31, 1896:

	Gross earnings.	Operating expenses.	Net earnings.	Taxes and rent.	Net revenue.
1896	\$887,940	\$25,184	\$272,756	\$72,703	\$200,053

—V. 63, p. 701.

## Cleveland Palmsville &amp; Eastern Railroad.

(Statement of Jan. 1, 1897.)

For the six months ending Dec. 31, 1896, the gross earnings were \$33,379; passengers carried 1,233,623; mileage, 161,335. Daily average receipts, \$142; average per passenger, 14.5 cents; average per mile, 21 cents. Gross earnings from all sources, \$33,341; operating expenses (43 per cent), \$16,063; net earnings, \$17,272; interest on bonds, \$9,251; other interest, \$3,830; balance surplus, \$7,192.

The trial balance of Jan. 1, 1897, is furnished to the CHRONICLE as follows:

Resources.		Liabilities.	
Track, "dway & equip.	\$1,102,445	Capital stock	500,000
Treasury bonds.....	107,909	Bonds.....	500,000
Cash.....	5,043	Bills payable.....	18,724
Bills receivable.....	500	Accounts payable.....	20,554
Accounts receivable.....	235	Surplus.....	33,340
Insurance prepaid.....	317	"and int. accrued.....	6,250
Operating expenses.....	16,008	Injury & damage fund.....	519
Int. on floating debt.....	3,830		
Int. on bonds.....	6,250		
Total.....	\$1,242,687	Total.....	\$1,242,687

—V. 63, p. 458.

## American Soda Fountain Company.

(Report for year ending December 31, 1896.)

President J. W. Tufts in the report says substantially:

"This company, after years of prosperity, has suffered a year of loss, caused by a combination of circumstances im-

possible to be actually understood by those not familiar with the business. There has been a large falling off in sales, while expenses have not proportionately decreased, because of the impossibility of quickly readjusting the business to its changed conditions. A readjustment will be effected at once. An immense and necessary stock of manufactured goods has been accumulated which has and must be disposed of at lower prices than formerly. For this reason the account of stock has been taken at lower prices than formerly, which affected terribly profits of last year.

"The Chicago business has been consolidated at a heavy cost, but an annual saving of \$15,000 in expenses will thereby be effected. This fall the Boston business will be consolidated in the new seven story fireproof structure which the Boston Real Estate Trust is constructing for the company on Congress Street, within a block of the new south Union station. Our lease of this building is for 15 years, controls a deep-water front and wharf, etc. The building will have 3 1/2 acres of floor space. The cost of rental in new building will be no more than at present and expenses of operation will be greatly curtailed, the saving on the one item of insurance being \$5,000 annually.

"Dividend payments during the year have largely reduced surplus and the directors have deemed it best not to declare further dividends until the earnings shall justify. It is hoped and expected that a revival of business will enable the resumption of dividend payments another year."

**Statistics.**—The following statements show the profits for the late year and for a series of years past, and also the balance sheet of Dec. 31, 1896.

PROFITS.		1896.	1895.
Net earnings for year.....	loss	\$61,079	\$321,727
Dividends paid.....		196,875	30,000

Bal. to profit and loss ..... def. \$25,994 sur. \$11,127

The surplus for 1891 was \$110,470; for 1892, \$110,187; for 1893, \$29,056; for 1894, \$53,123; for 1895, \$21,737; for 1896, deficit of \$61,079; amount of present surplus fund, \$36,914, against \$324,869 Jan. 1, 1896.

#### STATEMENT OF TREASURER FOR YEAR ENDING DEC. 31, 1896.

Assets—		Liabilities—	
Real estate, patents, etc.	\$2,140,744	Capital stock.....	\$3,750,000
Customers' notes.....	594,007	Accounts payable (not due).....	155,817
Cash on hand.....	36,317	Loans (unsecured) to the co. by its manag'rs	\$302,837
Accounts receivable.....	479,623	Notes payable.....	211,212
Merchandise manufactured and in process.	1,263,919	Surplus fund.....	66,914
<b>Total.....</b>	<b>\$4,516,610</b>	<b>Total.....</b>	<b>\$4,516,610</b>

\* After deducting \$201,680 for deterioration. † There are \$1,003,808 of additional loans from managers secured by customers' notes held as collateral.—V. 64, p. 232.

#### Diamond Match.

(Report for the year ending Dec. 31, 1896.)

The report shows net earnings for 1896 of \$1,226,442, against \$1,457,040 in 1895, \$1,373,084 in 1891, \$1,359,577 in 1893, \$1,050,979 in 1892 and \$302,816 in 1891. At the election of directors the regular ticket was adopted, Clarence Buckingham succeeding Edwin Walker. President Barber is quoted as speaking at the annual meeting substantially as follows:

**General Results.**—The company has sold more matches than it did the previous year at a larger aggregate profit. Notwithstanding the mishaps that the company has had, it has been able to pay its usual 10 per cent cash dividend, and, in our opinion, will continue to do so out of its earnings. The company has reduced its bills payable from \$356,663 in August to less than \$100,000 at the present time.

**Foreign Operations.**—The company's factory in Liverpool is in active and profitable operation. It looks as if we could sell all the goods we can manufacture at that place with a good profit. The company has also secured patents on its machinery throughout the world, wherever it would seem to be of advantage, and has pending negotiations in several European and South American countries for the use of its machines, out of which much profit is hoped for.

**Position as to Competition.**—Your management since 1891 has spent probably \$50,000 per annum in perfecting its machinery and improving the methods of manufacture. Its general appliances in consequence are so perfect that the company is producing its matches with 25 per cent of the manual labor of any other known process in the world. With these acknowledged advantages we feel that the company is in a promising condition. There has been no time in its history when its physical condition has been in such perfect order. Our relations with our customers throughout the country are most pleasant. We fully recognize that the strength of our position is in maintaining low prices of our goods. To that end, in the last year we have given the consumer the advantage of much the larger part of the reduction in cost.

**Assets in Lumber.**—We have in the Ontonagon River 125,000,000 feet of pine in shape of logs which is available for sale—an available asset, we think, of about \$1,250,000, which will be turned into money as rapidly as may seem best.

**Financial.**—Following are the results for the year.

SURPLUS ACCOUNT.		1897, 910
Balance Jan. 1, 1896.....		\$907,910
Less Ontonagon fire loss.....		134,129
Earnings for 1896.....		1,226,442
Less dividends paid in 1896.....		1,100,000
<b>Balance Dec. 31, 1896.....</b>		<b>\$399,352</b>

—V. 64, p. 180.

#### Baltimore Traction Company.

(Report for the year ending Dec. 31, 1896.)

At the annual meeting on Wednesday the old directors were re-elected. The Baltimore American says:

The President's report referred to the floating of \$300,000 convertible 5 per cent gold bonds, to clear up the floating debt and further increase the facilities for handling business. There is now no floating debt. The 8 1/2 re line has proven a very valuable acquisition. Improvements have been made at Gwynn Oak Park, and that resort will be maintained. The report speaks of the recently paid dividend of 1 1/2 per cent, and says:

The declaration of this dividend was agreed upon with sufficient expectation that your company is now established upon a permanent dividend-paying basis.

The percentage of losses through accidents to persons and property largely decreased in 1896, notwithstanding the increase in car service mileage.

In 1896 the cars ran 78,265 miles and the passengers carried numbered 33,670,474. The earnings, etc., have been as follows:

Year—	Gross earnings.	Operating expenses.	Net earnings.	Fixed charges.	Balance, surplus.
1896.....	\$1,289,514	\$44,123	\$843,346	\$44,511	\$17,735
1895.....	1,179,197	639,706	539,491	413,099	126,392
1894.....	1,012,318	821,934	344,279	359,242	30,037
1893.....	1,082,934	649,517	373,567	355,202	18,364

The following facts have been furnished us:

The property consists of street railway lines having the following length: Electric (Westinghouse), 9205 miles; horse, 177; electric, owned jointly 420; total, 9311. Gauge, 3 feet 4 1/2 inches; rail, glider and "T," 66, 78 and 80 pounds. The car equipment consists of 428 cars, cable and electric, with trailers, and a full complement of sweepers and salt cars. Horses on hand Jan. 1, 1897, 34. The authorized capital is \$1,000,000, of which \$3,750,000 has been issued.

The company's several loans are shown in our STREET RAILWAY SUPPLEMENT. The security for each is as follows:

The 1st mortgage bonds of 1899 are a first lien on the old Citizens' and People's Railways, and the improvements thereon.

The North Baltimore system is completely in itself, though owned and operated by the Baltimore Traction Co. The mortgage covers about 35 miles of electric road and certain real estate.

The Extension and Improvement bonds are a second lien on Citizens' and People's lines.

The Collateral Trust bonds of 1895 are the direct obligation of the company, secured by the deposit of all the stock—700 shares—and all the bonds (\$350,000) of the P. & P. Ry. Co., all the stock—2,000 shares and all the bonds (\$350,000) of the B. & C. B. Ry. Co., and 70 per cent of the stock, 1,400 shares—and all the bonds (\$100,000) of the W. G. O. & P. Ry. Co.

The Convertible Trust bonds of 1896 are secured by a deposit of its authorized stock with the Mercantile Trust & Deposit Co., of Baltimore, as trustee.—V. 63, p. 1111.

#### GENERAL INVESTMENT NEWS.

**Reorganizations, Etc.—Latest Data as to Defaults, Reorganization Plans, Payment of Overdue Coupons, Etc.**—All facts of this nature appearing since the publication of the last issues of the INVESTORS' and STREET RAILWAY SUPPLEMENTS may be readily found by means of the following index. This index does not include matter in to-day's CHRONICLE.

For some small street railway companies see index in CHRONICLES of December 26, 1896, and January 16, 1897.

NOTE.—Full-face figures under street railways refer to Volume 64.

**Atchison Topoka & Santa Fe Ry.**—New Common and Preferred Stock Being Issued.—Holders of certificates of deposit of the Guaranty Trust Company (formerly New York Guaranty & Indemnity Co.) issued for stock of the Atchison Topoka & Santa Fe RR. Co. can now exchange their certificates for the common and preferred stock of the new company to

which they are entitled under the plan. See advertisement on another page.—V. 64, p. 232.

**Atchafon Tpeka & Santa Fe Ry.—Atlantic & Pacific R.R.—***Verdict of Bond.*—The item in last week's CHRONICLE regarding the position of the Guaranteed Trust bonds of the Atlantic & Pacific seems to have produced some of our readers. A subscriber writes: "You say: 'The bond value of an undeposited bond is \$9.12.' How is it possible to ascertain the bond value, seeing that the road has not yet been sold? The explanation is that this value was determined by the forced sale in April, 1895, of the collateral which secured the Guaranteed Trust bonds. This collateral sold for \$1,000,000 and was purchased in the interest of the bonds then deposited, or the reader to be deposited, under the agreement of July 12, 1894. Subsequent foreclosure of the road by means of the collateral manifestly will not affect the value of the bond is not depreciated."

We are also asked how it is that in case all the Guaranteed Trust bonds shall not have "assented" then the share of the assented bonds in the amount eventually received by the committee will be increased. The answer is, that the negotiation with the Atchafon was conducted by the committee solely for account of the deposited bonds, and that the smaller the amount of the bonds deposited the larger will be the share of each in the proceeds received. It will be remembered that on Dec. 31 the A. & P. committee gave notice by advertisement that until Jan. 14, 1897, additional deposits would be received upon payment of a penalty of \$50 a bond. We are informed that no deposits have been allowed since that date. Of the total loan (\$18,754,000) \$18,327,000 bonds have assented. The committee as long ago as the spring of 1895 advertised that undeposited bonds would not be entitled to participate in the reorganization. See CHRONICLE March 16, page 479.

**New Atchison Securities Ready in Exchange for A. & P. Certificates.**—The securities received by the Bangs Committee in exchange for the Atlantic & Pacific Western division bonds sold to the Atchison Company are now ready for distribution. The holders of the certificates of the reorganization will receive 44.695 per cent of the par value of such certificates in Atchison 1 per cent bonds and 48.95 per cent in Atchison preferred stock upon presentation of their certificates at the State Trust Co. of New York.—V. 64, p. 232.

**Atlanta & Charlotte Air Line Ry.—Extension of Bonds.**—This company has made an arrangement with the Mercantile Trust & Deposit Co. of Baltimore to extend its first mortgage preference bonds, maturing April 1, next, the principal to be payable on Jan. 1, 1907, with interest at 4 per cent per annum. Holders who desire to make the extension must deposit their bonds on or before March 15, 1897, at the office of the Mercantile Trust & Deposit Co. in Baltimore, or at the office of the Central Trust Co., New York. At the time of deposit the full amount of the coupon falling due April 1, 1897, will be paid. The Mercantile Trust & Deposit Co. of Baltimore will also, on and after March 1, 1897, buy at 103½ (April coupon attached), any of the bonds the holders of which may desire to sell rather than extend.—V. 64, p. 232.

**Boston & Albany R.R.—Quarterly.—Earnings for the quarter and the six months ending December 31:**

3 months end. Dec. 31—	Gross earnings.	Net earnings.	Interest, taxes, etc.	Balance, surplus.

1895.....	953,021	390,968	\$5,206	431,543	def. \$3,472

Loans and bills payable December 31, 1895, \$995,000, against \$500,000 on June 30, and accrued taxes were \$3,053, against \$249,782. Bills receivable Dec. 31 were \$132,600, and cash on hand, \$63,547.—V. 64, p. 89, 81.

**Butte & Boston Mining.—Sold in Foreclosure.**—This property was sold in foreclosure Feb. 1 at Butte, Mont., to E. Rollins Morse, chairman of the Reorganization Committee.—V. 63, p. 1154.

**Cambria Iron.—Annual Statement.**—The company issues no report, but according to the daily papers the profits for the year were about \$720,000, equal to 9 per cent on the capital stock. There was paid 4 per cent, and \$161,000 was expended for improvements. The balance was carried to profit and loss.—V. 62, p. 277.

**Central Crowsdown R.R. (N. Y. City)—Quarterly.—Earnings for the quarter and the six months ending December 31:**

3 months end Dec. 31.	Gross earnings.	Net earnings.	Other income.	Interest, taxes, etc.	Balance, surplus.
1894.....	\$152,051	\$16,104	\$1,034	\$25,842	\$21,030
1895.....	147,374	41,702	1,103	25,611	20,221
6 months—					
1894.....	\$297,458	\$77,430	\$2,200	\$51,631	\$24,316
1895.....	276,125	77,502	2,209	51,249	24,342

There have been no important changes in the balance sheet since June 30.—V. 63, p. 879.

**Central Pacific R.R.—Status of Government Claims.**—Attorney-General Harmon, when asked this week if the Government could foreclose on the Central Pacific, replied:

"The answer to that question involves a difference of mathematics. The counsel for the Central Pacific claims that it is not in default. The Secretary of the Treasury shows that it is in default to the amount of \$7,000,000. The difference arises from the mode of applying the yearly payments under the law. The future action of the Government in suing the road depends upon this question of default. I think the road is wrong in its claim, and that the position of the Treasury Department is the correct one. If the Treasury is right there is a large default in excess of the sinking fund."—V. 64, p. 233.

**Central Ry. of Baltimore—\$400,000 Extension Bonds Sold.**—The Baltimore Trust & Guarantee Co. has purchased \$400,000 bonds, which are to be issued upon an extension of the road, and are to be secured by mortgage upon the extension, as well as upon the balance of the property. The new mortgage will be for \$60,000, \$400,000 of said bonds (now sold) to be issued March 1, 1897, to pay for the East Baltimore extension (14 miles), and equipment of road, and for lot on Druid Hill Avenue and our barn erected there on an addition to power plant of the company, &c. Remaining \$200,000 to be issued only for future extensions and equipment of same or for power house or power plant.

**Chicago Great Western Ry.—Chicago & Northern Pacific R.R.—President's Statement for Half-Year.**—President Stickney's statement for the half-year ending Dec. 31, 1896, to which reference was made last week, is now at hand, showing earnings on the Chicago Great Western as follows:

6 mos. to Dec. 31—	Gross earnings.	Net earnings.	Taxes, rentals, etc.	Debt interest.	Balance, surplus.
1896.....	\$2,399,152	\$614,230	\$315,251	\$234,350	\$10,619
1895.....	2,417,277	695,781	377,407	234,331	\$4,043

[Of the above interest on debt stock for the half-year ending Dec. 31, 1896, \$70,446 was payable in scrip, making the cash balance for that period \$31,035.—Ed.]

The whole decrease shown in the foregoing figures, and more, occurred in the single month of November (election month), when the gross earnings decreased \$71,817 and the net earnings decreased \$11,763. This decrease in business came so unexpectedly that it was impossible to bring the expenses into line.

President Stickney describes the progress made with the ballasting of the road and the reduction of grades, and adds substantially the following:

**Capital Expenditures.**—The proprietors at the last meeting approved the borrowing of \$200,000 on the five-year 6 per cent notes for additions and improvements to the property and for other capital accounts. From this loan the Finance Committee realized \$270,000, out of which they paid the then existing sterling loan of \$270,000 and some expenses, and remitted to America \$129,000, or, say, \$435,451. Out of this last amount there was paid, in reduction of the 7 per cent rolling stock lease warrants, \$105,151, leaving available \$310,300. Adding to this sum the assessments since received from shareholders under the arrangement of 1891, the total available for additions and improvements was \$553,510. Of this amount three hundred and one hundred at the end of the half-year about \$24,453, while to complete the estimates will require \$204,000. The amount of excess earnings up to Dec. 31, 1896, will be approximately \$215,000, or \$31,000 more than is required to meet these expenditures. This is substantially as estimated in my letter of December, 1895.

Other capital expenditures not embraced in the estimates submitted at the last meeting aggregate for the calendar year \$182,126, including the cost of additional ballasting, the cost of a branch 3½ miles in length to Mt. Airy, payment on account of De Kalb & Great Western road, construction of spurs, water stations, etc. During the year the company has purchased on the trust plan, 200 furniture cars at a cost of \$116,553, payable as follows:—\$16,553 in cash, and the balance in ten equal annual payments, with interest at the rate of 6 per cent per annum.

The progress of improvement has now reached such a stage that every dollar judiciously expended will add immediately to the net earnings, and means should be provided to thus carry on the work. The directors will make specific recommendations for additional appropriations later.

**New Lease of Chicago & Northern Pacific Terminals, Etc.**—Negotiations with the receiver of the Chicago & Northern Pacific Co., which owned the terminals at Chicago, resulted during 1896 in the affirmation of the old lease with slight modifications so far as the property which has been heretofore occupied; additional facilities were acquired, which will increase the rentals about \$25,000 per annum. The lease for 99 years, with the privilege of renewal, has been executed on behalf of the company and by the receiver, under orders of the Court, and the sale which was afterwards made of the property, under the orders of the Court, was made subject to the rights of this company under such lease, so that no future negotiations need be apprehended. The directors regard the lease as a valuable asset inasmuch as it gives this company ample terminal facilities in Chicago at a rental equivalent to not more than 2 per cent interest on their original cost. The common use of such portions as are used in common is an advantage, as it reduces expenses and increases interchange, which bring this company revenue.

In this connection the directors desire to state that growing out of the reorganization of the Northern Pacific Railroad Company the rentals which the company pays for the use of tracks between St. Paul and Chicago will be reduced nearly or quite as much as the rentals of Chicago terminals will be increased.

**Improved Status.**—While the statement of earnings for the corresponding six months of last year were a little in excess of this year, yet the fact that the earnings have been maintained so nearly at a parity with last year during the unusual depressing influences of a Presidential election, involving the value of the currency of the country, is in the minds of the directors, an especially reassuring fact. It shows that the line has made a decided gain in its ability to command and hold trade.—V. 63, p. 1009; V. 64, p. 233.

**Chicago Hammond & Western R.R.—Mortgage for \$2,500,000.**—The company has filed its mortgage for \$2,500,000 to E. F. Hyde, Trustee for the Central Trust Company of New York, to secure an issue of 3) year 6 per cent gold bonds. The property covered by the mortgage, it is stated, comprises all property now and hereafter to be owned by the mortgagee, including 4,000 shares of stock of the Hammond & Blue Island R.R. The instrument calls for the immediate delivery

of \$1,500,000 of the bonds; \$500,000 of the bonds are to be used on the construction of a branch from La Grange to Franklin Park, and \$150,000 on the retirement of equipment warrants which were used in paying for rolling stock. The balance of the issue may be used in constructing additional side-tracks and other improvements. It is signed by J. P. Lyman, President, and James D. Standish, Secretary, for the railroad, and E. Francis Hyde, trustee. A provision of the deed requires that the trustee shall always be Vice-President of the Central Trust Company of New York.—V. 64, p. 135.

**Columbus Central Electric Ry.—Reorganization Plan.**—A committee consisting of Geo. H. Worthington, Myron T. Herrick, J. V. Painter, Herbert L. Breneman and T. C. Campbell, with F. N. Bendelari, of Columbus, Ohio, as Secretary, has prepared a bondholders' agreement, copies of which will be furnished at the office of the Guardian Trust Co., Cleveland, Ohio, and the railway company, Columbus. Until Feb. 10th, deposits of the bonds subject to the terms of the agreement may be made at the office of the Guardian Trust Co.

**Reorganization Plan.**—The agreement, which has been signed by twelve-fifths of the bondholders, and is therefore obligatory [a majority only of the bonds being required to give it effect], contains the following as to reorganization:

In the event a sale and purchase of said property becomes necessary, then said committee may name the first board of directors of the new company, should said committee deem best to organize a new company; of which company it shall also determine the amount of bonds to be issued, the amount of preferred and common stock, or either, and the allotment of the same, and the sale of the bonds necessary to pay any and all indebtedness of the company, and to do everything essential to carry out the intent of this agreement.—V. 63, p. 335.

**Consolidated Street Ry. of Grand Rapids.—Street Ry. of Grand Rapids.—Bondholders' Committee for First 63 of 1912.**—Default on this bond having occurred, as already noted (CHRONICLE, January 23), Messrs. Byron D. Verrill of Portland (Chairman), Wm. Blodget of Blodget, Merritt & Co., Boston, and W. J. Hayes of W. J. Hayes & Sons, Cleveland, have consented to act as a committee for the protection of the bondholders. A large majority of the total issue of \$600,000 of these bonds has been deposited with the State Street Safe Deposit & Trust Co., of Boston, Mass., depository under the bondholder's agreement. Copies of the agreement can be obtained of the members of the committee, or of the depository, and any bondholder who has not yet deposited his bonds, but desires to participate in the benefits of the committee's action, should do so at once. February 1st was the limit of time for deposit, but no penalty has yet been fixed for belated deposits.—V. 63 p. 1115.

**Duluth Gas & Water.—Coupon Payment.**—The coupons due Nov. 1, 1896, on the consolidated mortgage bonds are being paid with accrued interest to Jan. 29, 1897, upon presentation at the Central Trust Co., New York.—V. 64, p. 233.

**Detroit Gas.—Decision in Favor of Purchase Money Mortgage.**—Judge Carpenter in the Circuit Court at Detroit has rendered a decision upholding the purchase money mortgage of Feb. 1, 1893, for \$1,000,000. (See CHRONICLE, V. 56, p. 672.) An appeal, it is understood, will be taken.—V. 63, p. 601.

**East Liverpool & Wellsville Street RR.—Foreclosure Decree.**—This property has been ordered sold under foreclosure of the first mortgage for \$300,000. The Union Trust Co. of Cleveland is mortgage trustee.

**Fitchburg RR.—Quarterly.**—Earnings for the quarter and the six months ending December 31 have been:

3 months end. Dec. 31.	Gross earnings.	Net earnings.	Other income.	Interest, taxes, etc.	Balance, surplus.
1896.....	\$1,993,249	\$652,731	\$17,037	\$331,459	\$245,233
1895.....	2,057,996	614,033	16,271	379,747	230,587
6 months—					
1896.....	\$3,783,718	\$1,308,393	\$33,081	\$756,077	\$525,397
1895.....	4,051,594	1,286,013	33,361	745,307	570,567

Loans and bills payable Dec. 31, 1896, \$310,000, against \$300,000 on June 30.—V. 64, p. 234.

**Fort Worth & Rio Grande RR.—Default and Proposition to Bondholders.**—The company defaulted on its coupon due Jan. 1. It is hoped that the expense of receivership and foreclosure may be avoided by the bondholders voluntarily agreeing to a reduction in the interest, so as to bring the charges within the earning capacity of the road.—V. 60, p. 430.

**Greenwood Anderson & Western Ry.—South Carolina Midland Co.—Receiver Appointed.**—On Feb. 1 Judge S. M. Minton, in the United States Circuit Court at Charleston, S. C., appointed C. M. Ward receiver of these roads.—V. 61, p. 82.

**John B. Stetson Co.—Annual Statement.**—No annual report is published, but the net earnings for the year ending Nov. 30, 1896, are stated as \$190,975, from which were declared dividends of 8 per cent on the \$1,500,000 of preferred and 4 per cent on the \$1,200,000 of common stock, leaving undivided profits for the year of \$22,975. All doubtful accounts, it is stated, have been "thoroughly pruned," while the inventory is thought to be conservative throughout. For a year of such depression the directors consider the result attained to be a matter of congratulation.

**Louisville & Nashville RR.—Actual Figures for Six Months.**—The estimated earnings for six months ending December 31, 1896, were given in the CHRONICLE of January 16, page 134. The actual figures are now at hand and show gross earnings of \$10,592,917, an increase over the estimated of \$14,972 and a surplus over all charges for the half-year of \$674,242, a decrease of only \$1,214 from the estimated figures.—V. 64, p. 234.

**Metropolitan West Side Elevated RR.—Bondholders' Agreement.**—The Olcott Committee in accordance with the announcement made last week has issued a bondholders' agreement. This agreement authorizes the preparation of a reorganization plan, which shall be lodged with the Central Trust Co., and shall be binding as to all deposited bonds not withdrawn by their owners within twenty days after written notice regarding the completion of the plan has been mailed to the bondholders. The expenses of the committee are limited to \$10 per bond and \$1 per share of stock.—V. 64, p. 234.

**New York Central & Hudson River RR.—Quarterly.**—Earnings for the quarter and the six months ending December 31 have been reported as follows:

3 mos. end. Dec. 31.	Gross earnings.	Net earnings.	First charges.	Dividends.	Balance, surplus.
1896.....	\$11,663,564	\$3,771,245	\$2,637,146 (1%)	\$1,000,000	\$134,099
1895.....	12,407,896	3,964,251	2,647,952 (1%)	1,000,000	316,309
6 mos.—					
1896.....	\$22,938,463	\$7,444,277	\$5,264,231 (2%)	\$2,000,000	\$180,113
1895.....	24,008,402	7,819,242	5,278,502 (2%)	2,000,000	540,740

The general balance sheet shows no important changes since June 31, profit and loss surplus standing at \$12,061,624 on Dec. 31, against \$11,881,431 on June 30.—V. 63, p. 1159.

**New York Chicago & St. Louis RR.—No Dividend Probable.**—Answering our inquiry, the Treasurer of the company writes: "Our board has never taken any formal action when a dividend was 'passed.' Final figures for 1896 have not yet been made, but I think it safe to say no dividend was earned and, therefore, none can be paid."—V. 63, p. 880.

**New York New Haven & Hartford RR.—Floating Debt, &c.**—The fall in the price of the company's stock has given rise to talk regarding the funding of the company's floating debt and the possibility of a reduction of dividends. As to the latter point, dispatches from New Haven are all to the effect that no reduction is likely. Regarding the floating debt the balance sheet of Sept. 30, 1896, showed outstanding loans and bills payable of \$7,335,000, nearly all, it is said, occasioned by the purchase of the New England RR. On the other hand the company is known to have in its treasury, with other assets, \$5,000,000 of New England RR. consol. 5s, which, especially if guaranteed, could be sold at a large premium. It is said that plans for financing the floating debt are under consideration. Judge Hall, First Vice-President of the company, is quoted as saying: "Nothing in the business of the company justifies any falling off in the price of the stock. Freight and passenger traffic is very good. The road is earning and will surely pay its regular 8 per cent dividend. The company is abundantly able to take care of its floating debt without any further issue of stock, and no such issue is contemplated."—V. 63, p. 880.

**Norfolk & Western RR.—New Securities Listed.**—This company's new securities, viz.: \$23,322,500 first consol. 5s, \$33,000,000 adjustment preferred stock and \$66,000,000 of common stock have been ordered to be placed upon the list of the New York Stock Exchange as soon as official notice of their issuance shall be given. An abstract of the mortgage securing the new loan will be published in the CHRONICLE next week, together with some facts from the company's application to the New York Stock Exchange.

**Clinch Valley Mortgage and Adjustment Mortgage Bonds to be Paid June 1.**—The Reorganization Committee has decided, in order to save the expense of foreclosure, and in view of the small amount of bonds outstanding (less than \$10,000 of both issues), to purchase at par and interest the outstanding Clinch Valley division 5 per cent bonds and the Norfolk & Western adjustment mortgage loan. They will be paid with interest to June 1, 1897, by the Fidelity Insurance, Trust & Safe Deposit Company of Philadelphia on that date, and interest on the bonds will cease thereafter.—V. 61, p. 231.

**Northern Pacific Railway.—Reorganization Syndicate Sale of Securities.**—The managers of the Northern Pacific Reorganization Syndicate have sold to a foreign group of buyers, represented by the Deutsche Bank, a considerable portion of the syndicate holdings of the Northern Pacific stocks and bonds. This sale, the amount of which has not been made public, will facilitate the early liquidation of the syndicate and the closing of its accounts with the most successful results to one of the largest railroad syndicates ever formed in this country. It will be brought to a close within twelve months of its reorganization with only sixteen per cent of the subscriptions called.—V. 64, p. 181.

**Oakland (Cal.) Street Railways.—Consolidation Proposed.**—The San Francisco papers state that William Henshaw, manager of the Union Savings Bank, has come East as the representative of a syndicate which has obtained options on the various street car lines of Oakland, and desires to interest Eastern capital in the project of consolidating them.

**Ohio Coal Roads.—Agreement as to Rates.**—The special committee of the Ohio Coal Traffic Association met in New York on Monday and agreed upon a percentage of allotments as follows: Columbus Hocking Valley & Toledo, 23.19; Toledo & Ohio Central, 16.40; Wheeling & Lake Erie, 13.44; Cleveland Lorain & Wheeling, 12.97; Columbus Sandusky & Hocking, 12; Baltimore & Ohio, 10; Walhonding Valley, 7. The agreement is for a year. There will be no trouble, it is said, over the abrogation, by order of the Association, of old contracts for coal at low prices. Any loss on such contracts as cannot be canceled will be equitably distributed, but in a majority of cases the holders of the low-rate con-

tracts seem to be amenable to reason. Rates on coal are now 40 to 50 cents higher than a week ago.—V. 64, p. 231.

**Ohio Valley RR.—Deposits of Bonds Called For.**—The bondholders' committee, consisting of Richard L. Edwards, (President of the Bank of the State of New York, 35 William Street, N. Y.) Frank Russak, Marcus Mayer, John B. Westbrook and Cord Meyer, has formulated a plan of deposit and requests deposits of bonds with the Bank of the State of New York, 35 William Street, New York City. Out of the authorized assessment of not exceeding \$10 per bond, \$5 per bond must be paid in cash at the time of deposit.—V. 64, p. 41.

**Oregon Railroad & Navigation.—Sale of Preferred Stock, with Control.**—The Berlin committee of the old Oregon Railway & Navigation 5 per cent bondholders has sold to a syndicate 30,000 shares of the new company's preferred stock (price reported at 45), which, with holdings of the preferred obtained here, will place the control of the company with interests identified with the Northern Pacific and the Great Northern, while possibly the reorganized Union Pacific will be found to be interested. The meaning of this transaction is well stated in the "Evening Post" as follows:

The control of the Ore. Railway & Navigation Company will insure its being maintained as an independent property and operated in harmonious relations with the Northern Pacific, the Great Northern and the Union Pacific railroads. There will be no diverting of traffic from one road to another, and no cutting of rates by either of the three roads named, but all will work in harmony with the Oregon R. W. & Navigation Company as the feeder for all three on equal terms. By this arrangement all danger of any one particular interest securing control of the Oregon Railway & Navigation Company for the purpose of taking away business from any one or more of the three roads named is done away with, the purchasers of the stock being equally interested in all of them. Instead of the three roads all running trains at the same time in territory served by all, and all three trains only half full, you will see a sensible and harmonious and economical management of all three roads, with a better service for the public and operating expenses kept within proper limits.

As shown in the INVESTORS' SUPPLEMENT a voting trust ensures to the preferred stock the right to elect ten of the company's fifteen directors until May 1, 1906. The preferred stock aggregates \$10,998,500 (\$9,289,750 of which went to the old bondholders) and a majority of it is now secured for the common interest of the companies above named. The common stock of the Oregon Ry. & Navigation Company is \$24,000,000, of which \$13,827,200 is owned by the Oregon Short Line & Utah Northern, soon to be reorganized as the Oregon Short Line RR. Co.—V. 64, p. 84.

**Oregon Short Line & Utah Northern Ry.—Coupon Payment.**—The coupons due Feb. 1, 1897, from Oregon Short Line Ry. first mortgage 6s are being paid at the office of the Union Trust Co., No. 80 Broadway, New York City, or at the office of James G. Harris, No. 92 Ames Building, Boston. Holders of certificates of deposit for the bonds will receive payment of said coupons on presentation of their certificates at the Central Trust Co., New York, or at the Old Colony Trust Co., Boston.—V. 64, p. 234.

**Pennsylvania RR.—New President.**—At a special meeting of the directors Feb. 3 First Vice-President Frank Thomson was elected President of the company to succeed George B. Roberts, who died Jan. 30. Mr. Roberts had been in poor health since last July, but his death resulted suddenly from heart failure. In our editorial columns will be found an article reviewing Mr. Roberts's connection with the company.—V. 63, p. 1011.

**Peoria Decatur & Evansville Ry.—Coupon Payment.**—Coupons due Sept. 1, 1896, on the Evansville Division first mortgage bonds will be paid at the Central Trust Company New York City, on and after February 10, 1897.—V. 64, p. 235.

**Philadelphia & Reading Ry.—Reading Co.—Consol. 5s of 1882 to be Extended at 4 per cent.**—The Philadelphia & Reading Ry. Co. gives notice to the holders of the first series 5 per cent consolidated bonds dated Aug. 26, 1882, and known as Stamped Fives, that it has arranged with Drexel & Co. of Philadelphia to purchase at par and accrued interest on or before March 1, 1897, of such holders thereof as wish to sell, any or all such bonds. The amount of the loan outstanding is \$5,767,042. In lieu of selling as aforesaid, holders who so desire are given the privilege up to Feb. 20, 1897, inclusive, at the same place, on deposit of their bonds, of receiving accrued interest from Nov. 1, 1896, to March 1, 1897, at 5 per cent per annum, and of extending their bonds for forty years from the first day of March, 1897, with interest at the rate of 4 per cent per annum, payable semi-annually. Both principal and interest of the extended bonds will be payable in gold coin of the United States of the present standard of weight and fineness, free from all taxes imposed by the United States or the State of Pennsylvania, under present or future laws. The Philadelphia & Reading Coal & Iron Company and the Reading Company also will become jointly and severally responsible for the payment of said principal and interest. The unextended bonds will be redeemed at par and accrued interest at March 1, 1897, at the office of the railway company in Philadelphia.—V. 64, p. 235.

**Taxation in Ohio and Indiana.—Decision by United States Supreme Court.**—On Feb. 1 Chief Justice Fuller announced that the Supreme Court of the United States by a majority of one had decided in favor of the constitutionality of the Nichols tax law of Ohio in the express company suits. The court also decided the tax case of the Western Union Telegraph Company against the State of Indiana, involving similar

questions to those settled in the Ohio cases. The State won in this case also.

A dispatch to the "Cleveland Leader" says:

There were ten of these cases brought by the officers of the Adams, American and the United States express companies to enjoin the collection of taxes under the acts of the General Assembly of Ohio, passed April 17, 1893, and May 10, 1894. The cases were appealed by the express companies from the decision of the Circuit Court for the Southern District of Ohio, which was favorable to the State.

Under the State law, which was assailed by the express companies, these companies, as also telegraph and telephone companies, are taxed in three forms: First on their real estate, second upon their gross receipts on business done within the State, and third they are additionally assessed by a State Board. It was the last assessment to which the companies took exception.

For the three years involved the State Board had increased the valuation of property in assessments under this law from \$289,982 to \$4,249,762. This increased valuation was arrived at by taking the market value of the entire capital stock of the express companies as a basis for arriving at the true value in money of the companies' property in Ohio.

Justice White delivered the opinion of the dissenting justices, saying: "The recognition of the right of taxation exerted by the State of Ohio in these cases must, if followed in other States, not only reproduce the illegality and injustice here shown, but greatly increase it, as every new imposition will be a new levy on property already taxed, and result in an additional burden on later State commerce."

The Chief Justice also announced the decision of the court in the cases involving the extent of the taxing power as applied to express companies and telegraph companies in Indiana, affirming the decision of the State Court in each case and thus sustaining the law. The two cases involve the validity of the State law of 1893 for the taxation of telegraph, telephone, palace car, sleeping car, dining car, express and fast-freight companies, which empowers the State Board of Tax Commissioners to assess taxation other than that of a local character.

**Tennessee Central RR.—Foreclosure Decree.**—The Chancery Court at Cookeville has ordered the foreclosure sale of this unfinished road. The line as projected was to run from Nashville to Knoxville, Tenn. It is partly built from Lebanon to Stirling Stone. Receiver C. O. Giddens is in charge of the property, and has issued his receiver's certificates for \$100,000 or more.—V. 64, p. 795.

**Toledo St. Louis & Kansas City RR.—Decision in Preferred Stock Suit.**—The United States Circuit Court of Appeals handed down last Tuesday at Cincinnati a decision in favor of the plaintiff in the suit of the preferred stockholders to be made parties defendant in the foreclosure proceedings. From one of the Eastern counsel for the preferred stockholders we have obtained the following statement:

At an early date in the pending litigation a petition was filed by representative preferred stockholders in the foreclosure proceedings praying to be made parties. This petition was granted and an order entered accordingly. An answer and cross bill were filed in behalf of the preferred stockholders alleging that the bonds were issued without consideration and contrary to law, and that a large part of the bonds were purchased by their present holders with knowledge of the facts.

The counsel for the first mortgage bondholders then made a motion to strike out the answer, and upon the argument of that motion they again raised the question of the right of the preferred stockholders to be parties defendant or to set up any defense, insisting that they were represented by the corporation of which they were stockholders. The Circuit Court, after nearly a year had been consumed by the different motions, rendered a decision holding that the preferred stockholders had no right to be made parties defendant independently of the railroad corporation.

From this decision the preferred stockholders appealed to the Circuit Court of Appeals, and that Court has now held, in the first place, that upon a motion to strike out a pleading, the Circuit Court had no power to pass upon the right of the preferred stockholders to be parties defendant, as this right had been settled by previous order making them parties. The Court further held that the corporation could not properly represent at the same time the interests of both the preferred and common stockholders in the litigation—these two interests being antagonistic; and this of itself was a sufficient reason why they should be made parties defendant.

The case now goes back to be heard in due course in the United States Circuit Court for the Northern District of Ohio, where the foreclosure proceedings were instituted. Nothing in the decision in any way affects the priority of the first mortgage lien. The contention, however, as to the amount of the lien is one of the questions which will now be raised and heard in the Lower Court.—V. 64, p. 182.

**Union Pacific Ry.—Modification of Plan as to Kansas Pacific Consols.**—It is stated that the allotment under the plan to the Kansas Pacific consols is to be 50 per cent in 4 per cent first mortgage bonds and 110 per cent in preferred stock, instead of 80 per cent in bonds and 72 per cent in preferred stock, as heretofore.—V. 64, p. 235.

**West Chicago Street.—Sale of Bonds.**—Reports of a sale of \$3,500,000 consols to New York bankers have been current, but we have been unable to confirm them.—V. 63, p. 1003.

**Wheeling & Lake Erie Ry.—Stockholders' Committee.**—Charles Fairchild, of Charles Fairchild & Co., and Alexander McNeill, of Thompson, Adams & McNeill, announce that at the request of stockholders in no way connected with the administration of the company, but holding over \$1,000,000 of its stock, they have consented to act as a committee to conduct an investigation into the affairs of the company entirely independent of the administration. They therefore invite the co-operation of all stockholders interested in such an independent investigation. See advertisement on another page.

**Default.**—As expected, default occurred February 1 upon the coupons of the extension and improvement bonds. Brown Brothers & Co., however, under their notice of last week, are purchasing said coupons upon deposit of the bonds.

**Notice from Fitzgerald Committee.**—Referring to its advertisement of last week, which is repeated to-day in our advertising columns, the Fitzgerald Committee is now prepared to receive deposits at the Mercantile Trust Co. of the consolidated mortgage 4 per cent bonds, and deems it important that such deposits should be made immediately under an agreement, copies of which are being distributed.—V. 64, p. 236.

## The Commercial Times.

## COMMERCIAL EPITOME.

FRIDAY NIGHT, Feb. 5, 1897.

Trade conditions in a number of lines of merchandise have shown material improvement during the past week. The volume of business transacted has increased, and the changes in values, where made, have been, as a rule, in favor of the seller. In a few instances, however, the decidedly wintry weather conditions experienced have had a tendency to hold business in check. Developments in financial circles have been generally encouraging. On Thursday a further reduction was made by the Bank of England in its minimum rate of discount to 3 per cent, and it is thought probable that in about a month the rate will have been reduced to the old basis of 2 per cent, which was in force previous to the export movement of gold to this country which started last summer. A plan of reforms has been prepared, and has the signature of the Queen Regent of Spain, which gives material concessions to Cuba.

The following is a comparative statement of stock of leading articles of merchandise at dates given:

	Jan. 1, 1897.	Feb. 1, 1897.	Feb. 1, 1896.
Pork.....bbls.	14,783	14,003	9,864
Lard.....lbs.	21,509	25,857	30,145
Tobacco, domestic.....hhd.	14,612	13,528	16,299

Manilla hemp.....bales	21,974	18,961	10,988
Sisal hemp.....bales	6,746	19,024	21,375
Flour.....bbls. and sacks	120,500	131,800	177,000

Lard on the spot has had a slow sale and prices have declined under moderate offerings, closing at 4c. for prime Western, 3-80c. for prime City and 4-25c. for refined for the Continent. The local market for lard futures has been neglected. At the West there has been more activity to the trading but at lower prices. Offerings have increased, longs have been liquidating and larger receipts of swine prompted selling. The close was easy.

## DAILY CLOSING PRICES OF LARD FUTURES.

	Sat.	Mon.	Tues.	Wed.	Thurs.	Fri.
May.....c.	4 30	4 25	4 20	4 15	4 12	4 07

Pork has had only a limited call, but values have held about steady, closing at \$8 25@8 75 for mess. Cut meats have been in fair request and steady. Tallow has had a better sale, but the close was easy at 3 3/4. Cotton seed oil has been quiet and easy, closing at 20c. for prime crude and 23c. for prime yellow. Butter and cheese have had a fair sale at steady prices. Eggs have been easier.

The demand for coffee of Brazil growth has been quiet and prices have been without changes, closing dull at 9 3/4 c. for Rio No. 7. Desirable stocks of mild grades have been in fair demand and have brought full values, closing at 16 1/4 c. for good Cucuta and 22 1/2@23 1/4 c. for standard Java. The trading in the market for contracts has been quiet and changes in prices have been unimportant. The close was at a slight decline under selling by a local operator.

The following were the closing prices:

Feb.....	9 30c.	May.....	9 45c.	Aug.....	9 50c.
March.....	9 35c.	June.....	9 45c.	Sept.....	9 50c.
April.....	9 40c.	July.....	9 45c.	Dec.....	9 55c.

The call from importers for raw sugars has been light, but there has been no pressure to sell, although at the close prices weakened a trifle, with centrifugals, 96-degrees test, quoted at 3 5-32c., and muscovado, 89-degrees test, at 2 1/4 c. Refined sugar has been in better demand and steady; granulated quoted at 4 1/4 c. Spices have been in active speculative demand at advancing prices. Teas have been steady.

Kentucky has been in moderate request at full values. Seed leaf tobacco has continued in brisk demand at firm prices. Sales for the week were 4,977 cases.

There has been a quiet market for Straits tin, but prices have held steady in response to foreign advices, closing at 13 50@13 60c. Ingot copper has been in moderate export demand and firm at 12c. for Lake. Demand for lead has been more active and prices have advanced, closing firm at 3 20@3 25c. for domestic. Spelter has also advanced, and the close was firm at 4 05@4 10c. for domestic. Pig iron has been quiet but steady, closing at 11@13c. for domestic.

Refined petroleum has advanced, closing at 6c. in bbls., 3-75c. in bulk and 6-95c. in cases; naphtha dull at 6 1/2 c. Crude certificates have advanced, closing at 92c. bid. Credit balances have been higher, closing at 90c. bid. Spirits turpentine has been in active demand and higher, closing at 28 1/2@29c. Rosins have been quiet but steady. Wool has continued in demand and firm. Hops have been in limited request and firm.

## COTTON.

FRIDAY NIGHT, February 5, 1897.

THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening the total receipts have reached 101,564 bales, against 138,303 bales last week and 151,811 bales the previous week, making the total receipts since the 1st of Sept., 1896, 5,641,657 bales, against 4,143,711 bales for the same period of 1895-6, showing an increase since Sep. 1, 1896, of 1,497,946 bales.

There has been a very narrow and uninteresting market for cotton for future delivery. Speculation has been dull, as the dealings have been confined almost exclusively to room traders. The fluctuations in prices have been small and the net changes for the week have been unimportant. Advices from the South report that spot cotton is in a fairly firm position, and state that both home spinners and exporters are buyers at full values. Saturday the market opened slightly lower, in response to easier foreign advices, but later recovered and closed at a slight advance for the day. There was a slight further gain of 3 to 4 points in prices on Monday, in response to stronger foreign advices and a small movement of cotton to the ports. Tuesday the market turned slightly weaker, and prices for the day showed a decline of 1 to 4 points. The port receipts were larger and reports were received from the Eastern mills stating that there had been an agreement reached concerning the curtailment of production; it was figured, however, that it would not mean more than 30,000 bales less in their consumption of cotton. Wednesday there was a dull market, but the receipts at the ports were small and prices advanced 2 to 4 points. The market was slightly higher during early 'Change on Thursday, as stronger foreign advices and small receipts stimulated some buying to cover contracts. Subsequently, however, most of the improvement was lost and the close was confined to 1 point advance for the day. To-day there was a dull and featureless market, with the change in prices unimportant. The close was steady, with prices 1 point lower to 2 points higher for the day. Cotton on the spot has had a moderate sale. Tuesday prices declined 1-160, but Thursday the loss was recovered. To-day the market was steady; middling uplands closed at 7 5-160.

The total sales for forward delivery for the week are 290,600 bales. For immediate delivery the total sales foot up this week 7,074 bales, including 100 for export, 3,474 for consumption, — for speculation and 4,500 on contract. The following are the official quotations for each day of the past week—January 30 to February 5.

Rates on and off middling, as established Nov. 22, 1893, and revised Dec. 11, 1895, by the Revision Committee at which grades other than middling may be delivered on contract:

Fair.....	6 1/4	on.	Good Ordinary.....	6 1/4	off.
Middling Fair.....	7 1/4	on.	Good Middling Tinged.....	7 1/4	off.
Good Middling.....	8 1/4	on.	Strict Middling Stained.....	7 3/4	off.
Good Middling.....	8 1/4	on.	Middling Stained.....	7 3/4	off.
Strict Low Middling.....	8 1/4	off.	Strict Low Mid. Stained.....	7 3/4	off.
Low Middling.....	8 1/4	off.	Low Middling Stained.....	7 1/4	off.
Strict Good Ordinary.....	11 1/4	off.			

On this basis the prices for a few of the grades would be as follows.

\* Includes sales in September, for September, 15,100; September, October, for October, 334,800; September-November, for November, 372,000; September-December, for December, 2,280,000.

We have included in the above table, and shall continue each week to give, the average price of futures each day for each month. It will be found under each day following the abbreviation "AV'ge." The average for each month for the week is also given at bottom of table.

For exchanges see page 293.

THE VISIBLE SUPPLY OF COTTON to-night, as made up by cable and telegraph is as follows. The Continental stocks, as well as those for Great Britain and the afloat are this week's returns, and consequently all the European figures are brought down to Thursday evening. But to make the totals the complete figures for to-night (Feb. 5), we add the item of exports from the United States, including in it the exports of Friday only.

The imports into Continental ports the past week have been 132,000 bales.

The above figures indicate an increase in the cotton in sight to-night of 103,474 bales as compared with the same date of 1896, a falling off of 916,474 bales from the corresponding date of 1895 and a decrease of 506,431 bales from 1894.

AT THE INTERIOR TOWNS the movement—that is the receipts for the week and since September 1, the shipments for the week and the stocks to-night, and the same items for the corresponding period of 1895-96—is set out in detail below.

\* This year's figures estimated.  
\* Last year's figures are for Newberry, S. C.

The above totals show that the interior stocks have decreased during the week 26,786 bales and are now 34,743 bales less than at same period last year. The receipts at all the towns have been 8,799 bales more than same week last year and since Sept. 1 they are 797,246 bales more than for same time in 1895-96.

QUOTATIONS FOR MIDDLING COTTON AT OTHER MARKETS.—Below are closing quotations of middling cotton at Southern and other principal cotton markets for each day of the week.

RECEIPTS FROM THE PLANTATIONS.—The following table indicates the actual movement each week from the plantations. The figures do not include overland receipts nor Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the outports.

Week ending—	Receipts at the Ports.			St'k at Interior Towns.			Rec'pts from Plant'ns.		
	1896-97	1896-96	1894-95	1896-97	1896-96	1894-95	1896-97	1896-96	1894-95
Dec. 31.....	219,122	174,824	251,851	578,478	583,683	600,950	218,819	163,165	243,806
Jan. 8.....	199,537	186,322	207,748	552,205	565,410	569,651	170,267	117,069	175,441
" 15.....	151,841	119,837	209,806	532,119	552,608	530,024	131,755	107,035	171,179
" 22.....	130,160	112,395	213,026	502,917	533,688	507,480	100,958	93,475	190,483
" 29.....	138,302	122,902	199,835	471,186	505,875	489,801	106,571	95,092	132,154
Feb. 5.....	101,564	113,589	155,098	444,600	479,143	486,453	74,778	83,554	131,750

The above statement shows: 1.—That the total receipts from the plantations since Sept. 1, 1896, are 5,965,463 bales; in 1895-96 were 4,595,154 bales; in 1894-95 were 6,782,581 bales.

2.—That although the receipts at the outports the past week were 101,564 bales, the actual movement from plantations was only 74,778 bales, the balance being taken from the stocks at the interior towns. Last year the receipts from the plantations for the week were 86,834 bales and for 1895 they were 131,750 bales.

OVERLAND MOVEMENT FOR THE WEEK AND SINCE SEPT. 1.—We give below a statement showing the overland movement for the week and since September 1. As the returns reach us by telegraph late Friday night it is impossible to enter so largely into detail as in our regular monthly report, but all the principal matters of interest are given. This weekly publication is of course supplementary to the more extended monthly statements. The results for the week ending Feb. 5 and since Sept. 1 in the last two years are as follows.

February 5	1896-97.		1895-96.	
	Week.	Since Sept. 1.	Week.	Since Sept. 1.
Shipped—				
Via St. Louis.....	8,890	393,541	10,426	392,592
Via Cairo.....	5,076	209,740	5,140	181,065

Leaving total net overland*..	22,356	631,828	15,551	604,615

\* Including movement by rail to Canada.

The foregoing shows that the week's net overland movement this year has been 22

**WEATHER REPORTS BY TELEGRAPH.**—Our telegraphic advices this evening denote that rain has been general at the South during the week, and that at some points the precipitation has been rather heavy. In the early part of the week the temperature was, as a rule, quite low, interfering with farming operations, but latterly the conditions have improved and plowing is progressing rapidly in Texas.

**Galeston, Texas.**—The severe cold weather during the early part of the week almost put a stop to farming operations throughout the State, but the latter part of the week has in general been favorable for farm-work and plowing is progressing nicely. We have had heavy rain on two days during the week, the precipitation reaching one inch and fifty-seven hundredths. The thermometer has ranged from 32 to 64, averaging 48. January rainfall two inches and ninety-seven hundredths.

**Fulstine, Texas.**—It has rained heavily on one day of the week, the rainfall reaching ninety-four hundredths of an inch. Average thermometer 45, highest 64 and lowest 26. Month's rainfall five inches and ninety-five hundredths.

**Huntsville, Texas.**—There has been rain on one day of the week, the precipitation reaching one inch and fifty hundredths. The thermometer has averaged 47, the highest being 65 and the lowest 29. Month's rainfall four inches and fifty-five hundredths.

**Dallas, Texas.**—It has rained on one day of the week, the rainfall reaching thirty-eight hundredths of an inch. The thermometer has averaged 36, ranging from 18 to 59. Month's rainfall three inches and twenty-two hundredths.

**San Antonio, Texas.**—There has been rain on two days of the past week, the rainfall reaching eighty-seven hundredths of an inch. Rain was beneficial to the soil, and plowing is now progressing rapidly. The thermometer has ranged from 31 to 65, averaging 50. January rainfall one inch and fifty-five hundredths.

**Luling, Texas.**—We have had rain on one day during the week, to the extent of thirty-two hundredths of an inch. Average thermometer 47, highest 63 and lowest 31. Month's rainfall one inch and thirty-seven hundredths.

**Columbia, Texas.**—There has been rain during the week to the extent of one inch and seventy hundredths, on one day. The thermometer has averaged 46, the highest being 66 and the lowest 25. Month's rainfall five inches and two hundredths.

**Cuero, Texas.**—It has rained heavily on one day of the week, the precipitation reaching eighty-two hundredths of an inch. The thermometer has averaged 46, ranging from 29 to 63.

**Brenham, Texas.**—It has rained on one day of the week, to the extent of one inch and forty hundredths. Average thermometer 44, highest 61, lowest 27.

**Fort Worth, Texas.**—We have had rain on one day of the week, the rainfall reaching forty hundredths of an inch. The thermometer has averaged 40, the highest being 59 and the lowest 21.

**Weatherford, Texas.**—We have had rain on one day of the week, the rainfall reaching thirty-eight hundredths of an inch. The thermometer has ranged from 20 to 60, averaging 40.

**New Orleans, Louisiana.**—We have had rain on two days of the week, the precipitation being fifty-two hundredths of an inch. The thermometer has averaged 44. January rainfall one inch and ninety-two hundredths.

**Shreveport, Louisiana.**—It has rained on three days of the week, to the extent of sixty-five hundredths of an inch. Average thermometer 40, highest 62 and lowest 22. January rainfall five inches and eighty-four hundredths.

**Columbus, Mississippi.**—There has been rain on one day of the week, the precipitation reaching one inch and ten hundredths. The thermometer has averaged 48, the highest being 60 and the lowest 16.

**Leland, Mississippi.**—January rainfall four inches and eighty-two hundredths.

**Vicksburg, Mississippi.**—Rain has fallen on two days of the week, to the extent of one inch and fifty-nine hundredths. The thermometer has ranged from 23 to 62, averaging 48. Rainfall for month of January six inches and twenty-four hundredths.

**Little Rock, Arkansas.**—It has rained on two days of the week, the rainfall reaching sixty-eight hundredths. Average thermometer 35, highest 49 and lowest 15.

**Helena, Arkansas.**—It has rained on four days during the week, with rainfall to the extent of forty-six hundredths of an inch. The weather is now warmer, with prospect of more rain. The thermometer has averaged 35, the highest being 47 and the lowest 17. January rainfall six inches and thirteen hundredths.

**Memphis, Tennessee.**—We have had rain on three days of the week, the precipitation reaching two inches and thirteen hundredths and it is now raining. The thermometer has averaged 33.7, ranging from 12 to 46.6. Rainfall for the month of January four inches and sixty-three hundredths.

**Nashville, Tennessee.**—We have had rain on two days during the week, the precipitation reaching one inch and twenty hundredths. The thermometer has ranged from 3 to 52, averaging 30. January rainfall three inches and thirteen hundredths.

**Mobile, Alabama.**—Rain has fallen on four days of the week, to the extent of two inches and fifty-one hundredths. Aver-

age thermometer 42, highest 55 and lowest 23. Rainfall for month of January two inches and ninety-seven hundredths.

**Montgomery, Alabama.**—We have had rain on two days during the week, the rainfall reaching forty-two hundredths of an inch. The thermometer has averaged 29, the highest being 47 and the lowest 18. January rainfall three inches and sixty-eight hundredths.

**Madison, Florida.**—We have had rain on one day of the week, the precipitation reaching eighty-three hundredths of an inch. The thermometer has ranged from 28 to 67, averaging 53.

**Savannah, Georgia.**—There has been rain on two days of the week, the rainfall reaching one inch and fifty-eight hundredths. The thermometer has averaged 43, the highest being 67 and the lowest 17.

**Augusta, Georgia.**—We have had rain on two days of the week, to the extent of seventy hundredths of an inch. The thermometer has averaged 38, ranging from 14 to 60. Rainfall for month of January three inches and twenty-four hundredths.

**Charleston, South Carolina.**—It has rained on three days of the week, the rainfall reaching eighty-five hundredths of an inch. Average thermometer 43, highest 60, lowest 20.

**Stateburg, South Carolina.**—It has rained on one day, the rainfall reaching ninety-one hundredths of an inch. The thermometer has averaged 37.8, the highest being 57 and the lowest 12. January rainfall two inches and five hundredths.

**Wilson, North Carolina.**—There has been rain on one day of the week, the rainfall reaching sixty hundredths of an inch. The thermometer has ranged from 14 to 50, averaging 36.

The following statement we have also received by telegraph, showing the height of the rivers at the points named at 8 o'clock February 4, 1897, and February 6, 1896.

	Feb. 4, '97.	Feb. 6, '96.

Shreveport.....	Above zero of gauge. 4.7	14.4
Vicksburg.....	Above zero of gauge. 24.7	18.8

**FAMINE AND PLAGUE IN INDIA.**—THE CONSUMPTION OF COTTON.—In our editorial columns to-day under the above caption will be found an interesting article by our special Manchester correspondent.

**COTTON SUPPLY AND CONSUMPTION IN EUROPE.**—By cable we have received the substance of Mr. Ellison's first of January cotton review, and in our editorial columns give the results and some suggestions respecting them.

**INDIA COTTON MOVEMENT FROM ALL PORTS.**—The receipts and shipments of cotton at Bombay have been as follows for the week and year, bringing the figures down to Feb. 4.

BOMBAY RECEIPTS AND SHIPMENTS FOR FOUR YEARS.

Year	Shipments this week.			Shipments since Sept. 1.			Receipts.	
	Great Brit'n.	Continent.	Total.	Great Britain.	Continent.	Total.	This Week.	Since Sept. 1.
1896-7	.....	34,000	34,000	7,000	168,000	175,000	51,000	522,000
1895-6	5,000	22,000	27,000	19,000	248,000	267,000	69,000	845,000
1894-5	.....	9,000	9,000	2,000	30,000	32,000	52,000	340,000
1893-4	.....	6,000	6,000	13,000	206,000	219,000	59,000	581,000

According to the foregoing Bombay appears to show a decrease compared with last year in the week's receipts of 18,000 bales and an increase in shipments of 7,000 bales, and the shipments since Sept. 1 show a decrease of 89,000 bales. The movement at Calcutta, Madras and other India ports for the last reported week and since the 1st of September, for two years, has been as follows. "Other ports" cover Ceylon, Tuticorin, Kurrachee and Coconada.

	Shipments for the week.			Shipments since Sept. 1.		
	Great Britain.	Continent.	Total.	Great Britain.	Continent.	Total.
Calcutta—						
1896-97...	.....	.....	.....	4,000	18,000	22,000
1895-96...	.....	.....	.....	5,000	9,000	14,000
Madras—						
1896-97...	.....	.....	.....	9,000	17,000	26,000
1895-96...	1,000	.....	1,000	18,000	14,000	32,000
All others—						
1896-97...	.....	2,000	2,000	13,000	40,000	53,000
1895-96...	.....	2,000	2,000	19,000	30,000	49,000
Total all—						
1896-97...	.....	2,000	2,000	26,000	75,000	101,000
1895-96...	1,000	2,000	3,000	42,000	53,000	95,000

The above totals for the week show that the movement from the ports other than Bombay is 1,000 bales less than the same week last year. For the whole of India, therefore, the total shipments since September 1, 1896, and for the corresponding periods of the two previous years, are as follows.

EXPORTS TO EUROPE FROM ALL INDIA.

Shipments to all Europe from—	1896-97.		1895-96.		1894-95.	
	This week.	Since Sept. 1.	This week.	Since Sept. 1.	This week.	Since Sept. 1.
Bombay.....	34,000	173,000	27,000	262,000	9,000	52,000
All other ports	2,000	101,000	3,000	95,000	.....	73,000
Total	36,000	274,000	30,000	357,000	9,000	125,000

**ALEXANDRIA RECEIPTS AND SHIPMENTS.**—Through arrangements we have made with Messrs. Davies, Benachi & Co., of Liverpool and Alexandria, we now receive a weekly cable of the movements of cotton at Alexandria, Egypt. The following are the receipts and shipments for the past week and for the corresponding week of the previous two years.

Alexandria, Egypt, February 3.	1896-97.	1895-96.	1894-95
Receipts (cantars).....	150,000	140,000	160,000
This week.....	150,000	140,000	160,000
Since Sept. 1.....	4,594,000	4,445,000	3,805,000

	This week.	Since Sept. 1.	This week.	Since Sept. 1.	This week.	Since Sept. 1.
Exports (bales)—						
To Liverpool.....	8,000	223,000	10,000	216,000	17,000	194,000
To Continent.....	6,000	185,000	8,000	193,000	11,000	207,000
Total Europe.....	14,000	413,000	18,000	439,000	28,000	401,000

\* A cantar is 98 pounds.  
† Of which to America in 1896-97, 21,533 bales; in 1895-96, 39,528 bales; in 1894-95, 28,624 bales.

This statement shows that the receipts for the week ending Feb. 3 were 150,000 cantars and the shipments to all Europe 14,000 bales.

**MANCHESTER MARKET.**—Our report received by cable to-night from Manchester states that the market continues steady for both yarns and shirtings. Manufacturers are working at a loss. We give the prices for to-day below and leave those for previous weeks of this and last year for comparison:

	1896-97.						1895-96.					
	32s Oop. Twist.		8 1/2 lbs. Shirtings, common to finest.		Cotton Mid. Upland		32s Oop. Twist.		8 1/2 lbs. Shirtings, common to finest.		Cotton Mid. Upland

**OVERLAND MOVEMENT, &c., TO FEBRUARY 1.**—In our editorial columns to-day will be found our regular statements of overland movement, receipts, exports, spinners' takings, &c., brought down to February 1.

**EXCHANGES.**—The following exchanges have been made during the week:

12 pd. to exch. 200 Meh. for May.	01 pd. to exch. 100 July for Aug.
22 pd. to exch. 1,400 Meh. for Aug.	42 pd. to exch. 400 Nov. for July.
03 pd. to exch. 2,100 May for Aug.	08 pd. to exch. 100 Meh. for Apr.
34 pd. to exch. 100 Sept. for Aug.	23 pd. to exch. 600 Meh. for Aug.
46 pd. to exch. 300 Nov. for July.	13 pd. to exch. 9,200 Meh. for May.
17 pd. to exch. 200 Meh. for June.	04 pd. to exch. 200 June for July.
13 pd. to exch. 4,200 Meh. for May.	04 pd. to exch. 200 May for June.
23 pd. to exch. 1,300 Meh. for Aug.	05 pd. to exch. 100 June for Aug.
44 pd. to exch. 600 Nov. for July.	22 pd. to exch. 200 Meh. for Aug.
13 pd. to exch. 2,000 Meh. for May.	18 pd. to exch. 500 Meh. for June.

**SEA ISLAND COTTON MOVEMENT.**—We have received this (Friday) evening by telegraph from the various ports the details of the Sea Island cotton movement for the week. The receipts for the week ending to-night (Feb. 5) and since Sept. 1, 1896, the stocks to-night, and the same items for the corresponding periods of 1895-96, are as follows.

	1896-97.		1895-96.		Stock	
Receipts to Feb. 5.	This week.	Since Sept. 1.	This week.	Since Sept. 1.	1897.	1896
Savannah.....	1,065	77,717	1,046	69,448	21,095	17,283
Charleston, &c.....	80	10,071	107	10,000	4,471	2,557
Florida, &c.....	197	5,984	....	4,738	4,096	1,498
Total.....	1,342	93,752	1,153	84,186	30,552	21,338

The exports for the week ending this evening reach a total of 992 bales, of which 840 bales were to Great Britain, 142 to France and — to Reval, and the amount forwarded to Northern mills has been 1,876 bales. Below are the exports for the week and since September 1 in 1896-97 and 1895-96

	Week Ending Feb. 5.			Since Sept. 1, 1896			North's H.

A considerable portion of the Sea Island cotton shipped to foreign ports goes via New York, and some small amounts via Boston and Baltimore. Instead of including this cotton for the week in which it leaves the Southern outports, we follow the same plan as in our regular table of including it when actually exported from New York, &c. The details of the shipments of Sea Island cotton for the week will be found under the head "Shipping News," on a subsequent page.

Quotations Feb. 5 at Savannah, for Floridas, common, 9c.; medium fine, 11 1/2c.; choice, 14 1/2c.

Charleston, Carolinas, medium fine, 7 1/2c. @ 13c.; fine, 19 @ 20c.; fully fine, 21 @ 23c.; extra fine, 28 to 35c.

**COTTON MILLS ON SHORT TIME.**—In accordance with the agreement entered into by a large number of cotton manufacturing corporations in New England, a reduction of the weekly running time was begun this week. Thirty mills in Fall River, representing in the aggregate some 2,400,000 spindles, have agreed to close their mills Friday and Saturday of each week for the next thirteen weeks. Heretofore the running time of these mills has been fifty-eight hours per week, but this shut-down will cut it to forty-two hours, and will result in a material reduction in the output of printing cloths, the stocks of which at the principal points of accumulation are now so heavy.

**JUTE BUTTS, BAGGING, &c.**—There has been practically no demand for jute bagging the past week, the trade for the season being at an end. The ruling quotations this evening are 4 1/2c. for 1 1/4 lbs., 5c. for 2 lbs. and 5 1/2c. for standard grades in a jobbing way. Car-load lots of standard brands are quoted at 4 1/2c. for 1 1/4 lbs., 5c. for 2 lbs. and 5 1/2c. for 2 1/4 lbs. f.o.b. at New York. Jute butts are neglected at 1 1-16c. for paper quality, 1 7-16 @ 1 1/2c. for mixing and bagging and 1 3/4c. for spinning butts, all to arrive. From Messrs. Ira A. Kip & Co.'s circular we ascertain that the deliveries of jute butts and rejections at New York and Boston during January were 16,952 bales, against 33,682 bales for the same month last year. Importers and speculators at New York and Boston on January 31 held no stock, against 2,300 bales at the corresponding date in 1896; and the amount of jute for the United States reaches 163,272 bales, against 196,222 bales last year.

**THE EXPORTS OF COTTON** from New York this week show an increase compared with last week, the total reaching 21,813 bales, against 10,493 bales last week. Below we give our usual table, showing the exports of cotton from New York, and the direction, for each of the last four weeks; also the total exports and direction since Sept. 1, 1896, and in the last column the total for the same period of the previous year.

**EXPORTS OF COTTON (BALES) FROM NEW YORK SINCE SEPT. 1, 1896.**

## BREADSTUFFS.

FRIDAY, February 5, 1897.

There has been a fair amount of business transacted in spring patents at a decline of 10c. to 15c. per bbl. For other grades of wheat flour, however, there has been a very slow market, but as stocks have not been large, there has been no attempt on the part of sellers to force business, and values have held about steady. The demand for rye flour has continued quiet and prices have been lowered about 10c. per bbl. Buckwheat flour has had a decidedly slow sale, but no changes have been made in quoted values. Corn meal has continued to sell slowly, and a reduction of 10c. has been made in prices. To-day the market for wheat flour was without change.

Early in the week there was a moderate amount of activity in the speculative dealings in the market for wheat futures. The advance, which started at the close of 'Change on last Friday as a result of reported large export purchases, was continued on Saturday, and prices closed at an advance of 3/4c. from the curb prices of the previous day. Monday, however, under decidedly disappointing advices from Liverpool, the market turned weaker. Longs sold freely to realize profits, and there was some selling for "short" account. The close was at a decline of 1 1/2c. for the day. Tuesday the market again turned stronger. Foreign advices reported higher markets and it was believed that the break of the previous day was the result of manipulation. Shorts bought to cover contracts and nearly all of Monday's loss in prices was recovered. During the remainder of the week there was a quiet and uninteresting market, with the changes in prices fractional. To-day the market was quiet but steady. In the spot market business has been quiet. Shippers have shown less interest and values have weakened slightly. No trades were reported to-day. No. 2 red winter was quoted nominal at 94 1/2c., f. o. b. afloat; No. 1 hard Duluth at 93 1/2c., f. o. b. afloat, and No. 1 Northern at 87 1/2c., f. o. b. afloat.

## DAILY CLOSING PRICES OF NO. 2 RED WINTER WHEAT.

	Sat.	Mon.	Tues.	Wed.	Thurs.	Fri.

May delivery .....	82 1/2	80 1/2	82 1/2	81 1/2	82 1/2	82 1/2
July delivery .....	79 1/2	78 1/2	79 1/2	78 1/2	79 1/2	79 1/2

Speculation in the market for Indian corn futures has been dull and prices have gradually weakened under free offerings from the West, although a continued export demand, particularly at outports, and liberal clearance from the seaboard, have prevented a material break in values. To-day the market was dull, with the changes in prices unimportant. In the spot market shippers have been less active buyers; still a fair business has been transacted at outports. The sales to-day in the local market included No. 2 mixed at 29c. in elevator and 30c. delivered; do for export at 29½c. f.o.b. afloat, and No. 2 mixed at 27½c. in elevator.

## DAILY CLOSING PRICES OF NO. 2 MIXED COBBLER

May delivery.....c.	30½	30½	30½	29½	30	29½
July delivery.....c.	31½	31½	31½	31½	31½	31½

Trading in the market for oats for future delivery has been dull, and as offerings from the West have been fairly liberal prices have declined slightly. In the spot market business was quiet early in the week. Subsequently, however, values weakened with futures and shippers became more active buyers. To-day a limited amount of business was transacted. The sales included No. 2, mixed at 21½¢. in elevator and No. 2 white at 24¢. in elevator.

## THE DRY GOODS TRADE.

NEW YORK, FRIDAY, P. M., Feb. 5, 1897.

The Fall River mills have been successful in securing the required number of signatures to the short-time agreement, and it has gone into effect this week. The curtailment is equal to sixteen hours per week, and will continue for thirteen weeks. The majority of the mills will during that period work 42 hours per week instead of 58 hours, but some, whilst curtailing the full number of hours in the thirteen weeks, will do it irregularly. The print cloth market is stronger as a result, and has advanced 1-16c., but up to the present time the demand has not been stimulated to any extent. The market here has not been affected at all, and in the general run of cotton goods has presented a uniformly dull appearance, with an easy tone prevailing in most directions. Despite the fact that the reductions in the prices of bleached cottons failed to draw out a good demand, there are evidences of pressure on the part of sellers in both brown and coarse colored cottons to move stocks by offering "trading" opportunities to some of the larger buyers, and the staple goods market is distinctly irregular. Spring specialties are in comparatively fair request, and are the best feature in the cotton goods division. The jobbing trade here and elsewhere shows some improvement. Business in the woolen goods division is gradually expanding, a considerable number of new lines in men's wear heavy-weights having been opened this week.

**WOOLEN GOODS.**—The heavy-weight situation has been made much more interesting by the opening of a number of new lines in men's-wear woollen and worsted fabrics during the past week, including some leading makes which are always looked forward to. Buyers have given more attention than previously this season to the display, and although the demand has not expanded materially, it has been more encouraging, particularly through salesmen on the road. The majority of the new goods have opened at last season's prices. Light weights are still fairly well re-ordered for quick delivery at steady prices. Business in overcoatings continues moderate, and prices are unchanged. Cloakings are dull. Woollen and worsted dress goods disclose more doing on supplementary requirements in both fancy and staple lines. Flannels, blankets and carpets are without material change.

**DOMESTIC COTTON GOODS**—The exports of cotton goods from this port for the week ending Feb. 3 were 11,028 packages, valued at \$334,690, their destination being to the points specified in the tables below:

NEW YORK TO FEBRUARY 3.

	<i>Week.</i>	<i>Since Jan. 1.</i>	<i>Week.</i>	<i>Since Jan. 1.</i>
Great Britain.....	38	345	2	224
Other European.....	34	534	650	945

China, via Vancouver.....	4,900	7,950	1,532	2,532
<b>Total.....</b>	<b>15,926</b>	<b>40,198</b>	<b>5,959</b>	<b>25,723</b>

\* From New England mill points direct.

The value of the New York exports for the year to date has been \$1,264,930 in 1897 against \$1,063,335 in 1894.

Some low sales have been reported in brown sheetings this week, chiefly in 4-yard goods, but although the market is easy all around, the bulk of business has been done at previous prices in 3 yards and standards. Brown ducks sell slowly and osenburgs are inactive. There is no demand of any account for 9-ounce denims, but lighter weights are in moderate request; prices are irregular. Picks are dull at previous prices, and other coarse colored cottons are inactive and easy to buy. The sales of bleached cottons are still in small lots, but a fair number of transactions have been recorded. Low-grade bleached, slightly steadier under print cloth influences. Wide sheetings are irregular with moderate sales. Cotton flannels and blankets slow. Kid-finished cambrics inactive, but prices fairly steady. The demand for fancy calicoes has been fair and for finer specialties also, but indigo blues, shirtings, Turkey reds and other regular prints are dull, without change in prices. In the gingham department business has been indifferent and without special feature. Print cloths have ruled very firm, and in face of a quiet demand extras have advanced 1-16c. to 3-9-16c.

	1897. Jan. 30.	1898. Feb. 1.	1895. Feb. 2.	1894. Feb. 3.
<i>Stock of Print Cloths—</i>				
At Providence, 64 squares.	438,000	183,000	74,000	187,000
At Fall River, 84 squares..	702,000	342,000	18,000	189,000
At Fall River, odd sizes....	749,000	328,000	88,000	50,000
<b>Total stock (pieces).....</b>	<b>1,889,000</b>	<b>893,000</b>	<b>180,000</b>	<b>386,000</b>

**FOREIGN DRY GOODS.**—Dress goods and silks in spring lines have been in fair request for small quantities at steady prices. Ribbons and laces show a better business doing. Linens continue dull. Hosiery and underwear quiet in both spring and fall goods.

### Importations and Warehouse Withdrawals of Dry Goods

The importations and warehouse withdrawals of dry goods at this port for the week ending February 4, 1897, and since January 1, 1897, and for the corresponding periods of last year are as follows:

# STATE AND CITY DEPARTMENT.

## TERMS OF SUBSCRIPTION.

THE INVESTORS' SUPPLEMENT will be furnished *without extra charge* to every annual subscriber of the **COMMERCIAL AND FINANCIAL CHRONICLE**.

THE STATE AND CITY SUPPLEMENT will also be furnished *without extra charge* to every subscriber of the **CHRONICLE**.

THE STREET RAILWAY SUPPLEMENT will likewise be furnished *without extra charge* to every subscriber of the **CHRONICLE**.

THE QUOTATION SUPPLEMENT, issued monthly, will also be furnished *without extra charge* to every subscriber of the **CHRONICLE**.

TERMS for the **CHRONICLE** with the four Supplements above named are Ten Dollars within the United States and Twelve Dollars in Europe, which in both cases includes postage.

### Terms of Advertising—Per inch space.)

One time .....	\$3 50	Thr Months (13 times) ..	\$25 00
One Month (4 times) ..	11 00	Six months (26 times) ..	43 00
Two Months (8 times) ..	18 00	Twelve Months (52 times) ..	53 00

(The above terms for one month and upward are for standing cards.)

The purpose of this State and City Department is to furnish our subscribers with a weekly addition to and continuation of the **STATE AND CITY SUPPLEMENT**. In other words, with the new facts we shall give, the amplifications and corrections we shall publish, and the municipal laws we shall analyze in the "State and City Department," we expect to bring down weekly the information contained in the **STATE AND CITY SUPPLEMENT** to as near the current date as possible. Hence every Subscriber will at all times possess a complete and fresh cyclopædia of information respecting **Municipal Debts**.

**Mitchell County, Tex.—Court of Appeals Decision.**—A decision of the Civil Court of Appeals, Second District, filed at Fort Worth, Tex., on January 29, 1897, upholds the validity of an issue of Court House and bridge bonds of this county. It seems that at the time the bonds were issued the County Commissioners failed to levy the tax for sinking fund and interest which the law requires. The Paducah (Ky.) National Bank, having in its possession some of these bonds, brought suit in the District Court of Mitchell County to test the validity of the bonds, and received a favorable decision. The county appealed on the grounds that the levying of the tax at the time the bonds were issued was a constitutional requisite to validity, that the issuance of the bonds without so doing made the securities void, and that as the records of the Commissioners' Court were open to the public the purchaser of the bonds was chargeable with notice of a fatal defect. In the opinion filed the higher court fully sustains the lower, although this decision is contrary to opinions heretofore filed concerning city improvement bonds. As this decision affects the validity of Court House and other county improvement bonds of Texas counties amounting, it is said, to \$5,000,000 or more, its importance will be realized.

**Bond Proposals and Negotiations.**—We have received through the week the following notices of bonds recently negotiated and bonds offered and to be offered for sale.

**Adams County, Ohio.—Bond Sale.**—On Feb. 2, 1897, County Auditor J. M. Wittenmyer awarded the \$30,000 of bonds of the county to the trustees of the Wilson Worthy Poor Fund, of Adams County, Ohio, whose bid was \$31,200. Several other bids were received, but only two of them were in accordance with the conditions of the sale. These two were Seasongood & Mayer, of Cincinnati, \$30,800, and Rudolph Kleybolte & Co., of Cincinnati, \$30,125. The securities are 4 per cent funding bonds and mature in twenty years from date of issue.

**Albany County, N. Y.—Bond Offering.**—Proposals will be received until 12 o'clock noon, February 16, 1897, by County Treasurer E. L. Barclay, for the purchase of \$71,000 of war loan refunding bonds. The securities will be registered and bear interest at the rate of 4 per cent, payable semi-annually. Thirty-six thousand dollars of the principal will mature from

March 1, 1898, to March 1, 1915, inclusive, at the rate of \$2,000 annually, and the remainder on March 1, 1916.

The present bonded indebtedness of Albany County is \$361,000, and the assessed valuation for 1893 was \$33,659,384 45.

**Atlantic City, N. J.—Bonds Unsold.**—It is reported that the \$10,000 issue of bonds of this city, proposals for which were opened on January 30, was not awarded on that date.

**Baltimore, Md.—Bond Sale.**—On February 1, Mayor Hooper, as Chairman of the Department of Finance, opened the proposals for the purchase of \$1,453,330 of stock of the city. The loan was awarded to the Third National Bank of Baltimore, whose bid was 105 77 for the whole issue. The other bids were as follows:

Merchants & Manufacturers' Fire Insurance Company, \$60,000, at 105 67.

Col. Windfield Peters, agent, whole issue, at 103 5/8.

Mercantile Trust & Deposit Company and Baltimore Trust & Guarantee Company, whole issue or none, at 104 77 and accrued interest.

Hambleton & Co., whole issue, at 103 76.

Maryland Trust Company and Fidelity & Deposit Company, whole issue or none, at 103 93.

Sperry, Jones & Co., and Dick Bros. & Co., of Philadelphia, whole issue, at 104 92.

John E. Hurst, \$300,000 at 105 67.

Kummer & Becker, \$10,000 at 104 50; \$15,000 at 104 25 and \$25,000 at 104.

Margaret J. Bennett, \$25,000 at 105 25.

Douglas H. Thomas, whole issue, or any part, at 105 53 25.

Stein Bros., \$200,000 at 103 03; \$200,000 at 103 14; \$200,000 at 103 26; \$200,000 at 103 38; \$20,000 at 103 53; \$20,000 at 103 65 and \$253,300 at 103 90.

H. A. Orrick, \$650,000 at 103 80.

J. H. Fisher & Son, whole issue or none, at 104 02.

Frank, Rosenberg & Co., \$500,000 at 103 76; \$500,000 at 103 89; \$453,300 at 104 02.

Hopkins Place Savings Bank, \$50,000 at 104 72; \$50,000 at 104 51; \$50,000 at 104 30; \$50,000 at 104 09.

F. D. Thompson, trustee, \$40,000 at 105 25.

Daly & Co., \$500,000 at 103 66; \$250,000 at 103 71; \$250,000 at 103 75.

Alexander Brown & Sons, \$275,000 at 105 35.

Bartlett S. Johnson, \$250,000 at 103 25.

C. M. Stieff, \$10,000 at 105.

Lowndes & Redwood, \$25,000 at 104 37; \$100,000 at 104 50; \$25,000 at 104 61.

A. White Bond Co., \$150,000 at 101 62 1/2; \$350,000 at 102; \$150,000 at 102 12 1/2; \$350,000 at 102 47 1/2; \$100,000 at 103 69 1/2; \$100,000 at 102 72 1/2; \$100,000 at 102 77 1/2; \$153,300 at 102 92 1/2.

Second National Bank of Cumberland, \$10,000 at par and accrued interest.

The securities are dated January 1, 1897, and mature July 1, 1935. Interest at the rate of 3 1/2 per cent is payable semi-annually on January 1 and July 1. This issue of stock was authorized July 2, 1896, for the purpose of funding the floating debt of the city existing December 31, 1895. The city does not tax its stock, but pays the State tax on this issue.

**Bayonne, N. J.—Bond Sale.**—It is reported that \$7,000 of bonds of this city have recently been awarded to Thomas J. Daly at par. These bonds are a part of the issue amounting to \$30,000, of which \$10,000 were recently sold to Cornelius Zabriskie, of Jersey City, at par. Mr. Daly holds an option on the remaining \$3,000. The securities bear interest at the rate of 4 per cent, and the principal will mature in twenty years from date of issue. Principal and interest will be payable in gold.

**Belmar, N. J.—Bond Offering.**—Proposals will be received until two o'clock P. M., February 13, 1897, by the Mayor and Council of the borough of Belmar for the purchase of \$85,000 of improvement bonds. The securities will be of the denomination of \$1,000. Interest at the rate of 5 per cent will be payable semi-annually and the principal will mature at the rate of \$5,000 annually on January 1, from 1901 to 1917 inclusive. Each proposal must be accompanied by a certified check for 25 per cent of the amount bid.

On October 31, 1896, the bonded debt of this borough was \$19,000; floating debt, \$9,000; assessed valuation, \$1,060,500 and the tax rate (per \$1,000) was \$12 50.

The official notice of this bond offering will be found among the advertisements elsewhere in this Department.

**Binghamton, N. Y.—Bonds Defeated.**—At a special election held on February 2, 1897, the proposition to issue \$50,000 of bridge bonds was defeated.

**Bridgeport, Conn.—Bond Issue.**—Bonds amounting to \$25,000 will probably soon be issued by this city.

**California—Bonds Proposed.**—The State of California contemplates the issuing of \$1,000,000 of gold bonds to provide for the southerly extension of the sea-wall of San Francisco. The act is to be submitted to a popular vote at the next general election in November if approved by the Legislature and Governor.

The securities, if authorized, are to be sold in parcels of \$200,000 by the State Treasurer, and will bear date of Jan.

or July 1 of the year in which they shall be sold. Interest at the rate of 4 per cent will be payable semi-annually on the first days of January and July, and the principal will mature in twenty years from their respective dates of issue. For the redemption of these securities a sinking fund will be created, known as the San Francisco sea-wall and thoroughfare sinking fund.

**Cass County, Mich.—Bond Election.**—It is reported that an election will be held shortly in this county to decide the question of issuing \$30,000 of new court-house bonds.

**Centerville, La.—Bond Sale.**—It is reported that this municipality has sold \$12,000 of refunding bonds. The securities will bear interest at the rate of 5 per cent and the principal will mature in from three to ten years from date of issue.

**Charleston, S. C.—Bond News.**—It has been decided that the refunding bonds to be issued by this city will bear interest at the rate of 5 per cent.

**Charlotte, Mich.—Bonds Defeated.**—City Treasurer Leiter reports to the CHRONICLE that the people of Charlotte defeated the proposition to issue electric-light bonds by a vote of 525 to 58.

**Cincinnati, Ohio.—Bonds Authorized.**—The Supreme Court decided on February 2, 1897, that the city of Cincinnati may issue \$1,500,000 of bonds to provide for the building of water-works, but that the bonds must be paid out of the water revenue.

**Bond Sale.**—School district bonds of this city to the amount of \$75,000 have been awarded to the Citizens' National Bank of Cincinnati at 107-348. The securities bear interest at the rate of 4 per cent and mature in ten years from date of issue.

**Cleveland, Ohio.—Bond Sale.**—It is reported that this city has sold \$35,000 of bonds at 115-87. The bonds bear interest at the rate of 5 per cent and mature in from one to twenty-five years from date of issue.

**College Hill, Ohio.—Bond Sale.**—The assessment bonds to the amount of \$9,629 53 offered by this village on Feb. 2, 1897, have been awarded to S. Kuhn & Sons, of Cincinnati, Ohio, for \$10,149 50 and accrued interest. Other bids received were:

The Lamprecht Bros. Co., Cleveland, O .....	104-0508
Ohio Valley National Bank, Cincinnati, O .....	103-1414
Centerville National Bank, Thurman, O .....	100-10417
C. R. Wild, Cincinnati, O .....	100

The securities will bear interest at the rate of 6 per cent, payable annually at the Citizens' National Bank, Cincinnati, Ohio, and the principal will mature, part yearly, from Feb. 2, 1898, to Feb. 2, 1907, inclusive.

**Dexter, Mo.—Bond Issue.**—It is reported that this city has issued \$100,000 of electric-light and water-works bonds.

**Dothen, Ala.—Bonds Proposed.**—It is reported that this city has obtained permission from the Legislature to issue \$20,000 of water-works bonds.

**Escondido Irrigation District, Cal.—Bond Offering.**—Proposals will be received until February 8, 1897, by this district for the purchase of \$4,500 of 6 per cent water-works improvement bonds, maturing April 15, 1903.

**Essex County, N. J.—Bonds Proposed.**—It is reported that this county contemplates the issuance of \$1,500,000 of bonds to provide for a new county court-house.

**Flemingsburg, Ky.—Bonds Proposed.**—It is reported that electric-light bonds of this city to the amount of \$5,000 are under consideration.

**Gallipolis, Ohio.—Bond Sale.**—It is reported that this city has awarded \$75,000 of bonds to S. Kuhn & Sons at a premium of \$6,732 50. The securities bear interest at the rate of 5 per cent and are payable in from eight to nineteen years from date of issue.

**Glenville, Ohio.—Bond Offering.**—Proposals will be received until 12 o'clock noon, February 20, 1897, at the office of Z. W. Morris, Village Clerk, for the purchase of coupon bonds of this village to the amount of \$100,000. The securities will be of the denomination of \$1,000. Interest at the rate of 4½ per cent will be payable semi-annually from April 1, 1897, and the principal will mature April 1, 1917. Bids for less than par will not be considered. The bond are to be issued for the following purposes: Sewer construction, \$61,000; water supply, \$20,000; fire department, \$10,000, and the balance for lighting the village.

**Hackensack School District, N. J.—Bonds Authorized.**—Geo. N. Comes, Clerk, reports to the CHRONICLE that \$15,000 of refunding bonds of the district have been authorized by the voters of Hackensack. The denomination of the securities will be \$100; they will bear interest at the rate of 5 per cent, payable semi-annually, and the principal will mature as follows: \$20,000 on September 1, 1898; \$20,000 September 1, 1899; \$20,000 September 1, 1900; \$25,000 September 1, 1901; \$25,000 September 1, 1902; \$20,000 September 1, 1903, and \$20,000 September 1, 1904. The bonds will be advertised for sale about July 1, 1897.

**Hamilton County, Ohio.—Bond Sale.**—On January 27, 1897, the Board of County Commissioners awarded \$60,000 of Mitchell Avenue aqueduct bonds, series No. 2, to Rudolph

Kleybolte & Co., of Cincinnati. We give below a list of the bids received:

R. Kleybolte & Co. ....	\$62,734 20
Irwin, Ellis & Ballman .....	62 648 00
Atlas National Bank .....	62 325 00
Citizens' National Bank .....	62 321 00
German National Bank .....	62 118 00
S. Kuhn & Son .....	62 112 00
J. M. Simons & Co. ....	62 027 40
W. E. Hutton & Co. ....	62 025 80
Western German Bank .....	62 000 00
H. K. Shookley & Co. ....	61 680 00
August Vos & Co. ....	61 620 00
Seasongood & Myer. ....	61 125 00

The securities are 10-20 year optional bonds and bear interest at 4 per cent.

**Harrison Union School District No. 6, N. Y.—Bond Sale.**—It is reported that \$5,500 of 4 per cent bonds of this district have been sold at 100-21.

**Helena, Mont.—Bonds Proposed.**—The reference by us last week to a report that Helena was considering the issuance of \$1,000,000 of bonds for the erection of a new Capitol was incorrect. It is the State of Montana that is building a State Capitol at Helena, the contemplated cost of which is \$1,000,000.

**Hillsboro, Tex.—Bond Issue.**—Mr. C. A. Sullenberger, Treasurer of this city, reports to the CHRONICLE that the City Council has in preparation an issue of water-works and sewerage bonds to the amount of \$12,000, and it is thought that the securities will be ready for sale about March 1. The bonds will bear interest at the rate of 5 per cent, payable semi-annually, and the principal will mature in forty years from date of issue. Both principal and interest will be paid in gold at the Chemical National Bank, New York. Of the city of Hillsboro, Mr. Sullenberger says: "It is in a fine agricultural section, is the county seat of Hill County, has a steadily growing population and taxable valuation, and its finances are in excellent condition."

**Holden, Mo.—Bonds Proposed.**—It is reported that this city will soon issue \$12,000 of bonds to provide for an electric-light plant.

**Hudson, N. Y.—Bond Sale.**—It is reported that this municipality has disposed of \$5,000 of bonds at 103, \$4,000 at 102-1235 and \$1,000 at 102-125. The above bonds are refunding bonds, bearing interest at the rate of 6 per cent and maturing in 1918.

**Independence, Mo.—Bonds Defeated.**—The citizens of Independence have defeated by a large majority the proposition to issue \$75,000 of sewer bonds and \$10,000 of city hall bonds.

**Jacksonville, Ala.—Bond Issue.**—It is reported that this city is about to issue bonds to the amount of \$75,000.

**Massachusetts.—Bond Offering.**—Proposals will be received until 12 o'clock noon, February 8, 1897, at the office of the State treasurer, E. P. Shaw, Boston, Mass., for \$6,000,000 of bonds of the "Metropolitan Water Loan." The securities will be issued in the form of coupon bonds of the denomination of \$1,000, dated July 1, 1895. Interest at the rate of 3½ per cent from January 1, 1897, will be payable semi-annually on January 1 and July 1, and the principal will mature July 1, 1935. The bonds will be delivered as coupon or registered bonds, at the option of the purchaser.

Principal and interest will be paid in gold at the office of the Treasurer of the Commonwealth in Boston.

All bids must be accompanied by certified checks for 2 per cent of the amount bid for.

The official advertisement of this bond sale will be found in the State and City Department of the CHRONICLE of Jan. 30.

**Marletta, Ohio.—Bond Election.**—It is reported that on Feb. 8, 1897, the citizens of this city will be called on to vote on a proposition to issue electric-light and school bonds amounting to \$55,000.

**Memphis, Tenn.—Bond Sale.**—This city has decided to sell the \$60,000 of 5 per cent bonds to Seasongood & Mayer of Cincinnati, O., at 104.

**Milwaukee, Wis.—Bonds Proposed.**—It is reported that this city proposes to issue \$150,000 of bonds for the Grand Avenue viaduct.

**Mount Sterling, Ohio.—Bond Offering.**—Proposals will be received until February 23, 1897, by Village Clerk John W. Hanawalt for the purchase of \$9,000 of bonds of this village. The securities will bear interest at the rate of 6 per cent, and the principal will mature in from 18 to 25½ years from date of issue. The denomination of the bonds will be \$500 and the proceeds are to be issued for electric-light and water purposes.

**Mount Vernon, N. Y.—Bond Sale.**—Bonds of this city to the amount of \$24,000 have recently been sold to E. Morrison, of New York City, at 103-29. The bonds bear interest at the rate of 5 per cent, and the principal will mature in 3 years from date of issue.

**Newberry, S. C.—Bond Sale.**—On January 25, 1897, water and electric light bonds of this city to the amount of \$42,000 were awarded to Geo. W. Williams, Jr., of Charleston, at 101-003. The following bids were also received: Newberry Savings Bank, 100-50; H. Asher Ensign, 95-23; Jos. N. Brown,

\$10,000 at 100; J. H. Ostendorf, \$5,000 to \$10,000 at par. The securities will be dated Jan. 1, 1897, and the principal will mature on Jan. 1, 1937. Interest at the rate of 6 per cent will be payable annually on January 1 at the National City Bank, New York. The denomination of the bonds will be \$500.

**New York City, N. Y.—Bond Sale.**—It is reported that New York City has sold bonds to the amount of \$916,953 to the Sinking Fund Commission at par.

**Oregon, Mo.—Bond Offering.**—Proposals will be received until February 18, 1897, by L. Moore, Treasurer, for the purchase of water-works bonds of this city amounting to \$35,000. The securities are to be coupon bonds bearing interest at the rate of 5 per cent, payable annually, and the principal will mature in twenty years from date of issue.

**Owyhee County, Idaho.—Bond Offering.**—Proposals will be received until twelve o'clock noon April 12, 1897, by the Board of County Commissioners at the office of E. L. Ballard, Clerk of the Board, Silver City, Idaho, for the purchase of coupon bonds of this county to the amount of \$61,000. The securities are to bear interest not exceeding 6 per cent, payable on the first days of January and July in each year, and the principal will mature one-tenth annually, beginning ten years from date of issue. Both principal and interest will be payable in gold at the office of the County Treasurer. Bids for less than par will not be considered. The proceeds of the above issue will be used for the purpose of paying the floating debt, which on January 15, 1897, amounted to \$86,392.60; the cash assets on January 4 amounted to \$33,190.03. In 1896 the total assessed valuation of the county was \$796,809 and the total tax rate (per \$1,000) was \$35. Property is assessed at about 40 per cent of its real value. In 1890 the population was 2,021 and at present is estimated at 5,500.

**Plainfield, N. J.—Bond Sale.**—It is reported that the E. C. Jones Co. has taken \$24,000 of Plainfield bonds at 102½. The loan will bear interest at the rate of 4 per cent and mature in forty years from date of issue.

**Pope County, Ill.—Bond Sale.**—It is reported that the \$15,000 of bridge bonds offered by Pope County on Jan. 7,

1897, have been sold at 95. The securities will bear interest at the rate of 4 per cent, payable semi-annually on Jan. 1 and July 1. They will be dated Jan. 1, 1897, and be payable Jan. 1, 1912, or at the option of the county after Jan. 1, 1902. Both principal and interest will be payable at the Hanover National Bank, New York City. The county has no bonded debt. The assessed valuation is \$1,074,278 and the real valuation about \$5,000,000. The population in 1890 was 14,016.

**Proctor, Vt.—Bond Sale.**—The \$50,000 of water and sewer bonds offered by the village of Proctor on January 22, 1897, have been awarded to the National Life Insurance Company of Montpelier, Vt. The bonds bear interest at the rate of 4 per cent, payable semi-annually in Boston, Mass., or Proctor, Vt., and are of the denomination of \$1,000.

**Rensselaer County, N. Y.—Bond Sale.**—On January 29, 1897, refunding bonds of this county to the amount of \$33,000 were awarded to E. C. Stanwood & Co.

A list of the bids received is as follows:

E. C. Stanwood & Co.	104-847
Troy Savings Bank	104-62
Faxon, Leach & Co.	101-559
D. A. Moran & Co.	104-29
Isaac W. Sherrill	104-35
N. W. Harris & Co.	104-15
Bertron & Storrs	104-128
Street, Wykes & Co.	104-065
The Lamproft Bros. Co.	104-05
R. L. Day & Co.	104-039
Blake Bros. & Co.	103-85
Deltz, Denison & Prior	103-85
Fred Taylor & Co.	103-77
Geo. M. Hahn	103-49
E. C. Jones Co.	103-15
Rudolph Kleyboite & Co.	102½
S. A. Kean	101-125

The securities are 4 per cent coupon bonds of the denomination of \$1,000, dated February 1, 1897; interest payable semi-annually and principal maturing at the rate of \$2,000 each year. The total bonded debt of the county, excluding this issue, is \$650,000; the assessed valuation for 1896 was \$79,013,577 and the population in 1890 was 124,511.

**St. Johnsbury, Vt.—Bond Offering.**—Proposals will be received until 12 o'clock noon Feb. 10, 1897, by W. S. Boynton,

## NEW LOANS.

**\$75,000**

**Town of Stamford, Conn.,**  
Funding 4½ Gold Bonds,  
DUE 1927.

Proposals will be received by the Selectmen and Treasurer of the town of Stamford, Conn., until noon, Monday, February 15th, 1897, for the purchase in whole or in part of \$75,000 of the bonds of the town of Stamford, Conn.

These bonds will be issued to retire an equal amount of the floating debt of the town, contracted by expenditures for school houses, bridges and other permanent improvements, and are payable in gold upon February 1st, 1927, interest payable in gold August 1st and February 1st at office of Treasurer.

Bonds will be delivered on February 20th, 1897, when the price bid must be paid to the Treasurer by the successful bidder.

Proposals should be sealed and addressed to "The Town Treasurer, Stamford, Conn., and marked 'Proposals for Bonds,' and must be accompanied by a certified check for two (2) per cent of the amount. The right to reject any or all bids is reserved.

Sinking fund provides for payment at maturity. It is proposed to issue coupon bonds of the denomination of \$1,000. Bonds may be registered.

The bonds are issued under Sec. 110, Revised Statutes of the State of Connecticut, 1894, and by authority of a town meeting held January 13th, 1897.

For further particulars address  
W. D. DASKAM,  
Treasurer, Town of Stamford.

**Borough of Belmar, N.J.,**  
5% BONDS.

The Mayor and Council of the Borough of Belmar, of the County of Monmouth, State of New Jersey, will receive, at the office of the Clerk in said Borough, up to and until the thirteenth day of February, A. D. 1897, sealed proposals or bids for an issue of improvement bonds of said Borough, aggregating \$85,000, to be issued in sums of \$1,000 each, five of which bonds shall be payable on the 1st day of January, 1901, and five of said bonds annually thereafter, so that the whole of said issue shall be paid in twenty (20) years; said bonds to bear interest at the rate of five (5) per centum per annum, payable semi-annually. The proceeds of said bonds are to be used for the construction of sewers and water works and improvement of streets of the said Borough, pursuant to a popular vote of the legal voters of said Borough.

Bids may be made for the entire issue of said bonds, or for a fractional part of said issue, and said bids shall be accompanied by a certified check, equal to the one fourth (¼) part of the amount of said bid, as a guarantee of good faith.

The Mayor and Council reserve the right to reject any or all bids, which will be opened at the hour of two o'clock on said day.

Dated BELMAR, Jan. 21, 1897.

**EDWD. C. JONES CO.,**  
321 CHESTNUT STREET. 80 BROADWAY,  
PHILADELPHIA. NEW YORK.

Clerk of the village of St. Johnsbury, Vt., for the purchase of \$20,000 of 4 per cent funding coupon bonds of the village. The securities will be dated Dec. 1, 1896, interest will be payable semi-annually on the first days of June and December at the First National Bank of St. Johnsbury, Vt., or the North National Bank of Boston, Mass., and the principal will mature as follows: \$1,000 Dec. 1, 1907; \$4,000 Dec. 1, 1908; \$4,000 Dec. 1, 1909; \$4,000 Dec. 1, 1910; \$4,000 Dec. 10, 1911. The denomination of the securities will be \$500. The total indebtedness of the village, including this issue, is \$94,700. This does not include the water debt, which amounts to \$37,500. The assessed valuation for 1896 was \$3,406,927; the real valuation (estimated) is \$5,000,000; and the population is estimated at 4,500.

**San Francisco, Cal.—Bond Petition.**—It is reported that the Legislature of this State will be petitioned by the Supervisors of San Francisco for authority to issue bonds to complete the city sewerage system. If authorized, the bonds will bear 4 per cent interest and mature in forty years from date of issue.

**San Miguel County, Cal.—Bond Sale.**—It is reported that this county has sold \$24,000 of 7 per cent school-house bonds at par. The securities mature in fifteen years from date of issue.

**Sevier County, Tenn.—Bond Petition.**—It is reported that the Legislature of the State of Tennessee has been petitioned by the authorities of Sevier County for permission to bond the county to the amount of \$70,000 for the purpose of constructing county roads.

**Tiffin, Ohio.—Bond Offering.**—Proposals will be received until 12 o'clock noon February 12, 1897, for the purchase of bonds of this city to the amount of \$19,500. The securities will bear interest at the rate of 6 per cent and the principal will mature in ten years from date of issue.

**Tippecanoe City, Ohio.—Bond Sale.**—It is reported that \$23,000 of electric-light and water bonds of this city have been sold at 111.195. The securities bear 6 per cent interest, and the principal will mature in fifteen years from date of issue.

**Toledo, Ohio.—Bond Sale.**—Refunding bonds of this city amounting to \$40,000 have been awarded to N. W. Harris & Co. of Chicago at 103.32. Other bids received were as follows:

Dietz, Dentson & Prior.....	103.32
Soltzer & Co.....	105.97
Lamprecht Bros. Co.....	105.77
Farson, Leach & Co.....	105.71
W. J. Harris & Co.....	105.22
Street, Wykes & Co.....	105.17
Rudolph Kleybolte & Co.....	104.50
Seasongood & Mayer.....	103.00

The securities bear interest at the rate of  $4\frac{1}{2}$  per cent and the principal matures in 15 years from date of issue.

The above bonds were offered for sale November 10, 1897, but owing to an error in the ordinance authorizing the issue, they were withdrawn from the market. The error has since been corrected.

**Visalia, Cal.—Bond Sale.**—It is reported that school bonds of this city to the amount of \$4,000 have been sold at 103.16.

**Watervliet, N. Y.—Bonds Proposed.**—This city has decided to petition the Legislature for permission to issue bonds to the amount of \$40,000 for a new city hall.

**West Alexandria, Ohio.—Bond Sale.**—It is reported that water-works bonds of this city amounting to \$16,000 have been awarded to R. Kleybolte & Co., of Cincinnati, at 100.0149. The securities bear interest at the rate of 5 per cent, and mature in from 7 to 23 years from date of issue.

**West Point, Miss.—Bond Offering.**—Proposals will be received until 7 o'clock P. M. March 15, 1897, by City Clerk L. T. Carlisle for the purchase of \$20,000 of water-works bonds. The securities will be dated May 1, 1897. They will bear interest from June 1, 1897, at the rate of 6 per cent, payable semi-annually on the first days of June and December, and the principal will mature May 1, 1917.

**Westerville, Ohio.—Bonds Proposed.**—The citizens of this city are contemplating the issuance of bonds to provide for an electric light plant and water-works.

**Woonsocket, R. I.—Bonds Proposed.**—It is reported that this city has petitioned the Rhode Island Legislature for permission to issue sewer bonds to the amount of \$100,000 and fundlog bonds amounting to \$350,000.

## STATE AND CITY DEBT CHANGE

We subjoin reports as to municipal debts received since the last publication of our STATE AND CITY SUPPLEMENT. Some of these reports are wholly new and others cover items of information additional to those given in the SUPPLEMENT and of interest to investors.

**Amherst County, Va.**—The following statement has been corrected to January 1, 1897, by means of a special report to the CHRONICLE from H. C. Joyner, County Treasurer.

County seat is Amherst C. H.

LOANS—	When Due.	Tax valuation, real.....
BRIDGE BONDS—		\$1,533,573
6s, J&J, \$13,500.....		Tax valuation, personal 365,811
RAILROAD BONDS—		Tax valuation, railroads 628,861
6s, J&J, \$27,000.....Jan., 1908		Total valuation 1896... 2,528,245
JAIL BONDS—		Assessment about 1/2 actual value.
6s, J&J, \$800.....		State tax (per \$1,000) 1896. \$100
Bonded debt Jan. 1, 1897. \$41,300		County tax (per \$1,000).... 7.00
Floating debt..... 2,300		Population in 1890 was.....17,551
Total debt Jan. 1, 1897.... 43,800		Population in 1897 (about) 20,000

INTEREST on the railroad bonds is payable by the National Exchange Bank, Lynchburg; on the bridge and jail bonds at the office of the County Treasurer.

OPTIONAL.—All bonds of this county are subject to call at any time.

**Hastings, Neb.**—G. J. Evans, Mayor. The following statement has been corrected to January 1, 1897, by means of a special report to the CHRONICLE from E. A. Francis, City Clerk.

Hastings is the county seat of Adams County.

LOANS—	When Due.	SEWER BONDS—
INTERSECTION PAVING—		5s, J&D, \$10,000.....June 2, 1910
6s, J&J, \$5,000.....Jan. 1, 1912		Subject to call at any time.
5s, A&O, 5,000.....Oct. 15, 1912		5s, A&O, \$15,000.....Apr. 1, 1911
RAILROAD AID—		WATER BONDS—
6s, A&O, \$60,000.....Oct. 1, 1907		5s, M&S, \$85,000.....Sept. 15, 1906
Subject to call at any time.		Subject to call at any time.
5s, M&N, \$20,000.....May 1, 1908		5s, M&S, \$15,000.....Sept. 15, 1908
Subject to call at any time.		Subject to call at any time.
		5s, M&N, \$10,000.....May 21, 1914

INTEREST payable on all bonds in New York City at Nebraska, fiscal agency—Kountze Brothers.

**TOTAL BONDED DEBT** January 1, 1897, was \$255,000; sinking fund, \$22,713; net debt, \$232,287; water debt (included in total debt) \$110,000. The water plant owned by the city yields a revenue of nearly \$10,000 a year.

**ASSESSED VALUATION** in 1896 of real estate was \$132,800; of personal property, \$187,200; of railroads, etc., \$61,800; total, \$681,800; city tax rate (per \$1,000), \$10.00. Real estate is assessed at about "one-fifth its actual value."

**POPULATION** in 1890 was 13,534; in 1880 was 2,817.

**Clay County, S. D.**—The following statement has been corrected to January 15, 1897, by means of a special report to the CHRONICLE from Frank L. Hedlin, County Treasurer.

County seat is Vermillion.

LOANS—	When Due.	Tax valuation, personal. \$417,967
UNIVERSITY BUILDING BONDS—		Tax valuation RRa, etc. 124,087
6s, J&J, \$10,000.....Jan. 1, 1899		Total valuation 1896... 2,746,280
6s, J&J, \$12,000.....Jan. 1, 1901		Assessment about 1/2 actual value.
Bonded debt Jan. 15, '97. \$22,000		Tax rate (per \$1,000).....\$15.00
Sinking fund..... 4,000		Population in 1890 was.....7,509
Net debt Jan. 15, 1897... 18,000		Population in 1880 was.....5,001
Tax valuation, real..... 2,204,226		Population in 1897.....11,865

INTEREST on all bonds is payable at the County Treasurer's office

**West Orange, N. J.**—The following statement has been corrected to date by means of a special report to the CHRONICLE.

This town is situated in Essex County.

LOANS—	When Due.	Tax valuation, personal. \$275,200
REDEMPTION BONDS—		Total valuation 1896... 3,454,050
4s, J&J, \$25,000.....July 1, 1916		Assessment about 1/2 actual value.
ROAD BONDS—		Tax rate (per \$1,000).....\$27.48
7s, J&D, \$74,000.....June 1, 1906		Population in 1890 was.....4,358
Total debt Jan. 1, 1897... \$99,000		Population in 1896 (est.).... 6,000
Tax valuation, real..... 3,178,850		

INTEREST is payable at the Orange National Bank, Orange, N. J.

TAX FREE—All of the West Orange bonds are exempt from taxation.

*THE FINANCIAL SITUATION.*

Two very important transactions distinguish the week's record. The first was the purchase on Monday by Mr. O. D. Borden, of the American Printing Company, Fall River, of 750,000 pieces (64x64) print cloth, 500,000 pieces for immediate delivery and 200,000 pieces for future delivery, said to be at 2 9-16 cents per yard, or 1-16 cent higher than the ruling quotation. The price at which the purchase was made is below the average cost of the cloth, though the mills with newest machinery can weave cloth at that price with cotton selling as now quoted. The total stocks of print cloths reported last Saturday was 1,934,000 pieces, of which there were at Providence 435,000 pieces (64x64) and at Fall River 720,000 pieces (64x64) and 779,000 pieces odd sizes. This purchase consequently calls for a little more than all of the print cloths (regular) in stock at Fall River. It is reported to be the intention of Mr. Borden not to sell the goods in their present condition, but to print them at his mill, which has a capacity of about 75,000 pieces per week, but has been, we understand, running at only 40,000 pieces during the last few months.

Since the transaction referred to above became known, the whole character of the dry goods market has changed. We do not mean that prices have advanced materially, or at all in most cases—that is not a matter of a day or a few days. The whole tone, though, has changed. A great many weak spots existed the previous Monday; they have all closed up and disappeared now. No one seemed to want any goods then, while every one was eager to sell; as we write there are buyers, not yet in crowds nor with shoulders broad enough nor bank accounts big enough to carry Mr. Borden's undertaking; but that is not needed—the inquiry has begun and it will surely increase; confident of that result, holders are no longer anxious sellers. It is hardly possible to over-estimate the depressing effect on demand of an old and heavy stock in sight. That influence has now in large part been removed. Another influence, acting in the same direction, and which will also help to stimulate demand, is the short-time movement at Fall River and elsewhere that we announced in our Cotton Report last week had begun. Within the thirteen weeks this agreement covers, the demand ought to broaden enough to force the mills on full time again.

An event likely to exercise even a still wider and more decided impulse towards a general industrial revival is the dissolution of the steel rail pool. Indeed it looks almost as if the two acts, the print cloth and steel rail movements, had been timed to happen just as they have, and hence to have come about by design, they both tend so directly towards the same end, each contributing in its way to hasten the start of general business activity. The break in the steel-rail pool (which seems to have been an affair of last week but only known to the public this week) resulted first in a drop at the close of last week in the price of steel rails from \$25 to \$20 per ton, and then this week to \$18, and some say to \$17 per ton, followed by the placing of very large orders for rails with producers. When we recall the fact that it was only in December that the price dropped from \$28 to \$25, and that now it is down to \$18, the strength of the inducement for railroads to make immediate purchases is evident.

Railroads, too, have no doubt been holding off, waiting for this break, knowing that it was pretty sure to occur. The important feature in the market leading to that belief has been that steel rails were held at \$25, while billets (as we noted in our article on "The Late Year's Iron Production" January 30) were selling at the price of \$16 and even lower. When billets can be bought at \$16 rails can probably be sold at \$18. As the price of rails all of last year was \$28, here is an inducement in 1897 to the railroads of ten dollars a ton, or about \$1,200 a mile for 75-lbs. rails, to send in their orders. It is no surprise, therefore, to see it stated that the roads are busy making their arrangements for the year. How many orders the steel rail companies will be willing to book before raising the price no one can know. If at these figures there is a loss on both billets and rails the natural conclusion would be that the fight cannot be expected to continue on that basis long. The entire Bessemer steel rail production last year reached only 1,100,000 tons; it has in some previous years got as high as 2,000,000 tons. Whether the mills can at present produce as much as the larger figure indicates is quite questionable, some of the mills having changed their plant so as to do other work; they can, though, produce very much more than they did last year. The promise at the moment is that the machinery will soon be running on full time, that their employees will make better hours, and that the railroads will go to work as soon as the weather will let them do so.

Of course the prospect of coming activity which is here suggested may be again deferred if our legislators, national and State, must continue to disturb confidence by their senseless clamor against trade combinations. On another page we make some observations concerning this week's investigation of the Sugar Trust by a Committee of our State Legislature and the indiscriminate attacks upon capital and capitalists which are the feature of the day. At the present time, when, as shown above, the conditions so strongly point to a revival in trade nothing could be so mischievous in its tendency or so certain to arrest the recovery as to keep up the existing agitation against capital and capitalists. Indeed, if the truth were known, it would probably be found that the fear of adverse legislation has held many enterprises in check, and is thus responsible for the slow way in which trade recovery has been progressing. A moment's thought must convince any one that a continuation of such a policy can only result in harm. As Mr. John H. Davis well said this week, in talking with a reporter from "The New York Times," "Frighten the capitalist and make him timid, and you at once put before industry an almost insurmountable barrier. Legislate against him, attack him, overtax him and make it unsafe for him to invest his money, and you at once take away all chances of industrial prosperity." It is to be hoped, therefore, that our legislators will see the folly of their course.

The election of Mr. John P. Green to the position of First Vice President of the Pennsylvania Railroad is in the regular line of promotion, and is also in line with the conservative policy that has distinguished the Pennsylvania management for so long. Mr. Green first entered the service of the road, we believe, in 1865, and he has been continuously in its employ since 1869, a period of twenty-eight years. This covers the time when J. Edgar Thomson, Thomas A. Scott and George B. Roberts

were successively at the helm. He was for many years assistant to Scott, and since 1882, when he was made Fourth Vice President, he has advanced steadily, until now he has become the First Vice President. Mr. Green has not only seen long service in the road and is thoroughly familiar with the policy which has raised the Pennsylvania to such a high plane in the railroad world, but with Mr. Frank Thomson, who is now President, he has had an active part in shaping and directing that policy, though his duties have brought him less prominently to public notice. In a word, he has been an exceedingly valuable man to the Pennsylvania, and President Roberts leaned on him a great deal. We believe that in recent years he has had the supervision of the company's finances as one branch of his work. The elevation of Mr. Charles E. Pugh to the position of Second Vice-President and the other promotions that have been made this week by the board of directors of the company are also deserving of the highest commendation. It must be gratifying to the security holders, as it is to the public, to see these faithful and capable officials continued in charge of a railroad property which excites the admiration of the whole world.

There is as yet no indication of any general improvement in railroad earnings, though the Chicago Milwaukee & St. Paul in its return for the first week of February shows a gain for the first time in a great many weeks. We publish on another page our compilation of the gross earnings of United States railroads for January and the exhibit is a decidedly unfavorable one. There were, however, a number of special adverse conditions, which account largely for the poor character of the comparison. For December some further returns of gross and net have been received, and the results are somewhat irregular, as heretofore. The Reading Company, now that it is out of the hands of receivers, has changed somewhat the form of its monthly returns, giving simply the figures of gross and net. On the Railroad Company there is a loss of \$116,163 in gross, but an increase of \$19,057 in net; and the Coal & Iron Company, with \$445,660 decrease in gross, has \$49,684 increase in net. Mr. C. W. Haskins, of the firm of Haskins & Sells, public accountants, and who is now Comptroller of the Central of Georgia, has sent us that company's statement for December and the half-year. Including the results on the Ocean Steamship Company, gross for the month is \$724,384 against \$745,857, and net \$298,168 against \$319,382; and for the half-year gross is \$3,888,697 against \$4,063,580, and net \$1,267,257 against \$1,414,494. The Chicago Great Western for the half-year reports gross of \$2,393,947 against \$2,417,278 and net of \$567,501 against \$623,784; and for the calendar year gross of \$4,686,489 against \$4,070,464, and net of \$1,199,295 against \$882,382. The Illinois Central for December has gross of \$2,104,066 against \$2,206,151, and net of \$776,953 against \$884,088; and the Baltimore & Ohio Southwestern gross of \$546,291 against \$545,708, and net of \$188,395 against \$171,718. Below is a four-year comparison of the December gross and net of a few roads whose returns have been received this week.

\* Includes St. Louis Alton & Terre Haute for all the years.

+ These figures are on a different basis from those for the later years.

Money on call has loaned this week at the Stock Exchange at 1½ and at 2 per cent, with comparatively few transactions at the higher figure, and the average has been about 1½ per cent. The banks maintain 2 per cent as the minimum, but trust companies demand 1½ as the lowest. The business in time contracts is small, there being a light demand for short dates, and lenders are unwilling to make concessions for long periods. Rates are 2 per cent for sixty days, 2½ per cent for ninety days to four months and 3 per cent for five to six months on good Stock Exchange collateral. A moderate amount of business is done in commercial paper and the best names are promptly taken, but among buyers there has been a feeling that rates must soon advance, and many have consequently been holding off. It was reported Thursday that ninety day to four months Eastern mill paper had been placed at 2½ per cent; also that Eastern city notes running to October have sold at the same rate of 2½ per cent. Quotations are 3 per cent for sixty to ninety day endorsed bills receivable, 3¼@4 for first class and 4@5 for good four to six months single names.

The European financial situation was somewhat disturbed early in the week by disquieting rumors regarding the physical condition of the Emperor of Russia, which, it was said, had caused a flurry at St. Petersburg, but this quickly subsided on the denial of the report. There was also some uneasiness due to the disturbance in the island of Crete. As the cable had stated that Greece had forcibly intervened in behalf of the Cretans, it was feared that the situation might be seriously complicated; but on Wednesday and Thursday less unfavorable views prevailed. The Bank of England minimum rate of discount remains unchanged at 3 per cent. The cable reports discounts of sixty to ninety day bank bills in London 1½ per cent. The open market rate at Paris is 1½ per cent and at Berlin and Frankfurt it is 2½ per cent. According to our special cable from London the Bank of England gained £395,795 bullion during the week and held £37,703,793 at the close of this week. Our correspondent further advises us that the gain was due to the import of £195,000 (of which £104,000 were from Australia, £82,000 from Egypt and £9,000 from other points), to receipts from the interior of Great Britain of £281,000 net and to exports of £30,000, of which £50,000 were to Uruguay and £30,000 to Brazil.

The foreign exchange market has been dull and remarkably steady this week, there being no change in the posted rates, and until Wednesday none in those for actual business. The tone has been firm. Some bankers assert that this firmness is partly caused by remittances of balances due on arbitrage account in anticipation of the semi-monthly settlement in London. It is also said that commercial bills are not plentiful and that there is a good demand for long sterling, which is being bought for investment by parties who feel confident that when merchandise exports fall off and imports increase, as they are likely to do within the next two months, there will be a profit even on sixty-day bills bought at current figures. There is also said to be a

demand for sight sterling resulting from operations in connection with investment bills. As these have approached the run off period they have been exchanged for sight drafts which have been delivered in settlement of bills previously sold for future delivery and the run off bills have been canceled. The market was dull and steady on Monday, and nominal rates were unchanged compared with those on Friday of last week, at 4 85½ for sixty day and 4 87½ for sight. There was no alteration in rates for actual business, which remained at 4 84½@4 84½ for long, 4 86½@4 86½ for short and 4 86½@4 87 for cable transfers, and the tone was steady to firm, so continuing on the following day. On Wednesday nominal rates were unchanged, but there was an advance in rates for actual business of one-quarter of a cent in long sterling to 4 84½@4 85, while short sterling and cable transfers remained unaltered, but were also advanced one quarter of a cent on Thursday. The following table shows the daily posted rates for exchange by some of the leading drawers.

HOLIDAY

The market closed firm on Thursday at 4 85½ for sixty day and 4 87½ for sight. Rates for actual business were 4 84½@4 85 for long, 4 86½@4 87 for short and 4 87@4 87½ for cable transfers. Prime commercial bills were 4 84½@4 84½ and documentary 4 83½@4 84.

The following statement gives the week's movements of money to and from the interior by the New York banks.

Week Ending Feb. 11, 1897.	Received by N. Y. Banks.	Shipped by N. Y. Banks.	Net Interior Movement.
Currency.....	\$3,541,000	\$2,080,000	Gain. \$501,000
Gold.....	622,000	431,000	Gain. 191,000
Total gold and legal tenders.....	\$4,163,000	\$3,411,000	Gain. \$752,000

With the Sub-Treasury operations the result is as follows.

Week Ending Feb. 11, 1897.	Into Banks.	Out of Banks.	Net Change in Bank Holdings.
Banks' interior movements as above	\$4,163,000	\$3,411,000	Gain. +752,000
Sub-Treasury operations .....	9,100,000	11,400,000	Loss. 2,300,000
Total gold and legal tenders. ....	\$13,163,000	\$14,811,000	Loss. \$1,248,000

The following table indicates the amount of bullion in the principal European banks this week and at the corresponding date last year.

Bank of	Feb. 11, 1897.			Feb. 13, 1896.		
	Gold.	Silver.	Total.	Gold.	Silver.	Total.
England.....	87,703,793	.....	87,703,793	48,110,405	.....	48,110,405
France.....	76,182,401	19,192,890	125,075,291	77,417,145	49,607,794	127,294,939
Germany.....	29,527,907	14,761,483	44,289,450	31,899,370	15,711,930	47,611,000
Aust.-Hungary.....	30,514,608	12,641,000	43,194,000	21,824,000	12,691,000	37,515,000
Spain.....	8,528,000	10,400,000	18,928,000	8,004,000	10,210,000	18,214,000
Netherlands.....	2,432,000	8,844,000	9,477,000	3,105,000	6,827,000	9,932,000
Nat. Belgium.....	2,852,000	1,424,833	4,276,000	2,749,333	1,374,667	4,124,000
Total.....	198,240,428	56,221,699	254,462,127	196,710,553	96,515,091	293,225,644

\* The division between gold and silver given in our table of coin and bullion in the Bank of Germany and the Bank of Belgium is made from the best estimate we are able to obtain; in neither case is it claimed to be accurate, as these banks make no distinction in their weekly returns, merely reporting the total gold and silver, but we believe the division we make is a close approximation.

NOTE. We receive the foreign results weekly by cable, and while not all of the date given at the head of this column, they are the results issued nearest to that date—that is, the latest reported figures.

THE "GREED OF CAPITAL."

Trusts have received further investigation this week. Mr. John E. Searles, Secretary and Treasurer of the Sugar Trust, has been called as a witness before the committee appointed by our State Legislature for the purpose of showing what evils Trusts have entailed on the poor wage earner and consumer. The claim in this case is that the Sugar Trust has destroyed competition, curtailed supply and advanced the price of a leading and general article of food. Mr. Searles's examination and the previous examinations had by the same committee do not seem to afford much encouragement to those ideas or to have advanced the effort to establish what the committee set out to prove.

The facts thus far obtained by the committee may be summarized as follows: (1) that the managers of the Sugar Trust (the directors and men in authority) do not own or control a majority of the stock; (2) that before the Trust was formed about one hundred men owned and controlled the entire business of refining sugars; now it is in the hands of over nine thousand different shareholders; (3) that all elections of directors have been practically unanimous, presumably because the knowledge and ability needed to conduct and carry on the sugar refining business which has been secured by the combination could not easily be duplicated; (4) that the number of employees to-day engaged in the business is as large as it was before the Trust was formed; (5) that the wages paid now by the Trust are about 10 per cent higher than they were formerly, and work has been much more regular since the existence of the combination; (6) that prices of refined sugar are lower than they were anterior to the Trust organization; (7) that the productive power of the refining company has never been fully taxed, that it could supply the consumption for the whole country if the occasion made it necessary; (8) that the company furnishes now about 80 per cent of the refined sugar consumed in the United States; (9) that the refining company does not control the price of sugar, that it fixes the price in no other sense than that it is able to undersell competitors.

Of the foregoing the most vital point is the one of price. If the commodity has not been made dearer to the consumer by the combination the chief contention of the critic falls to the ground. Especially is this true if the commodity has not only not been made dearer, but has declined in price. In the matter of refined sugar it is an unquestioned fact that the price is lower, and if we except the three years from 1884 to 1886 inclusive, when the market value was below cost and large producers of refined sugar failed—a condition which gave rise to the Trust and made it a necessity—if we except those years the price is not only now lower but the refined product has declined faster than the raw sugar. These are stubborn facts for those to grapple with who talk about the harmfulness of the Sugar Trust. In the face of such results is it well for commercial interests, is it well for the community at large, or for the individual, that the ante-Trust condition of affairs should be prolonged or should be restored—a condition which drives honest men out of an industry, leads to the confiscation of a large part of the capital employed in it, and the failure of some of those whose refineries have been worked for a large number of years, and would have ended if it had been prolonged in the failure of all except the few whose factories were most advantageously situated?

We never had any interest in or owned or held in any way a dollar's worth of any of the securities of the Sugar Trust and are no more likely to put a dollar into any of them than we are to buy a ticket in a lottery. At the same time we are of the opinion that the Trust as a form of conserving and concentrating capital and making it more efficient has been a benefit to the individual, rich and poor alike, and to the country as a whole. No doubt, whatever evils may have connected themselves or may connect themselves with this form of organization should be eliminated when discovered; but the mere fact that a trust is ably conducted and carefully managed, and makes money, ought to be a subject for gratification rather than for unintelligent and indiscriminate criticism.

There is one other feature of the examination which the Chairman of the Legislative Committee seemed to make over-much of and bring out with a good deal of relish. It happened that Mr. Searles made some money out of a certain venture on the occasion of the formation of the Sugar Refining Trust. The method of organization was to capitalize each refinery about to become a party to the combination at a figure upon which it was assumed the refinery would be able to earn a certain fixed per cent. On this general basis the North River Refinery had been allotted \$700,000 of certificates and the directors or trustees had agreed to the proposal to take that amount for the refining stock. Just about the time the transfer was to be accepted a trustee who had been absent during the negotiation came home from abroad and violently objected to the plan. Thereupon a meeting was held, and as a result the directors resolved to accept a cash offer of \$325,000 from Mr. Searles for their \$700,000 of certificates. As the company's business has up to this time been remarkably successful, Mr. Searles's transaction has turned out extremely profitable.

But what has Mr. Searles's profit or loss on his purchase to do with the purposes of this investigation? Of course the recital may excite the jealousy or envy of less fortunate individuals and so give rise to bad feeling and very incorrect conclusions. The Chairman of the Committee intimated that the facts made out a case of fictitious issue of capital. If Mr. Searles's evidence is correctly reported we cannot so understand the arrangement. The criticism we should be inclined to make about that affair is that it was a very risky venture. As the sugar refining business prospered Mr. Searles made money. A similar transaction connected with the formation of almost any other trust in recent years would have ended disastrously. If it is the business of the Committee to display before the public the fortunate side of that class of operations, why not proceed farther and give us a recital of the millions upon millions of money that have been lost in equally promising undertakings, so that the true and instructive moral can be drawn by the mass of readers. The parading of a transaction of that kind before the public as if it had a close relation to the general subject, or chief weight in determining the question whether trusts are an evil or not, may arouse cupidity and prejudice, but does not help the judgment at all.

Unfortunately it is not alone legislative committees that are engaged just now in giving currency to the idea that it is wicked to be rich, or that after a man has gotten money, it is sinful for him to use it in making more. There are among our active unselfish philanthropists and among intelligent, broad minded clergy-

men a number whose ideas are surprisingly biased or dazed on the subject of capitalists and money-making. Within a week one of the best of them, while preaching a sermon in this city, took occasion to mass rich men, trusts and the "greed of capital" in a confused way as if there was a taint inseparable from a successful merchant or banker who continued in active business accumulating wealth when he had secured what the public considered enough. We do not know what the "greed of capital" means applied in this general way. There are no doubt bad men among those who are rich. But so long as wealth is honestly acquired, its acquisition is certainly not blameworthy, and no man knows or has the right to say that it is not wisely administered.

As we look at it, too, it is better for one's less prosperous neighbor that the capitalist having accumulated enough to satisfy his wants should not go a-fishing the rest of his days, but should continue to keep his talents and his money fructifying in active industry. In that way he is helping keep the million employed.

#### PHASES OF THE EUROPEAN SITUATION.

We have frequently had occasion to notice the change, since this season a year ago, in the mutual relations of the European Powers. The fact, however, that the tone of public and private menace, the outbreak of popular hostility, has in so notable a degree subsided, does not by any means signify that diplomatic friction has wholly ceased. The conflict of angry feeling exhausted itself largely because of the very violence of the outbreak; but the collision of interests necessarily remained. In the tangled threads of European diplomacy these interests are often extremely difficult to trace. It is safe to say that on many occasions, such as the present Turkish crisis, when the public has complained that immediate action was not taken, the trained diplomatist was held back by knowledge of serious obstacles of which the people at large had no knowledge whatever.

This view of the situation has been somewhat forcibly suggested by two incidents of the past week—the development of a local crisis in the affairs of Crete, and the public rebuke of France by the Chancellor of the British Exchequer. The Cretan matter is a part of the Turkish question. Like Armenia, Crete has been a recent scene of Turkish butcheries. Last May, as a result of popular disturbances, the usual policy of massacre was adopted by the Turkish garrisons, and the policy has not yet been abandoned. Unlike the Armenians, however, the natives of the Mediterranean island have taken up arms against their oppressor with sufficient vigor to open the question who is to continue in control. Lord Salisbury achieved his diplomatic victory in the Armenian matter, and brought the European powers into union, chiefly because no transfer of territory was contemplated. The uneasiness aroused by the week's developments at Crete had its basis in the feeling that such a transfer might become inevitable. By geographical situation, by customs, history and religion, the people of the island are natural associates of the Greeks. Annexation to Greece was demanded by the Cretans in their nearly successful uprising against the Turks in 1866, and it is commonly believed that they demand such annexation now. If Greece were at present a first-class European Power, the island would undoubtedly have long ago been annexed by force. The rumor of

the present week has suggested the possibility of some such action now.

On Thursday these reports became sufficiently distinct to affect the security markets of all the European cities and indirectly to affect our own. As is usual at such times, the uneasiness was based less on definite expectations of trouble than on doubt as to what was to be expected. The outburst of the St. Petersburg press on Tuesday accusing England of participation in the Cretan trouble added to the perplexity of the public. But people are gradually learning that European newspapers are not always the safest index to official purposes, and later news indicated, as might have been expected, that the concert of European Powers would not be disturbed.

Another incident towards the close of last week served to illustrate the character of the forces thus at work below the surface. Ever since the British Government a year ago ordered its troops to move up the Nile against the dervishes, there has been intermittent expression of discontent from France. The necessity, however, of some such move for the protection of Egypt from invasion has been so plainly demonstrated that the French dissatisfaction seemed finally to have been allayed. The matter had almost escaped the public mind when Sir Michael Hicks-Beach, Chancellor of the Exchequer, bluntly accused the French Government last week Friday of unwarranted meddling with the British plans in Egypt. The Chancellor concluded a speech of considerable bitterness with the declaration that France was largely responsible for the present Egyptian situation, and that steps would shortly be taken to prevent her further meddling with Egyptian affairs and the Dongola expedition. A speech of this character, not excited by publicly known developments in the situation, created, naturally, something of a sensation. In Parliament and on the security markets signs of misgiving appeared immediately. The opposition in the House of Commons promptly objected to the attitude of the Cabinet's spokesman, Sir William Harcourt in particular, the leader of the Opposition, criticizing the Chancellor's declaration as "dangerous language of menace and defiance." The Paris newspapers, as was to be expected, retorted angrily.

Yet, when the situation is reviewed, it is not difficult to see what led up to this emphatic declaration. The friction which has caused this public rebuke is nothing new in European diplomacy. In the general movement of European States during the last ten or fifteen years to plant and maintain colonies on other continents, the French took a hand enthusiastically. They were not at all successful. They did, to be sure, acquire nominally some two million square miles of territory—half of it in the heart of the desert of Sahara—but they made little or no use of their acquisitions. The expeditions of military conquest suffered occasionally the disadvantage such as rested upon the Tonquin expedition of 1884. When they avoided such accidents as this they became mere dead-weights on the colonial department. France, in fact, never seemed to be serious in its colonial enterprises. They did not even appear to be contrived, like the colony-planting of the British Government, to create a new community of consumers for domestic trade and manufactures. The latest returns of import trade of all these colonies combined show that barely one-third the goods brought into such ports are goods of French production.

There has been no mystery about this failure to meet the tests by which a colonizing power is measured. France is notoriously unsuited for such achievement. This is so chiefly because it has no surplus home population out of which to build a tributary colony. Since 1871, while Great Britain's census has shown an increase, in the face of continuous emigration, of seven to eight millions population, or fully 20 per cent, France has increased barely two millions on a corresponding total. At the present time, indeed, the country's population is believed to be actually smaller than it was some years ago. This is not a condition favorable to colonial settlement. Five or six thousand only is France's recent average of annual emigration, and nearly all of these emigrants have gone, not to the colonies, but to the United States and the Argentine Republic. But the French themselves have been slow to recognize their own inadaptability to colonial enterprise. Of its acquisitions derived from the famous African partition of 1891 France has made virtually no use whatever; except, if the complaint of the English newspapers is to be believed, as a basis for occasional expeditions and territorial claims along the Upper Nile. These claims were never made by virtue of actual settlement, and they invaded ground which constructively belonged to Egypt. Two years ago a repetition of these annoyances invited a rebuke from an English cabinet minister before the House of Commons quite as emphatic as that of Sir Michael Hicks-Beach last week.

There is ground enough for believing that the present episode is of similar character. The right of France to protest, as in one way or another she has done, against the British occupation of Egypt, is based on the most shadowy plea imaginable. On the other hand, continued English occupation of Egypt is all that has stood during the last ten years in the way of the lapse of Egypt into anarchy or its capture by native fanatics.

It had been calculated by the British Government that the expenses of this latest expedition against the native forces up the Nile would be met from the Egyptian funds. The Chancellor of the Exchequer had assured the House of Commons that the home government would not be drawn upon for the purpose. It appears, however, that the French Government interfered, using its influence on the "mixed tribunal" which controls the Egyptian debt to reject the British Government's appeal. The answer of Sir Michael Hicks-Beach is that when the term of this tribunal expires next year by limitation, the English Ministry will take care that it is so reorganized as to prevent recurrence of such obstructive policy.

The bitter tone of the Chancellor of the Exchequer's speech was in fact the only reason why his statements should have caused misgiving. It is possible that Sir Michael emphasized the cabinet's feeling on the matter more sharply than the head of the ministry would have wished. There is, however, no reason for supposing that the speech could create any serious complication. No such declaration is ever made in Parliament until it has been thoroughly discussed in the cabinet. If the speech is any indication of the general international status of the European powers, it suggests that harmony is assured. No cabinet minister would have risked such a public declaration in the stormy days of January 1896; nor would it have been ventured now if there were any chance of imperilling the concerted action of the Powers regard-

ing Turkey. The fact that even the Paris newspapers after two or three days of wrathful outbursts, have subsided into a tone of rather submissive grumbling, is sufficient witness to the character of the situation.

### ACCOUNTING MADE A PROFESSION.

The "New York Times" of last Sunday in its financial columns had an interesting interview with President Fowler of the New York Ontario & Western bearing on the system employed by that company of having an independent audit of the accounts, and which has been a feature of its affairs for a good many years. The Ontario & Western was one of the first companies in this country to follow the English practice in this respect, and Mr. Fowler explains the methods employed in carrying out the system in the case of his road, and also descants on the merits and advantages which an audit of the accounts offers in the affairs of railway corporations generally.

The part of Mr. Fowler's remarks which has particularly arrested our attention is the closing portion, where he is moved to make the following observations: "As the independent audit plan becomes more general its value would be largely extended if the certificates of public accountants were given some proper legal recognition, or were the status of public accountants recognized, somewhat as chartered accountants are in England, their duties, privileges, and particularly their responsibilities, being clearly defined by law."

Mr. Fowler gives expression here to a thought which has no doubt occurred to many others who have studied the matter or reflected upon it. If an audit of the accounts is to be worth anything it must be conducted by persons of proved skill and ability, as also of unquestioned character and integrity. A person having only an imperfect knowledge of accounting, or no knowledge at all, and who yet undertakes to certify to the accuracy of the accounts of a corporation or an estate or an individual, must inevitably bring discredit on himself and the profession. It has hence often seemed to us that the present system, under which any one can style himself an accountant, offered quite as abundant opportunities for harm and mischief as for good. Certainly it opened the way to irregular practices fully as dangerous as the irregularities which a system of audit is intended to correct and prevent. In England this weakness has long since been overcome through the establishment of the so-called chartered accountants.

It seems to have escaped notice (except on the part of a few) that in this State also a very decided step has been taken in the same direction. At the last session of our Legislature at Albany a very important law was passed regulating the practice of accounting in New York State. While the new statute, as stated, has not yet received a great deal of attention here, strangely enough its importance is recognized at points a great way removed from New York. For instance, last November Mr. Sidney J. Haydon, a well-known accountant of Louisville, contributed a two-column article to the "Courier Journal" of that city, noting the change, and dwelling upon its significance and far-reaching effects. The new statute forms Chapter 312 of the Laws of 1896, and received executive approval in April last. Its title is "An Act to Regulate the Profession of Public Accountants," and in view of its importance we give it herewith in full.

AN ACT to Regulate the Profession of Public Accountants. (Became a law April 17, 1896, with the approval of the Governor. Passed, three-fifths being present.)

SECTION 1. Any citizen of the United States, or person who has duly declared his intention of becoming such citizen, residing or having a place for the regular transaction of business in the State, being over the age of twenty-one years and of good moral character, and who shall have received from the regents of the University a certificate of his qualifications to practice as a public expert accountant as hereinafter provided, shall be styled and known as a certified public accountant; and no other person shall assume such title, or use the abbreviation C. P. A., or any other words, letters or figures to indicate that the person using the same is such certified public accountant.

SEC. 2. The regents of the University shall make rules for the examination of persons applying for certificates under this act, and may appoint a board of three examiners for the purpose, which board shall, after the year eighteen hundred and ninety seven, be composed of certified public accountants. The regents shall charge for examination and certificate such fee as may be necessary to meet the actual expenses of such examinations, and they shall report, annually, their receipts and expenses under the provisions of this act to the State Comptroller, and pay the balance of receipts over expenditures to the State Treasurer. The regents may revoke any such certificate for sufficient cause after written notice to the holder thereof and a hearing thereon.

SEC. 3. The regents may, in their discretion, waive the examination of any person possessing the qualifications mentioned in Section 1, who shall have been, for more than one year before the passage of this act, practicing in this State on his own account, as a public accountant, and who shall apply in writing for such certificate within one year after the passage of this act.

SEC. 4. Any violation of this act shall be a misdemeanor.

SEC. 5. This act shall take effect immediately.

The provisions of this act should be very carefully pondered. It will be observed that in effect it establishes the profession of public accountants, for previously neither the science of accounting nor those who had made a specialty of it had any legal standing. The new law creates a body of persons who both legally and by their attainments may with perfect propriety be called certified public accountants. The requirements of these accountants are made quite strict. Besides being of age and of good moral character, they must have received certificates from the regents of the University of their qualifications to practice as public expert accountants. Furthermore it is distinctly provided "that no other person shall assume such title, or use the abbreviation C. P. A. or any other words, letters or figures to indicate that the person using the same is such certified public accountant." Then also any violation of the act is made a misdemeanor. The regents are required to prescribe rules for the examination of persons applying for the certificates, and may appoint a board of three examiners for the purpose, and this board after the year 1897 is to consist wholly of public accountants. Moreover, the regents may revoke any such certificate for sufficient cause after written notice to the holders thereof and a hearing thereon.

Section 3 of the act allows certain temporary deviations from the requirements laid down, with the intention evidently of bridging the period from the old conditions to the new. The regents may "waive the examination," but it is to be observed that their doing so is "in their discretion," and this discretion can only be exercised in the case of a person possessing the qualifications mentioned in the first section, and who shall have been for more than one year before the passage of the act practicing in this State on his own account as a public accountant. Finally such person must apply in writing for his certificate "within one year after the passage of this act." As the act was approved on April 17 1896, this section will apply only for a short time longer—that is, until April 17 1897.

It will thus be seen that the new law is a very important one, and that it regulates completely the

practice of accounting, so that this useful function shall be exercised only by persons perfectly qualified for the task. It raises the profession of accounting, too, to a high plane. No doubt many imagine that bookkeeping and accounting are synonymous. But that is not so, even in a restricted sense. Of course, to be an accountant presupposes a thorough acquaintance with the methods of keeping books, but that is about all the relation that exists between the two. Mr. Haydon, in the communication to the "Courier Journal," already referred to, brings out the distinction very clearly when he says: "A knowledge of bookkeeping only admits one to the threshold of the science of accounts—a science which broadens wonderfully with experience and the study of the underlying principles by which the complications of trade and finance are reduced to their simplest terms. For the true accountant seeks to free his work from the bugbear of useless technicalities, and aims to make his audit such a mirror of the essential operations and conditions of the business under analysis that it will prove clear and self-explanatory to any intelligent reader."

Obviously as far as the new law has any bearing upon the practice, which is growing among corporations, of having an independent audit of the accounts, the effect is simply to insure that where accountants are employed for the purpose they shall be thoroughly competent for the work. In that sense the usefulness of an audit is increased, but it should always be remembered that even under the best of conditions accountants' examinations are subject to certain limitations, and that such examinations by no means provide a remedy for all the ills of corporate management. But we have discussed that phase of the subject on previous occasions and need not enter upon it again to day. It is gratifying to think that through the new law the full measure of the advantages that can be got out of the system will be obtained from it.

Of course the law in question is simply a State statute, and therefore has no application outside of New York. But the event marks such an important departure and is so clearly in the interest of honesty and accurate methods that there seems little reason to doubt that now that New York has taken the lead other States will soon be compelled to follow.

#### CONCESSIONS IN RATES THROUGH THE CREATION OF OUTSIDE COMPANIES.

The full text of the decision of the Inter State Commerce Commission in the case which attracted so much attention last summer relating to the alleged practices of the Atchison, the Chicago & Great Western and others in the matter of the transportation of grain and grain products has been furnished this week. The opinion is not lengthy, but the findings of the Commission are important. The decision was arrived at two weeks ago, and a brief synopsis of it given to the press at the time; it is desirable to know, however, the process of reasoning employed by the Commission in reaching its conclusions.

The case derived its importance from the developments which occurred during the course of the investigation into the matter undertaken by the Commission. It will perhaps be remembered what a sensation was created, when President Stickney was testifying, at his frank avowal that the Chicago Great Western Railway in order to get grain tonnage for transportation over

its lines, had indirectly been engaged in the business of buying and selling grain, the agency employed for this purpose having been a company in which the Great Western had exclusive ownership. The question was whether this practice, considered in all its bearings and its ultimate effects, was legal, or whether it transgressed the provisions of the Inter-State law? It was generally expected that the Commission would decide against the road, and this view proves to have been correct.

The object of the Great Western management of course was to get business, and in the arrangement in question they obviously thought they had hit upon a plan for attaining their end without contravening the statute. In giving the details of the arrangement Commissioner Prouty, who wrote the opinion of the Commission, points out that some time previous to April 1 1896 President Stickney made an extended investigation into the condition of the grain traffic and grain rates between Kansas City and Chicago. As a result of that investigation he had satisfied himself that if one company had enough of that traffic so that it could increase the size of its cars, haul loaded cars both ways, and in general handle the grain to the best advantage, it could be done at a profit; and he had also satisfied himself that in the existing state of rates and of traffic conditions this could not be done without the adoption of some expedients other than those in use by other railroads. Accordingly, he employed a Chicago company engaged in the handling of grain and provisions and known as the Anglo-American Provision Company, to purchase grain in Kansas City, and after shipping it over the lines of the Great Western to sell it in Chicago. The amount paid the railroad for transporting the grain was the difference between the prices in the two markets. In practice the operation, however, was not as simple as here described. The difference between the prices in the two markets (after deducting the commission for purchase and sale) was passed, not to the railroad, but to the Iowa Development Company, this latter being a corporation organized for the purpose of holding certain lands belonging to the Chicago Great Western Railway Company, and whose stock was all owned by and whose management was the same as that of the Great Western. On the other hand, the Anglo American Company paid the freight on the shipment by means of a draft upon the Development Company, which the local agent, acting under instructions from the railway company, received and treated as a cash payment of the freight.

The practice began April 1 1896. Commissioner Prouty says it did not appear what the Development Company did with the funds so passed over to it for the time being, but it did appear that no settlement and payment of the freight to the railroad was made for over three months, or until July 7 1896. The practice in the case of other shippers was to exact cash payment of the freight bills, though in some instances large shippers were permitted to make weekly settlements. The amount paid over to the Development Company as the difference between the prices in the two markets averaged for the three months succeeding April 1 about 10½ cents per 100 pounds for all the grain so handled. The rate specified in the way bills upon which the grain was carried, and which, as already stated, was paid by drafts upon the Iowa Development Company,

ranged from 11 to 18 cents per 100 pounds. These latter are the rates which other shippers would have had to pay. At the time of the settlement between the Development Company and the railway, after the beginning of the complaint, the difference between the nominal rates at which the grain had been carried, that is the amount of the drafts drawn on the Development Company and the actual amount of money received from the Anglo-American Company, was about \$15,000, and the Development Company then borrowed that sum and paid the railway company that balance.

The question, as already said, was whether this arrangement was legal, or whether it was in contravention of the Inter-State law. The Commission says that the President of the railway in substance admitted, and the Commission finds as an inference of fact from the testimony independent of his admission, that the scheme was devised and entered upon by the railway, for the sole purpose of procuring grain for transportation; that the only purpose or use of the Development Company was to act at the bidding of the railway in furtherance of this plan, and that neither it nor the railway company had any bona-fide intention of dealing in the grain so bought any further than might be necessary to secure the same for transportation over the lines of the railroad. The result was that, although there were five other railway lines directly competing for this traffic between Chicago and Kansas City, many of them shorter and better equipped than the Great Western, that company carried, for the period covered by the investigation, nearly 70 per cent of all the corn moved between the two points.

The railway company, the Commission points out, admitted the facts substantially as above found, but claimed that in doing what had been done it had not violated the Inter-State law, and that therefore the Commission had no power to interfere with the practices complained of. For, first, it was contended the Iowa Development Company owned the grain and paid the same charges that any other shipper would have paid, and if it lost by the transaction, or if the railway company, indirectly through its stock ownership lost, it was no affair of the Commission; and second, assuming that the Development Company was not the owner of the grain in fact, but the railway company owned it, still the railway company might transport its own property for a less sum than that for which it transported the property of other persons.

Replying to these arguments, the Commission says: "The Commission is unable to yield its assent to these propositions. Assuming that the Development Company was an entity in these transactions, that the legal title to the grain actually stood in it, and that the nominal freight charges were actually paid by it, still it was merely a tool in the hands of the railway company and the act accomplished was the act of that company. The railway company furnished the credit by accepting drafts in payment of its freight charges; it suffered the whole loss by virtue of its ownership of the entire stock of the Development Company. It was precisely as if the railway company had said to an individual: Buy this grain; ship it by our route, pay the freights and we will make good to you whatever loss occurs in the transaction. It may not have been a special rate or rebate, but it was clearly a 'device,' by which it transported this merchandise

for a greater or less compensation than it exacted from all other persons for a like and contemporaneous service under similar circumstances and conditions."

If the transaction be treated as the transaction of the railway company, the result is the same. In that case, argues the Commission, the railway company owned the grain, transported it for itself, and received for its compensation the difference in price between what was paid and what it sold for, less the commissions. There was no fixed rate. The rate varied with each individual shipment. The rate actually received was much less than was or would have been charged any other person for the same service under the same conditions. In the estimation of the Commission, therefore, the transaction was both a violation of the 6th Section and an unjust discrimination under the 2d and 3d Sections, unless the railway company, by virtue of the fact that it owned the merchandise transported, was relieved from the operation of the Act, which the Commission holds it was not. "Granting that the railway company had the legal right under its charter to buy and sell this corn in this manner, still it must own it and transport it subject to the same limitations as every other individual. In its capacity of owner, it was a private person; in its capacity of carrier it was a public servant. If it elected to become a private individual in respect of the ownership of this grain, it could extend to itself in its capacity as a public servant no other or different privileges than it extended to every other shipper. To hold that this respondent might become a shipper on its own account for the express purpose of avoiding the Act to Regulate Commerce would be to nullify that Act in many essential respects.

But how does the present case differ from the cases of the anthracite coal companies, where the companies both own and transport the coal, and upon the legality of which practice the Commission has been obliged to pass in some previous decisions. The Commission anticipated this question, and replies to it by saying that the coal cases are in no respect similar to that under review. In the anthracite decisions, the common carrier was also the owner of extensive coal fields, and indeed it had become a common carrier largely for the purpose of transporting the product of those mines to market. But "this state of things existed before the passage of the Act, and had no reference to the Act. Unless the carrier was permitted to transport its coal, the result would be in effect the confiscation of its property, and to order it to charge itself with a particular rate would merely result in a matter of book-keeping. Under these circumstances it was held that the only remedy was to inquire whether the rate charged the complainant was a reasonable one. In the case under consideration the grain was not property which the carrier had purchased for use in or about its business, or with a view to its ownership, but was property which it had bought for the express purpose of securing the right to transport it, and thus evade the law which would have applied to its transportation had it been owned by any other party. In those cases there was a permanent condition which must be met; in this a temporary unlawful practice which should be stopped. We believe that the powers of the Commission are adequate to that end and that they should be exercised."

## RAILROAD GROSS EARNINGS IN JANUARY.

Many persons looked forward to a very decided improvement in railroad earnings with the beginning of the present calendar year. But this expectation has thus far been altogether disappointed. We have compiled our statement for the month of January, and it has to be classed with the poorest monthly exhibits we have had in the present downward movement. Out of the 129 roads which have contributed returns to our tables 92 show losses, and the falling off in the aggregate reaches over  $2\frac{1}{2}$  million dollars—\$2,543,101—or 6.78 per cent.

The causes for this unfavorable exhibit have been numerous. In the first place the revival in business has made but slow progress. Last year in January, trade, while already on the down grade, was yet of large proportions. Then again we are comparing with heavily augmented earnings in 1896, our statement then having been one of the very best in a long time; the gain amounted to \$3,732,448, or but little short of 11 per cent. Furthermore, there was one less business day in the month the present year, it having contained five Sundays, against only four Sundays in January, 1896. Then there was a large contraction in the grain movement, and also a falling off in the live stock movement. Finally, the weather conditions were adverse to the railroads in some instances. There were no general snow blockades, such as in some past years have almost closed many of the Western lines. But nevertheless, on the trans Continental lines on the extreme north operations were interfered with. This is particularly true of the Great Northern system and the Northern Pacific, where high winds drifted the snow badly and seriously interrupted operations in the middle and latter part of the month. The remark applies particularly to that portion of these lines in the Dakotas and Montana, though we understand the conditions were unfavorable along nearly the whole length of these systems, from Lake Superior to the Pacific Ocean. In Kansas, too, and some other Western States the weather proved a hindrance to some extent. Last year, in January, Western roads were unusually free from obstructions of any kind. The following enables a comparison to be made between the totals for this year and those for previous years.

	Mileage.		Earnings.		Increase or Decrease.
	Year Given.	Year Preceding.	Year Given.	Year Preceding.	
January.	Miles.	Miles.	\$	\$	
1893 (129 roads).....	93,284	91,178	39,215,791	37,319,283	Inc. 1,896,508
1894 (123 roads).....	95,951	93,993	31,129,110	30,347,900	Inc. 781,210
1895 (132 roads).....	101,651	100,739	36,971,671	36,847,302	Dec. 124,369
1896 (131 roads).....	93,879	93,293	37,696,489	33,954,011	Inc. 3,732,478
1897 (129 roads).....	95,271	91,708	31,977,629	37,620,730	Dec. 5,643,101

The falling off in the grain movement has been mainly in wheat, but it has also extended to some of the other cereals. Of wheat the receipts at the Western primary markets were only 5,807,546 bushels in the four weeks ending January 30 1897, against 10,558,325 bushels in the corresponding four weeks of January 1896. Both the winter wheat and the spring-wheat markets show losses, but the contraction has been chiefly at the spring wheat points; thus at Minneapolis the receipts were only 2,922,020 bushels against 6,524,120 bushels, and at Duluth 925,436 bushels against 1,408,359 bushels. The shrinkage in these cases is of course easily explained. It is due to the fact that in the previous year the spring-wheat crop had been of extraordinary dimen-

sions, while the late season it was of only ordinary dimensions. In corn also there was a heavy decrease, the receipts at the Western points in the four weeks this year having been less than 10 million bushels, against over  $13\frac{1}{2}$  million bushels last year. The diminution here must be ascribed to the low prices prevailing for corn. It is to be noted that Kansas farmers have fared better in this respect than those of some other Western States. This arises out of the fact that the shortage in New Mexico and Texas has created a special demand on that State. As a consequence the Kansas producer now gets 15 cents a bushel for his corn delivered at the station, while in Nebraska and Iowa the price realized is only 10 to 12 cents. The receipts of oats were larger in the aggregate, but that is due to the liberal shipments to Minneapolis and Duluth; at both Chicago and Peoria there has been a considerable falling off. In the aggregate of all kinds of grain the receipts were 29,759,306 bushels in 1897 against 37,257,732 bushels in 1896. Below we show the details of the grain movement.

At Chicago the receipts for the even month were only 12,815,817 bushels in 1897 against 18,523,425 bushels in 1896. The provisions movement also at this point was smaller, though on the other hand the receipts of live hogs were 763,904 head against 707,692 head. The live stock receipts as a whole reached only 23,337 car-loads, against 25,496 car-loads in 1896, 26,882 car-loads in 1895 and 28,005 car-loads in 1894.

In the South the cotton movement was heavier than a year ago, the receipts at the outports reaching 583,231 bales, against 494,091 bales last year; it will be observed from the table which follows, however, that the total was much below that of 1895, when the receipts were 857,075 bales. The overland shipments amounted to 127,613 bales in 1897, against 119,780 bales in 1896 and 186,173 bales in 1895.

RECEIPTS OF COTTON AT SOUTHERN PORTS IN JANUARY, 1897, 1896, 1895, 1894, 1893 AND 1892.

The losses in earnings by the individual roads have been quite large in a good many cases, the heaviest sufferers being the roads in the spring-wheat districts or those in the manufacturing sections. The New York Central has \$338,023 decrease, the St. Paul \$319,175 decrease, the Northern Pacific \$227,517 decrease, the Rock Island \$162,078 decrease, the Canadian Pacific \$161,798 decrease, the Wabash \$141,748 decrease, the Illinois Central \$104,522 decrease, etc. The large gains are few, being confined to the Mexican roads and one or two Southwestern lines.

#### PRINCIPAL CHANGES IN GROSS EARNINGS IN JANUARY.

		Total (representing 33 roads).....	\$2,582,844

\* For three weeks only.

In the Northwest, on account of the contraction in the spring-wheat movement, the losses are more general than in any other group, there being indeed only one road with an increase. The unfavorable comparisons, however, follow mainly from the fact that the gains in that section the previous year had been exceptionally heavy. Thus in the table below the total for 1897 at \$5,110,809 compares with \$5,918,638 in 1896, but with \$4,867,145 in 1895.

In the South the losses largely predominate, notwithstanding the increased cotton movement, but it should be remembered that these roads last year almost uniformly had large gains in face of a very small cotton movement. The result would seem to show that to these roads, as to others, an active condition of trade is of more consequence than a large cotton movement.

\* Figures here for 1897 and 1896 are simply the totals of the earnings for the four weeks of the month as reported in the weekly returns; the month's earnings usually exceed the weekly estimates quite considerably.

+ Including Scioto Valley & New England and Shenandoah Valley for all the years.

\* Fourth week of January not reported; taken same as last year.

+ January not reported; taken same as last year.

\* Figures are approximate, same as for this year; actual earnings were larger.

The trunk lines, as far as we have returns from them, show in most cases moderate losses. The New York Central, however, has a decrease of \$338,023, or nearly 10 per cent. On the Big Four the decrease is \$50,127, or less than 5 per cent.

#### EARNINGS OF TRUNK LINES

## Monetary &amp; Commercial English News

[From our own correspondent.]

LONDON, SATURDAY, January 30th, 1897.

The visit of Count Muravieff to Paris is the principal topic of political interest of the week, and it is naturally exciting great attention and much speculation all over Europe. It is a most unusual thing for a foreign minister to visit any government before he has actually taken charge of the Foreign Office, and therefore it is assumed that there must be some important political object in view. There are some, however, who allege that it is nothing more than an attempt to soothe down French susceptibilities caused by the failure of French representations to the Czar while he was in Paris. It is said that he then promised to insist upon a Russian representative being admitted to the Council of the Turkish Debt, and that shortly afterwards his ministers pointed out to him that that would lead to an international control in Turkey, and then he withdrew. It is also said that the French Government remonstrated with him about his currency reform, and naturally the Russian Finance Minister was indignant at the interference. Whatever may be the true explanation, it shows that Russia is fully aware how much she is dependent upon French money to maintain her position, and is leaving nothing undone to flatter French amour propre.

Mr. Rhodes arrived here on Sunday, and the inquiry into the Chartered Company's affairs is to begin almost without delay. Mr. Rhodes has been very quietly received, but he is

very confident that he will come successfully out of the investigation, and in fact there has, this week, been more business in the South African mining market and at higher prices than for the last five or six months. For what reasons it is not possible for outsiders to say, but unquestionably the belief is spreading that just as opinion in South Africa has turned round in Mr. Rhodes's favor, so it will be found that the evidence rendered will all redound to Mr. Rhodes's credit.

Meantime the negotiations at Constantinople go on, and the conviction is growing that a settlement will be arrived at. One reason, perhaps, for the belief is that French investors are estimated to hold between 70 or 80 millions sterling of Turkish, Bulgarian and Servian securities; that the French have suffered severely from the depreciation of these securities, and that the French Government has made such representations to the Russian Government that the latter feels it necessary to rehabilitate Turkish finances, for the time being at all events.

There was some vague expectation throughout the city that the Directors of the Bank of England at their meeting this week would put down their rate of interest to 3 per cent, but very properly the Directors did not do so. It is possible, however, that they may do so next Thursday, or, at all events, early next month.

In the silver market there is very little doing, but there has grown up a sudden and a strong demand for the India Council drafts. The Council sold on Wednesday the whole 50 lacs offered for tender at good prices, and it has since sold more by special contract. Evidently the exchange banks have now exhausted the means of remittance which they had laid in largely before hand. The news from Bombay is more favorable. It is said that the mortality is decreasing, and that the people are recovering courage, but the famine prospects are very bad.

Trade continues steadily to improve. There is no speculation worth speaking of; there is no sensational incident of any kind, but every industry almost is well employed. The iron and steel trades are perhaps the most prosperous, but even the cotton trade is not bad in spite of the Indian famine, while there is a recovery in the woolen trade. The great depression in the United States last year stopped American buying at the Colonial wool sales in the spring. For the first time since then there is again very active American buying and all wools suited to American requirements are quite as dear as at the December sales, and rather dearer. On the other hand the commoner kinds of wools are decidedly lower, because France, which is the largest buyer usually of inferior wools, is for the time being holding off, and Germany is not buying very much. Here at home there is a very good demand for wool and the woolen industry is very actively employed.

The stock markets were somewhat disappointed on Thursday morning because the Bank rate was not put down, but they quickly recovered, and generally they have been better this week. The most remarkable improvement has been in South African shares. As said above, there is an unaccountable belief growing that Mr. Rhodes will come out triumphant from the inquiry, and whether it is to that, or to better crushings, or to the mere weariness of waiting any longer, that the change is due, there has been buying on an extraordinary scale. In some instances five and ten thousand shares have been bought in a lot, and prices have all gone up. Consols, British railway stocks, and in short all good securities are well maintained; and although the public is not doing much, there has been more business in American securities likewise. The chief demand, of course, is for good bonds. There is some inquiry for second rate bonds, but the shares, except for market operators, are out of request.

The railway dividends continue good, and everything goes to show that the country has rarely, if ever, been more prosperous. Taking the dividends issued so far and the bank dividends, both for the second half of last year, it is evident that the railways and banks alike have done better than in any year since 1890. The satisfactory showing of the railways clearly proves that the trade of the country was both large and prosperous. The work-people are well employed, and there is hardly a complaint of scarcity of employment. We have just had a week of exceptionally cold weather, and snow continued for two or three days; yet there has been surprisingly little complaint of distress anywhere.

The following return shows the position of the Bank of England, the Bank rate of discount, the price of consols, &c., compared with the last three years:

	1897 Jan. 27.	1896 Jan. 29.	1895. Jan. 30.	1894. Jan. 31.

Messrs. Pixley & Abell write as follows under date of January 28:

Gold—Transactions have taken place both for export to the East and to Russia during the week, and all arrivals have been easily disposed of. £29,000 has been received at the Bank from China. Arrivals: South Africa, £297,000; West Indies, £221,000; New York, £15,000; total, £133,000. Shipments: Bombay, £5,000; Kobe, £138,200; total, £143,200.

Silver—Chiefly owing to scarcity of spot supplies, the market has hardened, since we last wrote and remains steady at the rise. The Indian price to-day is Rs. 80 1/2 per 100 Tola. Arrivals: New York, £204,000; West Indies, £12,000; total, £216,000. Shipments: Bombay, £80,900.

Mexican Dollars—Business in this coin has taken place at 29 1/4d. during the past week, and this remains the nearest price. Shipments to Penang, £11,500.

The quotations for bullion are reported as follows:

## SILVER QUOTATIONS FROM 1833 TO 1896.

So much interest attaches to the prices of silver during past years that we give below the highest, lowest and average quotations of Messrs. Puxley & Abell of London each month of each year, from 1833 to 1896, both inclusive, and also the average price for each of these years. The highest quotation during the year just closed was 81 9 16d. on February 24, the lowest price touched was 29 1/4d. on October 13, and the average for the year was 30 3/4d., against 29 3/4d. in 1895.

A TABLE SHOWING THE MONTHLY FLUCTUATIONS IN LONDON IN THE PRICE OF BAR SILVER, PER OUNCE STANDARD, FROM JANUARY, 1833, TO DECEMBER, 1896, INCLUSIVE.

—Mr. Frederick T. Ackermann, of Meissner, Ackermann & Co., has opened an office at 23 Beaver Street, where he will deal in miscellaneous investment securities, making a specialty of Standard Oil Trust, Natural Gas Trust and North-western Ohio Natural Gas Co. stocks and Atlantic Mutual Insurance Co. scrip.

—Details of an offering of New York Brooklyn & Manhattan Beach consolidated mortgage five per cent gold

bonds by Messrs. Redmond, Kerr & Co. will be found in our advertising department. This road forms a belt line around and through the city of Brooklyn, and is leased for ninety-nine years to the Long Island R.R. Co. at a guaranteed rental sufficient to pay the interest on the bonds and five per cent dividends on the preferred stock. A special circular containing a map of the road and other facts relating to the bonds will be furnished on request.

WALL STREET, THURSDAY, FEB. 11, 1897-5 P. M.

**The Money Market and Financial Situation.**—Legitimate business in Wall Street this week has been confined largely to the bond market. A considerable proportion of the trading is done over the counter and therefore does not appear in the Stock Exchange records. It is reported in some quarters that the inquiry for high-grade investment securities is increasing rather than diminishing. However that may be there is no surplus of such securities in the market, notwithstanding the large amount of State and municipal issues which have been put out during the past three months.

The speculative element in the Street has been interested in the legislative inquiry into the management of the so-called Trusts, and made it the occasion for a successful bear movement on several of the industrial stocks.

Other than the two features above mentioned, the markets have been largely devoid of interest, including the foreign exchange and money markets.

There is reported to be an increase in the movement of coarse grains into Chicago, and the earnings of some of the granger roads make a favorable comparison with earnings for the corresponding period last year. There are, moreover, hopeful signs of renewed activity in other directions. Prominent among these is the sale of the accumulation of print cloths, which takes it out of the market, and the placing of large orders for locomotives and for steel rails, which is of recent date. It is stated that the breaking up of the steel rail combination and the decline in price which has followed have resulted in a large increase in the demand for rails.

The open market rates for call loans during the week on stock and bond collaterals have ranged from 1½ to 2 per cent. To-day's rates on call were 1½ to 1¾ per cent. Prime commercial paper is quoted at 3 to 4 per cent.

The Bank of England weekly statement on Thursday showed an increase in bullion of £395,795, and the percentage of reserve to liabilities was 53.42, against 52.45 last week; the discount rate remains unchanged at 3 per cent. The Bank of France shows an increase of 1,035,000 francs in gold and a decrease of 975,000 francs in silver.

The New York City Clearing-House banks in their statement of Feb. 6 showed a decrease in the reserve held of \$3,200,700 and a surplus over the required reserve of \$54,540,050, against \$59,148,250 the previous week.

	1897. Feb. 6.	Difference from prev. week.	1896 Feb. 8.	1895 Feb. 9.
Capital	59,772,700		61,122,700	61,622,700
Surplus	74,888,100		73,017,100	72,028,200
Loans & discounts	497,513,600	Inc. 8,747,900	448,431,800	481,586,600

Legal tenders	117,221,000	Dec. 3,075,000	85,874,500	85,191,000
Reserve held	186,760,500	Dec. 3,200,700	103,375,400	167,454,900
Legal reserve	142,240,450	Inc. 1,407,600	123,192,975	133,088,675
Surplus reserve	\$54,540,050	Dec. 4,608,200	40,182,425	33,766,225

**Foreign Exchange.**—The market for foreign exchange has been dull and featureless, with quotations practically unchanged.

To-day's actual rates of exchange were as follows: Bankers sixty days' sterling, 48½@48½; demand, 48½@48½; cables, 48½@48½.

Posted rates of leading bankers follow:

February 11.	Sixty Days.	Demand.
Prime bankers' sterling bills on London	4 85½	4 87½
Prime commercial	4 84½@4 84½	
Documentary commercial	4 83½@4 84	
Paris bankers' (francs)	5 19½@ 181½	5 17½@ 171½
Amsterdam (guilders) bankers	401½@40½	40¼@40¼
Frankfort or Bremen (reichsmark) bankers	95 @95½	95½@95½

The following were the rates of domestic exchange on New York at the under-mentioned cities to-day: Savannah, buying 1-16 discount, selling par; Charleston, buying 1-16 discount, selling 1-16 premium; New Orleans, bank, \$1 00 premium; commercial, 25c. per \$1,000 discount; Chicago, 50c. per \$1,000 discount; St. Louis, par@25c. per \$1,000 premium.

**United States Bonds.**—Sales of Government bonds at the Board include \$205,000 4s, coup., 1925, at 123¼ to 123½; \$28,500 4s, coup., 1907, at 113¾ to 113; \$110,000 4s, reg., 1907, at 111½ to 111¾; \$20,000 4s, reg., 1925, at 123¼ to 123½; and \$15,000 5s, coup., at 113¾. The following are the closing quotations:

Fine gold bars.....par @ ¼ prem.	U. S. trade dollars — 65 @ — 75

**State and Railroad Bonds.**—No sales of State bonds have been reported at the Board during the week.

Notwithstanding the dullness which prevails in other departments the market for railway bonds is active and generally strong. All high-grade offerings are readily absorbed without supplying the demand.

In many cases the activity of issues not regarded as the best is accompanied with a substantial advance in prices, including Erie 4s, New York Ontario & Western, Ches. & Ohio 5s, Oregon Short Line & Utah Northern, San Antonio & Aransas Pass, Brooklyn Rapid Transit and American Spirits. There has been a further decline in Hooking Valley 5s, and some weakness is noticeable in Kansas Pacific, Reading 1st preferred and Southern Railway 5s. The active list includes also Atchison, Northern Pacific, Chicago & Northern Pacific, Missouri Kansas & Texas, Reading, Texas & Pacific, Burlington & Quincy, Rock Island, Ohio Southern, Milwaukee & St. Paul, St. Louis & San Francisco, Union Pacific and West Shore bonds.

**Railroad and Miscellaneous Stocks.**—In the stock market the miscellaneous list has been most conspicuous. Attention has been called to American Sugar Refining, American Tobacco, United States Rubber and United States Leather, on account of the investigation of Trusts which was begun by the Senate Committee appointed for that purpose, and efforts to depress the market for these shares have been successful. On Wednesday U. S. Rubber preferred had lost 7 points, Am. Tobacco 4 points and Am. Sugar 3 points within the week. About the only strength to be found in the group was in American Spirits, which, in sympathy with the bonds, made some advance.

The principal feature of the railway list is heaviness in the anthracite coal stocks and a decline, averaging over a point for the leading shares. This decline is based in part on rumors that there has been inside liquidation of Lackawanna, and further on the unfavorable results of operations during the year 1896. The grangers have been relatively strong on the heavy grain movement now in progress and favorable prospects for the future, until to-day, when in sympathy with the general weakness of the market they fractionally declined.

## NEW YORK STOCK EXCHANGE—ACTIVE STOCKS for week ending FEB. 12, and since JAN. 1, 1897.

# Investment AND Railroad Intelligence.

## RAILROAD EARNINGS.

The following table shows the gross earnings of every STEAM railroad from which regular weekly or monthly returns can be obtained. The first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the period from January 1 to and including such latest week or month.

The returns of the street railways are brought together separately on a subsequent page.

ROADS.	Latest Gross Earnings.				Jan. 1 to Latest Date.

**Net Earnings Monthly to Latest Dates.**—The table following shows the net earnings of STEAM railroads reported this week. A full detailed statement, including all roads from which monthly returns can be obtained is given once a month in these columns, and the latest statement of this kind will be found in the CHRONICLE of January 23, 1897. The next will appear in the issue of February 20, 1897.

Roads.	Gross Earnings.		Net Earnings.

#### STREET RAILWAYS AND TRACTION COMPANIES.

The following table shows the gross earnings for the latest period of all STREET railways from which we are able to obtain weekly or monthly returns. The arrangement of the table is the same as that for the steam roads—that is, the first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for

the calendar year from January 1 to and including such latest week or month.

## STREET RAILWAYS AND TRACTION COMPANIES.

\* Figures were exceptional in 1895 on account of Atlanta Exposition.  
† Large business in Dec., 1895, due to boycott on competing lines.  
‡ Decrease in earnings due to factories being shut down.

**Street Railway Net Earnings.**—The following table gives the returns of STREET railway gross and net earnings received this week. In reporting these net earnings for the street railways, we adopt the same plan as that for the steam roads—that is, we print each week all the returns received that week, but once a month (on the third or the fourth Saturday) we bring together all the roads furnishing returns, and the latest statement of this kind will be found in the CHRONICLE of January 23, 1897. The next will appear in the issue of February 20, 1897.

## Alabama Great Southern Railway Company, Limited.

(Report for the year ending June 30, 1896.)

The report of the American Company (Alabama Great Southern R.R.) was given in the CHRONICLE of Oct. 17, 1896, pages 699-701. The report of the English Company, which owns all the capital stock of the American Company, says:

The net revenue account of the American Company shows a balance brought forward from last year of \$23,902, from which has been deducted \$15,003, the estimated cost of replacing certain equipment requiring renewal prior to the 1st of July, 1896, leaving \$8,899. To this must be added the balance of revenue account for the year ended June 30, 1896, interest and income from investment in the Belt Railway of Chattanooga, amounting together to \$104,278, making a total of \$113,177. From this has to be deducted interest on bonds and debentures and other charges, making together \$61,090 17s. 11d., leaving a balance of \$52,086. The directors recommend the payment of a dividend of 23 per cent (six shillings per share) on the "A" Preference Shares. This will absorb \$19,606, leaving \$32,480 to be carried forward.

The balance sheet of the English Company on June 30th, 1896, showed:

Liabilities.		Assets.	
Shares Issued (see S.T.P.P.).....	\$2,212,070	Shares of American Co. own'd.....	\$7,241,450; prof., \$3,380,350. £2,241,900
Debitures (incl. interest).....	137,015	Debitures Amer. Co. held.....	137,015
Creditors.....	1,275	Amer. Co. 1st mort. bonds.....	208
Unclaimed dividends.....	996	Cash.....	8,858
American Co.—General acct. For purchase of shares (S.T.P.P.).....	6,823	Other fittings.....	140
Tex. Pac. Ry. Co., held on joint account.....	200,000	Tex. Pac. Ry. Co. cost.....	200,000
Revenue account.....	10,000	Amer. Co. dividend on pref. shares.....	19,606
Total.....	\$2,007,785	Total.....	\$2,007,785

NOTE.—To represent funded arrears of dividend on 65,518 preference shares there were issued 1 per cent certificates, redeemable out of surplus earnings:—Original amount, \$81,935; 35 per cent redeemed in 1890 and 1891, \$28,677—\$53,258.—V. 63, p. 699.

## Alabama New Orleans Texas &amp; Pacific Junction Railways Company, Limited.

(Report for the year ended 31st December, 1896.)

Secretary R. V. Tomlinson in the report says in part:

After providing for general expenses, a balance of \$84,981 is carried to the credit of net revenue, to which must be added \$62 brought forward from the year 1895, making a total available of \$65,043 2s. 6d. The interest for the year on the "A" debentures and income tax absorbed \$37,622, leaving \$27,421, out of which the directors have declared a payment, on the 8th February, 1897, of £2 10s. per cent (£25,336) in respect of interest on the "B" (income) debentures, leaving \$2,085 to be carried forward.

The reports of the several companies in which this English company is interested have already been published in the CHRONICLE (see v. 63, pp. 555, 649, 650), and their latest earnings are given from month to month in our earnings department. The present report adds:

The directors are pleased to note that during the fiscal year ended the 30th of June, 1896, the earnings of the New Orleans & North Eastern Company were only about \$11,000 less than the full interest on its first mortgage bonds. In the closing months of the year 1896, however, the earnings, both from passengers and freight, somewhat fell off, owing, it may be assumed, to the general depression in business. The work of ballasting the line has proceeded steadily throughout the year, and nearly 110 miles are now completed. New steel rails, weighing 75 lbs. per yard have been laid on about 10 miles of road

and these improvements will continue to be made as vigorously as circumstances permit.

The Alabama & Vicksburg Company paid a dividend of 3 per cent on its common stock in 1896, and there has been an increase in receipts both from passengers and freight, owing to the higher prices realized for cotton, which was shipped earlier than in the previous year.

The Cincinnati New Orleans & Texas Pacific Company remains in the hands of a receiver, and a proposition for purchase of the railway (by representatives of the new Southern Ry. Co. and of the Cincinnati Hamilton & Dayton RR. Co.) has been rejected by popular vote of the City of Cincinnati, to which the matter had to be referred. After payment of rental and cost of improvements to the property for the year ended the 30th June, 1896, there was a deficit of \$21,000. The earnings have fallen off considerably, while on the other hand the rental payable to the city as from the 12th October last has increased to \$90,000, the annual amount being \$1,000,000 for five years from that date, against \$1,000,000, the previous amount. The position of this company is anything but satisfactory.

**Securities Owned.**—The securities owned are:

	—New Or. & N. E.— Owned.	—Ala. & Vicksb.— Owned.	—Vicks, Shreve & Pac.— Owned.
Stock	\$1,321,000	\$5,000,000	\$1,591,000
Prior lien do.	None.	1,472,000	None.
1st M. do.	1,000,000	8,000,000	3,000,000
2d M. do.	None.	267,700	600,000
3d M. do.	None.	None.	1,561,000
Income.	None.	None.	491,800

Also owns Cincinnati New Orleans & Texas Pacific (Cincinnati Southern) Railway \$532,000 stock, out of \$3,000,000; the company property at New Orleans and land near New Orleans and cross-tie works.

**Income Statement.**—The following statement has been compiled for the CHRONICLE as follows:

	1896.	1895.	1894.	1893.
New Orleans & Nor. East. RR.	\$215,559	\$315,519	\$232,271	\$231,885

General expenses	3,590	3,435	3,634	3,657
Income tax	1,428	1,475	1,753	1,594
Interest on A debentures	36,194	36,194	36,253	36,417
Interest on B debentures	25,336	10,134	8,807	—
Balance (including surplus previous year).	\$1,085	\$62	\$341	\$554

**Earnings.**—The earnings of the several properties in which the company is interested have been as below:

	1896.	1895.	1894.	1893.
Year ending June 30				
N. O. & North Eastern, gross	1,419,720	1,222,760	1,293,069	1,419,962
Net earnings	368,971	240,223	228,941	229,004
Alabama & Vicksburg, gross	575,072	555,676	565,780	584,298
Net earnings	160,958	129,971	129,447	105,833
Vicks, Shreve & Pac. gross.	558,411	580,113	550,217	561,924
Net earnings	151,843	115,513	124,534	122,359
Cib. N. O. & Tex. Pac., gross	3,685,865	3,447,941	3,576,979	4,174,969
Net earnings	1,039,992	976,767	911,764	988,945
Loss after paying rental, &c.	21,119	68,110	172,541	117,573

**Balance Sheet.**—The balance sheet on Dec. 31, 1896, showed:

	1896.	1895.	1894.	1893.
Preferred "A" shares fully paid	\$21,500,000			
Debitures	\$2,607,893			
Accrued interest on "A" debentures	6,241			
undry outstanding accounts	3,270			
Net revenue account.	27,421			
Total	\$24,144,831			
Capital expenditure account.			\$23,690,031	
Revenue to Sept. 30, 1890.				417,882
Outstanding account.				1,230
Cash				35,708
Total				\$24,144,830

There are also outstanding \$250,000 deferred "B" shares, issued as fully paid under agreement of 23d June, 1891, as also certificates representing \$25,491 in all, issued in part payment of four coupons of first debentures, which became due in 1895, 1896 and 1897. To secure these certificates second debentures were delivered to trustees, who exchanged the same for \$231,192 10s. (nominal) of "C" debentures, which they now hold.

**NOTE.**—The unpaid interest due from the New Orleans & North Eastern (of which a portion is to be funded), and from the Vicksburg Shreveport & Pacific companies, amounts to \$259,923 14s. 6d.

### Philadelphia & Erie Railroad.

(Report for the year ending Dec. 31, 1896.)

The earnings, expenses and charges were as follows:

	1896.	1895.	1894.	1893.
Av. rate per ton per mile.	0.391 cts.	0.399 cts.	0.418 cts.	0.414 cts.
Av. rate per pass. p. mile	—	2.374 cts.	2.399 cts.	2.402 cts.
Earnings—				
Passengers	000,959	614,197	594,581	678,363
Freight	3,765,352	3,611,291	3,240,061	4,297,301
Mail, express, etc.	146,260	153,086	126,550	129,216
Total	4,512,511	4,378,574	3,965,196	5,104,880
Expenses (incl. all taxes)	3,281,060	3,197,335	2,969,575	3,577,150
Net earnings	1,231,451	1,181,236	995,621	1,527,130

#### INCOME ACCOUNT.

	1896.	1895.	1894.	1893.
Receipts—				
Net earnings	1,231,451	1,181,236	995,621	1,527,130
Other receipts	545	704	24,799	19,353
Total income	1,231,996	1,181,940	1,020,411	1,546,483
Disbursements—				
Interest on debt	1,017,470	1,047,470	1,047,170	1,012,170
Interest on special stock	—	—	—	108,000
Interest on equipment	114,411	106,978	110,124	120,827
Miscellaneous	67,151	22,605	8,000	8,600
Total disbursements	1,241,431	1,177,313	1,165,294	1,349,597
Balance	\$90,565	\$104,627	\$155,117	\$206,886

In March 1894, paid a 2 per cent dividend. The balance to credit of profit and loss account Dec. 31, 1896, was \$684,786.—V. 62, p. 316.

### Chicago Peoria & St. Louis Railroad.

(Statement for year ending Dec. 31, 1896.)

The full income account for the late calendar year is now furnished as follows:

Gross earnings	\$897,940	Taxes and rentals	\$72,703
Operating expenses	625,184	Interest on 1st d.	97,550
		Interest on loan	43,030
Net earnings	\$272,756		\$218,253
Balance surplus for year			\$54,508
—V. 64, p. 284.			

### Huntingdon & Broad Top Mountain Railroad & Coal Co.

(Report for the year ending Dec. 31, 1896.)

President Spencer M. Janney, in the company's forty-fourth annual report, says in part:

**General Results.**—There were moved in 1896 a total tonnage of 2,614,417 tons, compared with 2,899,066 tons in 1895, coal furnishing 2,169,633 tons, against 2,413,890 tons in 1895.

The loss in the coal tonnage for the year is therefore 244,184 tons, which, considering the demoralized condition of the coal trade and the general depression among the industries which are the largest consumers of coal, is not to be wondered at. Notwithstanding its reduced earnings, your company ends the fiscal year practically free from floating debt and with its line in good physical condition.

**Car Trusts.**—To fund all the outstanding car trust certificates a new consolidated car trust was created for \$630,000, the original amount of the old outstanding car trusts being \$1,153,000. This new trust of \$630,000 included \$100,000 as a special fund for the purpose of equipping such of the coal cars as had not already been so equipped with air brakes and automatic couplers, and for other purposes of the trust, thus bringing the cars so equipped up to the latest standard of efficiency and safety in accordance with an Inter-State Commerce Act on the subject.

**Dividends.**—Dividends for the year of 7 per cent on the preferred stock and 3 per cent on the common stock have been declared. While about 4 per cent had been earned on the common stock, yet the management, in accordance with its continued conservative policy, deemed it best to declare the dividends as stated.

**Maintenance, Etc.**—General Manager George F. Gage says the improvements and maintenance of roadway charged to roadway expenses aggregate \$46,753. The roadbed, track, trestle work and bridges are in good condition. There have been laid during the year 199 1580-2240 tons of new 70 and 85-pound steel rails and 23,403 new cross-ties have been put in. The new work (account construction and equipment) of the year aggregates \$1,237.

**Earnings, Etc.**—Results for four years have been as follows:

	1896.	1895.	1894.	1893.
Receipts and Expenses				
Total earnings	\$583,362	\$418,004	\$581,750	\$706,791
Expenses	284,150	295,983	287,939	334,198
Net earnings	299,212	85,021	313,811	372,603
Deduct—				
Interest on bonds	106,190	110,650	117,635	117,568
Dividends	131,151	200,872	207,678	203,142
Total	287,341	311,522	325,313	325,710
Balance	\$11,871 sur.	\$40,493 def.	\$11,502 sur.	\$46,993

#### BALANCE SHEET DEC. 31, 1896.

### Baltimore Traction Company.

(Report for Year ending Dec. 31, 1896.)

President Wm. A. House has favored the CHRONICLE with a type-written copy of his report to the stockholders. The report which contains the earnings published last week, says:

As is well known, the year 1896 was not a very prosperous one, owing to the financial stringency and the great depression which existed to nearly all branches of business. Considering these disadvantageous conditions, it is most gratifying to be able to state that the gross earnings of your company increased \$90,323, or 7½ per cent, compared with 1895, and the net surplus for the year, over all fixed charges and taxes amounts to \$177,875; an increase of \$51,483, or 41 per cent.

**Convertible Bonds—No Floating Debt.**—On Dec. 31, 1895, there existed a floating debt of \$278,785, incurred during that year for the construction of additional mileage and the purchase of new equipment. To liquidate this debt and to provide funds for the double tracking of suburban roads, the changing of the Druid Hill Avenue line from cable to electricity, for additional new equipment to accommodate the rapidly increasing traffic, and the construction of the Shore Line Railway, your company issued \$300,000 convertible 4 per cent gold bonds, as authorized April 30, 1895. With the proceeds of these bonds all of the outstanding obligations of the company have been retired, all the new work and equipment have been paid for, and the company is now without any floating debt.

**Extensions and Improvements.**—The Shore Line Electric Railway was

put in operation May 24, 1896, and has proved a most valuable acquisition, its earnings having contributed largely to the revenue of your company. Extensive improvements were made during the year at Gwynn Oak Park, and we propose maintaining this beautiful park of seventy-five acres at its present high standard of excellence.

The Drail Hill Avenue line was put in operation as a trolley line October 4, 1896, effecting a large decrease in operating expenses. *Dividend, Etc.*—In December 17, 1896, a dividend of 14 per cent on the capital stock of the company was declared, and the same was paid on January 15, 1897. The declaration of this dividend was agreed upon with confident expectation that your company is now established upon a permanent dividend-paying basis. The high standard of the physical condition of the property has been maintained. The rolling stock is in excellent condition, and every car available for service.

*Election.*—The number of votes cast by the President, by proxies, was 157,863, and by stockholders present 11,823, making a total of 169,686. The following directors were re-elected: Wm. T. Dixon, Christian Davies, Sidney F. Fyler, James S. Hagerty, Chas. Adler, Theo. F. Wilcox, H. A. Parr, T. Edward Hambleton and William A. House.—V. 64, p. 235.

#### Edison Electric Illuminating Company of New York.

(Report for the year ending Dec. 31, 1896.)

On another page the remarks of the President, Mr. Spencer Trask, from the report for the year will be found in full, together with the income account and balance sheet in detail.

*Balance Sheet.*—A comparative statement of the balance sheets on Dec. 31 of each of the last three years has been compiled for the CHRONICLE as follows:

#### CONDENSED BALANCE SHEET DECEMBER 31.

	1896.	1895.	1894.
<i>Dr.</i>			
License under Edison patents.....	3,159,000	3,157,070	3,020,000

—V. 64, p. 231.

#### American Straw Board.

(Report for year ending December 31, 1896.)

*Annual Meeting.*—The facts regarding the annual meeting are reported by the "Chicago Times Herald" as follows:

*General Results.*—Vice-President Newcomb made an oral statement, saying in part:

"Our trade, such as we have, is quite satisfactory, but we are not doing enough of it to make money. At the beginning of the year 1896 there were in the hands of consumers about 30,000 tons of strawboard product in excess of the normal amount. Owing to the very low prices resulting from the severe competition previous to the inauguration of the trade agreement consumers stocked up unusually heavy. This surplus stock has now been practically exhausted, and as a matter of fact our business for the month of January, 1897, is largely in excess of the corresponding month last year.

"I am certain that if we could have an ordinarily good year, and there is indeed considerable prospect of such, our company could not only pay off its floating debt, but pay a dividend before the end of the year. If we could, for instance, have the output we did in 1895 or 1894, we should make money fast under the present arrangement."

*New President.*—Samuel Thomas resigned the position of President and Crawford W. Fairbanks succeeded him.

The officers and directors are as follows: President, Crawford W. Fairbanks; First Vice-President, R. F. Newcomb; Second Vice-President, J. H. Swinerton; Treasurer, W. P. Orr; Secretary and Assistant Treasurer, E. M. Watkins. Directors.—Samuel Thomas, R. F. Newcomb, W. P. Orr, Crawford Fairbanks, T. H. Conderman, George L. Webb, E. A. Blodgett and C. H. Castle.

*Earnings.*—The earnings for five years have been:

	1896.	1895.	1894.	1893.	1892.
Gross income.....	\$2,278,390	\$2,575,000	\$2,199,000	.....	.....
Profits.....	113,292	93,452	52,840	\$342,176	\$725,201
On stock, p. ct.....	1'88	1'55	'87	5'7	12'1

*Balance Sheet.*—The balance sheet on Jan. 1 was:

	1897.	1896.	1895.
<i>Assets—</i>			
Plants and patents.....	\$6,411,621	\$6,407,895	\$6,404,747

—V. 64, p. 179.

#### Illinois Steel.

(Report for the year ending December 31, 1896.)

The annual report has not come to hand, but the details as reported by press dispatches are as given below: President Gates says the year has been very unsatisfactory. In April there were orders on the books for over 500,000 tons of the product. The Chicago Convention put customers where they could not take and pay for goods. Orders are now on the books sufficient to absorb practically all the inventory of material and greatly reduce by August long standing obligations.

On Dec. 31, 1896, material and supplies on hand, cash, bills and accounts receivable and railroad stocks and bonds, as shown by the balance sheet, were \$11,808,367; less bills and accounts payable and interest accrued, \$5,773,391, leaving \$6,034,976, to which should be added the securities owned not included in railroad stocks and bonds \$3,121,712. Total convertible assets in addition to plant, \$9,156,598.

Directors H. H. Porter and J. C. Morse retired, and Cornelius C. Cuyler, of New York, and Isaac Elwood, of Illinois, took their places. Secretary and Treasurer Gray retired. The officers elected are as follows:

President, John W. Gates; First Vice-President, Charles H. Foote; Second Vice-President, W. P. Palmer; Secretary, W. A. Green; Treasurer, W. H. Thompson; Directors—Nathaniel Thayer, Francis Bartlett and Francis L. Higginson, Boston; Morgan Roteb, New Bedford, Mass.; A. J. Forbes Leth, London, England; Marshall Field, Norman Williams and W. L. Brown, Chicago; Isaac Elwood, De Kalb, Ill.; Cornelius C. Cuyler, New York, and John W. Gates. Executive Committee—W. L. Brown, Nathaniel Thayer, Marshall Field, John W. Gates and A. J. Forbes Leth. Finance Committee—W. L. Brown, Nathaniel Thayer, A. J. Forbes Leth and J. W. Gates.

Operations for three years past have been:

	Pig iron and spiegeleisen made.	Raw material received.	Finished product shipped.	Wages and salaries pd.
<i>Year.</i>				
1896.....	946,907 tons	3,571,984 tons	773,673 tons	\$8,724,631
1895.....	1,000,000 "	4,355,263 "	875,699 "	6,533,798
1894.....	.....	2,339,370 "	563,446 "	3,071,385

The profit and loss surplus amounting Dec. 31, 1895, to \$914,401, has been changed during the year into a deficit of \$349,399, a total decrease of \$1,263,800. For 1895, after meeting \$660,000 bond interest, there was a surplus from the year's operations of \$1,233,266 against \$30,607 for the year 1894.

	1896.	1895.	1894.

#### Trenton Potteries Company.

(Report for the year ending Dec. 31, 1896.)

President D. K. Bayne says: The net result (after charging \$35,021 to profit and loss for maintenance of property) is a profit on the operations of the year of \$3,532. The organization of the business has never been more effective and satisfactory than now, and only extreme and unprecedentedly low prices stand in the way of prosperity, and it is hoped that tariff legislation will largely correct this during the coming year. The financial conditions of your company still remain favorable, not having to borrow any money or discount any bills receivable and paying cash for all supplies, enabling us to buy at the most favorable rates. Your company has no debt except current accounts, which are paid weekly as presented, \$14,577 91. The detailed statement for 1896 will be submitted at the annual meeting in June next.

#### MEMORANDUM OF QUICK ASSETS IN DECEMBER.

	1896.	1895.	1891.
Cash.....	\$53,418	—	\$101,091

<b>Total.....</b>	<b>\$463,355</b>	<b>\$465,301</b>	<b>\$457,401</b>

—V. 62, p. 317.

#### American District Telegraph Company of New York.

(Report for the year ending Dec. 31, 1896.)

President Thomas T. Eckert in the report says:

The report shows a continuation of the business depression which had already been felt for the previous three years. In the report for 1895 it was noted that the old tariff rates had recently been resumed, making a reduction of 25 per cent in the rates for messenger service, but this has already been partially recovered by an increase in the volume of business, showing a loss of earnings of the messenger depart-

ment of only about 9 per cent for the year, while there is an increase of 10 per cent in the service performed on messenger calls. The cost of construction and maintenance of lines, rentals of subways, etc., has increased 8 per cent. Taking into consideration the continued great depression in all branches of business, the results shown for 1896 are not discouraging. Our facilities are maintained in excellent order, so that we can easily profit by increased business without material increase in cost. [The securities owned and the amount of stock outstanding remain the same as last year, see V. 62, p. 230.—Ed.]

**Earnings, Etc.**—The earnings, etc., have been compiled for the CHRONICLE as follows:

	1896.	1895.	1894.
Gross receipts.....	\$148,940	\$354,957	\$552,093
Operating expenses.....	498,954	474,322	441,951
Net earnings.....	\$57,182	\$80,635	\$88,141
Dividends.....	(1%) 38,441	(3%) 115,323	(1%) 31,140
Balance.....	\$18,741	def. \$31,848	sur. \$29,701
Previous surplus.....	35,972	70,670	10,939
Total surplus Dec. 31.....	\$54,713	\$35,972	\$70,660

Telegrams delivered.....	1,457,005	4,523,575	4,373,953
Circulars delivered.....	17,319,020	6,457,346	6,519,129

—V. 62, p. 230.

### Central Union Telephone Company.

(Report for year ending Dec. 31, 1896.)

President Henry B. Stone, in his report read at the annual meeting in Chicago on Jan. 20, said in part:

**Construction.**—In 1896, there has been expended on extraordinary reconstruction \$118,422, which will be charged to maintenance account before the closing of the books. There has also been expended in new construction, approximately, \$700,000, of which \$125,000 has been expended at exchanges and \$775,000 on metallic-circuit toll lines. The principal exchange work has been at Toledo and Columbus, Ohio, and Indianapolis, Ind. The company now has a foundation plant in its existing exchanges, sufficient to provide for an increase of subscribers up to 50,000.

During the year there have been completed, approximately, 5,000 miles of wire of toll lines—11 as between towns connecting exchanges—making the total number of miles of wire now in operation nearly 18,000, two thirds of which are copper-metallic circuits of the most modern type. These facilities, in connection with the lines of the Long Distance Company, afford means of intercommunication between the cities and larger towns to almost all of the country lying between the Mississippi River and the seaboard. There should be, however, in this year, considerable increases to these toll lines, particularly in Illinois, in order to meet the requirements of the immediate future.

**New Bonds, Etc.**—A first mortgage of \$1,000,000 was placed on all of the property of the company on the first of July, 1896. Of these bonds \$1,275,000 have been sold and paid for at 97 1/2%. At the close of 1896 there was a total unfunded debt of \$100,000. Construction work will require this year, say, \$800,000. If net earnings to the extent of \$200,000 are devoted to this, and additional bonds are sold, bringing the total amount outstanding up to \$2,000,000, all this work will be accomplished and the end of 1897 find the company out of debt, except its bonds, with the whole of its territory well covered with a plant of the most modern character, practically new, its average age being about three years. Its earning capacity should then be sufficiently to maintain its property at the highest standard of efficiency, pay interest on its bonds and leave a good surplus.

**Competition.**—There was in 1896 a considerable net gain of exchange subscribers, but the number of competing exchanges in towns where this company was already established was so great as, for the time, to largely nullify the expected increased earnings from this source, by forcing rates below the cost of doing the business. This competition is based on entirely wrong estimates of the cost of doing the telephone business; but while it lasts it is, from its ignorance, the more severe. Most of the competing exchanges which have been in operation for any length of time have insolvency directly in front of them. As yet the opposition only have toll lines radiating from a few of their larger exchanges, but nothing which is comparable to the state and interstate service given by the metallic-circuit toll lines of this company and the Long Distance company.

The following directors were elected: C. H. Brownell, R. C. Clowry, C. R. Cummings, Arthur G. Fuller, F. H. Griggs, W. A. Jackson, J. Russell Jones, M. G. Kellogg, Henry B. Stone, John F. Wallick, Norman Williams.

**Earnings.**—The earnings, etc., have been:

	1896.	1895.	1894.	1893.
Gross earnings.....	\$1,327,931	\$1,315,710	\$1,423,070	\$1,336,976
Expenses.....	1,026,311	971,021	1,017,082	956,569
Earnings.....	\$301,620	\$374,619	\$405,988	\$380,307
Interest.....	64,521	23,124	.....	.....
Net earnings.....	\$237,099	\$351,495	\$405,988	\$380,807
Dividends.....	60,053	330,265	330,625	330,000
Surplus.....	\$171,046	\$21,230	\$75,723	\$50,307

The company's capital stock is \$6,695,000.—V. 63, p. 153.

## GENERAL INVESTMENT NEWS.

**Reorganizations, Etc.**—*Latest Data as to Defaults, Reorganization Plans, Payment of Overdue Coupons, Etc.*—All facts of this nature appearing since the publication of the last issues of the INVESTORS' and STREET RAILWAY SUPPLEMENTS may be readily found by means of the following index. This index does not include matter in to-day's CHRONICLE.

For some small street railway companies see index in CHRONICLES of December 26, 1896, and January 16, 1897.

**NOTE.**—Full-face figures under street railways refer to Volume 63.

**American Sugar Refining—Amount of Sugar Refined.**—The Special State Commission on Trusts has been examining the officers of this company regarding its history, organization, etc. An article on the investigation appears in our editorial columns. President Theodore A. Havemeyer on Saturday testified that the company now refines about 75 per cent (1,230,000 tons) of the country's total output of refined sugar as against 90 per cent formerly.—V. 61, p. 133.

Preferred Stock, issued and delivered for the acquisition of the Western Division, first mortgage bonds of the Atlantic & Pacific RR. ....	9,200,000
Pref. Stock, 87 1/2 shares delivered to a syndicate under contract with the reorganization committee, and the balance now being delivered to the holders of reorganization certificates for common stock of the Aetehson Topeka & Santa Fe RR. Co. ....	10,200,000
Common Stock.—Of this stock 8,715 shares have been delivered to a syndicate under contract with the Reorganization Committee, and the balance is now being delivered to the holders of reorganization certificates for common stock of the Aeteh. Topeka & Santa Fe RR. Co. ....	102,000,000

The general mortgage 4s listed to this date aggregate \$105,932,000 and the preferred stock \$119,657,300.—V. 61, p. 236.

**Atlantic & Pacific RR.—Income Bondholders' Protective Committee.—Deposits Called for.**—A committee consisting of Jules S. Bache, of J. S. Bache & Co., New York; Henry W. Dodd, of Richardson, Hill & Co., Boston; Wm. J. Quinlan, Jr., of Chemical National Bank, New York; Edwin Einstein, New York, and N. W. Jordan, of Boston, with William Strauss as counsel, has been formed to protect the Income Bonds (Western Division.) Attention is called "to the value of the property, including all land grants and extraordinary privileges, sought to be foreclosed without attempting to recognize any equity or value beyond the first mortgage." The committee believes its efforts will "undoubtedly be strengthened by the attitude of Congress as indicated by its recent action in the rejection (by the House of Representatives by its vote of 71 to 143) of the conferees' report on the Atlantic & Pacific bill, whereby it was sought to perpetuate the charter of the company at the expense of the junior security-holders."

Holder of income bonds desiring to co-operate must deposit their bonds on or before March 15, either with the Manhattan Trust Co. of New York or the American Loan & Trust Co. of Boston, and deposit the sum of \$1 25 per bond of \$1,000, to be used as a guarantee fund for the committee's expenses. Trust Company receipts will be issued. See advertisement in another column.—V. 61, p. 286.

**Baltimore City Passenger Ry.—Certificates of Indebtedness.**—The stockholders will meet Feb. 15 to authorize an issue of \$500,000 of 4 1/2 per cent gold certificates of indebtedness maturing Nov. 2, 1911, with which to fund the floating debt and to provide means for improvements.—V. 63, p. 1008.

**Baltimore & Ohio RR.—Car Trusts Authorized for 1,000 New Box Cars.**—The United States Court has authorized the construction of 1,000 additional box cars to be built by the Missouri Car & Foundry Co., under a contract with the Akron & Chicago Junction RR., which is part of the B. & O. system. They are to be delivered at St. Louis by May 1. In consideration of its traffic being given a preference, the Fairport Warehouse & Elevator Co. is to advance a cash payment of 10 per cent on the delivery of the cars. The balance of \$462,000 is to be divided among forty lease warrants for \$11,550 each, payable quarterly, and bearing 6 per cent interest. The cars are to be paid for by their mileage earnings at the rate of 6 mills a mile, the B. & O. receivers agreeing to make good any deficiency. After the warrants have been paid the 10 per cent cash advance is to be made good out of the mileage earnings, and the cars are to become the property of the Akron & Chicago Junction RR.

The receivers in their petition say in substance: "Notwithstanding the recent additions to the car equipment of the B. & O., the balances against us on account of foreign car mileage have increased because of the large increase in traffic. Through the agreement we shall obtain the use of much-needed cars without any cash outlay other than the payment of mileage, which will be applied to the purchase of the cars and finally vest their title in a company whose stock is owned by the B. & O. This same mileage has been

paid on foreign cars, and has insured entirely to the benefit of the companies in which the B. & O. has no interest.—V. 64, p. 232.

**Boston Elevated R.R.—West End Street Ry.**—On Wednesday a bill was introduced in the Massachusetts Legislature to amend the charter of the Boston Elevated R.R. Co., giving it authority, among other things, to lease the West End Street Ry. A Boston paper furnishes the following summary of the company's plans:

It is proposed to lease the entire West End system and operate the "L" and the surface cars in harmony. There will be a trunk system from Guild Block, Dudley Street, Roxbury, to Sullivan Square, Charlestown; branch lines from Brattle Square, Cambridge, to Scollay Square; from the railway terminals at the southern, Union and northern Union depots, connecting both and making a tour of the water front. A new subway will have to be built on Cambridge Street, entering at Jay Street, Bowdoin Street and Court Street to Scollay Square. The new company will bear all expenses of this work. Electricity will be the motor power. The capital stock of the company will be from \$10,000,000 to \$20,000,000. The company offers to pay one-half of 1 per cent of its gross earnings of elevated and leased lines to the Commonwealth. If the company pays 4 per cent or less than 6 per cent dividend on stock, it will pay another one-half of 1 per cent of gross receipts. Should it exceed 6 per cent dividends, it will divide its earnings above that point with the Commonwealth. The company will use the two through tracks in the subway. The company asks for location and 5-cent fares for thirty years.—V. 62, p. 888; V. 64, p. 236.

**Boston & Maine R.R.—Quarterly.**—Earnings for the quarter and the six months ending December 31 have been reported as follows. Net earnings for the six months in 1896 are shown after deducting \$295,015 for new equipment and \$84,647 for air brakes, etc.

	Gross earnings.	Net earnings.	Other income.	Interest, taxes, etc.	Balance, surplus.
3 months end. Dec. 31—					
1896.....	4,900,993	1,444,001	150,755	1,321,427	303,337
1895.....	5,183,933	1,384,601	172,465	1,303,555	247,116
6 months—					
1896.....	10,413,242	3,239,569	299,325	2,611,212	913,692
1895.....	11,156,939	3,491,412	318,603	2,601,581	1,213,155

—V. 63, p. 879.

**Brooklyn Elevated R.R.—Kings County Elevated R.R.—Brooklyn Rapid Transit—Nassau Electric R.R.—Experts Approve the Running of Trolley and Elevated Cars Across the Bridge.**—The expert engineers Virgil G. Bogue, George H. Thompson and L. H. L. Buck have made a report in which they say:

"From an engineering or operating point of view, we have discovered no adequate reason why, under suitable contracts, the cars of the surface railroads and the trains of the elevated railroads, or either of them should not be permitted to operate on the bridge."

The surface cars going to New York, it is proposed, shall use the north side of the north roadway, shall go around an elevated loop at the New York end and return by the south side of the south roadway. Convenient terminals would be provided at the New York end, and on the bridge the cars would be kept at least 102 feet apart in order to distribute their weight.

The elevated railroad cars would use the same tracks as the bridge railroad, and would be fitted with a cable grip, such as the regular bridge cars use, and with similar braking appliances, and one car in each train would be fitted with electric motors and appliances of the same style and power as those of the regular bridge motor cars. The cars would also have side doors like the bridge cars.

A communication from the presidents of the Brooklyn elevated roads, embodied in the report, is as follows:

At the outset we desire to state that if the authorities should permit elevated railroad trains to cross the railroad of the bridge, our respective companies would by merger, traffic agreement, or otherwise, operate our railroads under one management, and that our trains, while on the bridge, would be under the absolute control and subject to all the rules and regulations of the bridge management.

The report was referred to a committee consisting of Mayor Wurster, Comptroller Palmer and Mr. Henriques, with instructions to report at a special meeting of the board next Tuesday afternoon. William Berri has been made President of the Board of Trustees of the bridge to succeed Mr. Howell deceased.—Vol. 63, p. 1010; V. 64, p. 83, 233, 283.

**Brooklyn Heights R.R.—Brooklyn Rapid Transit System.—Quarterly.**—The Heights Company operates all the lines of the Rapid Transit System, except the Brooklyn Queens County & Suburban, which is operated separately. Earnings for the quarter and the six months ending December 31:

BROOKLYN HEIGHTS RAILROAD.					
	Gross earnings.	Net earnings.	Other income.	Interest, taxes, etc.	Balance, sur. or def.
3 months end. Dec. 31—					
1896.....	1,063,170	430,372	59,614	441,486	sur. \$,500
1895.....	1,015,063	376,861	54,444	529,912	def. 98,304
6 months—					
1896.....	2,253,041	948,736	120,943	937,431	sur. 80,245
1895.....	2,165,345	898,786	109,233	1,015,638	def. 43,819

BROOKLYN QUEENS COUNTY & SUBURBAN R.R.					
	Gross earnings.	Net earnings.	Other income.	Interest, taxes, etc.	Balance, sur. or def.
3 mos. to Dec. 31.					
1896.....	178,218	62,751	2,157	89,283	sur. 24,374
1895.....	159,209	37,132	10,468	84,635	def. 37,034
6 months.					
1896.....	340,024	151,034	4,540	178,989	sur. 26,264
1895.....	348,799	118,374	13,363	169,135	def. 37,397

The Heights Company had loans and bills payable Dec. 31, 1896, of \$431,001, against \$335,513 on June 30, and the Queens County & Suburban \$437,900 on Dec. 31, against \$330,900 — V. 64, p. 80, 233.

**Buffalo Rochester & Pittsburg Ry.—Debtors Bonds to Fund Floating Debt, Etc.**—President Arthur G. Yates has sent to the stockholders a circular which says: "A meeting of the stockholders will be held in Ridgway, Pa., on March 25, 1897, to authorize an issue of debentures with which to fund

the floating debt and provide for future capital requirements. The issue is not to exceed \$3,000,000 in coupon bonds of \$1,000 each, dated Jan. 1st, 1897, with interest at 6 per cent per annum, payable semi-annually on the first days of January and July; principal due January 1st, 1917. The company is to have the right to retire the bonds on any first day of January or July at 105 and accrued interest.

"The actual floating debt amounts approximately to \$90,000 and has been incurred for construction and equipment as detailed in the annual reports. Against the floating debt there is in the treasury \$112,000 Erie R.R. Co. 6 per cent construction notes received in payment for advances in double-tracking the Erie R.R. Co.'s line between Mount Jewett and Johnsonburg. These notes are paid at the rate of \$1,000 monthly.

"It is the policy of the present management not to resume dividends on the preferred stock until the floating debt has been funded. Authority is asked for an issue in excess of the amount required to fund the present floating debt, in order to provide for new equipment and construction which may be necessary in order to transact our increasing business."

**Earnings.**—The earnings for the six months ending Dec. 31 are stated in the circular as follows.

	Gross earnings.	Net earnings.	All charges.	Balance, surplus.
6 months to Dec. 31—				
1896.....	\$1,795,034	\$409,277	\$433,211	\$176,036
1895.....	1,737,025	498,933	429,009	69,923

—V. 64, p. 233.

**Buffalo (Street) Railway.—Quarterly.**—Earnings for the quarter and the six months ending December 31 have been reported as follows. These figures do not include the Croastown St. Ry., 76 miles, whose report has not yet been received:

	Gross earnings.	Net earnings.	Other income.	Interest, taxes, etc.	Balance, surplus.
3 months end. Dec. 31.					
1896.....	\$337,990	\$170,702	\$6,000	\$108,024	\$68,678
1895.....	341,975	177,390	6,122	108,117	78,305
6 months—					
1896.....	\$688,718	\$349,254	\$12,034	\$212,451	\$148,837
1895.....	690,013	361,261	12,110	210,255	169,116

Loans and bills payable Dec. 31, 1896, \$826,433, against \$763,029 on June 30.—V. 63, p. 1156.

**Burlington Electric Ry.—Burlington Railway & Light.—Reorganization and Consolidation.**—The reorganization committee of the Burlington Electric Ry., consisting of E. I. K. Noyes, 53 State Street, Boston; E. G. McInnes and Herbert N. Smith, has arranged a reorganization based on a consolidation of the railway, when foreclosed under the first mortgage, with the Burlington Gas & Fuel Co. and the Burlington Electric Light Co. Under the plan a new company, the Burlington Ry. & Light Co. (see V. 63, p. 838), will issue:

First mortgage 5 per cent twenty-year bonds, which will be a first lien on all the property now owned by the present Electric Light Co., the Gas Co. and the Street Ry. Co. ....	\$750,000
Of which to be reserved for additions to gas plant .....	125,000
To take up old bonds of Street Ry. and for subscriptions .....	275,000
Part payment for Electric Light and Gas plant and for assessment .....	350,000
Capital stock .....	\$1,250,000

The first mortgage bonds of the street railway are sold to 75 per cent of their par value and subscribers 25 per cent of their holdings in cash (equal to one-half of the amount necessary to retire the road) taking to payment for their old bonds, at 75 per cent, and for their 25 per cent subscription, first mortgage 5 per cent bonds of the new company. The second mortgage bonds paying 20 per cent subscription will receive par in new stock; if paying 10 per cent will receive 75 per cent in stock, and if paying no subscription 50 per cent in stock, new bonds being given for amount of subscription. Of the bonds \$284,000 out of \$300,000 firsts and all the \$125,000 seconds are deposited under the agreement with the American Loan & Trust Co. of Boston.

As to the prospective earnings, the committee says: The plant of the Lighting Company is a modern plant of latest construction, with a capacity of 300 arc lights, 6,000 to 8,000 incandescent lights, and has ample steam power and space for operating the street railway. In addition to the electric light plant it has a steam-heating plant, using exhaust steam, which adds very largely to the earnings. The Burlington Gas & Fuel Co. is a new plant of modern type, which, with the additions now in contemplation, will show earnings of \$2,000 net. This would give the new company the following earning capacity: Net earnings street railway plant, estimated, \$28,000; present net earnings Electric Light & Steam Heating plant, 1895, \$27,540; Burlington Gas & Fuel Co., net, \$20,000. Total net, estimated, \$75,540.

The managers of the consolidated company are to have an option for four months from transfer of property on all the new bonds at par and interest. It is proposed to re-lay the road with sixty-pound rails and build about 5½ miles of new track to West Burlington, Crapo Park, etc. It is hoped to have the reorganization completed and the new securities issued early in the spring.—V. 63, p. 41.

**Canadian Pacific Ry.—Dividend on Common Stock.**—The directors have declared semi-annual dividends of 1 per cent on the common and 2 per cent on the preferred stock, payable April 1. V. 63, p. 1158.

**Charlotte Electric Ry., Light & Power (Charlotte, N. C.)—Annual Statement.**—Our attention has been called to the statement made by this little Southern Company, whose bonds are all owned by Charlotte Consolidated Construction Co. For two years past the earnings have been:

	Gross earnings.	Net earnings.	Interest on bonds.	Balance, surplus.	Total surplus.
Year ending Dec. 31—					
1896.....	\$52,977	\$25,813	\$8,000	\$19,313	\$34,870
1895.....	38,959	16,270	6,000	10,270	18,377

**Chicago & Northern Pacific R.R.—Additional Reorganization Certificate Listed.**—The New York Stock Exchange has listed \$430,000 additional certificates of deposit represented by \$490,000 first mortgage 5 per cent gold bonds held by J. P. Morgan & Co. as managers of the Northern Pacific reorganization in excess of those to be retired in settlement of all claims between the two companies. The total amount listed to date is \$25,953,000. It is understood that the plan of reorganization may be forthcoming any day.—V. 64, p. 236.

**Columbus & Cincinnati Midland RR.—Baltimore & Ohio RR.—Bondholders' Suit.**—On February 14 Idor Ryner representing the Middendorf Committee (see V. 64, p. 233) brought suit in United States Circuit Court at Baltimore against the B. & O. receivers to obtain payment of interest on the Columbus & Cincinnati Midland bonds. Judge Morris required the receivers to show cause by April 8 why the application should not be granted. Mr. Ryner said that the suit was not hostile to the reorganization of the Baltimore & Ohio; that the Midland bonds were amply secured by the earnings of the road and by the guaranty of the Central Ohio, which guaranty was assumed by the B. & O. RR. Co.—V. 64, p. 232, 233.

**Commercial Cable.—Official Statement as to the Company and Its New Loan.**—The advertisement of Baring Brothers offering the £100,000 of 4 per cent debenture stock, which was recently sold in London at 94, contains substantially the following letter from Mr. Mackay, the President of the Commercial Cable Company, under date of Jan. 9, 1897:

**To Messrs. Baring Brothers & Co., Limited, London:**

GENTLEMEN: The issue of which the debenture stock you are now offering forms part was authorized for the purchase and extension of the system of the Postal Telegraph Cable Co. The issue is secured by a first mortgage deed of trust, conveying to the Farmers Loan & Trust Co., as trustee, the entire assets of the Commercial Cable Co., now owned or hereafter acquired, including those of the Postal Telegraph Cable Co. The mortgage has been recorded in ten of the principal cities into which the lines of telegraph extend, and the company covenants to complete registration within one year in all places where the property is not by that time vested in subsidiary companies and their shares transferred to the trustee of the mortgage.

In amount the mortgage is limited to \$20,000,000 four per cent bonds, or the sterling equivalent in four per cent debenture stock, viz., \$4,120,000; of this \$15,000,000 have been issued to purchase \$15,000,000 Postal Telegraph Cable Company's shares and property, \$1,000,000 to pay for additions to the property made last year and to provide for contemplated extensions during 1897, and \$4,000,000 remain in the treasury for future requirements.

For the past three years (1896 partly estimated) the net earnings of the land lines have been about sufficient to pay 4 per cent on their purchase price. I believe that these lines will continue to be self-supporting, and that the interest charge for their purchase will form no burden upon the earnings of the ocean cables proper.

The assets according to the balance sheets Dec. 31, 1895, and the net earnings in the year 1895 wear as follows:

	Net earnings in '95.	Assets Dec. 31.
Commercial Cable Co.	\$1,215,397	\$14,892,813
Postal Telegraph Cable Co.	617,863	18,341,145
Total.	\$1,833,260	\$33,233,958
Amount loaned under above mortgage.		\$18,000,000
Interest on amount now loaned.	\$640,000	

Apart from the issue you are now making, the amount outstanding is widely distributed among holders throughout the United States, Canada and Europe, or held by myself; and I undertake to sell none of my own holding under par for two years except with your consent. The Commercial Cable Co. has a share capital of \$10,000,000, on which 7 per cent dividends are paid.

I append the results of the two companies' operations for the past eight years. [We omit years 1890, 1892 and 1894.—EDS.]

**POSTAL TELEGRAPH CABLE COMPANY.**

Year.	Miles wire.	Offices.	Messages.	Receipts.	Net earnings.
1889....	51,016	8	6,974,361	\$1,943,192	\$343,393
1891....	76,365	1,187	4,271,768	2,403,224	341,999
1893....	101,807	1,635	10,251,194	3,565,293	537,272
1895....	117,341	2,067	12,493,832	4,321,298	617,983
1896....					Estimated 5-6,000

**COMMERCIAL CABLE COMPANY.**

Year.	Net earnings.	Dividends.	Surplus.
1889....	\$959,911	\$201,400	\$758,511
1891....	1,045,924	54,120	515,201
1893....	1,057,743	613,376	444,370
1895....	1,215,398	700,000	515,398
1896....	Estimated 1,180,000	800,000	

Of this surplus \$1,000,000 has been expended in repayment of \$600,000 six per cent debentures.—V. 64, p. 180.

**Eau Claire Light & Power.—Incorporation.**—This company, with capital stock, \$100,000, has been incorporated by A. J. Keith, N. J. Wilcox and H. A. Patton, presumably as successor to the Eau Claire Street Ry. Light & Power Co., of Eau Claire, Wis., foreclosed Nov. 17, 1896.

**Englewood & Chicago Ry.—Foreclosure Suit.**—The receiver's suit has been extended to cover foreclosure. The bill charges that the company is insolvent and unable to pay the interest on its bond issue. The issue authorized is \$2,500,000, but only \$700,000, it is said, has been sold.—V. 64, p. 180.

**Forty-second Street Manhattanville & St. Nicholas Avenue Ry.—Quarterly.**—Earnings for the quarter and the six months ending December 31:

3 months end.	Gross earnings.	Net earnings.	Other income.	Interest, taxes, etc.	Balance, sur. or def.
Dec. 31.					
1896....	\$175,244	\$21,546	\$2,100	\$46,750	sur. \$144
1895....	135,506	15,738	1,000	28,250	def. 11,512
6 months—					
1896....	\$358,544	\$62,307	\$3,100	\$58,940	sur. \$4,517
1895....	315,627	41,888	2,000	58,950	def. 15,062

Loans and bills payable Dec. 31, \$175,000, against \$65,000 on June 30.—V. 63, p. 839.

**Kansas City Pittsburg & Gulf RR.—Through Line to Open March 3.**—Only five miles remain to be graded on the entire line. It is expected to begin passenger service from Kansas City to New Orleans and Galveston on March 3, although the line will be in shape to ship through freight at an earlier date.—V. 64, p. 134.

**Kings County Elevated RR.—Long Island Electric RR.—Through Cars to Far Rockaway.**—Justice Dickey, of the Supreme Court, in Brooklyn, has authorized the receiver of the Kings County Elevated Railroad to make a contract with the Long Island Electric Railroad for the connection of the two systems and the running of through cars from the Brooklyn Bridge to Far Rockaway. Through cars, it is said, will probably be running in July.—V. 62, p. 779; V. 64, p. 83.

**Lykens Valley RR. & Coal.—Northern Central.—New Lease.**—On Jan. 20, 1896, the Summit Branch RR. Co. defaulted on the rental due that day to the Lykens Valley RR. & Coal Co. Consequently the lease was canceled. On April 20, 1896, a new lease was made by the Lykens Valley RR. & Coal Co. to the Northern Central RR., which company had previously sub-let the property from the Summit Branch Company. The new lease provides that the rental shall be \$35,000 yearly. The dividends on the \$90,000 stock are therefore payable at the rate of 5 per cent per annum in place of 10 per cent as formerly. The lease is terminable on sixty days' notice by either party.—V. 62, p. 338, 590.

**Metropolitan Street Ry. (N. Y. City).—Quarterly.**—Earnings for the quarter and the six months ending December 31:

3 mos. end.	Gross earnings.	Net earnings.	Other income.	Interest, taxes, etc.	Balance, surplus.
Dec. 31.					
1896....	\$2,274,754	\$1,981,407	\$129,935	\$793,226	\$18,116
1895....	1,935,121	912,105	38,156	592,806	357,455
6 mos. dth.					
1896....	4,409,833	1,993,587	261,172	1,573,811	684,949
1895....	3,370,310	1,614,178	87,743	1,105,933	625,933

There are no important changes in the balance sheet since that of Sept. 30, 1896, given in V. 63, p. 922.—V. 64, p. 135.

**Metropolitan Traction, New York.—Contracts Awarded.**—President H. H. Vreeland, on Feb. 13, gave out the statement that contracts had been made for the engines and the electrical machinery necessary to equip the Sixth, Eighth and Amsterdam Avenue lines on the west side of the city and the Fourth and Madison Avenue lines on the east side, and also the Fifty-ninth Street cross-town line, and that the system adopted was the underground electrical system now in operation on the Lenox Avenue line. Mr. Vreeland states that defects in the system have been remedied from time to time and "that the large expenditure of money necessary to improve the longitudinal lines is warranted by the operation of the experimental line."—V. 64, p. 235.

**Minneapolis & St. Louis RR.—Statement for Half year.**—The statement of earnings and expenses for the six months ending Dec. 31, 1896, and 1895 are as follows:

6 months to Dec. 31.	Gross earnings.	Net earnings.	Other income.	Interest on bonds.	Dividend on stock.
1896....	\$1,097,155	\$492,343	\$41,123	\$290,270	\$122,500
1895....	1,131,024	510,400	52,030	290,270	122,500

Leaving a surplus over dividend of \$123,744, against \$149,721 for the same period of 1895.—V. 63, p. 697, 711.

**Mortgage Trust Co. of Pennsylvania.—Debenture Holders asked to reduce interest temporarily.**—The President of this Philadelphia company, James Aylward Davelin, has made the following statement:

The company has requested its debenture holders to reduce the rate of interest to 4 per cent clear of State tax, temporarily, until the general business conditions improve to an extent to warrant a return to the former rate of 5 per cent. The amount of the abatement is to be repaid before any dividends are declared on the capital stock.

The company has handled Western farm mortgages and on Nov. 17, 1896, had outstanding \$500,000 capital stock and \$3,899,000 debenture bonds. It was also liable for deposits of \$117,587, contingent fund, \$102,083; undivided profits, \$33,362. On the other hand it had cash \$4,401; due from banks, \$56,929; call loans, \$193,599; loans on bonds and mortgages, \$1,098,017; real estate, \$200,500; miscellaneous, \$123,688; total, \$4,682,030.

**Nashville Chattanooga & St. Louis Ry.—Consols for \$500,000 Listed.**—On the New York Stock Exchange have been listed \$500,000 additional first consols, \$361,000 of them having been issued upon the Rome RR., from Kingston to Rome, Ga., 18 1/2 miles, (\$86,000) upon a branch from near Centerville to Swan Creek, 4 1/2 miles, in Hickman County, Tenn., and \$54,000 upon an extension of the West Nashville Branch RR., 2 1/2 miles, in Davidson County, Tenn.—V. 64, p. 135.

**National Linseed Oil.—Mortgage for \$1,500,000 Filed.**—The following official statement has been furnished us:

"The company has placed a first mortgage on its principal plants to secure an issue of \$1,500,000 of 15-year 6 per cent bonds. The object is to increase the working capital, retire floating debt and outstanding debenture bonds. The Central Trust Company of New York is trustee. This does not increase the indebtedness and will much improve the financial condition of the company."—V. 63, p. 1060.

**New York Biscuit.—Annual Statement.**—The net earnings for 1896 are reported by telegraph, after deducting all fixed charges, as \$758,060 [contrasting with \$633,080 in 1895 and \$545,390 in 1894]. There has been charged off the surplus account during the year the total sum of \$306,445. By the sinking fund, bonds have been retired to the extent of \$60,000. The company owns improved real estate worth from \$200,000 to \$250,000, which may be disposed of as the market improves. The bills payable Jan. 1, 1897, aggregated \$774,031, and the outstanding bonds were \$1,219,000.—V. 64, p. 135.

**New York New Haven & Hartford RR.—Quarterly.**—Earnings for the quarter and the six months ending Dec. 31:

3 months end.	Gross earnings.	Net earnings.	Other income.	Interest, taxes, etc.	Balance, surplus.
Dec. 31.					
1896....	\$7,384,677	\$2,401,124	\$190,149	\$1,579,672	\$1,011,951
1895....	7,807,433	1,787,900	170,987	1,845,977	133,010
6 mos.—					
1896....	\$15,477,608	\$5,223,544	\$300,524	\$3,143,312	\$2,380,726
1895....	16,129,988	5,096,202	231,532	3,430,211	1,921,523

From this surplus of 1896 (\$2,380,726) dividends for the six months call for \$1,890,033, leaving a balance of \$181,693.

Following is the balance sheet of December 31, 1896. On June 30, 1896, loans and bills payable were \$6,650,000.

## CONDENSED GENERAL BALANCE SHEET DECEMBER 31, 1896.

Assets—		Liabilities—	
Cost of road & equip.	\$51,200,366	Capital stock	\$47,475,700
St'ks, leased lines re-		Bonds	4,300,000
ceived in exchange		Debentures	16,397,200

rentals	13,375,718		
Dividends.	1,899,033		
Total.	\$100,708,651	Total.	\$100,708,651

**Four-Tracking on New York Division.**—The company on Monday began using the four-track elevated line through the city of Stamford, leaving it is said of the line between New York and New Haven only the three miles at Bridgeport which has not four tracks. There seems likely to be some delay in completing the Bridgeport improvements.—V. 64, p. 287.

**New York & Staten Island Electric.**—Consolidated Company.—An agreement has been reached for the consolidation of the three electric-light companies of Staten Island under the above title. Col. G. B. M. Harvey says:

"The Richmond Borough Electric Company, incorporated by Erasmus Wiman; the Richmond County Electric Light Company, started some months ago by E. P. Doyle, and the Port Richmond Electric Company, started and owned by Mr. Boardman, Mr. Camon and their associates will go into the consolidation. A new company, to be called the New York & Staten Island Electric Co. will take title to all these properties, and will build a plant of the most modern type. Mr. Doyle will be President."

**Norfolk & Western RR.**—Mortgage Abstract Next Week.—The abstract of the company's new first consolidated mortgage will be published in the CHRONICLE next week.—V. 64, p. 257.

**Northern Pacific Ry.**—Final Payment on Duluth & Manitoba Dakota Division Bonds.—The Guaranty Trust Company of this city will pay on Feb. 15 to the holders of the trust certificates of the Dakota Division of Duluth & Manitoba RR. first mortgage bonds the sum of \$819 25 for each \$1,000 bond represented by such certificate. This payment represents the balance due upon the sale of the bonds to the Northern Pacific Railway Co.—V. 64, p. 237.

**Ohio Southern Ry.**—Penalty of \$10 on 1st Cs.—The First Mortgage Bondholders' Committee having received a large majority of the bonds, no further bonds will be received except upon the payment of a penalty of \$10 per bond. See notice in another column.—V. 64, p. 181.

**Oregon Short Line Ry.**—New Company Incorporated.—This company was incorporated in Utah on February 17 as successor to the Oregon Short Line and Utah Northern sold in foreclosure. The officers of the new company were in the CHRONICLE of January 30, p. 234.—V. 64, p. 288.

**Pennsylvania RR.**—New Officers.—The directors have elected John P. Green First Vice-President to succeed Frank Thomson, who was recently chosen President. The Second Vice-President is Charles E. Pugh; Third Vice-President, S. M. Prevost; First Assistant to the President, Samuel Rea; General Manager, J. B. Hutcheson.—V. 64, page 283.

**Philadelphia Newtown & New York RR.**—Bonds Listed.—On the Philadelphia Stock Exchange have been listed \$1,403,000 5 per cent mortgage gold bonds due Oct. 1, 1942; both principal and interest guaranteed by the Philadelphia & Reading Railroad Co. (since foreclosed), payable in gold coin, free of tax, in Norristown, Pa. The Guaranty Trust & Safe Deposit Co., of Philadelphia, is mortgage trustee. The authorized issue is \$1,600,000, of which amount \$10,000 are reserved to take up bonds due Oct. 1, 1897, and \$182,000 for construction and equipment. Of the bonds due Oct. 1, 1942, \$819,100 are owned by the Reading Company, of which \$52,100 have the April, 1893, \$67,000 the October, 1893, \$67,000 the April, 1894, \$446,000 the October, 1894, \$155,000 the October, 1895, and all subsequent coupons attached and unpaid; \$12,000 have the October, 1896, coupons attached and unpaid.

**St. Louis & Kirkwood RR.**—Foreclosure Suit.—Edward S. Leonard, of Peoria, Ill., has applied for a receiver for this company, and for the foreclosure of the mortgage, interest on which fell due Jan. 2 and remains unpaid.

**Seaboard & Roanoke RR.**—North Carolina RR.—Southern Ry.—Governor Russell, of North Carolina, on Feb. 5 sent to the Legislature a special message, including correspondence with President Hoffman, of the Seaboard Air Line, in which the latter offers to pay the State \$400,000 per annum as rental for the North Carolina Railroad for twenty years. The road is now operated on a ninety-nine-year lease as a division of the Southern Railway main line, at an annual rental of \$266,000, this sum to be increased to \$280,000 in 1901. The State owns three-quarters of the stock, and consequently as the lease was made by the North Carolina RR. Co. and not by the State the Governor thinks the contract can be set aside. The Seaboard's proposition includes the grant of trackage rights to the Southern on terms similar to those paid by it to the Atlantic Coast Line, but forbids the Southern to build an independent line.—V. 62, p. 457; V. 64, p. 182, 232.

**Seattle Lake Shore & Eastern Ry.**—Foreclosure Decree Affirmed.—The U. S. Circuit Court of Appeals has affirmed the foreclosure decree in the appeal taken by the Northern Pacific RR. Co. An effect of the decision will be to give the Seattle Co. a half interest in the Union depot property at Spokane.—V. 63, p. 175.

**Short Route Railway Transfer.**—Foreclosure Sale Ordered.—The U. S. District Court at Louisville has ordered the foreclosure sale of this property under the first mortgage for \$500,000, the upset price being \$500,000. The Illinois Central bought \$333,000 of the first mortgage bonds in connection with its purchase of Mr. Huntington's interest in the Chesapeake Ohio & Southwestern. The Short Route skirts the river front in Louisville from Brook St. to Eleventh St., connecting the railroads of the eastern and western parts of the city. It is a trestle and is used by the Illinois Central RR., the Southern Ry., the Big Four, Baltimore & Ohio Southwestern, etc. The Illinois Central will probably buy the property.

**South Jersey Traction.**—Foreclosure Sale Feb. 4.—The foreclosure sale of this property set for Feb. 4 was adjourned one week. The address of the bondholders' committee is 301 Betts Building, Philadelphia. Of the bonds, \$185,000 have been deposited with the Guaranty Safe Deposit & Trust Co., of Philadelphia, pending reorganization.—V. 63, p. 1116.

**Staten Island Rapid Transit RR.**—Quarterly.—Earnings for the quarter and the six months ending December 31 have been reported as follows, excluding ferry earnings:

3 months end, Dec. 31 -	Gross earnings.	Net earnings.	Interest, taxes, etc.	Balance, sur. or def.
1896.....	\$144,749	\$49,609	\$33,414	def. \$33,805
1895.....	144,057	49,719	82,893	def. 31,173
6 months -				
1896.....	\$364,714	\$172,678	\$161,151	sur. \$11,527
1895.....	438,059	193,060	152,870	sur. 45,191

Loans and bills payable Dec. 31, 1896, \$752,375, against \$699,375 on June 30.—V. 63, p. 839.

**Suburban Electric RR. of Chicago.**—Application for Receiver for Construction Co.—A press dispatch from Chicago, Feb. 9, says that Charles S. Leeds, a stockholder, has applied for a receiver for the Suburban Construction Company on the ground that the Suburban RR. Co. has violated its agreement to give him its entire capital stock and not less than \$600,000 worth of first mortgage bonds for the work of construction. Other agreements also, he declares, have been violated.

**Third Avenue RR. (N. Y. City.)**—Quarterly.—Earnings for the quarter and the six months ending December 31:

3 months end, Dec. 31.	Gross earnings.	Net earnings.	Other income.	Interest, taxes, etc.	Balance, surplus.
1896.....	\$328,033	\$215,755	\$11,182	\$91,821	\$105,116
1895.....	616,429	249,145	8,912	84,199	173,558
6 months -					
1896.....	\$1,333,980	\$595,695	\$30,220	\$173,601	\$147,314
1895.....	1,342,148	607,936	21,022	166,243	402,655

Loans and bills payable Dec. 31, 1896, \$1,275,000, against \$1,875,000 on June 30.—V. 64, p. 235.

**Toledo St. Louis & Kansas City RR.**—Bache Petition to be Made Party in Foreclosure Suit.—J. S. Bache, of New York, has filed an intervening petition to be made a party in the foreclosure suit of the Continental Trust Co. The case will be heard before Judge Taft at Cincinnati on the 20th inst. This litigation is said to be in the interest of the common stock.—V. 64, p. 238.

**Union Pacific Ry.**—Sinking Fund 8s Accept Modified Plan.—Holders of the land grant sinking fund 8 per cent bonds on Wednesday voted to accept the modified terms proposed by the Union Pacific Reorganization Committee, namely, an exchange for 75 per cent in new 4 per cent bonds and 100 per cent in new preferred stock. The Union Pacific Reorganization Committee accordingly announces that it has received deposits of a substantial majority of the sinking fund bonds, and that further deposits of bonds of this class will be received, without penalty, at the Mercantile Trust Company, New York, and Old Colony Trust Company, Boston, to and including February 25, 1897.

**Kansas Pacific Consols.**—Amended Plan to Be Submitted to Bondholders.—The Kansas Pacific bondholders' committee, of which F. D. Tappen is the Chairman and W. E. Roosevelt, 33 Wall Street, is Secretary, has called a meeting of the bondholders at 33 Wall Street on the 24th inst. at 2 o'clock to consider the proposition of the Union Pacific reorganization committee to modify the plan. The committee has addressed a circular to the bondholders, in which they say:

The committee has done its best to secure a larger allotment of bonds without success; and with this great chance in the proposition has felt that it should be submitted to a general meeting of the holders of certificates issued for bonds deposited with the committee.

The subject is a most important one, as in the judgment of the committee the alternative is presented of accepting the provision or of assuming charge of the property, retiring from the present Union Pacific reorganization, and assuming to reorganize the Kansas Pacific property by itself, or in conjunction with some existing line or lines. For these reasons it is earnestly requested that every certificate holder be represented at the meeting, and a form of proxy is enclosed. Should no instruction be received the committee will vote according to its best judgment at the time of the meeting.

The Union Pacific Reorganization Committee say that it is not within their power, with the amount of securities at their disposal under the modified plan, to make any larger allotment than the one now offered, namely, 50 per cent in new first mortgage bonds instead of 80 per cent, and 110 per cent in preferred stock instead of 72 per cent. A valuation put upon the new securities is 90 for the first mortgage bonds and 40 for the preferred stock.—V. 64, p. 338.

For other investment items see page 333.

## Reports and Documents.

### THE EDISON ELECTRIC ILLUMINATING COMPANY OF NEW YORK.

ANNUAL REPORT FOR THE YEAR ENDING DECEMBER 31, 1896.

NEW YORK, Jan. 21, 1897.

To the Shareholders of the Edison Electric Illuminating Company of New York:

In presenting the figures for the past year, your Directors have to note a continued increase in the business and prosperity of your Company.

During the year the high tension companies whose stock and securities, with the sole exception of \$32,000 Manhattan bonds, have now been acquired by your Company, their cost being included within its capitalization, have been brought into close working relation with your Company, and the combined results are therefore given for the year ending December 31st, 1896, in comparison with like figures for the previous year, as closely as they can be arranged for comparison:

	1896.	1895.
Gross Station earnings.....	\$2,222,737 00	\$2,000,835 93
General and technical expense, including taxes.....	\$311,838 77	\$1,115,654 28
Station operating expense.....	840,350 21	
Depreciation charges.....	127,330 00	100,000 00
Total expenses.....	\$1,280,518 98	\$1,215,654 28
Net Station earnings.....	\$942,218 08	\$785,201 65
Earnings from other sources.....	24,162 05	30,557 09
Total net income.....	\$966,380 13	\$815,758 74

Deducting from \$966,380 13 the amount of interest paid on auxiliary companies' bonds held outside the Edison Company, \$2,800, and accounts of these companies written off, \$3,423 19, the net income available for your Company is \$960,156 94.

The figures for the Edison system alone are appended, for comparison with the figures given in last year's report:

	1896.	1895.
Gross Station earnings.....	\$1,771,229 82	\$1,544,922 73
General and technical expense, including taxes.....	\$253,758 65	\$218,421 44
Station operating expenses.....	532,634 12	541,051 27
Depreciation charges.....	120,000 00	100,000 00
Total expenses.....	\$956,396 77	\$859,472 71
Net Station earnings.....	\$814,833 05	\$695,350 07
Earnings from other sources.....	18,741 89	18,955 46
Income from high tension system.....	126,582 00	111,453 21
Total net income.....	\$960,156 94	\$815,758 74

The interest on Edison bonds in 1896 was \$322,100 00, the Edison dividends \$476,220 00, a total of \$798,320 00.

The combined station earnings show an increase in gross of 11% and in net of 18%. The ratio of operating expenses, including both station and general expenses, but not depreciation charges, to gross station earnings, is 52% for both systems, as against 55% for the previous year.

The net earnings, it should be noted, are shown less depreciation charges, which during 1896 have been charged off month by month, instead of deducting them at the end of the year in profit and loss account—a conservative course which it is believed will have your approval.

The following are the installations on the combined systems, central station service only, using the rating of arc lamps and motors adopted last year by the leading Edison companies for calculating the 16 c. p. equivalent, 1 e., 10 per standard arc lamp and 15 per horse-power:

	1896.	1895.	
No. customers.....	Dec. 31, 7,898	[Jan. 1, 1896.] 6,928	Increase. 970
No. inc. lamps.....	309,369	246,628	62,741
No. arc lights.....	5,559	5,031	528
No. motors, h. p.....	15,953	11,458	4,295
Total equiv. 16 c. p.....	613,991	483,605	130,386

Adding supplementary service, or emergency connections with isolated plants, the installation figures on Edison and auxiliary services combined reach a total of 708,458 16 c. p. lamp equivalent.

The concentration in the larger stations and the increased operating economies, conjoined with the large extension of business in the past year, have resulted in a considerable decrease in the cost of current. Your Directors are giving careful consideration to a revision of the Company's prices, which by reducing the cost of current to the consumer, wherever practicable, will encourage further increase of the Company's business.

Through the summer, both the 12th Street and 39th Street stations have been kept out of service as generating stations, being used only as distributing centres. Progress has been made, by the development of storage battery annexes and by the tie feeder system between stations, with the controllable disconnective boxes, toward concentrating operations during the night and over Sunday in one sta-

tion, and on several occasions the entire system has been operated from the 26th Street station exclusively. The technical staff are now making a careful study of the application of this method to produce the most economical results. The new 12th Street station, completed in 1895, has been otherwise in continuous service during the year.

The storage battery annex in the Bowling Green Building, replacing the generating plant in the Produce Exchange Building, was completed during the past year and has been in regular service since November 18th. This has usefully supplemented the supply of current during the hours of maximum demand from the Duane Street generating plant, which during the hours of minimum demand furnishes the current for charging this storage battery. The storage battery at 12th Street has been in service during the year, being charged at minimum hours from either Duane Street or 26th Street station.

An annex station, transforming current supplied from the Manhattan Company's high tension plant, where there has been surplus power, into direct low tension current, through motor generators, has been installed during the year on a site temporarily leased in the northeast portion of your Company's territory. The results of this experimental installation have been satisfactory and may have an important bearing on the Company's future development. Provisions were of course made against any electrical connection between the high tension and low tension service. The current supplied from this annex has strengthened the service in that important part of the city, besides demonstrating the feasibility of developing this kind of supply on a larger scale.

No important extensions to the underground system have been made during 1896, your Directors considering that during the financial uncertainties of the past year, conservative management was particularly desirable. The mains have been extended, however, to meet the specific requirements of business and the feeders extended in like manner in districts where the demand for current was in excess of the supply.

At the desire of the city authorities, your Company has extended its proposals for city lighting, confining its bids, however, to streets in which Edison mains are already laid. The Fifth Avenue system of lighting will be extended to other main thoroughfares and the development of the enclosed arc lamp has made it practicable for the Company to offer to the city a less costly form of lighting, which has been adopted for other streets. Your Company has pursued the policy of making a price for city lighting below the average cost of current, recognizing both that the city is entitled to the best possible rates from a corporation which enjoys the privileges of the streets, and that the long hour demand of city lighting comes in part during the hours in which there is otherwise small demand upon station equipment.

The high tension properties owned by your Company have been effectively reorganized during the past year, and these changes have made possible an increase in operating economies and an improvement in service from the high tension system. These properties are now on a sound business basis which promises satisfactory return on your investments in them.

The Balance Sheet and Statement of Income Account are appended. As stated, the depreciation charges during the past year have been carried into monthly expenses before providing for the dividend, which has been continued at the rate of 6% per annum during the year past.

Your Directors during the past year have adopted a method of appropriation from the yearly net earnings to the employees' benefit account, which recognizes the services rendered by the Company's forces in direct proportion with the improvement in operating economies and the increase of net revenue.

During the year Mr. J. W. Lieb, Jr., has been appointed to the post of General Manager, a promotion to which his long experience and his valuable services to the company, especially since his return to its staff, have fully entitled him.

Your directors report with sorrow the loss during the year of Mr. Harrison J. Smith, General Operating Superintendent, who died on June 18, as the result of a fall while at his home. Mr. Smith had been associated with the company almost from the beginning of its corporate existence, first as a working mechanic, and his career has furnished a useful inspiration to all the men who served under him.

Attention is called to the report of the First Vice-President in the pamphlet report.

By order of the Board of Directors.

SPENCER TRASK, President.

E. & O. E.  
NEW YORK, December 31st, 1896.

JOS. WILLIAMS,  
Treasurer.

Depreciation charges (\$120,000) during 1896 were deducted as a monthly charge against Earnings instead of being treated in Profit and Loss, as in 1895.

**West Chicago Street RR.—Sale of Bonds.**—It is reported that Mr. C. T. Yerkes has negotiated a sale of West Chicago Street Ry. 5 per cent consols through the Central Trust Co. of New York and Messrs. Hallgarten & Co. The amount of bonds placed is stated to be \$3,500,000, but the parties interested say the negotiation has not been finally completed and the published reports are inaccurate.—V. 64, p. 238.

**Western New York & Pennsylvania Ry.—Quarterly.**—Earnings for the quarter and the six months ending December 31 have been reported as follows. Charges in 1896 include interest (amounting to \$100,000) for the six months on the new general mortgage bonds; in 1895 this interest was provided for under the reorganization plan.

	3 months end. Dec. 31—	Gross earnings.	Net earnings.	Other income.	Interest, taxes, etc.	Balance, surplus.
1896.....		\$791,014	\$280,513	\$11,409	\$206,092	\$86,230
1895.....		888,940	243,378		158,676	84,712
6 months—						
1896.....		1,671,136	632,200	14,266	411,231	235,232
1895.....		1,820,515	522,835	7,109	316,827	213,116

Loans and bills payable December 31, 1896, were only \$9,000, against \$62,720 on June 30.—V. 64, p. 130.

**West Virginia Central & Pittsburg RR.—Dividend of One Per Cent.**—The directors have declared an annual dividend of 1 per cent, payable March 1, against 1½ per cent paid last year. The net earnings for the six months ending Dec. 31, 1896, were reported to the CHRONICLE recently as \$197,738 against \$219,225 in 1895.—V. 63, p. 456.

**Wheeling & Lake Erie Ry.—Needs of Property.**—President Blair in a circular to the stockholders says: "While your property has been materially improved during the past year, it still needs many more improvements to strengthen and better its physical condition in order to reduce its operating expenses. These betterments are essential in order to enable this company to operate the property upon an economical and safe basis as compared with its competitors and other railroads in the country."—V. 64, p. 288.

**Wilmington & Weldon RR.—Bonds Sold to Refund 7 Per Cents Maturing May 1.**—The company has sold to Brown Brothers & Co. \$933,000 general first mortgage 4 per cent gold bonds of 1885, the remainder of the authorized issue of \$4,000,000, those previously sold having been 5 per cents. The new issue will retire the consols 7½ maturing May 1, leaving the general first mortgage a first lien on 463 miles of road, at less than \$9,000 per mile. The mortgage has also a second lien on 52 miles. The saving in interest charge effected is about \$28,000 yearly. V. 63, p. 1115.

—J. P. Morgan & Co. and Blake Brothers & Co. offer at 100 and accrued interest \$3,000,000 State of Massachusetts 3½ per cent gold bonds, "Metropolitan Water Loan," due July, 1935, secured by sinking fund. See advertisement in our State and City Department.

## The Commercial Times.

## COMMERCIAL EPITOME

FRIDAY NIGHT, Feb. 12, 1897.

To day has been made a legal holiday, the birthday of Abraham Lincoln, and the banks and mercantile exchanges are closed, involving a general suspension of business. The weather is seasonable, and with the near approach of spring there is more activity in the dealings in manufactures, with good prospects for a further improvement. Naturally the better aspect which affairs assumed late in the fall was not fully maintained after the holidays, and some time is required to get all the wheels in motion, but there is nothing to discourage the belief that a good season's trade is before us. The prospects for the approval by the Senate of the arbitration treaty are said to be not good, for the want of time, as only about three weeks of the session remain. It seems to be settled that there will be an extra session of Congress at an early date to act upon a revision of the tariff, which is now in preparation by the House Committee of Ways and Means. European diplomacy continues in a feverish condition, but excites little apprehension of serious consequences.

There has been a dull market for lard on the spot. Exporters have been inactive and the lard refiners indifferent buyers. Prices have been easy, closing at 4c. for prime Western and 8½c. for prime City, with 4½c. quoted for refined for the Continent. The lard futures have been neglected here, but the West has been unsettled and on the whole easier, with free sellers, scarcity of freight room and dull export demands. May closed at 4½c.

## DAILY CLOSING PRICES OF LARD FUTURES.

	Sat.	Mon.	Tues.	Wed.	Thur.	Fri.
May.....	4 07	4 12	4 17	4 12	4 10	—

Pork has been in a low export demand, with prices easier at \$8 25@\$8 75 for mess, \$9 50@\$9 50 for family and \$8 50@\$9 50 for short clear. Cut meats have been in freer demand at well-sustained prices, closing at 4½c. for pickled bellies, 12@10 lbs. average, 5c. for pickled shoulders and 8½c. for pickled hams. Demand for beef has been dull, but prices have held firmly, closing at \$7 00@\$8 00 for mess, \$7 50@\$9 00 for packet, \$9 00@\$11 00 for family and \$13 00@\$14 00 for extra India mess. Beef hams have been stronger at \$18 00@\$18 50. Tallow has declined ½c. with home trade demands only closing nominally at 8½c. for City. Oleo stearine has been active for export at 4½c. The inquiry for cotton-seed oil has been stronger for export at better prices. Sales at 20c. for prime crude and 23½c. for prime yellow. Butter has had a fair sale at higher values, closing at 14@21½c. for creamery. Cheese has been advancing slightly, closing at 9@12½c. for State factory, full cream. Fresh eggs have declined and closed steady at 16c. for choice Western.

Coffee of Brazil growth has been slightly depressed and closed offered at 9½c. for Rio No. 7, and offered at 9½c. for new arrival. Mild grades have been more active at steady prices, closing at 10½c. for good Cuncuta and 23¼@24¾c. for standard Java. There has been a slow and easier market for contracts, with some pressure to sell by local houses.

The following were the closing prices:

Feb.....	May.....	9 20c.	Aug.....	9 30c.
March.....	June.....	9 15c.	Sept.....	9 30c.
April.....	July.....	9 25c.	Dec.....	9 30c.

The demand for raw sugar has quickened and the market is about 1-16c. higher, with 2 13-16c. bid for 89-deg. test muscovado and 3-16c. bid for 96 deg. test centrifugal. Refined have advanced ½c. on hard and for some soft grades, and 1-16c. on others, with granulated now 4½c. Teas have been selling a little more freely at steady prices.

Manufacturers have been fair buyers of the common grades of Kentucky tobacco at firm prices. Sales 300 hhds. Seed leaf has been in liberal demand at full prices. Sales for the week, 170 cases 1895 crop, New England Havana, 12@22c.; 150 cases 1895 crop, State Havana, 10@15c.; 35 cases 1895 crop, Zimmers, 12½@15c.; 150 cases 1894 crop, Zimmers, 12@13c.; 200 cases 1893 crop, Wisconsin Havana, 9@10c.; 500 cases 1894 crop, Wisconsin Havana, 7@9c.; 300 cases 1895 crop, Wisconsin Havana, 6@9c.; 100 cases 1893 crop, Pennsylvania Havana, 12@13c.; 125 cases 1893 crop, Pennsylvania seed leaf, 10@10½c.; 150 cases 1894 crop, Pennsylvania Havana, 11@11½c.; 200 cases 1894 crop, Pennsylvania seed, 9@10c.; 50 cases 1895 crop, Pennsylvania Havana, 10@11c., and 350 cases 1895 crop, Pennsylvania seed leaf, 9@10c.; also 400 bales Havana at 70c. to \$1 10 in bond and 300 bales Sumatra at 70c. to \$1 65 in bond.

There has been little done in S-raits tin, while prices have been fairly steady at 13 50@13 60c. Ingot copper has been quiet, with large deliveries on contracts satisfying wants. Lake at 12c. Lead is stronger at 3 25@3 27½c. for domestic. Spelter firm at 4 05@4 15 for prime Western. Pig iron has been steady at \$11 00@\$12 50 for domestic.

Refined petroleum has been firmer, closing at 6 35c. in bbls., 3 75c. in bulk and 6 95c. in cases; naphtha dull at 6½c. Crude certificates have been neglected. Credit balances have been quiet at 90c. Spirits turpentine has been quiet, but prices have been firm at 29@29½c. Rosins have been slow at \$1 70 for common and good strained. Wool has been in good demand at full values. Hops have had a fair inquiry at steady prices.

Figures in cotton are for six days ending Thursday.

### COTTON.

THURSDAY NIGHT, February 11, 1897.

THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the six days ending this evening the total receipts have reached 105,665 bales, against 101,561 bales last week and 138,302 bales the previous week, making the total receipts since the 1st of Sept., 1896, 5,757,122 bales, against 4,255,157 bales for the same period of 1895-6, showing an increase since Sep. 1, 1896, of 1,501,965 bales.

Speculation in cotton for future delivery has been more active. It has been, however, the result of liquidation by longs who have tired of carrying their holdings awaiting the arrival of an outside demand and have turned sellers. Prices consequently have suffered and for the week there has been something of a shrinkage in values. An increased movement of cotton to the ports and interior points was taken as an indication that the recent decreased receipts were due principally to poor condition of the roads, and this added to the weakness as did also advices from the Southern markets stating that the demand for spot cotton had fallen away and that prices were declining. The most pronounced weakness in the local market for futures was on Monday, when prices declined 9 to 14c. under active liquidation by tired longs. A slight recovery of 1 to 4 points followed on Tuesday as the pressure to sell was over and foreign advices gave some encouragement. Wednesday the market again turned weaker. There was renewed selling by tired longs, and as prices declined stop orders were reached, which added to the weakness. Foreigners were reported sellers of the next crop. The close was at a decline of 8 to 10 points for the day. Yesterday the market opened weak under easier Liverpool advices, but there was a quick rally on better advices from New England manufacturing centres. Then followed some irregularity with considerable "notching," operators realizing on March contracts and buying the later months. The close was easier. As compared with last Friday the final prices were 27 to 29 points lower for this crop and 20 points lower for the next crop. The representative of a leading house, who has just returned from an extended tour through the South, gave out an estimate of the crop at 8½ million bales. Cotton on the spot has been quiet. On Monday and Wednesday prices were lowered 16c. Yesterday the market was easy at 7 3/16c. for middling uplands.

The total sales for forward delivery for the week are 660,301 bales. For immediate delivery the total sales foot up this week 5,027 bales, including 3,599 for export, 1,328 for consumption, — for speculation and 100 on contract. The following are the official quotations for each day of the past week—February 6 to February 11.

Rates on and off middling, as established Nov. 22, 1893, and revised Dec. 11, 1895, by the Revision Committee at which grades other than middling may be delivered on contract:

Fair.....	0.1 1/4	on.	Good Ordinary.....	0.1	off.
Middling Fair.....	7/8	on.	Good Middling Tinged.....	7/8	Even.
Strict Good Middling.....	1 1/2	on.	Strict Middling Stained.....	7/32	off.
Good Middling.....	5/16	on.	Middling Stained.....	3/8	off.
Strict Low Middling.....	3/16	off.	Strict Low Mid. Stained.....	25/32	off.
Low Middling.....	3/8	off.	Low Middling Stained.....	1 1/4	off.
Strict Good Ordinary.....	1 1/8	off.			

On this basis the prices for a few of the grades would be as follows.

UPLANDS.	Sat.	Mon.	Tues.	Wed.	Th.	Fri.

THE VISIBLE SUPPLY OF COTTON to-night, as made up by cable and telegraph is as follows. The Continental stocks, as well as those for Great Britain and the afloat are this week's returns, and consequently all the European figures are brought down to Wednesday evening. But to make the totals the complete figures for to-night (Feb. 11), we add the item of exports from the United States, including in it the exports of Thursday only.

\* Last week's figures; this week's not received.

The imports into Continental ports the past week have been 83,000 bales.

The above figures indicate an increase in the cotton in sight to-night of 71,855 bales as compared with the same date of 1896, a falling off of 905,036 bales from the corresponding date of 1895 and a decrease of 535,057 bales from 1894.

AT THE INTERIOR TOWNS the movement—that is the receipts for the week and since September 1, the shipments for the week and the stocks to-night, and the same items for the corresponding period of 1895-96—is set out in detail below.

TOWNS.	This week.	Movement to February 11, 1897.		This week.	Movement to February 14, 1896.	
		Since Sept. 1, 1896.	Stock Feb. 11.		Since Sept. 1, 1896.	Stock Feb. 14.

\* This year's figures estimated.

† Last year's figures are for Newberry, S. C.

The above totals show that the interior stocks have decreased during the week 10,983 bales and are now 14,882 bales less than at same period last year. The receipts at all the towns have been 3,604 bales more than same week last year and since Sept. 1 they are 305,850 bales more than for same time in 1895-6.

RECEIPTS FROM THE PLANTATIONS.—The following table indicates the actual movement each week from the plantations. The figures do not include overland receipts nor Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the outports.

Week Ending—	Receipts at the Ports.			Stk at Interior Towns.			Rec'pts from Plant'ns.		
	1897.	1896.	1895.	1897.	1896.	1895.	1897.	1896.	1895.
Jan. 8....	104,537	135,322	207,746	552,905	565,410	549,651	170,267	117,069	175,441
" 15....	151,541	119,837	200,906	532,119	552,608	530,024	131,755	107,035	171,179
" 22....	130,160	112,395	213,026	502,917	533,698	507,180	100,958	93,476	190,482
" 29....	138,302	122,902	199,835	471,186	505,878	480,601	106,571	95,092	182,156
Feb. 5....	101,564	113,580	155,098	444,460	479,143	466,153	74,778	84,854	131,750
" 11....	105,654	100,446	132,989	433,417	458,279	442,252	91,682	85,582	108,825

The above statement shows: 1.—That the total receipts from the plantations since Sept. 1, 1895, are 6,669,945 bales; in 1895-96 were 4,680,736 bales; in 1894-95 were 6,891,406 bales.

2.—That although the receipts at the outports the past week were 105,654 bales, the actual movement from plantations was only 94,682 bales, the balance being taken from the stocks at the interior towns. Last year the receipts from the plantations for the week were 85,582 bales and for 1895 they were 108,825 bales.

OVERLAND MOVEMENT FOR THE WEEK AND SINCE SEPT. 1.—We give below a statement showing the overland movement for the week and since September 1. As the returns reach us by telegraph late Friday night it is impossible to enter so largely into detail as in our regular monthly report, but all the principal matters of interest are given. This weekly publication is of course supplementary to the more extended monthly statements. The results for the six days ending Feb. 11 and since Sept. 1 in the last two years are as follows.

February 11	1896-97.		1895-96.	
	Week.	Since Sept. 1.	Week.	Since Sept. 1.
Shipped—				
Via St. Louis	11,096	404,637	9,271	401,863
Via Cairo	6,117	215,857	4,563	185,628
Via Parker	536	11,360	70	13,278
Via Evansville		2,178		00
Via Louisville	2,362	107,451	3,142	102,054
Via Cincinnati	3,514	98,214	2,031	62,544
Via other routes, &c.	6,103	94,561	1,263	70,364
Total gross overland	29,728	934,258	20,340	835,791
Deduct shipments—				
Overland to N. Y., Boston, &c.	0,578	254,902	6,935	184,400
Between interior towns	25	3,163	17	2,487
Inland, &c., from South	411	24,691	1,480	32,178
Total to be deducted	10,014	282,716	8,432	219,065
Leaving total net overland*	19,714	651,542	11,908	616,726

\* Including movement by rail to Canada.

The foregoing shows that the week's net overland movement this year has been 19,714 bales, against 11,908 bales for the week in 1896, and that for the season to date the aggregate net overland exhibits an increase over a year ago of 34,816 bales.

In Sight and Spinners' Takings.	1896-97.		1895-96.	
	Week.	Since Sept. 1.	Week.	Since Sept. 1.
Receipts at ports to Feb. 11	105,665	5,757,122	106,446	4,255,157
Net overland to Feb. 11	19,714	651,542	11,908	616,726
Southern consumption to Feb. 11	19,000	485,000	19,000	479,000
Total marketed	144,379	6,893,604	137,354	5,350,883
Interior stocks in excess	10,983	312,823	20,864	425,579
Came into sight during week	133,396		116,490	
Total in sight Feb. 11		7,206,487		5,776,462
North's spinner's takings to Feb. 11	42,663	1,180,291	29,843	1,198,264

\* Decrease during week.

It will be seen by the above that there has come into sight during the week 133,396 bales, against 116,490 bales for the same week of 1896, and that the increase in amount in sight to-night as compared with last year is 1,431,023 bales.

WEATHER REPORTS BY TELEGRAPH.—Reports to us by telegraph from the South this evening so far as received indicate that rain has been general and that in a few localities the precipitation has been heavy. The temperature has been higher.

Texas.—No telegrams received.

New Orleans, Louisiana.—There has been rain on two days during the week, the precipitation reaching one inch and sixty-three hundredths. Average thermometer 51.

Columbus, Mississippi.—Rain has fallen on four days of the week to the extent of two inches and four hundredths. Average thermometer 54, highest 65, lowest 30.

Mobile, Alabama.—We have had heavy rain on three days of the past week, the rainfall being one inch and eighty-two hundredths. The thermometer has averaged 53, the highest being 67 and the lowest 40.

Montgomery, Alabama.—It has rained on four days of the week, the precipitation reaching one inch and sixty-four hundredths, and it is still raining. The thermometer has averaged 49, ranging from 40 to 57.

Madison, Florida.—There has been rain on three days, the precipitation reaching one inch and eighty hundredths. Average thermometer 58, highest 70 and lowest 41.

Savannah, Georgia.—There has been rain during the week to the extent of one inch and forty-seven hundredths on six days. The thermometer has averaged 54, ranging from 42 to 66.

Charleston, South Carolina.—It has rained on three days of the week to the extent of one inch and four hundredths. The thermometer has averaged 54, the highest being 64 and the lowest 44.

Stateburg, South Carolina.—We have had rain on three days of the week, the precipitation reaching three inches and forty hundredths. The thermometer has averaged 47<sup>8</sup>/<sub>16</sub>, ranging from 39 to 63.

Wilson, North Carolina.—There has been rain on two days of the week, the rainfall reaching seventy-seven hundredths of an inch. The thermometer has ranged from 30 to 64; averaging 49.

The following statement we have also received by telegraph, showing the height of the rivers at the points named at 5 o'clock February 10, 1897, and February 13, 1896.

	Feb. 10, '97.	Feb. 13, '96.
New Orleans	Above zero of gauge.	8-2
Memphis	Above zero of gauge.	11-2
Nashville	Above zero of gauge.	23-0
Shreveport	Above zero of gauge.	5-3
Vicksburg	Above zero of gauge.	19-1

EXCHANGES.—The following exchanges have been made during the week:

13 pd. to exch. 8,500 Mch. for May.	19 pd. to exch. 2,400 Mch. for J'ne.
04 pd. to exch. 700 Feb. for Mch.	01 pd. to exch. 800 Feb. for Mch.
03 pd. to exch. 800 Feb. for Mch.	25 pd. to exch. 1,100 Mch. for Aug.
18 pd. to exch. 1,000 Mch. for J'ne.	08 pd. to exch. 1,400 Apr. for May.
23 pd. to exch. 800 Mch. for July.	17 pd. to exch. 100 Apr. for Aug.
10 pd. to exch. 300 May for July.	05 pd. to exch. 200 June for Aug.
23 pd. to exch. 100 Mch. for Aug.	25 pd. to exch. 200 Mch. for July.
24 pd. to exch. 700 Mch. for Aug.	06 pd. to exch. 1,400 Apr. for May.
07 pd. to exch. 500 Apr. for May.	05 pd. to exch. 400 Nov. for Dec.
14 pd. to exch. 10,100 Mch. for May.	01 pd. to exch. 300 July for Aug.
11 pd. to exch. 500 May for Aug.	03 pd. to exch. 1,400 Dec. for Sep.
24 pd. to exch. 2,900 Mch. for July.	

INDIA COTTON MOVEMENT FROM ALL PORTS.—The receipts and shipments of cotton at Bombay have been as follows for the week and year, bringing the figures down to Feb. 11.

BOMBAY RECEIPTS AND SHIPMENTS FOR FOUR YEARS.

Year	Shipments this week.			Shipments since Sept. 1.			Receipts.	
	Great Britain.	Continent.	Total.	Great Britain.	Continent.	Total.	This Week.	Since Sept. 1.
'96-7	15,000	15,000	7,000	181,000	188,000	49,000	571,000	
'95-6	5,000	9,000	14,000	24,000	252,000	276,000	83,000	908,000
'94-5	15,000	15,000	2,000	65,000	87,000	32,000	872,000	
'93-4	1,000	1,000	13,000	207,000	220,000	58,000	619,000	

According to the foregoing Bombay appears to show a decrease compared with last year in the week's receipts of 14,000 bales and an increase in shipments of 1,000 bales, and the shipments since Sept. 1 show a decrease of 89,000 bales. The movement at Calcutta, Madras and other India ports for the last reported week and since the 1st of September, for two years, has been as follows. "Other ports" cover Ceylon, Tuticorin, Kurrachee and Coconada.

	Shipments for the week.			Shipments since Sept. 1.		
	Great Britain.	Continent.	Total.	Great Britain.	Continent.	Total.

**ALEXANDRIA RECEIPTS AND SHIPMENTS.**—Through arrangements we have made with Messrs. Davies, Benachi & Co., of Liverpool and Alexandria, we now receive a weekly cable of the movements of cotton at Alexandria, Egypt. The following are the receipts and shipments for the past week and for the corresponding week of the previous two years.

Alexandria, Egypt, February 10.	1896-97.	1895-96.	1894-95.
Receipts (cantars).....			
This week.....	145,000	130,000	135,000
Since Sept. 1.....	4,739,000	4,575,000	3,940,000
	<i>This week.</i>	<i>Since Sept. 1.</i>	<i>This week.</i>
Exports (bales).....	<i>Since Sept. 1.</i>	<i>This week.</i>	<i>Since Sept. 1.</i>
To Liverpool.....	10,000	233,000	10,000
To Continent.....	16,000	201,000	13,000
Total Europe.....	26,000	434,000	23,000
	439,000	462,000	20,000
	421,000		

\* A cantar is 93 pounds.  
† Of which to America in 1896-97, 23,017 bales; in 1895-96, 41,303 bales; in 1894-95, 28,624 bales.

This statement shows that the receipts for the week ending Feb. 10 were 145,000 cantars and the shipments to all Europe 26,000 bales.

**MANCHESTER MARKET.**—Our report received by cable to-night from Manchester states that the market is steady for both yarns and shirtings. The demand for both home trade and foreign markets is improving. We give the prices for to-day below and leave those for previous weeks of this and last year for comparison:

	1897.						1896.					
	32s Oop.	8 1/2 lbs. Shirts.	Cotton Mid.	32s Oop.	8 1/2 lbs. Shirts.	Cotton Mid.	32s Oop.	8 1/2 lbs. Shirts.	Cotton Mid.	32s Oop.	8 1/2 lbs. Shirts.	Cotton Mid.

**SEA ISLAND COTTON MOVEMENT.**—We have received this (Friday) evening by telegraph from the various ports the details of the Sea Island cotton movement for the week. The receipts for the week ending to-night (Feb. 11) and since Sept. 1, 1896, the stocks to-night, and the same items for the corresponding periods of 1895-96 are as follows.

	1896-97.		1895-96.		1897.	
Receipts to Feb. 11.	This week.	Since Sept. 1.	This week.	Since Sept. 1.	1897.	1896
Savannah.....	900	78,617	824	70,272	21,585	16,533
Charleston, &c.....	50	10,121	51	10,051	4,174	2,527
Florida, &c.....	293	8,262	45	4,783	4,783	2,038
Total.....	1,243	95,000	920	85,106	30,542	21,148

NOTE.—Figures for Savannah estimated.

The exports for the week ending this evening reach a total of 260 bales, of which 93 bales were to Great Britain, 167 to France and — to Reval, and the amount forwarded to Northern mills has been 993 bales. Below are the exports for the week and since September 1 in 1896-97 and 1895-96.

Exports from—	Week Ending Feb. 11.			Since Sept. 1, 1896.			North'n Mills.	
	Great Brit'n.	Fr'nce &c.	Total.	Great Brit'n.	Fr'nce &c.	Total.	Week.	Since Sept. 1.

Total 1895-96.....	172	116	288	23,601	5,573	34,174	822	30,169

Quotations Feb. 11 at Savannah, for Floridas, common, 9c.; medium fine, 11 1/2c.; choice, 14 1/2c.  
Charleston. Carolinas, medium fine, 17 1/2c. @ 18c.; fine, 19 @ 20c.; fully fine, 21 @ 23c.; extra fine, 28 to 35c.

**JUTE BUTTS, BAGGING, &C.**—There has been little or nothing doing in jute bagging during the week under review, but quotations are nominally unchanged at 4 1/2c for 1 1/2 lbs., 5c. for 2 lbs. and 5 1/2c for standard grades in a jobbing way. Car-load lots of standard brands are quoted at 4 1/2c for 1 1/2 lbs., 5c. for 2 lbs. and 5 1/2c. for 2 1/2 lbs. f. o. b. at New York. Jute butts are very dull at 11-16c. for paper quality, 1 1/4 @ 1 1/2c for mixing and bagging 1 and 1 1/4c. for spinning butts, all to arrive.

**EAST INDIA CROP.**—Messrs. Gaddum, Bythell & Co., of Bombay, make the following telegraphic report under date of January 28:

"Receipts do not increase as they should were the crop as large as expected some time ago by the more sanguine estimators. Some people maintain that the famine and plague have adversely affected the supplies intended for our market, but others consider the small figures to be only the natural result of a short crop. Forecasts regarding the yield from all India in 1896-7 now average about 31 per cent below last year, which would mean a deficit of one million bales. It is generally admitted that the Dhollera and Broach crops will in their turn prove considerably smaller than those grown last season. Our market is quiet but steady, except for Bangals and Broach, which are in good demand. Advancing exchange is perhaps the most noticeable feature of the week."

**DOMESTIC EXPORTS OF COTTON MANUFACTURES.**—We give below a statement showing the exports of domestic cotton manufactures for December and for the twelve months ended Dec. 31, 1896, and for purposes of comparison like figures for the corresponding periods of the previous year are also presented:

Quantities of Manufactures of Cotton (colored and uncolored) exported to—	Month ending Dec. 31, 1896.	1895.	12 mos. ending Dec. 31, 1896.	1895.

THE EXPORTS OF COTTON from New York this week show a decrease compared with last week, the total reaching 10,766 bales, against 21,813 bales last week. Below we give our usual table, showing the exports of cotton from New York, and the direction, for each of the last four weeks; also the total exports and direction since Sept. 1, 1896, and in the last column the total for the same period of the previous year.

EXPORTS OF COTTON (BALES) FROM NEW YORK SINCE SEPT. 1, 1896.

**COMPARATIVE PORT RECEIPTS AND DAILY CROP MOVEMENT.**  
—A comparison of the port movement by weeks is not accurate as the weeks in different years do not end on the same day of the month. We have consequently added to our other standing tables a daily and monthly statement, that the reader may constantly have before him the data for seeing the exact relative movement for the years named. The monthly movements since September 1, 1896, and in previous years, have been as follows:

Monthly Receipts	Year Beginning September 1.					
	1896.	1895.	1894.	1893.	1892.	1891.
Sept'mbr	912,486	943,886	518,762	377,408	405,355	676,823
October	1,468,511	1,302,400	1,022,664	1,311,279	1,135,473	1,532,426
November	1,286,251	912,759	1,607,662	1,272,776	1,125,855	1,376,909
December	1,256,000	987,839	1,497,560	1,238,738	930,029	1,215,144
January	635,978	549,118	939,197	687,028	436,457	665,162
Total	5,379,131	4,035,127	6,184,945	4,888,219	4,033,189	5,466,464
Percentage of total port receipts Jan. 31..	75.35	79.46	81.70	79.70	76.33	

This statement shows that up to January 31 the receipts at the ports this year were 1,524,909 bales more than in 1895-96 and 625,714 bales less than in 1894-95. By adding to the totals to January 31 the daily receipts since that time we shall be able to reach an exact comparison of the movement for the different years.

	1896-97.	1895-96.	1894-95.	1893-94.	1892-93.	1891-92.
To Jan 31	5,559,131	4,035,127	6,184,945	4,888,219	4,033,189	5,466,464
Feb. 1....	18,192	15,242	33,520	8,558	11,778	24,498
" 2....	21,794	8	22,797	17,014	12,636	30,366
" 3....	11,222	22,277	8	14,247	10,188	22,064
" 4....	15,662	23,108	31,435	8	11,759	18,668
" 5....	15,656	14,581	27,96	24,316	8	32,028
" 6....	14,171	15,781	21,938	18,665	15,960	29,013
" 7....	8	22,507	13,192	5,368	17,747	8

" 10....	17,756	20,313	8	12,100	11,802	22,477
" 11....	35,662	23,369	24,904	8	9,650	26,235
Total	5,757,122	4,208,891	6,414,875	5,016,432	4,158,594	5,738,156
Percentage of total port receipts Feb. 11	78.03	81.89	84.00	81.15	80.17	

This statement shows that the receipts since Sept. 1 up to to-night are now 1,548,223 bales more than they were to the same day of the month in 1896 and 657,756 bales less than they were to the same day of the month in 1895. We add to the table the percentages of total port receipts which had been received to February 11 in each of the years named.

**SHIPPING NEWS.**—The exports of cotton from the United States the past week, as per latest mail returns, have reached 153,831 bales.

	Total bales.

## BREADSTUFFS.

THURSDAY, February 11, 1897.

The market for wheat flour has been without changes or new features of an interesting nature during the past week. The amount of business transacted has been small, as the home trade has limited its purchases to a few hand-to-mouth orders and the export demand has been flat. Values, however, have held about steady, as stocks in sellers' hands were limited and there was no attempt to hurry business. Rye flour has sold slowly, but no changes have occurred in prices. Demand for buckwheat flour has been limited to a few jobbing orders; prices have been unchanged. Corn meal has been quiet but about steady.

There has been a moderate amount of activity to the speculative dealings in the market for wheat futures, and the tendency of prices early in the week was towards a slightly higher basis. Saturday prices advanced  $\frac{1}{2}$  @  $\frac{5}{8}$  c., and on Tuesday there was a further gain of  $\frac{1}{4}$  to  $\frac{1}{2}$  c. The strength came principally from the West, where it was reported that some of the large operators were working on the bull side of the market, owing it was stated, to the strength of the statistical position. Foreign advices came slightly stronger, and this also added to the strength of the market. Wednesday there was a decline. The buyers early in the week turned sellers, and dull and easier foreign advices had a depressing influence.

To-day the dealings were devoid of spirit and chiefly of a local scalping character, with the drift downward in the absence of good support, owing in part to discouraging cables. There has been only limited spot dealings, exporters having few orders, and generally at lower limits. F. o. b. rates as follows: No. 1 hard Duluth, 92 $\frac{1}{4}$  c.; No. 1 Northern, 86 $\frac{1}{2}$  c.; No. 2 red, 91 $\frac{1}{4}$  c.

## DAILY CLOSING PRICES OF NO. 2 RED WINTER WHEAT.

	Sat.	Mon.	Tues.	Wed.	Thurs.	Fri.
February delivery.....c.	84 $\frac{1}{2}$	84 $\frac{1}{2}$	85	83 $\frac{3}{4}$	82 $\frac{3}{4}$	Holiday
March delivery.....c.	85 $\frac{1}{2}$	85 $\frac{1}{2}$	86 $\frac{1}{2}$	84 $\frac{1}{2}$	83 $\frac{1}{2}$	
May delivery.....c.	82 $\frac{1}{2}$	82 $\frac{1}{2}$	83 $\frac{1}{2}$	82 $\frac{1}{2}$	81 $\frac{1}{2}$	
July delivery.....c.	79 $\frac{1}{2}$	79 $\frac{1}{2}$	80	79	78 $\frac{1}{2}$	
September delivery.....c.	77 $\frac{1}{2}$	77 $\frac{1}{2}$	77 $\frac{1}{2}$	76	75 $\frac{1}{2}$	

There continued a slow and uninteresting market for Indian corn futures. There was practically no speculative interest, and under the weight of large supplies prices have continued to gradually sag. The export demand both here and at out-ports has shown something of a shrinkage and this has had a tendency to weaken values. To-day the operations were unimportant and the variations slight, although a weaker tendency prevailed, owing largely to the continued abundant movement from the West. Spot prices weakened slightly, leading to only a fair export business, mainly for March to June shipment. No. 2 for early loading quoted 2 $\frac{3}{4}$  @ 29 f. o. b. alfalfa, No. 2 for local account 29 $\frac{3}{4}$  delivered.

## DAILY CLOSING PRICES OF NO. 2 MIXED OATS.

	Sat.	Mon.	Tues.	Wed.	Thurs.	Fri.
February.....c.	29 $\frac{1}{2}$	28 $\frac{3}{4}$	28 $\frac{3}{4}$	28 $\frac{1}{2}$	28 $\frac{1}{2}$	Holl.
May delivery.....c.	30 $\frac{1}{2}$	29 $\frac{3}{4}$	29 $\frac{3}{4}$	29 $\frac{1}{2}$	29 $\frac{1}{2}$	day.
July delivery.....c.	31 $\frac{1}{2}$	30 $\frac{3}{4}$	30 $\frac{3}{4}$	30 $\frac{1}{2}$	30 $\frac{1}{2}$	

The speculative dealings in the market for oats for future delivery have been decidedly slow, and prices show fractional declines from those quoted a week ago in sympathy with the easier market for corn. In the spot market a moderate amount of business has been transacted, as both shippers and the home trade have been fair buyers, and prices have held steady. To-day the market was dull, flat and featureless. Spot trade was dull and prices easier, especially on No. 2 white, quoted 23 @ 23 $\frac{1}{4}$  c. in elevator, and No. 2 mixed 21 $\frac{1}{4}$  c.

## DAILY CLOSING PRICES OF NO. 2 MIXED OATS.

	Sat.	Mon.	Tues.	Wed.	Thurs.	Fri.
February delivery.....c.	21 $\frac{1}{2}$	21 $\frac{1}{2}$	21 $\frac{1}{2}$	21 $\frac{1}{2}$	21 $\frac{1}{2}$	Holl.
May delivery.....c.	22 $\frac{1}{2}$	21 $\frac{1}{2}$	21 $\frac{1}{2}$	21 $\frac{1}{2}$	21 $\frac{1}{2}$	day.
July delivery.....c.	23	22 $\frac{3}{4}$	22 $\frac{3}{4}$	22 $\frac{1}{2}$	22	

Rye was slightly firmer early in the week, with a fair trade in No. 2 Western to arrive at opening of navigation, but later a decline of  $\frac{1}{4}$  c. occurred. Barley weakened slightly, leading to a fair trade in feeding grades.

## AGRICULTURAL DEPARTMENT REPORT ON FARM ANIMALS.—

The Agricultural Department's report on farm animals was issued on February 10 as follows:

The returns for January upon comparative numbers and values of farm animals show as the total number of horses 14,365,000, mules 2,218,000, milch cows 1,942,000, oxen and other cattle 30,508,000, sheep 36,819,000, and swine 40,607,000.

The average farm prices per head are estimated for horses \$31 45, mules \$11 70, milch cows \$23 16, oxen and other cattle \$16 54, sheep \$1 83, swine \$1 12. The aggregate values are for horses \$451,300,000, mules \$24,400,000, milch cows \$369,300,000, oxen and other cattle \$504,500,000, sheep \$67,500,000, swine \$167,400,000; grand total, \$1,632,900,000.

In number there appears to be a decrease of 5 per cent in horses, 2-3 per cent in mules, 1-2 per cent in milch cows, 4-9 per cent in oxen and other cattle, 3-9 per cent in sheep and 5-2 per cent in swine during the year. Horses and mules are increasing to the South Atlantic and Gulf States but decreasing generally elsewhere. Milch cows are increasing in the Rocky Mountain and Pacific States, while nearly stationary eastward. Several Rocky Mountain States show an increase in other cattle, also in sheep. The same region, as well as the South Atlantic, reports an increase in swine. The great Central States show a general decrease in all stock, so that the movement in number reported a year ago still continues.

The destruction of sheep by dogs was large in the South. The percentage in the whole country, excluding the Rocky Mountain ranges, was 1-1 per cent, or about 250,000 in all.

In average price, there is a falling off of 5 to 8 per cent shown by horses, mules and swine, and a further increase of 3 to 7 per cent by cattle and sheep.

In total value, horses, mules and swine have declined 10 per cent each, and oxen and other cattle 1 per cent, while milch cows have increased 1 per cent, and sheep 3 per cent, since January, 1896. Decrease in grand total, 4 per cent, about \$75,000,000.

The movement of breadstuffs to market as indicated in the statements below is furnished to us by the Statistician of the New York Produce Exchange. We first give the receipts at Western lake and river ports, arranged so as to present the comparative movement for the week ending Feb. 6, 1897, and since August 1, for each of the last three years:

## THE DRY GOODS TRADE.

NEW YORK, THURSDAY, P. M., Feb. 11, 1897.

The week opened with a generally quiet tone, but the market was soon stirred up by news of a very heavy transaction in print cloths, M. C. D. Borden, representing the American Printing Company, buying 750,000 pieces of regulars at 2 9-16c., 1-16 of a cent above the then market price. The purchase was divided into 500,000 pieces spots (practically cleaning up the stock of extras on hand) and 250,000 pieces futures. The effect on the print cloth market has been marked, good sales being made since at an advance of 1/16c., and the whole market here has shown an improvement in general tone with a gradual expansion in the demand for converted and printed goods and for brown goods more or less akin to print cloths in construction. Sellers take a more hopeful view of the future, and although prices have not advanced anywhere, there has unquestionably been some correction of previously weak tendency in some quarters. Reports from local and out-of-town jobbers are generally encouraging, a good distribution of spring and staple merchandise being recorded, and with the more confident feeling prevailing, supplementary business at first hands is expected to be well sustained. In the woolen goods division of the market good progress has been made this week in new heavy-weights, and light-weights are still selling better than usual for the time of year.

**DOMESTIC COTTON GOODS**—The exports of cotton goods from this port for the week ending Feb. 9 were 1,071 packages, valued at \$61,532, their destination being to the points specified in the tables below:

NEW YORK TO FEBRUARY 9.	1897.		1896.

\* From New Zealand mill points direct.

The value of the New York exports for the year to date has been \$1,326,492 in 1897 against \$1,231,725 in 1896.

There has been an improvement in light-weight coarse yarn brown goods this week, and sales of fair quantities have been made at prices which buyers refused to pay last week. In heavy-weight sheetings and drills business has been moderate, but the tone has been firmer throughout. Medium and fine grade bleached goods are selling better at the close of the

week at steady prices, and in low grade bleached the market has a firmer tendency. Kid-finished cambrics are in better request and against buyers in leading makes. Wide sheetings and cotton flannels and blankets quiet and unaltered. Sales of denims are on a limited scale and again mostly in light-weights without change in price. Other coarse, colored cottons dull and generally easy to buy. Regular prints have been in better demand than for a considerable time past, with a steadier tone prevailing. Fancy calicoes are steady with fair sales, and a fair demand is also reported for fine specialties. Fine dress gingham have been re-ordered with a little more freedom, but low grades are still inactive. Staples quiet and unchanged. The print cloth market closes the week with a very strong tone at an advance of 1/16c., extras being in request at 2 11-16c., and odds in good demand on that basis. The sales are the largest for any single week on record, as in addition to the 750,000 pieces already referred to some 400,000 pieces have probably changed ownership.

**WOOLEN GOODS.**—There has been a good attendance of buyers in this division of the market during the week and more business has been done through the combination of store trade and mail orders than for a considerable time past. The new lines of heavy-weight woollens and worsteds have brought out the bulk of this, but still the demand for supplementary supplies of light-weights has been quite full for this time of the year. There is a marked preference in both heavy and light-weights for medium and low priced qualities in fancy woollens and worsteds, the great bulk of the buying being in lines selling under \$1.00 per yard. A few agents have done so well on their fall goods that they are withdrawing samples from the market. Prices are generally steady, but some unexpectedly low quotations have been made in Clay mixtures. Overcoatings are in rather better request and more business is reported in cloakings, plain goods being the best sellers in both. Satinets and cotton-warp cassimeres show better results. Flannels are dull, but a moderate business is reported in blankets. Re-orders for dress goods, both staple and fancies, have been fair in a generally steady market.

**FOREIGN DRY GOODS.**—With a good attendance of buyers a fair general business has been reported in foreign merchandise. Dress goods have been more freely ordered in fancies at 75c. and upwards, and silks have been in steady request and generally firm. Linens are quiet. Ribbons and laces in fair demand. Hosiery and underwear quiet.

## IMPORTATIONS AND WAREHOUSE WITHDRAWALS OF DRY GOODS

The importations and warehouse withdrawals of dry goods at this port for the week ending February 11, 1897, and since January 1, 1897, and for the corresponding periods of last year are as follows:

IMPORTS ENTERED FOR CONSUMPTION FOR THE WEEK AND SINCE JANUARY 1, 1897 AND 1896.	Week ending Feb. 11, 1897.	Since Jan. 1, 1897.	Week ending Feb. 12, 1896.	Since Jan. 1, 1896.

## STATE AND CITY DEPARTMENT.

## TERMS OF SUBSCRIPTION.

THE INVESTORS' SUPPLEMENT will be furnished *without extra charge* to every annual subscriber of the **COMMERCIAL AND FINANCIAL CHRONICLE**.

THE STATE AND CITY SUPPLEMENT will also be furnished *without extra charge* to every subscriber of the **CHRONICLE**.

THE STREET RAILWAY SUPPLEMENT will likewise be furnished *without extra charge* to every subscriber of the **CHRONICLE**.

THE QUOTATION SUPPLEMENT, issued monthly, will also be furnished *without extra charge* to every subscriber of the **CHRONICLE**.

TERMS for the **CHRONICLE** with the four Supplements above named are Ten Dollars within the United States and Twelve Dollars in Europe, which in both cases includes postage.

## Terms of Advertising—(Per inch space.)

One time.....	\$3 50	Three Months (13 times).....	\$25 00
One Month.....	11 00	Six months (28 times).....	43 00
Two Months.....	18 00	Twelve Months (52 times).....	58 00

(The above terms for one month and onward are for standing cards.)

The purpose of this State and City Department is to furnish our subscribers with a weekly addition to and continuation of the **STATE AND CITY SUPPLEMENT**. In other words, with the new facts we shall give, the amplifications and corrections we shall publish, and the municipal laws we shall analyze in the "State and City Department," we expect to bring down weekly the information contained in the **STATE AND CITY SUPPLEMENT** to as near the current date as possible. Hence every Subscriber will at all times possess a complete and fresh cyclopædia of information respecting Municipal Debts.

## REVIEW OF MUNICIPAL BOND SALES IN JANUARY.

According to our record of municipal bond sales, the total of these securities marketed during last month was over 10 millions of dollars, or nearly as large as during December, when the aggregate reached 10½ millions of dollars. This amount is to be compared with \$6,534,858 during January, 1896, when the offerings were small on account of the approaching Government bond sale.

Among the noteworthy sales in January was that of \$4,400,000 of Philadelphia 3½ per cents of 1905-1924 at 104-3799. Other large sales were: Allegheny, Pa., 4s of 1901-1926, \$400,000, at 105-78; Chicago Sanitary District 4½s of 1898-1917, \$800,000, at 102-146, and Springfield, Mass., 4s of 1917, \$350,000 at 101-7514.

We omit from our table the \$4,000,000 of New York State canal bonds, bids for which were received and opened during the past month, as a bill has passed the State Senate exempting from taxation all State bonds hereafter issued, and is now before the Assembly. If the bill becomes a law, these bonds will again be offered for sale.

In the following table we give the prices which were paid for January loans to the amount of \$9,870,776, issued by 55 municipalities. The aggregate of sales for which no price has been reported is \$531,000, and the total sales for the month, \$10,401,776. In the case of each loan reference is made to the page of the **CHRONICLE** where a full account of the sale is given.

† Optional after this date. : Average. \* Notes.

In the **CHRONICLE** of January 9 1897, page 93, a list of December bond sales amounting to \$10,634,087 will be found. Since the publication of that statement we have received the following reports.

## ADDITIONAL DECEMBER BOND SALES.

Page.	Location.	Rate.	Maturity.	Amount.	Award.
146..	Denver, Col.....	6	1904*	\$200	100*
96..	St. Albans Academy & Graded Sch. Dist., Vt.....	4	Dec. 30, 1926	30,000	102-56

\* Subject to call.

These additional loans will make the total sales reported in December foot up \$10,664,287.

We append the following statement, showing the bond sales of each month during the last four years, the amount for December being corrected so as to include the sales above recorded.

Jersey City, N. J.—*Water Contract*.—Incorrect reports being current in regard to the water contract between this city and the East Jersey Water Co., we give the following official statement regarding the same:

"The city contracted with the East Jersey Water Co. under date of October 12, 1895, for a temporary water supply for the term of one year. The city has the privilege since October 12, 1896, of annulling the contract upon three months' notice, but if such notice is not given the company

## JANUARY BOND SALES.

Pa	Location.	Rate.	Maturity.	Amount.	Award.
94..	Allegheny, Pa.....	4	1901-1926	\$400,000	105-78
94..	Ann Arbor, Mich.....	5	.....	10,800	100-23
94..	Athens, Ohio.....	5	1907	4,800	102-61
244..	Barnesville, Ohio.....	6	1898-1912	13,936	107-917
244..	Camden, N. J.....	4	1917-1922	100,000	102*
146..	Charles County, Md.....	4	Jan. 1, 1907	8,000	105-107

is compelled to supply the water until September, A. D. 1900. The price is \$43 per million gallons for the minimum supply of 20 million gallons per day, and scales down from that to \$22 per million gallons for a maximum supply of 50 million gallons per day. The Mayor has under consideration the award of a contract to the same company based upon their proposal for a permanent supply for 25 years, the price to be \$35 per million gallons for a minimum supply (daily) of 20 million gallons, but the city has the option of purchasing the plant at any time after the expiration of five years from the date of contract for \$6,990,000.

**Bond Proposals and Negotiations.**—We have received through the week the following notices of bonds recently negotiated and bonds offered and to be offered for sale.

**Anoka, Minn.—Bond Sale.**—It is reported that 5 per cent refunding bonds of this municipality have been sold at 105.

**Atlantic City, N. J.—Bond Sale.**—It is reported that this city has sold the \$10,000 of improvement bonds which were not awarded on Jan. 30, 1897, to the E. C. Jones Co., of New York, at 101-01.

**Augusta, Ga.—Bond Offering.**—Proposals will be received until 12 o'clock noon, February 27, 1897, by W. B. Young, Mayor, for the purchase of \$63,000 of 4 per cent bonds of this city. The securities will be dated April 1, 1897, interest will be payable semi-annually on the first days of April and October, and the principal will mature thirty years from date of issue. These bonds will be of the denominations of \$100, \$250 and \$500, and are to be issued to retire a like amount of bonds maturing April 1, 1897.

Each bid must be accompanied by a certified check on some bank in this city for 5 per cent of the amount of such bid and no bid for less than par will be considered.

**Baltimore, Md.—Bond News.**—The ordinance under which the \$1,453,300 of 3½ per cent stock of this was issued provides that the Mayor shall certify to its adoption to the City Council. This he has not done, and it is the opinion of some of the prominent lawyers of the city that his failure to do so will affect the validity of the above issue.

**Barton, Vt.—Bond Offering.**—Proposals will be received until 7 o'clock, P. M., to-day by F. W. Baldwin, Clerk of Trustees, for the purchase of \$30,000 of 4 per cent refunding electric-light bonds of this village. The securities will be dated January 1, 1897, interest will be payable semi-annually on the first days of January and July at the Hancock National Bank of Boston, Mass., and the principal will mature January 1, 1927, the bonds being subject to call after 1907. The total debt of the village, including this issue, is \$55,000; assessed valuation, \$413,311; real valuation, \$826,622, and the population about 1,100.

**Bluffton, Ohio.—Bond Offering.**—Proposals will be received until 6:30 o'clock P. M. March 1, 1897, by Charles Gustwiller, Village Clerk, for the purchase of \$8,000 of 6 per cent bonds of this village. The securities will be dated March 1, 1897, interest will be payable semi-annually at the Village Treasurer's office, and the principal will mature at the rate of \$500 per annum from March 1, 1900, to March 1, 1915, inclusive.

The bonds will be of the denomination of \$500 and are to be issued to provide funds for the construction of an electric-light plant. Bids for less than par and accrued interest will not be considered, and each bid must be accompanied by a certified check for \$500. The assessed valuation of the village is \$292,903; real valuation, \$900,000, and the population about 1,900.

**Bryan, Ohio.—Bond News.**—About four years ago this city issued \$45,000 of 6 per cent water-works bonds. The parties holding them, inasmuch as there was some question as to their validity, agreed to accept refunding bonds for the same amount, but at one-half of one per cent lower rate of interest, if the bonds could be made perfectly legal.

The City Council then voted to issue \$2,500 of bonds to the party negotiating the refunding loan, under the plea of keeping the faith of the original contract, which called for an interest rate of 5½ per cent. A petition was then filed by some of the leading citizens of the town asking for an injunction to prevent the issuance of the \$2,500 of bonds, and the request was granted by the Probate Court. No further action has yet been taken in regard to the matter.

**Buffalo, N. Y.—Bond Sale.**—On February 5, 1897, City Comptroller Erasmus A. Knight opened the proposals for the purchase of the \$500,000 of school bonds and \$55,000 of park bonds of this city. The securities were awarded as follows:

**\$500,000 SCHOOL BONDS.**

Buffalo Savings Bank, Buffalo, N. Y., \$200,000.....	102-12

These securities are dated January 1, 1897, and bear interest at the rate of 3½ per cent, payable semi-annually on the first days of January and July at the office of the Comptroller, or at the Gallatin National Bank, New York City.

The bonded debt of the City of Buffalo on the first day of January, 1897, less the amount held in sinking funds, was \$12,125,902 18. The assessed valuation of the taxable real estate of the city by the rolls of the year 1896 is \$225,485,795.

**Cambridge, Mass.—Bonds Proposed.**—It is reported that the city of Cambridge will petition the Legislature for authority to issue an additional water loan of \$1,000,000.

**Camden, N. J.—Bond News.**—On February 9, 1897, the Finance Committee awarded \$400,000 of the city's water bonds to the E. C. Jones Co. at private sale. Their bid was 101 for \$200,000 and 103 for the remainder, providing the city is placed on the New York State Savings Fund list. Certain members of the committee contended that such a sale was not fair to the city, as there was a good demand for the bonds and that better bids would have been received had there been a public sale. Upon their petition to the Court an injunction was granted preventing the sale of the bonds to the E. C. Jones Co. at the above bid. This action will stop the work on the new water system.

**Columbus, Miss.—Bond News.**—H. M. Lanier, City Marshal, reports to the CHRONICLE that the United States Supreme Court has decided that the bonds issued by this city to aid the Columbus Fayette & Decatur R.R. are a valid debt of this city. A new loan at a lower rate of interest will be made to refund the bonds now outstanding.

**Essex County, N. J.—Bond News.**—E. L. Conklin, County Auditor, reports to the CHRONICLE that there is a possibility of an amendment being attached to the bill about to be brought up before the State Legislature authorizing this county to issue \$1,500,000 of bonds, to the effect that the issuance of these bonds be submitted to a vote of the people in April, 1898.

**Fond du Lac, Wis.—Bond Sale.**—It is reported that Farnson, Leach & Co., of Chicago, have been awarded \$60,000 of refunding bonds of Fond du Lac at a premium of \$1,437 80. The securities will bear interest at the rate of 4½ per cent and the principal will mature in 1917, with option of call after 1907.

**Graham, Va.—Bonds Proposed.**—It is reported that bonds of this city to pay the cost of constructing water works and an electric-light plant are under consideration.

**Grenada, Miss.—Bonds Authorized.**—It is reported that the people of this municipality have authorized the issuance of water-works and sewer bonds to the amount of \$40,000.

**Grove City, Pa.—Bond Sale.**—Six thousand dollars of 5 per cent five-year bonds of this municipality have been sold at par.

**Grundy Centre, Iowa.—Bond Sale.**—It is reported that school bonds of this municipality to the amount of \$10,000 and bearing interest at the rate of 5 per cent have been sold at 100-11.

**Hamilton County, Ohio.—Bond Offering.**—Proposals will be received until 12 o'clock noon to-day by the Board of Commissioners for the purchase of \$3,000 4 per cent "Restored Plat Bonds" of this county. The securities will be dated Feb. 13, 1897, interest will be payable semi-annually, and the principal will mature February 13, 1904. The bonds will be of the denomination of \$500. No bid for less than par and accrued interest will be considered, and each bidder must enclose with his proposal a certified check for \$100 payable to the order of Tilden R. French, Treasurer of the County.

**Harrietstown Union Free School District No. 1, N. Y.—Bond Sale.**—On February 2, 1897, the \$8,000 of bonds of this district were awarded to W. J. Hayes & Sons, of Cleveland, Ohio, at par, interest and \$85 premium. Geo. M. Hahn, of New York City, also bid for the loan at 102-29. The securities

are of the denomination of \$1,000 each, and are dated January 1, 1897. Interest at the rate of 4½ per cent is payable annually, and the principal matures at the rate of \$1,000 yearly from 1898 to 1905, inclusive.

**Hoboken, N. J.—Bond Sale.**—It is reported that this city has sold sewer bonds to the amount of \$10,000, bearing interest at the rate of 4 per cent at par.

**Holyoke, Mass.—Note Sale.**—The Boston News Bureau reports that Bond & Goodwin have been awarded \$100,000 of nine-months' notes of Holyoke at 3.07 per cent discount and \$3 premium. Eleven other bids were received for the loan.

**Houston, Texas.—Bonds Proposed.**—It is reported that improvement bonds of this city to the amount of \$25,000 have been proposed.

**Jersey City, N. J.—Bonds Proposed.**—This city expects to issue \$19,500 of bonds at a rate not exceeding 4½ per cent. The proceeds from \$12,000 of the issue will be applied to the erection of a new engine house, the remainder to be used for the purchase of a site for a new police station.

**Johnstown, N. Y.—Bond News.**—Walter Stanton & Co., of New York, to whom were awarded the \$5,000 of 4 per cent bonds of this city have refused to accept the same on the ground that they are invalid. The loan was issued for the purpose of refunding bonds to the same amount heretofore issued by the former town of Johnstown. The municipal law states that bonds may only be issued to refund the city's indebtedness, while this was a debt of the old town of Johnstown. The State Legislature will be petitioned to grant the necessary relief.

**Kanawha County, W. Va.—Bonds Proposed.**—The citizens of this county have petitioned the State Legislature for permission to issue bonds to provide for the construction of a bridge across the Kanawha River.

**Knox County, Tenn.—Bonds Proposed.**—It is reported that Knox County proposes to issue bonds to an amount not exceeding \$150,000 for the purpose of funding the floating debt.

**Le Roy, Minn.—Bond Offering.**—Proposals will be received by A. R. Williams, Village Recorder, until 7 o'clock P. M., February 27, 1897, for the purchase of \$8,000 of bonds of this village, each bid stating the rate at which the loan will be taken. The securities are dated August 1, 1896, interest will be payable annually at the rate determined upon, and the principal will mature August 1, 1916, the bonds being subject to call after 1906. The securities are of the denomination of \$1,000 and are to be issued to provide funds for the construction of water-works.

**Lowell, Mass.—Bond Sale.**—On February 8, 1897, Bond & Goodwin loaned this city \$100,000 until October 31, 1897, at 3.03 per cent.

**Mabel, Minn.—Bond Sale.**—It is reported that this municipality has sold \$5,000 of water works bonds at 102.00

**Macon, Ga.—Bond Sale.**—On February 9, 1897, the \$130,000 of paving bonds of this city were awarded to E. D. Sheppard & Co. at 103½. The securities bear interest at the rate of 4½ per cent and the principal will mature in thirty years from date of issue. They are of the denominations of \$100 and \$500.

**Massachusetts Bond Sale.**—On February 8, 1897, State Treasurer Shaw awarded the \$6,000,000 of Metropolitan Water Loan bonds to a syndicate composed of Kidder, Peabody & Co., J. P. Morgan & Co. and Blake Bros. & Co. at 107.82.

The other bids received were:

Security & Trust Co., New York, N. Y.	107.19
J. W. Seligman & Co., New York, N. Y.	107.11
E. H. Rollins & Sons, Boston, Mass.	106.77

The securities are issued in the form of coupon bonds of the denomination of \$1,000, dated July 1, 1895. Interest at the rate of 3½ per cent from January 1, 1897, is payable semi-annually on January 1 and July 1, and the principal will mature July 1, 1935.

Principal and interest are payable in gold at the office of the Treasurer of the Commonwealth in Boston.

**Mohawk, N. Y.—Bond Sale.**—It is reported that Mohawk has disposed of \$12,000 of electric-light bonds at 102.03. The securities will bear 4 per cent interest.

**New Bedford, Mass.—Bond Offering.**—Proposals will be received until 7:30 P. M., February 19, 1897, for the purchase of \$200,000 of 4 per cent thirty-year water bonds, \$172,000 of 4 per cent ten-year improvement bonds, \$128,000 of 4 per cent twenty-year public-building and school-house bonds and \$89,000 of 4 per cent thirty-year sewer bonds. Interest on these securities will be payable semi-annually and principal and interest will be payable in gold. Each bid must be accompanied by a certified check for 2 per cent of the amount bid for.

**New Mexico.—Bond Offering.**—Proposals will be received until 12 o'clock noon March 8, 1897, by Samuel Eldodt, Territorial Treasurer, for the purchase of \$75,000 of 5 per cent capital rebuilding bonds of the territory. \$25,000 of the securities are dated May 1, 1895, and \$50,000 are dated Nov. 1, 1895. The interest will be payable semi-annually on the first days of May and November at the National Bank of Commerce in the city of New York, and the principal will mature in thirty years from the above dates of issue, the bonds being subject to call after 1915. All coupons maturing up to and including the 1st day of May, 1897, will be removed from the

bonds before sale and delivery, and no bids below par will be accepted. Provision has been made for raising a fund for payment of the interest and for the establishment of a sinking fund for the payment of the principal beginning in the year 1915.

**Nevada City, Cal.—Bonds Authorized.**—The people of this city have voted to issue school-house bonds to the amount of \$10,000.

**Norfolk, Va.—Bonds Proposed.**—It is reported that Norfolk proposes to issue \$20,000 of sidewalk bonds.

**Pierce County, Wash.—Bond Sale.**—It is reported that this county has disposed of funding bonds to the amount of \$60,000. The loan bears interest at the rate of 6 per cent and matures in 1917.

**Portland, Me.—Bond Offering.**—Proposals will be received at the office of the City Treasurer until 12 o'clock noon, Feb. 25, 1897, for the purchase of \$31,000 of registered bonds of this city, the bids stating the rate of interest at which the loan will be taken. The securities will be dated March 1, 1897, and the principal will be payable either in this city or in Boston on July 1, 1897. The bonds are to be of the denominations of \$1,000 or multiples thereof and are to be issued to renew the loan maturing March 1, 1897. Bids for a rate of discount will not be considered.

**St. Johnsbury, Vt.—Bond Sale.**—On Feb. 10, 1897, the \$20,000 of 4 per cent bonds of this village were awarded to the National Life Insurance Company of Montpelier, Vt., at 103.87. There were 17 other bids. The securities are dated Feb. 1, 1897, interest is payable semi-annually on the first days of June and December at the First Nat. Bank of St. Johnsbury, Vt., or the North National Bank of Boston, Mass., and the principal will mature as follows: \$4,000 Dec. 1, 1907; \$4,000 Dec. 1, 1908; \$4,000 Dec. 1, 1909; \$4,000 Dec. 1, 1910; \$4,000 Dec. 1, 1911. The denomination of the securities is \$500. The total indebtedness of the village, including this issue, is \$94,700. This does not include the water debt, which amounts to \$37,500. The assessed valuation for 1896 was \$3,406,927; the real valuation (estimated) is \$5,000,000, and the population is estimated at 4,500.

**Shelby, Ohio.—Bond Issue.**—It is reported that the Board of Education of this place will issue bonds bearing interest at the rate of 6 per cent for the erection of new school buildings.

**Sidney, Iowa.—Bond Offering.**—Proposals will be received by W. A. Webster, Town Recorder, until 3 P. M. February 20, 1897, for the purchase of \$10,000 water-works bonds of this town.

**Sioux City, Ia.—Bond Call.**—Notice has been given that improvement bonds, "C" 171 to 206, both inclusive, are called for payment and will be redeemed upon presentation at the Northwestern National Bank of this city. The securities will cease to bear interest March 1, 1897.

The official notification of this call will be found among the advertisements elsewhere in this Department.

**Snohomish County, Wash.—Bond News.**—The Auditor of this county reports to the CHRONICLE that the county has been enjoined from issuing the proposed \$130,000 of 6 per cent twenty-year bonds and that the case is still in the courts.

**Sny Island Levee Drainage District, Ill.—Bond News.**—S. E. Hewes, Secretary of the Commissioners of this district, reports to the CHRONICLE that the organization of the district was effected in 1880, and that it has no bonds outstanding.

In about 1870 there was an organization of a Levee District, and about \$650,000 of 10 per cent bonds were issued to pay for the building of the levee. The interest on these bonds was not paid, and the lower courts of the State decided that the land-owners must pay an assessment to provide funds for the payment of this interest. In about 1875 the Supreme Court of the State, on an appeal from the decision from the lower courts, decided that the issue of bonds was unconstitutional. The case was then appealed to the U. S. District Court, which court has not as yet rendered a decision. Most of these bonds are held by an estate, and no valuation is placed on them.

**Trenton, N. J.—Bond Sale.**—It is reported that E. H. Rollins & Sons have been awarded \$17,000 of bonds of the city of Trenton at 102.39. The securities will bear interest at the rate of 4 per cent and the principal will mature in 1917.

**Upper Alton School Dis., Ill.—Bond Sale.**—It is reported that this district has sold \$4,000 of school bonds at par. The securities will bear interest at 4 per cent, and mature in from one to eight years from date of issue.

**Washington, Pa.—Bond Election.**—The proposition to issue \$50,000 of school bonds will be submitted to a vote of the citizens on the 16th inst.

**Waterbury Conn.—Bonds Unsold.**—On Feb. 8, 1897, Richard F. Grady, City Clerk, received fourteen bids, ranging from 103.17 by W. J. Hayes & Sons to 100.23 by Abraham White, for the purchase of the \$25,000 of 4 per cent ten-year water bonds, which this city proposed to issue. Prior to the opening of these proposals the City Attorney decided that only \$10,000 of the \$25,000 could be used for the purposes intended, and so all bids were rejected. It is expected that these \$10,000 of bonds will be offered for sale again at some date to be determined upon later.

**Westmoreland County, Pa.—Bonds Proposed.**—It is reported that court house bonds of this county to the amount of \$300,000 are under consideration.

**Winthrop, Minn.—Bond Election.**—The citizens of this village will vote in March upon a proposition to issue bonds to provide funds for an electric-light plant.

**Wooster, Ohio.—Bonds Invalid.**—Press reports state that the Judges of the Wayne County Circuit Court have decided that \$76,000 of Wooster City bonds sold in 1892 to The Lamprecht Bros. Co. of Cleveland are illegal and unconstitutional for the reason that the bonds do not bear upon their face the purpose for which they were issued. The city voted in favor of issuing \$100,000 of bonds to secure completion of a railway. The full amount of the bonds was not issued, but instead \$76,000 of the securities were sold. The money was never paid into the city treasury, but to the treasurer of a board of railway trustees. Fraud was alleged.

## STATE AND CITY DEBT CHANGES.

We subjoin reports as to municipal debts received since the last publication of our STATE AND CITY SUPPLEMENT. Some of these reports are wholly new and others cover items of information additional to those given in the SUPPLEMENT and of interest to investors.

**Cowley County, Kan.**—The following statement has been corrected to date by means of a special report to the CHRONICLE from F. H. Corkright, Treasurer.

County seat is Winfield.

LOANS—	When Due.	Total debt Jan., 1897....

INTEREST—WHERE PAYABLE—Coupons are payable at the Atlas Nat. Bank of Boston. Reg. interest is remitted by City Treasurer.

TOTAL DEBT, SINKING FUNDS, Etc.—The subjoined statement shows Taunton's total debt, the sinking fund held by the city against the same, and the water debt, on the dates named.

	Dec. 1, '96.	Dec. 1, '95.	Dec. 1, '94.	Dec. 1, '93.
Gross debt.....	\$1,176,875	\$1,563,543	\$1,671,737	\$1,700,542
Sinking funds, etc.....	101,969	634,085	863,127	901,791
Net debt.....	\$1,074,905	\$879,458	\$808,609	\$798,751
Water debt (included).....	\$712,200	\$1,112,700	\$1,012,700	\$1,007,700
Water sinking fund.....		479,869	441,586	407,417
Net water debt.....	\$.....	\$632,831	\$601,114	\$600,283
Net "municipal" debt.....	\$.....	\$246,627	\$207,495	\$198,468

The sinking fund receives yearly a sum sufficient with accumulations of interest on sinking fund investments to retire entire debt at maturity.

The city of Taunton has always complied with the Statutes of the Commonwealth relative to its sinking funds and also in regard to the \$12 tax limit. No permission to extend its debt beyond the time originally fixed for its payment has ever been asked.

ASSESSED VALUATION—The city's assessed valuation and tax rate at different periods have been as follows, real estate being taken at about 90 per cent of cash value.

Years.	Assessed Valuation—			Rate of Tax per \$1,000.
	Real.	Personal.	Total.	
1896.....	\$14,184,660	\$5,207,235	\$19,391,895	\$17.60
1895.....	14,020,050	5,183,434	19,203,484	17.60
1894.....	13,814,470	5,073,494	18,987,964	17.60
1893.....	13,564,100	5,121,310	18,685,410	18.00
1892.....	13,262,740	5,050,610	18,313,350	18.40
1891.....	12,994,625	5,075,925	18,070,550	17.40
1890.....	12,824,625	4,998,407	17,823,032	17.60
1889.....	12,621,708	4,769,868	17,391,576	17.80
1888.....	.....	.....	16,756,469	16.70
1882.....	.....	.....	16,003,677	15.80

POPULATION—By 1895 census population was 27,115; in 1890 it was 25,448; in 1880 it was 21,213; in 1870 it was 18,629.

Newton, Mass.—Henry E. Cobb, Mayor. Below is a statement of the financial condition of this city, corrected to Jan. 1, 1897, by means of a special report to the CHRONICLE from Sth A. Ranlett, Treasurer.

This city is situated in Middlesex County. Newton is one of the few Northern cities having tax-receivable coupons attached to any of its bonds. See below.

## NEW LOANS.

\$75,000

Town of Stamford, Conn.,  
Funding 4% Gold Bonds,  
DUE 1927.

Proposals will be received by the Selectmen and Treasurer of the town of Stamford, Conn. until noon, Monday, February 15th, 1897, for the purchase in whole or in part of \$75,000 of the bonds of the town of Stamford, Conn.

These bonds will be issued to retire an equal amount of the floating debt of the town, contracted by expenditures for school houses, bridges and other permanent improvements, and are payable in gold upon February 1st, 1927, interest payable in gold August 1st and February 1st at office of Treasurer.

Bonds will be delivered on February 20th, 1897, when the price bid must be paid to the Treasurer by the successful bidders.

Proposals should be sealed and addressed to "The Town Treasurer, Stamford, Conn., and marked "Proposals for Bonds," and must be accompanied by a certified check for two (2) per cent of the amount. The right to reject any or all bids is reserved.

Sinking fund provides for payment at maturity. It is proposed to issue coupon bonds of the denomination of \$1,000. Bonds may be registered.

The bonds are issued under Sec. 140, Revised Statutes of the State of Connecticut, 1894, and by authority of a town meeting held January 13th, 1897. For further particulars address

W. D. DASKAM,  
Treasurer, Town of Stamford.

State and City Supplement (Semi-Annually)

[Entered according to Act of Congress, in the year 1897, by the WILLIAM B. DANA COMPANY, in the office of the Librarian of Congress.]

VOL. 64.

SATURDAY, FEBRUARY 20, 1897.

NO. 1,652.

## The Chronicle.

PUBLISHED WEEKLY.

### Terms of Subscription—Payable in Advance:

For One Year.....	\$10 00
For Six Months.....	6 00
European Subscription (including postage).....	12 00
European Subscription Six Months (including postage).....	7 00
Annual Subscription in London (including postage).....	22 10s.
Six Mos. do. do. do. ....	21 10s.

The INVESTORS' SUPPLEMENT will be furnished without extra charge to every annual subscriber of the COMMERCIAL AND FINANCIAL CHRONICLE.

The STATE AND CITY SUPPLEMENT will also be furnished without extra charge to every subscriber of the CHRONICLE.

The STREET RAILWAY SUPPLEMENT will likewise be furnished without extra charge to every subscriber of the CHRONICLE.

The QUOTATION SUPPLEMENT, issued monthly, will also be furnished without extra charge to every subscriber of the CHRONICLE.

File covers are sold at 50 cents each; postage on the same is 18 cents. File cover for supplements can be had at office for 65 cents or mailed for 80 cents.

### Terms of Advertising—(Per Inch space).

One time.....	\$3 50	Three Months (13 times).....	\$25 00
One Month (4 times).....	11 00	Six Months (26 " ).....	43 00
Two Months (8 " ).....	18 00	Twelve Months (52 " ).....	58 00

(The above terms for one month and upward are for standing cards.)

### London Agents:

Messrs. EDWARDS & SMITH, 1 Drapers' Gardens, E. C., will take subscriptions and advertisements, and supply single copies of the paper at 1s. each.

**WILLIAM B. DANA COMPANY, Publishers,**  
Pine Street, Corner of Pearl Street,  
POST OFFICE BOX 958. NEW YORK.

## CLEARING HOUSE RETURNS.

The following table, made up by telegraph, etc., indicates that the total bank clearings of all the clearing houses of the United States for the week ending to-day, February 20, have been \$975,511,844, against \$873,632,949 last week and \$886,828,208 the corresponding week of last year. The totals in both years cover only five business days, Washington's Birthday having intervened.

CLEARINGS, Returns by Telegraph.	Week Ending February 20.		
	1897.	1896	Per Cent
New York .....	\$455,838,233	\$521,829,765	-13.1
Boston .....	69,631,238	68,841,278	+1.1
Philadelphia .....	52,225,697	52,592,771	-0.5
Baltimore .....	10,536,053	11,408,038	-7.6
Chicago .....	66,627,723	68,761,514	-3.1
St. Louis .....	23,989,439	19,219,965	+24.6
New Orleans .....	7,299,943	8,315,581	-12.5
Seven cities, 5 days .....	\$686,148,325	\$733,978,960	-6.0
Other cities, 5 days .....	127,926,248	132,849,243	-3.7
Total all cities, 5 days .....	\$814,074,573	\$866,828,208	-6.2
All cities, 1 day .....	161,437,201		
Total all cities for week .....	\$975,511,844	\$886,828,208	+10.0

The full details of clearings for the week covered by the above statement will be given next Saturday. We cannot, of course, furnish them to-day, bank clearings being made up by the various clearing houses at noon on Saturday, and hence in the above the last twenty-four hours of the week have to be in all cases estimated, as we go to press Friday night.

We present below our usual detailed figures for the previous week, covering the returns for the period ending with Saturday noon, February 13, and the results for the corresponding week in 1896, 1895 and 1894 are also given. Contrasted with the preceding week, there is a decrease in the aggregate exchanges of about one hundred and eighty-four million dollars, and at New York alone the loss is one hundred and forty-two millions. In comparison with the week of 1896 the total for the whole country shows a loss of 10.3 per cent. Compared with the week of 1895 the current returns record a gain of 3.9 per cent and the excess over 1894 is 8.9 per cent. Outside of New York the decline from 1896 is 1.3 per cent. The increase over 1895 reaches 7.7 per cent, and making comparison with 1894 the gain is seen to be 11.2 per cent.

Week ending February 13.

### THE FINANCIAL SITUATION.

There are some slight indications of a turn for the better in commercial affairs. The two incidents we mentioned in this column last week (the large purchase of print cloths and the break in the steel rail pool), and which we then stated would have a tendency to hasten the revival of business, have been the origin of this new movement. Perhaps the favorable influence these two events have had has been increased by the promise the approach of spring holds out—a season when outdoor work is so largely resumed by railroads, agriculturists and others—the milder weather recently enjoyed being proof of its nearness. At the same time it is not to be forgotten that a term of activity, if now in prospect, has only been made possible through the existence of those earlier agencies affecting our political, financial and industrial interests that had their inception in the result of the election; and hence that no improvement can be permanent or of any great length unless we reform our currency and make enduring the stronger financial situation the Government and country are now in.

The dry goods trade, which in some measure is an index to the prevailing condition, has presented a more animated appearance. To be sure, complaints are heard that the buying is even now not at all free but of a conservative, hand-to-mouth character. That feature is natural after such experiences as we have passed through. There could be no sudden development; the growth this year must start way down, as it were at the root; we must have evidences of life at its earliest stage before we can have the blossom or the full fruitage. A healthy, natural expansion could not progress in any but a conservative form. So far as that may be the case now, it cannot in the least conflict with or detract from the force of the assertion that it is a highly encouraging condition to find with the first hint of spring buyers have appeared in larger numbers and that orders by mail are coming in a trifle more freely.

In the case of the steel rail trade there can be no doubt of coming great activity. Last year's steel rail production was, as we stated a week ago, only 1,100,000 tons. Some claim that orders from railroads are already booked to that amount. Besides that, it appears that important export orders have been filled. If these statements correctly represent the extent of the business done, then it is probably true that higher prices for steel than the lowest, fixed a week ago, are now, or will be in the near future, asked. However that may be, it is a fact that railroads in all parts of the country have contracted for large deliveries of rails, and the promise is that considerably more track will be laid the coming summer than was laid in 1896. The result thus far on labor has been that many more men have been put to work making rails; the ultimate result will be that the railroads will find employment the ensuing season for a much larger force on repairs of track and new work than a year ago. Activity, too, is infections. One department of trade cannot be filled with work and the others remain comparatively idle.

The "Iron Age's" monthly record of pig iron production possesses particular interest this time in view of these developments in the steel-rail branch of the business. The placing of such extensive orders for rails has had a decidedly stimulating effect in all branches of the iron and steel trades, so that the disruption of

the pool, it is likely, will mark the turning point in the condition of these trades. There has been a noticeable increase in the demand for many forms of iron and steel, and prices are more firmly held where they are not actually higher. The purchasers of rails on foreign account are a wholly new feature of the situation. The "Age" estimates these purchases at 100,000 tons, and states that the amount includes 25,000 tons each for the account of the London & Northwestern Railway and the London & Southwestern, besides an order of 11,000 tons for Japan. It adds significantly that "these sales will convulse the English iron trade and furnish proof that henceforth our steel manufacturers must be reckoned as an important factor in the world's markets."

It is of course obvious that under the large production of rails there will be a very heavy demand for the raw material needed in their manufacture—ore, coal, limestone, &c.,—and this furnishes a decidedly encouraging feature in the situation. Before the recent events the outlook did not appear very cheering. Thus the "Age's" record of the furnaces in blast, which of course comes down only to the 1st of February, shows no addition at all as compared with January 1 in the number of active furnaces (a few resummptions having occurred, but offset by an equal number of stoppages), while the weekly product increased only a little over 3,000 tons. The output is now 162,959 tons per week. Of course, as compared with the total of 112,782 last October, this marks a substantial recovery, but if we go further back we find that the production February 1 1896 was 198,599 tons per week, while on November 1 1895 it was 217,306 tons. There has also latterly been an accumulation of stocks again, the figures of the "Age" showing a total of 988,907 tons February 1, against 910,643 tons January 1 and 870,662 tons December 1. On the whole it will be seen these figures present few features of encouragement. It is fortunate, therefore, that the developments in the rail trade have changed the whole aspect of things.

We have this week the reminder of another very favorable feature in the general situation—one that has been growing in importance month by month and has contributed so largely to lift the country for the time being out of the hole our currency defects put us in. The foreign trade statement for January has been issued by the Bureau of Statistics and it shows another phenomenal merchandise balance. We give the figures lower down in this article, prepared in our usual form with comparisons running back to 1875. It will be seen on examination that the January result is the best ever recorded in that month and that it brings up the excess of merchandise exports for the seven months ending with February 1 to the largest figure for this period in the country's history. The merchandise exports in January were \$94,984,000, the imports were \$51,327,000 and the difference to our credit \$43,657,000. This balance compares with only \$18,322,000 last January and \$13,682,064 in January 1895. For the seven months since July 1 1896 the total excess on the side of merchandise exports is now \$292,964,000, against only \$46,248,000 for the same seven months of the previous year. If we include the whole trade (that is, merchandise, gold and silver) for the seven months, the account between the United States and the outside world (so far as the official trade figures reflect the situation) shows a remainder in favor of this country on February 1 1897 of \$247,490,000.

Such a state of the accounts has never existed before. It means, beyond a doubt, a large suspended balance represented for the time being by credit instruments.

Why, it may be asked, if it be true that the industrial outlook is so full of promise and such a phenomenal trade balance stands guard over the Treasury gold reserve—why is it that the stock market is so lifeless? There is no mystery connected with that affair. The conditions surrounding railroad properties are such that the only question one hears asked respecting them on Wall Street now-a-days is whether this company or that is not going to lower its old rate of distribution? Besides, lots of companies have already done that, and with regard to them the inquiry is now whether or no they will not reduce the rate further or perhaps go into liquidation. No suggestion of the raising of dividends is heard anywhere. While this is the position of railroad property, and while returns of earnings continue unfavorable (losses still predominating with only an occasional slight increase), what else could one expect? But it may be said in reply if the promised industrial revival is realized will not all this change? That thought brings up a feature which at the moment is the worst in the whole outlook, involving in large measure the future prosperity not only of our railroads but of all our industries; for we can never have a full industrial revival that is not shared in and helped by our railroads. We refer to the adverse legislation with which the roads are threatened.

If we assume that the attitude of the States and the proposals of their Legislatures as they appear to-day are to be put into the form of statutes, instead of an improved condition these properties would be left in a desperate state. We all know the burdens they are now laboring under, and what we have said above is further suggestive of them; and yet there are many of these law-making bodies which seem to be intent on doing their utmost to draw a larger tax, or to force a lower rate for traffic, or to require some other sacrifice from this suffering industry. Not unlikely the most of these efforts will be frustrated; possibly the legislatures themselves will be brought to see the impolicy of harming further such a powerful agent in helping to cure our industrial depression. But at the moment the outlook in the particulars referred to is not of such a character as to inspire confidence. What have we here in this city in full operation but a legislative committee appointed by the Legislature of the great commercial State of New York trying to hoodwink labor by intimidating capital. Its panacea for the distress which is weighing down business interests and labor alike is to destroy the prosperity of the few representatives of organized capital that at the moment happen to be prospering. Ex-Mayor Hewitt expresses the apparent object of this committee accurately by stating that it is "trying to find out who is making money in business and then to prevent it if possible." Here is consequently the same spirit at work that animates those who are pursuing railroads. That form of aggregated capital has apparently too little in it just now; so this mill has been set up with another purpose, the organizers naturally expecting a better yield by grinding the prosperous.

The pamphlet report of the Delaware & Hudson, containing the balance sheet, has been issued this week. It discloses, however, nothing specially new. The floating debt is just as stated by us in our article

reviewing the preliminary report, namely \$1,300,000, this being the amount of the loans payable shown as outstanding. When we look on the other side of the account, the reason for this debt becomes plain. All the coal companies, as we have already pointed out several times in these columns, hold increased amounts of coal, the depression in trade having so largely diminished the demand for the article. The company had \$1,539,365 of coal on hand December 31 1896, against \$954,658 on December 31 1895, being an augmentation of nearly six hundred thousand dollars in the money tied up in this way. Then the amount advanced to the leased lines on construction account was increased during the twelve months from \$804,582 to \$1,379,792. The increase in this case represents, we suppose, mainly the outlays on the Albany & Susquehanna in the laying of double track. Then, also, as stated in our previous article, the fact that the dividends paid in 1896 amounted to 7 per cent, while earnings in that year (on which the current year's dividends will be based) were only 5 per cent, made a draft on cash resources to the extent of about \$700,000. We notice that accumulated surplus was diminished during the twelve months from \$7,094,893 to \$6,000,870. The company held in actual cash at the end of the year \$1,225,593, an amount not far short of the \$1,300,000 of floating debt. On account of the re-payment of the advances made to the New York & Canada, the investment in that company has been reduced from \$4,752,330 to \$3,760,741.

We have deferred till next week our review of the gross and net earnings of United States railroads for the late calendar year, in order to make the showing more complete. For use in that compilation we have obtained a statement of the earnings of the Baltimore & Ohio for December. The result is about the same as for the months immediately preceding, there being an increase in gross of \$116,784, reflecting the steady expansion in the business of the road, and an augmentation of \$183,873 in expenses occasioned by continued heavy outlays on track and equipment. For January gross is estimated at \$1,955,645, against \$1,817,932 in the same month last year. The Pittsburg Cincinnati Chicago & St. Louis for January reports \$197,619 decrease in gross, \$4,748 decrease in net; the Nashville Chattanooga & St. Louis \$50,548 decrease in gross, \$36,385 decrease in net; and the West Virginia Central & Pittsburg \$12,752 decrease in gross, \$70 increase in net. We have also procured a special statement of the Atlantic & Pacific for December, showing \$3,162 decrease in gross and \$10,586 increase in net. The following furnishes a four-year comparison for a few roads that have this week submitted statements for either December or January.

Last week's bank return reported a further gain of \$2,854,100 in loans, making \$11,602,000 since January 30. The greater part of this increase is shown by three banks. One of these has doubtless been making loans to parties handling raw sugar, while the others have been largely re-discounting for banks in the extreme Northwest. Some money has been loaned to Eastern houses, and it is thought probable that a part of the funds required for the recent print cloth purchase came from New York. The sum of \$3,300,000 gold was deposited in the Clearing House vaults this week, making \$48,300,000 now held there. The net gold in the Treasury, which was last Thursday officially reported at \$145,905,073, was yesterday reported at \$147,281,113.

Money on call, representing bankers' balances, has this week loaned at  $1\frac{1}{2}$  and at 2 per cent, and generally at  $1\frac{1}{2}$  per cent, with quite small amounts at the highest figures, the average being about  $1\frac{1}{2}$  per cent. Banks maintain 2 per cent as the minimum, while those of the trust companies who are loaning meet the market at the Stock Exchange. There is a better demand for long time contracts and rates are firmer. Quotations are 2 per cent for thirty days,  $2\frac{1}{2}$  per cent for sixty to ninety days, 3 per cent for four to six and  $3\frac{1}{2}$  per cent for seven months, on good Stock Exchange collateral. There is a good business in commercial paper, with no pressure of names, and the market is not broad, many of the banks having full lines and being disposed to wait for better rates. Quotations are 3 per cent for sixty to ninety day endorsed bills receivable,  $3\frac{1}{2}$  @ 4 per cent for first-class and 4 @ 5 per cent for good four to six months single names. Re-discounting for banks in the extreme Northwest is fairly liberal.

It is reported that the position of the Indian money market is somewhat embarrassing, reserves of the banks being low, and that the English Government may have to render more or less assistance during the remainder of the season. The European security markets have been more or less influenced all the week by the political tension resulting from the Turco-Grecian incident and the discount markets have been kept firm. The Bank of England minimum rate of discount remains unchanged at 3 per cent. The cable reports discounts of sixty to ninety day bank bills in London at  $1\frac{1}{2}$  per cent. The open market rate at Paris is  $1\frac{1}{2}$  and at Berlin and Frankfurt it is  $2\frac{1}{2}$  per cent. According to our special cable from London the Bank of England gained £779,603 bullion during the week, and held £38,483,396 at the close of the week. Our correspondent further advises us that the gain was due to the receipt of £624,000 net from the interior of Great Britain and to the import of £156,000, of which £102,000 was from Australia, £46,000 from Egypt and £8,000 from Portugal.

The foreign exchange market was strong on Monday, influenced by dearer discounts in London and by the flurry in the European markets caused by the Turco-Grecian incident, but when the excitement regarding this affair subsided the market became dull and steady, growing firm again on Thursday. Bankers report that there are moderately large offerings of run-off bills deliverable within the next ten days or two weeks, but from present indications these bills will probably be

exchanged for long sterling. As discounts in London are likely to remain firm at about current rates in the near future, while investment bills can be carried here at about  $1\frac{1}{2}$  per cent, there will be a small profit in the exchange of run-off bills for long sterling, thus increasing the demand for the latter and aiding in the maintenance of comparatively high figures for short. The offerings of spot or near commercial bills are so small that they make no impression upon the market. It is reported that there has this week been some demand for short sterling and for cable transfers for mercantile remittance. The range for posted rates on Monday was 4 85½ to 4 86 for sixty day and 4 87½ to 4 88 for sight, Brown Bros. and Heidelbach, Ickelheimer & Co. advancing the latter half a cent and Lazard Freres moving both long and short upward half a cent. The tone was strong, especially for short sterling and cable transfers, at an advance of one-quarter of a cent in rates for actual business compared with the close on Thursday of last week, to 4 87 @ 4 87½ for the former and 4 87½ @ 4 87½ for the latter, and during the day there was a good demand, but this subsided by the close. There was no change in the range for posted rates thereafter and no alteration in those for actual business until Thursday, the market remaining dull and steady; but then it grew firmer, especially for long sterling, rates for actual business in which were advanced one half a cent, to 4 85 @ 4 85½, while those for short sterling and cable transfers were unchanged. Yesterday the market was steady, with no change in either actual or posted rates.

MR. GAGE ON THE SOCIAL DISCONTENT.

Responding at the complimentary banquet of the Commercial Club of Chicago last week, Friday, Mr. Lyman J. Gage referred to certain peculiar phases of existing social discontent in language so apt and forcible that we wish to call it to particular notice. Mr. Gage first pointed out the fact, well recognized by the newer school of medical science, that morbid emotional activity frequently results in derangement of the mental functions. Violent excitement over a given topic may, under this analysis, be a genuine symptom of disease, and the disease may affect not individuals alone, but large communities. "In looking over the apparently disordered condition of our social state," Mr. Gage continued, people may possibly find that this diagnosis will "philosophically explain some portion of the phenomena."

We think that Mr. Gage has touched on a very potent factor in the existing situation. His views of the case are neither far-fetched nor fantastic; on the contrary, we believe that any reader of these columns will be able to call to mind conclusive instances in point. The nation is, in fact, witnessing, in many quarters, the development of a very morbid mental process, which consists in brooding over wrongs which the individual cannot define, for which he can point out no intelligible cause, and for which he makes no effort to assign a rational remedy. Mr. Gage proceeded to illustrate his meaning by a personal instance which other people, from their own experience, will readily believe to have been faithful to the facts: "a highly respected friend of mine," he continued, "a lawyer of ability, in a recent letter writes after this fashion: 'You', he says, 'have not been a worshipper of the golden calf——' And then, as if the last two words excited disturbed emotions, breaks out thus: 'This is an utterly venal age. Love of money has supplanted that which is humane and noble. The money power has the people by the throat. The people feel it and are writhing under its corrupt and corrupting influences. The feeling of wrong and oppression grows each day. There seems to be no purpose on the part of the moneyed power to settle questions and correct conditions by peaceable means.'"

This censure is a perfectly fair sample of its kind. It is utterly incoherent logically; indeed, it casts reasoning aside with complete indifference. "He indicts society", Mr. Gage commented, "but files no specifications. He agonizes in eloquent language and demands the indefinite; but not a practical suggestion, not a line or word as to how; and yet the duties and burdens of our social problems are on him as much as on any other." Mr. Gage is entirely right in noticing this case as typical; he is equally right in ascribing it to morbid mental conditions. It is true enough that fanatics of this sort have followed a human impulse in choosing some single institution or principle for the cause of all existing ills. The coincidence of a given public policy with unsatisfactory private trade and profits is always sufficient reason for examining that policy with care. The public statute and the industrial depression may be connected as a cause and consequence, or they may not. In either case, the man who sets forth plainly the means by which his cause of evil is conceived to work out its results, or who clearly and dispassionately explains what is the nature of his remedy, and how he expects that remedy to operate, will get a hearing. But the formidable symptom, in the outbursts of hysterical passion to which Mr. Gage refers, is the unwillingness of the individual to do either. He assigns a cause, and will give no reason, beyond his own assertion, for believing that it is a cause. He demands a remedy; if he is told that all experience proves the remedy to be worse than the disease, he turns from controversy into mere abuse. He is, in brief, a victim of hallucination. We leave it to our readers, in whose minds the recollection of last fall's campaign is fresh, to say whether we overstate the case.

If proof is wanted of the utter disorder in reasoning processes which underlies the worst of this outcry against the well-to-do sections of the community, there is proof enough at hand. We do not need to recall such explosions of emotional insanity as a Western Governor's declaration four years ago that he would "ride in blood to the bridles" before submitting to the

repeal of the silver-purchase act, or the threat, publicly uttered and applauded in Western political gatherings last fall, that the time would come when "bankers would be hung like horse thieves." Last Monday an open letter was published in a Denver newspaper, signed by the occupant of an office which ought to be the place of most circumspect and cautious policy. The General Master Workman of the Knights of Labor begins this letter by declaring that relief for the prevalent discontent will not come through discussion of tariff, currency, or any legislation. "The past", it seems, "is one long protest against the ballot as an instrument of reformation." Men must "lay aside the mask and look each other in the face"; the only possible relief "will come, in the old way, in war." And since, this professed representative of laboring men continues, "the only remedy is war, I prefer to have the war at home. What moral right have we to impose war, with all its cruelties, destruction and desolation, on a foreign country as the means of relieving our own distresses?"

We give space to this curious production simply because it illustrates, in somewhat glaring colors doubtless, the very mental disorder to which we have referred. That such a letter is the product of a sane and balanced mind, we do not suppose any one will for a moment contend. The declaration, like that of Mr. Gage's correspondent, undertakes neither to explain the operation of the cause assigned nor the operation of the suggested remedy. Perverted reasoning faculties have simply grasped at both, have failed to reach either, and have thereupon hastened to endorse by public utterance the extraordinary conclusion that if Americans can be set at work slaughtering some thousands of other Americans, and burning down the houses of those still left alive, the industrial problem will work out a solution of happiness and content. If such talk had even a coherent meaning, the Utopia conceived for Western civilization ought to be sought in Hayti. But it is not coherent, and it has no basis even in misguided reason.

We do not call up the case of men like this in the belief that their personal influence is formidable. It is a useful trait of American society that the speaker who utters nonsense will be measured, sooner or later, at his proper standard. Let his appeal be never so incendiary, if it becomes ridiculous his fate is settled. This very man has already passed through precisely such experience; his violence and bombast, at the time of the Chicago railway strike of 1894, were so far from kindling the embers of industrial insurrection that they lost him, once and forever, all influence with intelligent laboring men. To such degree as he speaks officially to-day, he speaks for a decaying organization, wrecked by exactly such excesses among its chiefs. What the opinion and policy is among the really influential labor leaders may be judged from the utterances of Mr. Arthur and Mr. Sargent during last fall's campaign—men who hold positions of true and large responsibility.

There is, nevertheless, sufficient danger in the mere fact that such derangement of the reasoning processes, temporary though it may be, is abroad in large communities of our nation. The appeal directly made to such infatuation in the Bryan campaign of 1896 was beyond any question the most disquieting factor in the contest. The circumstance that the appeal was made by a candidate of engaging personality, pleasing address and humane sentiments offset in very small degree the dangers of the situation. Where society

endorses such appeals it may begin with a Camille Desmoulins, but it will end, most probably, with a Danton or a Robespierre. Our country is happily no field for such revolt against civilization. Ordeals and ill-digested notions of public policy must occasionally have their trial on the legislative stage, as they seem to be having it now in Kansas. But they go no further than experiment, and as experiment alone they bring their own penalty and cure. Taking the nation as whole, the vote of last November told the story for itself. But it was very far from telling everything. Of the 6,500,000 votes cast for the Bryan ticket in the fall election, we have no hesitation in affirming that nine-tenths, at the lowest estimate, were thus cast solely because of the Democratic label on the ballot. Had the agitators fought the battle on the merits of their own propaganda, as they did in 1876, with equal popular distress and with a better candidate, they would in our opinion have done well had they trebled the 81,737 votes cast for the Greenback ticket and Mr. Peter Cooper.

The fact, remains, however, after all is said, that the social discontent, even in its extravagances, is a result of real industrial depression, and that it grows by what it feeds upon. A readjustment of our unsettled trade conditions would in a very short space check the spread of such mental disorder. Continuance of unwholesome influences in finance will certainly intensify it. Unless, therefore, our statesmen and legislators wish to multiply both in numbers and in violence this community of agitators, they will be wise in bending everything to remedy such evils as undoubtedly do exist. For such an honest effort Mr. Gage himself appealed earnestly in the speech from which we have already quoted. "There are real mistakes," he said, "to be corrected. We have violated natural laws, which govern in the realm of economics with the same force and power as they do in the physical realm." This is a plain and straightforward statement. Taken in connection with Mr. Gage's well known record, and falling from the lips of one who in his future public station will have much to do with shaping remedies, it is a hopeful omen.

Not less encouraging is the growing recognition by Eastern men of the actual ills which beset the industrial communities of the West and South, and of the absolute necessity of remedy for the defective currency system, which is the cause and origin. Such comments on the situation as those of Mr. Dodge at the Chamber of Commerce meeting on February 4, and of Congressman Fowler before the Massachusetts Reform Club on Lincoln's Birthday, point the way to intelligent study and solution of the problem. If the West has misunderstood the wishes and purposes of the East, there has perhaps been misunderstanding on the other side as well. The flat denial that the interior communities have any reasonable ground for discontent has of itself served to invoke the counter declaration that the financial centres are profiting by the distresses of the rest of the United States. The natural product of such misunderstandings is blind revolt and mental vagaries among such unfortunates as surrender themselves to the influence of passion. If both communities can be brought to face the problem and devote their united efforts to meeting the genuine needs of the situation, the West and South will have an opportunity to learn that their interests and the interests of the East are identical. Of all illusions in this controversy, none has done more mischief, and none is of itself more utterly absurd,

than the notion that any system which impairs the value and the profit-earning capacity of interior enterprise could fail in turn to inflict an equal injury on the East.

#### PROPOSED RATE REDUCTIONS BY WESTERN LEGISLATURES.

One would suppose that after all that the railroads have endured and suffered in recent years, they might in fairness be allowed to enjoy exemption from adverse legislation for the time being—at least while the process of recovery remains as slow as at present. But unfortunately such is not the case. In a great many of the Western States, and also in some of the Southern States, bills proposing reductions in either passenger or freight rates, or both, have been introduced in the legislatures. These propositions, too, are being seriously considered in a good many cases, and in some instances there is a possibility that the measures may become laws.

It must be admitted that in view of the existing railroad situation there is something decidedly incongruous in such measures. A very large proportion of the railroad mileage in the newer of the Western States has passed, or is passing, through receivership and foreclosure, and in the older States the experience has been equally hard, dividends having been reduced or suspended altogether. Moreover, the recovery so confidently hoped for has as yet failed to come. In face of two successive good crops, earnings as a rule are still falling off. It is not surprising either that under such circumstances railroad officials should get discouraged and think that there is no chance of obtaining justice at the hands of the Western people.

This feeling will account for the fact that so many railroad managers are making only a feeble show of opposition to these new attempts at spoliation. But it seems to us the occasion calls for a different attitude. Vigorous, determined resistance should be offered to any measures calculated further to weaken and impoverish the roads. The efforts, however, should not be misdirected. Reason and argument should be employed to convince the people of the error involved in action such as that proposed and the harm and disaster that must result from it. The facts should be set before them in such a way that they may understand them, and also so as to appeal to their sense of fair play. This done, we are sure good results will follow.

It should always be remembered that the basis for the attitude of the agricultural classes is to be found in their own condition. They are having a hard struggle for existence. A decade or more ago everything looked prosperous. Crops were good, farm prices high and real estate values booming. Nearly every farmer lived in expectation of seeing his land rise to the level of New York City corner lots. With that idea enormous debts were incurred in many of the newer States in laying out streets, erecting expensive public buildings for which there was no need and which are now rotting, and in making various other so-called improvements. Then came poor crops, falling prices for agricultural products and a complete collapse of real estate values. Now the people find in numerous cases that they are burdened with a debt which it is absolutely impossible for them to carry. In their efforts to get out of their difficulties they are clutching at every project, however chimerical or visionary, that seems to afford a

promise of relief, and the railroads, which in their eyes embody at once the idea of monopoly and capitalist wealth, are thought specially fit objects upon which to levy exactions tending to lighten their burdens.

While these facts as to the general situation of the Western and Southern people are well known, few persons appreciate or have any conception how really desperate the condition of some of these communities has become. We are at present collecting returns regarding debt, finances, taxation, &c., from all the municipalities throughout the country for the new edition of our STATE AND CITY SUPPLEMENT, to be issued in April, and among the statements received this week has been one relating to the city of Anthony, in Harper County, Kansas. The plight in which this municipality finds itself serves so well to illustrate the unfortunate condition of some of these communities that we furnish herewith a transcript of a few of the leading items contained in the return. The facts we are sure will come as a revelation to those who have not previously looked into this question of the burdens under which many sections are laboring.

CITY OF ANTHONY, HARPER COUNTY, KANSAS.—Aggregate indebtedness of city January 1 1897, including delinquent interest, \$168,187 53.

Rate of tax levy in city for year 1896, 134 mills on the dollar.

Year.	Population.	Assessed Valuation.
March 1, 1899 .....	2,252	\$512,684 28
" 1890 .....	2,021	473,167 32
" 1891 .....	1,825	409,362 17
" 1892 .....	2,003	355,490 67
" 1893 .....	2,404	422,202 94
" 1894 .....	1,686	352,421 31
" 1895 .....	1,367	239,907 60
" 1896 .....	1,074	171,051 00

It will be observed that in three years the population of this little city, located in Southern Kansas and having three railroad lines connecting it with the outside world, has dropped from 2,404 to 1,074; while the assessed value of the property of the municipality, which in 1889 stood at \$512,684, in 1896 was only \$171,051. In other words, population has declined over one-half, property values fully two-thirds. Moreover, the city has a debt of \$168,187. This would be large even on the basis of the assessed values of 1889, but on the basis of present values practically the whole property within the town would be required to liquidate it, assessed values being, as we have seen, only \$171,051 against the debt of \$168,187. Of course there is something radically wrong in the laws of a State which permit the creation of a debt of such relatively large proportions, but we shall not refer to this feature further than to say that over five years ago, in analyzing the statutes of Kansas with reference to the debt-creating power of the municipalities of that State, we showed that the provisions of the Constitution imposed practically no limit in that respect, and that there were also what appeared to be irregularities in many instances in the legislative acts giving permission to issue bonds.

The tax rate of Anthony in 1896, it will be noticed, was 134 mills on the dollar—that is 13.4 per cent. In view of that fact it is not surprising to hear that of the taxes for 1895 only 75 per cent have as yet been collected, while of the taxes for 1896 but 7.2 per cent had been collected up to January 15 1897. Judgment was taken against the city nearly three years ago. Mr. J. P. Horton, the City Clerk, in his sworn statement

declares that excessive taxation has reduced the values of all city property, that rents are low, and that nearly two hundred store rooms and dwelling houses are now vacant. During the last two years, he states, almost one hundred business and dwelling houses have been torn down and moved out of the city, while other large taxpayers have announced that they, too, will remove their property from the city unless the rate of taxation is reduced.

When to the foregoing we add the fact that the price of corn and most other agricultural products is ruling very low, and that general business depression prevails, we have a picture of despair and distress which must appeal strongly to the sympathies of all classes. It would be an exaggeration to say that Anthony presents a typical case. It furnishes rather an extreme case, though there are other cases in the same State where the situation is nearly as bad, and some possibly where it is even worse. The whole matter throws a flood of light upon the present state of things in the remoter parts of the country, and helps us understand the frame of mind of the people which makes them espouse the free-silver heresy, and to entertain the delusion that they can improve their condition by compelling the railroads to move passengers and freight at unremunerative rates, and levying excessive taxes on the property of the roads, and in various other ways endangering their solvency and prosperity.

It is evident, too, from this recital of the difficulties and burdens under which some of these agricultural communities labor, that there is one way, and only one way, in which the situation can be met. It must be made clear to the Western and Southern people that their present course is a mistaken one, that it can prove of no benefit to them, while certain to prove harmful and detrimental to the country as a whole and to them with it. Obviously, in a case like that of Anthony, where the debt is almost equal to the assessed value of the property, the debt cannot be met; it follows that a compromise of some kind must be made so as to bring the burden within the ability of the municipality to bear. And the same remark applies in other cases. In brief, the proper course is to call a meeting of creditors, just as a merchant or manufacturer or other business man does when he becomes embarrassed, set the facts before these creditors and agree upon a basis for readjusting the obligations by scaling them down. Such a plan has the merit of being honest as well as sensible. As a result, the municipality is quickly lifted to its feet, while the creditors obtain all that can be got. To seek a remedy by depreciating the standard of values would simply involve all in ruin.

So, too, as regards the treatment of the railroads. They and the communities they serve are interdependent. Neither can get along without the other. By impairing the efficiency of these transportation agencies the communities must necessarily suffer. Nor should the Western and Southern people ignore the fact that the railroads, like the farmers, have experienced hard times—that they have suffered in the same way and from much the same causes as the agricultural classes. Moreover they should remember that when the consuming power of a community has been diminished, either through a decrease in population, as in the case of Anthony, or in some other way, forced reductions in rates are wholly unjustifiable; lower rates can come only with an increase in the density of the volume of traffic, not with a decrease.

As it happens, Kansas is one of the States where legislative propositions looking to a reduction in rates are just now being advocated with especial vigor. And yet there is no State in the whole Union where less can be said in defense of a reduction. This fact is brought out clearly and forcibly in a memorial which President Ripley, of the Atchison road, has addressed to the Legislature of Kansas. We refer to this memorial not only because it is convincing and conclusive, but because it is a model of what such a report should be and furnishes an illustration of the kind of work that the railroads in all other States should undertake where they are threatened with hostile legislation. The paper is in excellent taste throughout, no invective being employed, the writer relying wholly upon the strength of his arguments and facts. In brief, it is an attempt to reason with the legislators, in a friendly and amicable spirit, and to show them that their proposed action would be a wrong and an injustice.

Mr. Ripley begins by referring to the fact that the railroads have suffered quite as severely as the Kansas people themselves. He points out that in earlier and more prosperous times the Atchison (the largest taxpayer and the largest single interest in Kansas), like most of the citizens of Kansas, permitted itself to expand too greatly; it built railroads as the citizens built towns—in the belief that they could be sustained. That belief proved to be fallacious, and as a consequence the Atchison has upon its hands some 2,500 miles of road in Kansas, much of which does not pay operating expenses. Yet there is not one of these branches that does not serve many communities, not one so poor that the denizens of its territory could do without it. "So we must all stay by Kansas and hope for better times. But we cannot make times better by preying on each other—we must live and let live, must exercise mutual forbearance and patience, and pull together to retrieve the mistakes of the past.

He points out that in the general scaling down of Kansas values the Atchison has borne its full share; under its recent reorganization the holders of its bonds were obliged to forego more than half their interest charges, and the property is not now earning, and under present conditions cannot be made to earn, anything like a fair return upon its cost or its actual cash value. The same is true of the other roads in the State—perhaps even to a still greater degree, and Mr. Ripley ventures the statement that there is not a single road in Kansas that earned last year or will earn this year or can earn under present conditions 4 per cent either on its cost or what it would cost to duplicate it. Nor is it true, as so often charged, that the persons who furnished the money to build the Kansas roads have been richly rewarded. Those who subscribed for the Atchison securities in the seventies are now earning less than 3½ per cent interest on their actual cash investment; those who subscribed for the securities in the eighties are receiving less than 2 per cent on their investment, and those who subscribed for the stock are now receiving nothing in return for the cash paid by them for the same.

As to the reasonableness of present transportation charges, Mr. Ripley says that freight rates in Kansas are now as low, considering the conditions, as they are in any Western State. He gives a table prepared from Census figures showing that Kansas has a smaller population per square mile than any of the adjoining

States, with the exception of Nebraska, and a smaller population per mile of road than even Nebraska. The density of population is in Illinois four times and in Iowa and Missouri twice that of Kansas. Yet the rates charged in Missouri and Iowa are but a trifle less than those of Kansas, while those in Nebraska are substantially the same. On the Atchison the rate per ton per mile has declined from 2.288 cents in 1882 to 1.028 cents in 1896.

In regard to the proposition to reduce passenger fares to two cents per mile, Mr. Ripley asserts that with the exception of a few main lines the railroads are now transacting their passenger traffic without profit; almost every road in the State is running daily passenger trains which do not pay the wages of the train crew, simply as an accommodation to the public and to make the towns along the lines desirable places in which to live. He calls attention, too, to the fact that out of every dollar that the Atchison earns in Kansas from freight and passengers it pays back at once 70 cents for labor and supplies, and about 8 cents more for taxes. In 1895 the net earnings in Kansas were about \$1,800,000, out of which \$800,000 was paid for Kansas taxes, being 44 per cent of the whole.

Mr. Ripley closes his appeal with these earnest words, which every legislator in the West and South should take to heart: "When by the joint efforts of the railroads and the people we have assured prosperity and the population which that prosperity will attract, and when the railroads are paying anything like reasonable returns upon their cost, it will be time enough to discuss reductions in rates. Meantime, do not advertise to the world that invested capital is unsafe in Kansas or that resort to the courts is necessary to protect the rights of citizens against unreasonable demagogues, or honest but mistaken agitators, who imagine wrongs that have no existence, and believe that the interests of the State can be advanced by driving away capital or confiscating the property of others."

#### BRITISH HOME TRADE AND FOREIGN INVESTMENTS—INDIAN FAMINE AND PESTILENCE AND THE COTTON INDUSTRY.

MANCHESTER, Feb. 3, 1897.

A striking feature of British commercial history during 1896 is the well sustained volume and the generally satisfactory state of the home trade. Usually when attempts are made, in speeches or in the press, to gauge the condition of mercantile and industrial affairs in the British islands, reference is more or less confined to the statistics of imports and exports, partly because the foreign trade of the United Kingdom is, relatively to the whole, of exceptional importance, and partly because no means exist of determining the amount of the home trade.

The only criteria of activity or slackness of a statistical kind of the home trade are to be found in the returns of railway traffic and of the bankers clearing houses at the commercial centres, the percentages of the unemployed supplied by the various trades unions to the Board of Trade and the number of persons dependent upon the poor rates. These, however, except the last named, are largely affected by the varying condition of the foreign and colonial commerce of the country. So far as the past year is concerned they all point to a better experience among the masses of the

people in 1896 than in any of the previous five years. But there are other proofs of the encouraging condition of the home trade in the large business done and the satisfactory profits earned by the wholesale and retail houses engaged in the distribution of dry goods, food products, hardware and other articles of consumption in the households of the people. The profits of the wholesale dry goods joint stock establishments last year were not always so large as those realized in 1895, but allowing for fluctuations of prices of most staple goods and the losses thereby incurred, there can be no doubt that their gains from current trade and the amount of their turnover have been at least as great and perhaps rather greater than those of the preceding year. It is well known, too, that the last twelve months have, on the whole, brought excellent results to retail distributors in all branches of trade. It may even be said, with truth, that this has been the case for years past, and it is a feature of particular importance when the long depression of agriculture in this country and the frequent struggles with adverse circumstances of several great textile and other industries within the past five or six years are borne in mind.

These considerations give prominence to a special characteristic of British economic life which has hitherto attracted little attention—the enormous amount and its great increase within the last ten years of the revenue derived by residents in the United Kingdom from other countries. It is estimated by Sir Robert Giffen—a high authority on this subject—that in 1886 the annual income from British capital invested in foreign countries and in the colonies, in public loans, railways, banks, mining, land, financial and other investment stocks, and in deposits in colonial and other banks, was £85,318,000 per annum. Since then investment in and profits received from South African gold mines has increased enormously as well as from other mining enterprises abroad, and the annual revenue drawn from all these external sources must have greatly increased.

This calculation takes no account moreover of the earnings from British shipping abroad nor of the income received from British capital invested otherwise than through the medium of companies whose shares are quoted on the stock exchanges. There are, too, many more persons and families of fortune resident in these islands who have come from the colonies or foreign countries, and it is even said that London has, to a large extent, taken the place of Paris as the elysium of wealthy people who have acquired fortunes in other lands. It is obvious that this rapid growth in the amount of income drawn from outside the country and expended or invested here must have tended powerfully to increase the employment of labor and the consumption of articles of household and personal use, as well as to keep up the rates of wages. An investigation of this subject by some competent authority at the present time would almost certainly show that the amount of revenue derived from external sources and expended in these islands is very much larger than it was even ten years ago, and that it is a factor of great moment in sustaining the volume of the home trade and securing its steady prosperity. For, obviously, income of this kind, though of course not invariable, must be less subject to fluctuation, except in great and world-wide crises, than that derived from ordinary trade and industry.

The course of famine and pestilence in India continues to excite very keen interest among the business community, particularly in Manchester. So far as its immediate effect upon the demand for cotton goods for the Dependency is concerned the plague is even of greater consequence than the famine. Business of all kinds is completely disorganized in Bombay and Kurrachee, and such demand as is met with for India on the Manchester Exchange is chiefly for Calcutta and Madras. Even this, however, is not large and stocks of plain staples usually exported to that country are increasing. The number of looms standing idle which are ordinarily employed in producing Indian descriptions is also becoming larger. Good authorities are of the opinion, however, that the effect of the famine alone upon the consumption of imported cotton manufactures will not be anything like so serious as a mere contemplation of the statistics of famine relief might lead one to suppose, that is to say of the number of persons dependent upon the Government for support in employment on public works, or in the form of gratuitous relief. Imported goods are chiefly consumed by the comparatively well-to-do classes, as these are judged by the Indian standard of living.

It is mainly among the very poor, who buy the lower-priced goods made in Bombay, or in the native handlooms, that the power to buy clothing and household textiles is so greatly diminished by a famine. In parts of the country where the past crops have not failed, and where sowings for the winter crops to be reaped next spring have been possible, the cultivators and grain dealers have been substantially benefited by the rise in the prices of food stuffs. This view is confirmed in two ways. Among the earliest sufferers from the famine are the handloom weavers in districts of India where the weaving of coarse goods is carried on, not as a domestic adjunct to agricultural or other pursuits, but as a regular occupation. At Sholapore, for example, on the eastern boundary of the Bombay Presidency, where there are 4,000 hand looms, the greater part of the weavers were unemployed, according to a telegram received some days ago, and had become chargeable upon the relief funds. But the experience of the famine period of twenty years ago is even more conclusive. The stress of the calamity of that time was felt most severely in the latter half of 1876 and through 1877. Yet the imports of cotton manufactures into India appear to have suffered very little diminution. This fact is plain in the following table showing the amount of cotton piece goods imported from 1874 to 1880 inclusive:

Yards.		Yards.	
1874.....	1,116,369,890	1878.....	1,358,960,871
1875.....	1,223,435,835	1879.....	1,127,731,573
1876.....	1,166,141,537	1880.....	1,333,740,988
1877.....	1,186,418,910		

It appears, therefore, to be a fair inference that the present serious check to the demand for cotton goods in Manchester is, to say the least, quite as much the product of the prevailing and still spreading pestilence and the alarm to which it has given rise as to the famine. Besides, it is felt to be quite possible that the plague may become even a more serious affair than it now is, if the efforts being made to stop its progress and to subdue it should not soon prove effectual. For the moment, however, the prospect of the British cotton industry and of the consumption of cotton, dependent as these are so largely upon the India trade, are not encouraging. The movement for the provision of a great famine relief fund by voluntary contributions has made rapid progress

throughout the Kingdom during the last fortnight. The London Mansion House Fund reaches to-day £205,000, in Glasgow the subscriptions exceed £25,000, and in Manchester they are fully £33,000. An effort is being made, which is very likely to be successful, to combine the whole of the Lancashire contributions in one amount. If this should be done there can be little doubt that the Lancashire fund will considerably exceed £100,000.

For some years British and American proprietors of trade marks have had occasion to complain of fraudulent imitation of them in Japan. Until now no means have been available of dealing with this evil. Provision for eventually putting a stop to it was made in the Anglo-Japanese treaty of July 1894, by which Japan undertook, before the abolition of the Consular Courts in that country, contemplated in the treaty, to join the International Conference for the protection of industrial property (patents, trade marks and designs). Consular Courts could not be abolished, however, until new treaties providing for the abolition were made with many countries already having conventions with Japan in which the extra-territorial jurisdiction of these courts was recognized. The English was the first of the new treaties, the American the second, and others have followed. The German-Japanese treaty concluded last year goes a step beyond those previously arranged, inasmuch as it contains an article (No. 17) conceding to German citizens "the same protection as natives [in Japan] in regard to patents, samples (including patterns) designs, trade and manufactured marks, firms and names, upon fulfillment of the formalities prescribed by law." In pursuance of the "most favored nation" clause of an earlier Anglo-Japanese treaty, that of August 1858, the stipulations of the German clause just quoted were at once extended to British citizens, and it was recently agreed between the British Minister at Tokio and the Japanese Government that its application should date from January 4 1897. There can be little doubt that the treaty between the United States and Japan requires an extension of these stipulations to American citizens also.

The procedure in securing registration in Japan for patents, designs and trade marks is comparatively simple: (1) The application must be presented by some person in Japan duly appointed to represent the foreign applicant by a "letter of authorization;" (2) the application or petition for registration must be drawn up in Japanese, or be accompanied by a Japanese translation, and must contain a proper description by drawings or specimens of the matter to be registered; (3) it must be accompanied by a certificate of the nationality of the applicant. When the news of the opening of a Registration Office in Japan to Germans and Japanese alike was made known, some fear was at first entertained that British trade marks might be legally appropriated by them through priority of application. It appears, however, that according to the Japanese regulations on this subject, which were prepared as far back as 1888—probably in anticipation of the new treaties—no one can register a trade mark already in use in Japan except the real owner of it. Merchants and manufacturers need therefore be under no apprehension as to their rights being forestalled by priority of application by others.

In spite of the protests of numerous European and American commercial representative bodies, including the New York Chamber of Commerce, the projected

enforcement of an official telegraphic vocabulary, from which alone the words employed in cipher or "code" international messages may be constructed, has not been abandoned. This project was first sanctioned by the International Telegraphic Conference held at Paris in 1890. It was then resolved that an official vocabulary, intended at the time to be obligatory only for inter-European messages, should be prepared by the permanent Telegraphic Bureau at Berne. This volume was issued toward the close of 1894, and it was immediately seen by persons accustomed to compile and use telegraphic codes for telegraphic purposes that it was altogether inadequate in its supply of words and seriously defective in its construction. At the next conference held at Buda Pesth last July, it was agreed that another and better vocabulary should be prepared. The determination to make it compulsory and exclusive was reaffirmed, however, although the date of its obligatory application was postponed to a time to be fixed "at a subsequent conference." Not less important was a resolution, adopted at the same time, to extend its scope to extra-European code messages. In order to meet the objection against the obligation to use only words contained in the official volume, possessors of private codes were invited to forward them to the Director of the Bureau at Berne, but without any undertaking that all the words appearing in them should be comprised in the new edition of the Vocabulary.

English merchants are, of course, up in arms against this innovation, and, through the Chambers of Commerce, are preparing fresh protests which will be addressed to the Postmaster General against any interference with the existing liberty of choice of any legitimate words to be found in the eight languages already authorized for the purpose. It is obvious that, in these days, when the international commerce of the world is conducted mainly by means of telegraphic correspondence—made possible only by the use of cipher—the proposed curtailment is a very serious matter. Representative commercial bodies on the Continent are also very extensively opposed to the change, and there are indications that the discontent will find voice in most of the great centres of commerce throughout Europe. This may, perhaps, not appear very promptly, because the grievance is not pressing. The next international conference will not be held until 1901, and it may be that the considerable interval still remaining may have the effect of retarding the full expression of the discontent, which is undoubtedly both strong and widespread.

### THE CHICAGO & ALTON REPORT.

President Blackstone makes no extended remarks this time in the annual report of the Chicago & Alton, but the report always attracts attention by reason of the unique position which the road has held for so many years. As has been frequently pointed out in these columns, a distinctive policy has been pursued in the management of the property, so much so that the road stands *sui generis* in this respect. At a time when all other leading systems were adding large amounts of mileage through acquisitions and new extensions, the mileage of the Alton was kept stationary. Since the completion of the Kansas City extension in 1879—eighteen years ago—the extent of road in the system has remained practically unchanged. This policy, too, has been attended with marked success, as is evident from the fact that the company has been

able to continue 8 per cent dividends on both classes of stock through the whole of the recent period of depression, when none of its neighbors and competitors found such an achievement possible.

As far as the results for the late year are concerned, they show very little change from those for the year preceding, so that the opinions expressed on previous occasions as to the merits and advantages of the policy pursued require no modification. Gross earnings as compared with 1895 increased a little; net earnings fell off a trifle. Out of the 1896 net the company was able to meet all charges and the 8 per cent dividends, and then there was left a balance of \$221,692; of this latter \$52,378 was appropriated for new track and additional property, \$119,316 was applied to the sinking funds, and \$32,665 was used in settlement of old claims, leaving the sum of \$17,333 to be carried forward to swell accumulated surplus. It is evident that the large crops the last two years have been a great benefit and have prevented a further shrinkage in revenues (after the losses in previous years), which must inevitably have occurred except for that circumstance. From the monthly statements of earnings it appears that, for the first seven months to July 31 there was a gain over 1895 each month, the aggregate increase for the seven months reaching \$278,414; in the last five months the influence of the great depression in trade arising from the silver agitation was felt, and earnings fell off \$240,616, leaving the increase for the twelve months only \$37,798. The effect of the good crops is seen in the fact that the gross earnings on shipments of farm products from local stations in Illinois and Missouri were \$1,355,875 in 1896, against \$1,276,478 in 1895, \$1,177,353 in 1894, and \$1,041,049 in 1893; the largest total in any previous year had been \$1,277,823 in 1891.

While the policy pursued in the Alton case, under which no mileage has been acquired and therefore no increase in charges incurred, has been eminently successful, it by no means follows that a like policy would have been attended with equally satisfactory results in the case of other systems. That this policy was, all things considered, best for the Alton admits of no question, and the management are entitled to much credit for not having joined in the general movement of expansion, which became so marked a feature of the railroad history of the time, after the resumption of gold payments in 1879. But there were special circumstances in the Alton case which did not exist in the case of most of the other systems. The Alton under Mr. Blackstone's management, has always been ably and conservatively managed. The property was in fine condition eighteen years ago, as it is to day. It had already built up a large business when the revival in trade occurred in 1879, and this business, under a continuation of good management, it was reasonably certain to retain. The location of the line is excellent, and it is situated in the very heart of the country, connecting the important traffic centers of Chicago, St. Louis and Kansas City. Practically the whole system is main line. By reason of this favorable geographical situation it could confidently count on a share in the increase in traffic resulting from the growth and development of the Western country, whether it built any new mileage itself or not. In a word, it was in position to dispense with new extensions. In the case of most other large systems, however, the conditions were different; for these

to have remained stationary while big confederations of road were being built up on every side would have been to invite decay. Thus the policy of non expansion clearly fitted the Alton, while it is doubtful whether it could have been applied to the other systems.

Most of the extensions built through the newer regions of the West have, because of their light traffic, been a burden to the parent company. The Alton, in not having any of these extensions to take care of, escaped the drain on its resources from that cause which the other companies experienced. And that is where its main advantage has come in. It of course suffered from the unfavorable conditions prevailing the same as the rest of the roads. This appears from the fact that its gross revenues in 1896 were only \$6,840,283, while sixteen years before, in 1880, they had been \$7,687,225, and the net earnings were only \$2,801,737 against \$3,477,934. The Alton was in condition to bear this loss. But if it had had heavier charges to meet because of new extensions, its fate must have been the same as that of other lines. It is to be said, too, that the policy of spending so freely for improvements when earnings were large must also be credited with part of the company's good fortune, since it removed the necessity for heavy expenditures on the same account in recent years when earnings fell off.

Mr. Blackstone in the present report refers again to the increasing burden of taxation which is imposed on the railroads, and he gives an interesting table to reinforce his argument on that point. In his previous report he pointed out that while the assessment of railroad property has been steadily increased, the assessment of other property has been reduced. The table which he now presents shows that as the Alton's net earnings have fallen off the amount required for taxes has very decidedly risen. In 1880, when the net was \$3,477,984, the taxes were \$147,413; in 1896, with net of only \$2,801,736, the taxes were \$315,745. In other words, during the sixteen years taxes have increased from 4.24 per cent of the net earnings to 11.27 per cent; and the force and value of this comparison is enhanced by the fact that the mileage of the system has not been enlarged at all in the interval, so that the taxes now are levied on precisely the same property as in the earlier year. Similar complaints of excessive taxation are being made by other railroads, and the matter is one that should receive careful attention, for we need hardly say that declining rates for freight and passengers and increasing taxes can not go on together very long.

## Monetary and Commercial English News

[From our own correspondent.]

LONDON, SATURDAY, February 6th, 1897.

The report of the Senate Committee on the Arbitration Treaty has caused disappointment here, but the feeling is tempered by satisfaction at the evident desire of all right-thinking people in the United States to maintain the most friendly relations between the two countries. The signing of the Venezuela Treaty is heartily welcomed, and everyone hopes that the arbitration will be concluded satisfactorily.

The announcement that Mr. Gage, President of the First National Bank of Chicago, is to be the new Secretary of the Treasury has also been received here as a good omen. Although, naturally, little is known of Mr. Gage, that little is uniformly favorable, and it is assumed that he would not accept unless he was assured that a serious effort would be made to take the Government out of banking.

Count Muravoff's visits to Paris and Berlin are over, and the world is as ignorant as ever as to what was the real object he had in view. It is stated, however, upon what appears to

be excellent authority, that he and the French Foreign Minister warned the Turkish Ambassador in Paris that the Powers are agreed, and that the Sultan must accept their recommendations. There is hope, too, that the Spanish Government is really about to make an earnest effort to settle with Cuba.

On the other hand, Mr. Chamberlain's speech a week ago in the House of Commons during the debate upon the re-appointment of the South African Committee has caused some uneasiness. The Colonial Minister said that there is a recrudescence of unreasonableness, and he added that if certain recent legislation in the Transvaal was enforced, it might have serious consequences. President Krüger has retorted somewhat warmly. From all of which it is inferred that unless great tact is used on both sides, there may be a renewal of trouble in South Africa.

In home affairs the most significant event for a considerable time is the election of a radical labor candidate for Walthamstow Division. The division is practically a suburb of London, is very densely populated, and for the last eight or nine years has been strongly conservative. At the general election a year and a-half ago the Conservative majority largely exceeded two thousand; now a working man has been elected by a majority of 269. The general inference is that the working classes throughout London and the neighborhood are disgusted at the money voted last year and about to be voted this year in aid of the landed interest and the Church.

On Thursday the Directors of the Bank of England put down their rate of discount from  $3\frac{1}{2}$  per cent to 3 per cent. The general expectation is that this rate will be maintained, at all events till the end of March, because the revenue collections will transfer immense sums from the other banks to the Bank of England. At the same time, it is to be noted that the Government is buying largely for the sinking fund and the savings banks, which will to some extent counteract the collection of the revenue. Furthermore, Japanese money is being transferred from Berlin to London, and lastly money is becoming so cheap all over Europe that considerable receipts of gold are expected.

The silver market is very quiet, and the demand for India Council drafts has somewhat abated. Last week the Council was able to sell by public tender and private contract over a crore of rupees. On Wednesday of this week it offered 50 lacs and sold only 21 lacs at a very trifling fraction under 1s.  $3\frac{3}{4}$ d. per rupee. It ought to be added, however, that it has since sold considerable amounts, almost every day, by private contract. The Indian money market continues very tight. The Bank of Bombay yesterday raised its rate of discount from 10 to 12 per cent. The Bengal Bank rate is 10 per cent. In the interior rates range up to 15 per cent and even higher. The distress is increasing, the number employed on the relief works is augmenting every day, and it is feared that no improvement can be expected until the end of April, when the next crops will become available. The Government reports that the plague in Bombay is abating. Most vigorous efforts are being made to stamp it out. But unfortunately at Kurracchee it is spreading, and there is a panic among the native work people.

Business on the Stock Exchange continues very quiet, partly because of Mr. Chamberlain's speech and partly because the general public still keeps aloof. In the American market there is some investment in good bonds, but very little in anything else, though there is now and then a professional speculation which follows the movements in New York. In South American securities there is not much doing, as the injury done to the crops in Santa Fe and Entre Rios by locusts and rains appears to have been serious.

The South African market is stagnant, and indeed the only little activity anywhere is in the markets for British Government securities and British railway stocks. Government securities are bought because of the cheapening of money, and British railway stocks are bought because the dividends, so far announced, are highly satisfactory, and trade all over the country is steadily improving. The working classes are well employed, rates are fairly well maintained, and the volume of business done by the railways is greater than ever before. As yet there has been no rise in wages and no great increase in fixed charges, and consequently investors hope that in the current six months, at all events, there will be a considerable improvement in dividends.

On the Continent operators are waiting for the decision of the Ambassadors at Constantinople and the settlement of the

Cuban question. Paris is beyond all comparison the greatest of Continental markets, and Paris is very deeply interested in both Spanish and Turkish securities. There has been a great fall in both. If the Turkish and Spanish questions are settled there is expected to be a rise, and then the universal opinion in Paris is that there will be a marked recovery in business, and that all the Continental bourses will follow suit.

The following return shows the position of the Bank of England, the Bank rate of discount, the price of consols, &c., compared with the last three years:

	1897 Feb. 3.	1896 Feb. 5.	1895. Feb. 6.	1894. Feb. 7.

Messrs. Pixley & Abell write as follows under date of February 4:

Gold.—There has been no change in the gold demand, which continues to absorb all arrivals. Since last week the Bank has received £100,000 in Sovereigns, while £80,000 has been taken for South America. Arrivals: South Africa £128,000; River Plate, £15,000; West Indies, £24,000. Total, £147,000. Shipments: to Calcutta, £13,250; Japan, £135,000. Total, £148,250.

Silver.—The market has slightly given way since our last report on American selling, and is fairly steady at the reduction. The Indian price to-day is 8 rupees. Arrivals: New York, £143,000; River Plate, £24,000; West Indies, £17,000. Total, £174,000. Shipments: Calcutta, £29,900; Bombay, £20,500. Total, £120,400.

Mexican Dollars.—With no business in these coin the price is only a nominal one. Arrivals from New York, £38,000.

The quotations for bullion are reported as follows:

GOLD.			SILVER.

#### Commercial and Miscellaneous News

CHANGES IN LEGAL TENDERS AND NATIONAL BANK NOTES TO FEB. 1.—The Comptroller of the Currency has furnished us the following, showing the amounts of national bank notes January 1, together with the amounts outstanding February 1, and the increase or decrease during the month; also the changes in legal tenders held for the redemption of bank notes up to February 1.

National Bank Notes—			
Amount outstanding January 1, 1897.....			\$235,576,381
Amount issued during January .....	\$333,184		
Amount retired during January .....	901,460		568,296
Amount outstanding Feb. 1, 1897.....			\$235,008,085
Legal Tender Notes—			
Amount on deposit to redeem national bank notes January 1, 1897.....			\$19,726,074
Amount deposited during January.....	\$2,996,760		
Amount issued and bank notes retired in Jan.	901,460		2,095,300
Amount on deposit to redeem national bank notes Feb. 1, 1897.....			\$21,821,374

\* Circulation of National Gold Banks, not included in above, \$86,577.

According to the above the amount of legal tenders on deposit Feb. 1 with the Treasurer of the United States to redeem national bank notes was \$21,821,374. The portion of this deposit made (1) by banks becoming insolvent, (2) by banks going into voluntary liquidation, and (3) by banks reducing or retiring their circulation, was as follows on the first of each of the last five months:

Deposits by—	Oct. 1.	Nov. 1.	Dec. 1.	Jan. 1.	Feb. 1.
Insolv't bks.	\$663,309	\$647,905	\$704,585	\$895,497	\$935,897

WALL STREET, FRIDAY, FEB. 19, 1897—5 P. M.

**The Money Market and Financial Situation.**—The disturbed relations existing between Greece and Turkey, which unsettled the European markets on Monday, was used by the bear element in Wall Street with but little effect, and aside from some depression in coal securities there have been no unfavorable developments of importance during the week. The coal trade on both sides of the Alleghenys has been in an unsatisfactory condition for so long that even the strongest coal-carrying roads are affected by the results. A sharp decline in Lehigh Valley securities in the Philadelphia market was followed by another heavy drop in Hocking Valley bonds and shares on the New York Stock Exchange.

There are, however, several favorable features of the general situation which although not likely to be radical in immediate results are nevertheless worthy of note. One of the most important of these is the improvement in the iron and steel industries, as the orders which have already been placed for steel rails insure activity in that branch for some time to come. There are also reports from different parts of the country that various manufacturing establishments are increasing the number of hands employed, and a larger number of railway traffic reports now make a favorable showing.

The statistics of the foreign trade of the United States for the month of January compiled by the Treasury Department are very satisfactory when compared with those for the corresponding month of previous years.

In the money market there is reported to be an increase in the offerings of commercial paper, and this is regarded by bankers as indicating a revival of activity in commercial circles. This increase, however, is not sufficient to cause any advance in rates.

The open market rates for call loans during the week on stock and bond collaterals have ranged from 1½ to 2 per cent. To-day's rates on call were 1½ to 2 per cent. Prime commercial paper is quoted at 8 to 4 per cent.

The Bank of England weekly statement on Thursday showed an increase in bullion of £779,603, and the percentage of reserve to liabilities was 53.76, against 53.42 last week; the discount rate remains unchanged at 3 per cent. The Bank of France shows an increase of 4,560,000 francs in gold and 2,006,000 francs in silver.

The New York City Clearing-House banks in their statement of Feb. 13 showed a decrease in the reserve held of \$3,123,500 and a surplus over the required reserve of \$51,633,225, against \$54,540,050 the previous week.

	1897. Feb. 13.	Difference from Prev. week.	1896. Feb. 15.	1895. Feb. 16.
Capital.....	59,772,700		61,122,700	61,622,700
Surplus.....	74,888,100		73,017,100	72,028,200

Surplus reserve.....	51,633,225	Dec. 2,901,825	36,818,875	33,513,425

**Foreign Exchange.**—The foreign exchange market has been dull but generally firm, and rates are a fraction higher than our last quotations. The offerings, which were limited, have been readily absorbed at current rates.

To-day's actual rates of exchange were as follows: Bankers sixty days' sterling, 48½@48½½; demand, 48½@48½½; cables, 48½@48½½.

Posted rates of leading bankers follow:

February 19.	Sixty Days.	Demand.
Prime bankers' sterling bills on London.....	48½@48½	48½@48½
Prime commercial.....	48½@48½	48½@48½
Documentary commercial.....	48½@48½	48½@48½
Paris bankers' (francs).....	518½@518½	518½@518½
Amsterdam (guilders) bankers.....	401½@401½	401½@401½
Frankfort or Bremen (reichmarks) bankers.....	95@95½	95½@95½

The following were the rates of domestic exchange on New York at the under-mentioned cities to-day: Savannah, buying 1-16 discount, selling par; Charleston, buying par, selling ¾ premium; New Orleans, bank, \$1 00 premium; commercial, 25c. per \$1,000 discount; Chicago, 70c. per \$1,000 discount; St. Louis, 50c. per \$1,000 discount bid, offered at 25c. discount.

**United States Bonds.**—The market for Government bonds has been active and strong. Sales at the Board include \$335,000 4s, coup., 1925, at 122½ to 122¾; \$224,000 4s, reg., 1907, at 111½ to 112; \$50,000 4s, reg., 1925, at 122½; \$83,000 4s, coup., 1907, at 113 to 113½; \$70,000 5s, coup., at 113½ to 113¾; \$1,000 currency 6s, 1899, at 106½, and \$4,000 currency 6s, 1898, at 103½. The following are the closing quotations:

\* This is the price bid at the morning board, no sale was made.

**United States Sub-Treasury.**—The following table shows the daily receipts and payments at the Sub-Treasury during the week.

Date.	Receipts.	Payments.	Balances.		
			Coin.	Coin Cert's.	Currency.
Feb. 13.	\$ 3,846,502	\$ 3,533,955	\$ 123,613,597	\$ 2,917,472	\$ 58,154,896
" 15.	2,718,558	2,773,553	124,003,847	3,084,194	57,538,930
" 16.	3,707,581	3,567,979	124,081,289	2,981,189	57,725,090
" 17.	3,967,255	3,363,331	124,301,868	2,366,655	58,703,486
" 18.	4,401,109	3,340,910	125,301,039	2,328,875	58,803,003
" 19.	4,687,404	3,252,449	125,965,951	2,271,985	59,631,788
Total.	23,328,439	19,832,177			

**Coins.**—Following are the current quotations in gold for coins:

Sovereigns.....	\$4 86	\$4 89	Fine silver bars.....	— 64½@ — 65½
Napoleons.....	3 85	3 88	Five francs.....	— 93 — 95½
X K Reichmarks.....	4 74	4 78	Mexican dollars.....	— 50½@ — 51½
25 Pesetas.....	4 77	4 81	Do uncom'clal.....	— — —
Spain, Donblons.....	15 55	15 75	Peruvian sols.....	— 45½@ — 47½
Mex. Doubleons.....	15 50	15 75	English silver....	4 83 @ 4 87
Fine gold bars... par	85½	86 prem.	U. S. trade dollars	— 65@ — 75

**State and Railroad Bonds.**—Sales of State bonds at the Board include \$7,000 Virginia fund, debt 2-3s of 1891 at 62 to 62½, \$5,000 Alabama class A at 106, \$300 Tenn settlement 3s at 72 and \$2,000 Alabama class B at 105.

The market for railway bonds has been less conspicuous than during several weeks previous, but is still prominent for activity and strength. Changes in quotations are generally unimportant however, except in the case of Hocking Valley bonds, which have declined from 10 to 15 points in anticipation of a possible default of interest due March 1, and an advance of over 2 points in Oregon Short Line. The high-grade issues continue to be in demand and sales during the week include those of Central of New Jersey, Rock Island, Chicago & Erie, North West, Milwaukee & St. Paul, St. Paul Minn. & Manitoba, Oregon Short Line, Union Pacific, West Shore, Wabash, Richmond & Danville, New York New Haven & Hartford, Lexington Ave & Pavoia Ferry and Brooklyn Union Gas. The most pronounced activity, however, has been in the lower grade issues, including Atchison, Chesapeake & Ohio, Chicago & No. Pacific, Kansas Pacific, Missouri Kansas & Texas, New York Ontario & Western, Northern Pacific, Reading, San Antonio & Aransas Pass, Southern Railway and Texas & Pacific bonds.

**Railroad and Miscellaneous Stocks.**—The stock market has been somewhat irregular during the week, and prices for different shares in the same group, although affected chiefly by the same general influences, have moved in opposite directions. The coal stocks have been conspicuous. Lehigh Valley declined several points on the Philadelphia Exchange. Hocking Valley, moving in sympathy with the bonds, declined from 8½ to 4½. This stock sold in November above 20. A considerable decline in Central of New Jersey and Reading is offset by a corresponding advance in Delaware & Hudson and Lackawanna. Northern Pacific preferred has been active on a rising market and Lake Shore sold to-day at 158, the highest point in its history. Manhattan Elevated has continued weak, selling down to 86½ and closing at 87½.

The Trust stocks of the miscellaneous list have been prominent on account of the Investigating Committee's work, but recovered a part of the decline noted last week. United States Rubber preferred advanced 3½ points and the common 1½ points, American Tobacco 3½ points and American Sugar 2½ points. Tenn. Coal, Iron & Railway and Colorado Fuel & Iron each declined about 2 and 4 points respectively. American Spirits has been in demand and the preferred shares advanced 2½ points, losing a part of the advance to-day.

## NEW YORK STOCK EXCHANGE—ACTIVE STOCKS for week ending FEB. 19, and since JAN. 1, 1897.

# Investment AND Railroad Intelligence.

## RAILROAD EARNINGS.

The following table shows the gross earnings of every STEAM railroad from which regular weekly or monthly returns can be obtained. The first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the period from January 1 to and including such latest week or month.

The returns of the street railways are brought together separately on a subsequent page.

\* Figures given do not include Oregon Ry. & Nav., Un. Pac. Denver & Gulf, Denver Leadville & Gunnison, Montana Union and Leavenworth Topeka & Southwestern. \* These figures include results on leased lines. \* Includes earnings from ferries, etc., not given separately. \* Mexican currency. \* Includes only half of lines in which Union Pacific has a half interest.

† Includes operations of the Chic. Burlington & Northern in both years.  
‡ Covers results for lines directly operated east of Pittsburg.  
§ Includes results on affiliated lines.  
¶ Covers besides the Atlantic system the Houston & Texas Central Austin & Northwestern, Central Texas & Northwestern and Ft. Worth & New Orleans.  
† Includes St. Louis Alton & Terre Haute for all periods.

**Latest Gross Earnings by Weeks.**—The latest weekly earnings in the foregoing are separately summed up as follows:  
For the second week of February our preliminary statement covers 50 roads, and shows 4.37 per cent increase in the aggregate over the same week last year.

**Net Earnings Monthly to Latest Date.**—The table following shows the net earnings of STEAM railroads reported this week. A full detailed statement, including all roads from which monthly returns can be obtained is given once a month in these columns, and the latest statement of this kind will be found in the CHRONICLE of January 23, 1897. The next will appear in the issue of February 27, 1897.

Roads.	Gross Earnings.		Net Earnings.

\* After allowing for other income from Jan. 1 to Dec. 31 there was a deficit of \$85,727.

### STREET RAILWAYS AND TRACTION COMPANIES.

The following table shows the gross earnings for the latest period of all STREET railways from which we are able to obtain weekly or monthly returns. The arrangement of the table is the same as that for the steam roads—that is, the first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the calendar year from January 1 to and including such latest week or month.

### STREET RAILWAYS AND TRACTION COMPANIES.

\* Figures were exceptional in 1895 on account of Atlanta Exposition; Decrease in earnings due to factories being shut down.

**Street Railway Net Earnings.**—The following table gives the returns of STREET railway gross and net earnings received this week. In reporting these net earnings for the street railways, we adopt the same plan as that for the steam roads—that is, we print each week all the returns received that week, but once a month (on the third or the fourth Saturday) we bring together all the roads furnishing returns, and the latest statement of this kind will be found in the CHRONICLE of January 23, 1897. The next will appear in the issue of February 27, 1897.

Roads.	Gross Earnings.		Net Earnings.	
	1896-7.	1895-6.	1896-7.	1895-6.

## ANNUAL REPORTS.

**Annual Reports.**—The following is an index to all annual reports of steam railroads, street railways and miscellaneous companies which have been published since the last editions of the INVESTORS' and STREET RAILWAY SUPPLEMENTS.

This index does not include reports in to-day's CHRONICLE.

NOTE.—Full-face figures under street railways refer to Volume 64.

## Chicago &amp; Alton Railroad.

(Report for the year ending Dec. 31, 1896.)

President T. B. Blackstone in the report says:

**General Results.**—The number of passengers transported during the year is 21,875 more, and the number of tons of freight transported 2,410 more than in the preceding year. The average rate per ton per mile was in 1896 817-1000 of a cent, and in 1895, 867-1000 of a cent.

**Excessive Taxation.**—In our last annual report we called your attention to the excessive taxation of railroad property in the West. The number of miles of railroad upon which your company has paid taxes has remained unchanged for the last seventeen years. Yet as the net earnings have decreased the taxes have increased, the taxes amounting to \$147,413 in 1880 and \$315,745 in 1896, the percentage of taxes to net earnings having increased from 4 1/4 per cent in 1880 to 11 1/4 per cent in 1896.

**Trackage to Peoria.**—Since Sept. 29, 1895, trains of your company have been run daily between Chicago and Peoria, using the tracks of the Toledo Peoria & Western RR. between Washington and Peoria, a distance of twelve miles. Considerable traffic has been developed, but the margin of profit has been very small. It is hoped that more favorable terms may be obtained for the use of tracks and terminal facilities, so that it will prove for the interest of your company to continue this traffic, which has thus far been largely experimental.

**Statistics.**—Various statistics of interest are as follows:

Description—	1896.	1895.	1894.	1893.
<b>Passenger Traffic.</b>				
Passengers card.	2,191,044	2,169,169	1,979,933	2,181,747

## Delaware &amp; Hudson Canal Co.

(Report for the year ending Dec. 31, 1896.)

President, R. M. Olyphant says:

**General Results.**—The net profits of the business amounted to \$1,765,012, or a little over 5 per cent, a result which, in view of the extraordinary depression in all business interests of the country, should not be regarded as unfavorable. In view of such out-turn, however, your managers have deemed it the part of prudence to reduce the dividend for 1897 to 5 per cent, thinking it wiser to follow the actual figures, even while hoping for a more favorable showing the coming year. The total output of coal, the amount produced by your company and the amount transported for others were as follows. [For comparison we add the years given prior to 1896—Eds.]:

Tons (000s omitted).	1896.	1895.	1894.	1893.	1890.	1887.
Total output.	43,177	46,511	41,391	43,089	35,855	34,880
Produced by D. & H. ....	4,223	4,348	3,997	4,467	3,706	4,063
Carried for other companies.	1,613	1,803	1,754	1,710	1,309	984
<b>Total tons carried.</b>	<b>5,836</b>	<b>6,151</b>	<b>5,751</b>	<b>6,177</b>	<b>4,915</b>	<b>5,047</b>

The operations of the leased lines show a slightly decreased loss, being \$18,242, as against \$23,647 for the previous year.

**Life of Coal Lands.**—Stockholders frequently ask about the coal lands of the company, and the possibility of their exhaustion. Careful reports on file in this office show that coal can be profitably mined from our properties for from sixty to seventy years, with an annual output as large as in any previous year.

**Improvements—Guaranteed Debentures.**—The double-tracking of the Albany & Susquehanna RR. has been completed and paid for, and places the line in admirable condition to take care of all the business that may be offered it, at a reduced cost for handling. The business of the New York & Canada RR. has required expenditures for permanent improvements from year to year since it was first opened. On account of advances made by this company for such purpose, as well as for its construction, that company issued during the past year its debenture bonds of \$1,000,000, bearing interest at 4 1/2 per cent per annum, and payable in 1904. These bonds were guaranteed by this company, and sold at par. The profit and loss of the yearly business of the New York & Canada RR. is, and always has been, placed, as it should be, in the profit and loss account of your company.

**Rutland RR.**—Your company has for some years been interested in the Rutland RR. Co. as a large holder of its stock. The road of that company prior to March last was operated under lease by the Central Vermont RR. Co. The latter company then went into the hands of receivers, who, in accordance with the permission of the Court appointing them, surrendered the lease of the Rutland Company, and since May last that road has been operated by its own officers. The result of its business since then is that it has paid all fixed charges, and after making and paying for many betterments has declared a dividend of one per cent on its preferred stock, and has carried forward a surplus. Its directors confidently anticipate much improvement in its future earnings.

**Equipment.**—The additions to our equipment during the year were: 6 locomotives, 100 box cars, 2 passenger cars, Gravity RR.; 2 combination cars, Gravity RR.; 1 cochoise car, Gravity RR.; 10,031 tons of steel rails were purchased and paid for during the year.

**Coal Output.**—The report contains a table from which the following figures are taken:

## COAL OUTPUT (000s omitted).

	1896.	1895.	1894.	1893.	1890.	1887.
Total output.	43,177	46,511	41,391	43,089	35,855	34,880
Of which Del. & Hud.	6,836	6,161	6,761	6,178	4,916	5,047

—V. 63, p. 559.

## Philadelphia &amp; Erie RR.

(Report for year ending Dec. 31, 1896.)

The income account for 1896 was published in the CHRONICLE of Feb. 13, page 326. The pamphlet report of President Shortridge says in part:

**Improvements.**—While the most rigid economy has been exercised during the year, the property of the company has been maintained at its usual efficient standard; 38,458 cubic yards of new ballast having been placed in the road. New single-track bridges were erected at Corry, Newberry and Montgomery; a double-track stone bridge constructed near Milton; a double-track iron bridge built at Warren; and a new one in course of construction over Bald Eagle Creek at Look Haven, which will be completed early in the present year, the last two replacing single-track wooden bridges. Slight additions have been made to the company's sidings, and extensive repairs have been made to the terminal facilities at Erie and to the shops at Sunbury, Kane and Renovo.

**Coal and Iron Shipments.**—Anthracite coal shipments to Erie during the year decreased 4,366 tons. Iron-ore shipments eastward decreased 187,367 tons, while other traffic eastward shows an increase of 287,800 tons over the previous year.

**Warren & Franklin Bonds Paid.**—The \$1,500,000 of Warren & Franklin first mortgage 7s, maturing Feb. 1, 1896, have all been paid off and canceled [by the Western New York & Pennsylvania Railway, which had assumed the same.—Eds.] except \$1,500, thus relieving your company from its obligation of 1865 to purchase said bonds if the company had been unable to do so at maturity.

**Stock not taxable but net earnings equal 6 per cent on capital invested.**—Early in the year 1899 the Commonwealth of Pennsylvania presented a claim against your company for over \$500,000 for tax on capital stock for the twenty years from 1868 to 1894. In a compromise settlement of this claim the Commonwealth received the sum of \$75,000. Subsequently a case was tried to test the right of the Commonwealth to tax the capital stock of this company, and the Supreme Court decided that it was not liable to State tax until the net earnings realized at least 6 per cent per annum upon the capital invested. In view of this decision the Commonwealth was asked to refund the \$75,000 paid as above stated, and the State Board of Accounts has credited the Company with that amount as against any future taxes.

## GENERAL BALANCE SHEET DEC. 31, 1896.

Dr.		Cr.

## Lehigh Coal &amp; Navigation.

(Report for year ending Dec. 31, 1896.)

The report says in substance:

**General Results.**—Coal production from the company's property, including the coal used by the company in its operations, was 1,549,097 tons, which was 27,402 tons in excess of the amount produced in 1895. The total shipments and local sales amounted to 1,399,955 tons. The average cost of coal was \$1.337, against \$1.329 in 1895. This slight increase was accounted for by the higher wages paid in 1896. The profit from the coal operations was nearly all made in the last six months of the year. Previous to that time the market was suffering from the extremely low prices caused by the unnatural competition and excessive production in 1895. If the higher prices realized for coal had extended to the smaller sizes, or steam coals, as well, the results would have been much better, as 44 per cent of our total output consists of sizes including pea and smaller. The mines are in good condition, and capable of a much larger production should the market require it during the coming year.

The loss in the operation of canals was due to the expenditure caused by the rebuilding of Dam No. 1 at White Haven, which was destroyed by freshet and heavy ice in March last.

**Financial.**—The balance of the collateral trust 4½ per cent bonds, amounting to \$500,000, have been sold during the year on satisfactory terms, and the proceeds used to take up the floating debt and to provide for necessary improvements on our coal property.

The railroad loan of \$2,000,000 due February 1, 1897, has been extended until 1914 at 4 per cent instead of 6 per cent per annum. The reduction in interest charges will be \$40,000 yearly. We received a large premium for the privilege of extension.

**Earnings.**—Receipts, etc., for four years have been as follows:

	1896.	1895.	1894.	1893.
<b>Receipts—</b>				
From railroads ..	1,550,625	1,410,074	1,445,515	1,811,887

—V. 64, p. 41.			

### National Lead Company.

(Report for the fiscal year ending Dec. 31, 1896.)

The remarks of President L. A. Cole are as follows:

**General Results.**—The statement herewith discloses accurately the result of the business of the company for the year 1896, the fifth in its history. The conditions surrounding commercial interests in that period are familiar to all, and need review only as they may apply to this business. Continually falling prices limited the margin of profit and although consumption was stimulated, making the tonnage distributed the largest in our history, the net earnings were but \$1,174,991. While competition has been active, it will be observed that no demoralization has resulted and that a profit, although small and inadequate to the capital involved, has followed on the conduct of the business. Our relations to the trade continue harmonious.

**Plant Investment.**—This account shows for the five years ending with this report a net increase of \$799,248 (for the current year, \$137,933), representing expenditures for permanent improvements and for new properties, less amount received for properties sold. This sum has been paid from undistributed earnings, represented on the balance sheet by "surplus" account, thus largely employing it. The policy of modernizing the factories has been continued and its wisdom demonstrated in lower manufacturing costs. The smelting and refining plants of the company have not been operated during the year. From "plant investment" account has been deducted \$288,145 for depreciation and a like amount charged to "surplus" account. This is done in pursuance of a conservative policy and in no manner affects the net earnings shown for 1896.

**Working Capital, Etc.**—Attention is called to the decrease in the item of "other investments," many of the assets heretofore included under that head having properly been transferred to "stock on hand." Shareholders will note the stock on hand is less this year than last, partly attributable to the values at which inventories have been taken, all being the lowest ever recorded.

Working capital is ample for present needs and has been less actively employed only because our large stocks cost less money. The accounts payable are less and as usual represent current matters waiting audit before payment. The mortgage indebtedness remains at \$12,600.

**Prospects.**—In conclusion it may be said that there has been no occasion to depart from the established policy of the company as respects the conservation, protection, and extension of its trade and the distribution of profits earned. Both classes of the stock are largely held by those to whom originally issued, and all holders have an undivided interest in its prosperity. We feel reasonably confident in our belief that the bottom was touched in 1893, and in predicting that the year on which we have entered will be fairly prosperous for the company.

**Earnings, Etc.**—Results for four years were as follows:

	1896.	1895.	1894.	1893.
Net earnings ..	1,174,991	1,281,261	1,212,253	1,428,037
Dividend on preferred ..	1,043,280	1,043,280	1,013,280	1,013,280
Dividend on common ..	143,051	143,051	447,162	295,103
Depreciation of plant ..	288,145			
<b>Total charges ..</b>	<b>1,331,425</b>	<b>1,192,334</b>	<b>1,490,442</b>	<b>1,341,388</b>

### Illinois Steel Company.

(Report for year ending Dec. 31, 1896.)

The balance sheet and other figures were given last week on page 327. President Gates in the report says:

**General Results.**—The past year has been a very unsatisfactory one to iron and steel manufacturers, as well as to business generally. In April last we had orders upon our books for over 500,000 tons of

product sold at satisfactory prices for delivery during the year, and our directors, therefore, felt justified in authorizing the purchase of two-thirds of the usual quantity of ore consumed by us in average years, a decision at that time being essential in order to avail ourselves of the low-water freights. The paralysis of business which followed the Chicago Convention lasted until November, owing to which four of our five plants were completely shut down during August and September, notwithstanding the fact that we had fully 300,000 tons of product sold for prompt delivery at that time; but the financial conditions that prevailed throughout the country rendered it impossible for our customers to accept and pay for the goods contracted for, and as a consequence of our being thus forced to carry both ore and finished material, thereby locking up a large amount of capital, our accounts and bills payable have been abnormally high.

**Outstanding Obligations.**—The orders now on our sales books are sufficient in volume to absorb practically our entire inventory of materials, and with normal conditions prevailing by which customers can fulfill their contracts with us, we should be enabled by August 1 next to largely reduce our outstanding obligations.

**Earnings, Etc.**—We have done our full share of the business of the country during the year 1896, although we have had about 40 per cent of our productive capacity unemployed, having among other products sold and delivered about 33 per cent of all the rails used in the United States during that period. In the years 1895 and 1896 we paid all fixed charges, kept our property to excellent order, paid \$350,513 in dividends, charged to manufacturing cost \$903,082 for improvements and betterments to plants, leaving our condition on Jan. 1, 1897, about the same as it was on Jan. 1, 1896, without any impairment of our investment but with increased value and economies in our plants.

**Construction, Etc.** We also went for new construction in 1896 \$1,045,121, this work being ordered early in 1895 and not completed until 1896, being expenditures contemplated when the new debenture issue was made in 1893, and paid for out of the proceeds of the same. We have increased the capacity of our various plants largely within the past two years, and have also succeeded in making considerable reductions in the cost of manufacture. The physical condition of our plants is the best in the history of our company.

**Prospects.**—With reasonably good business we should be able to realize a handsome return upon our investment, after paying interest and all fixed charges; maintain our standard of quality, and produce and deliver our goods in competition with any American manufacturer.—V. 64, p. 327.

### Maryland Coal Company.

(Report for the year ending Dec. 31, 1896.)

This company reports earnings, etc., as follows:

	1896.	1895.	1894.	1893.	1892.
Coal output, tons ..	350,624	449,234	351,374	358,919	286,213
<b>Credits and payments—</b>					
Amt. to credit of coal acct. Dec. 31 ..	\$985,118	\$1,029,829			\$996,848
Coal on hand Dec. 31 ..	5,079	3,163			4,914
Interest received ..	2,177	590			
<b>Total credits ..</b>	<b>\$892,374</b>	<b>\$1,032,587</b>			<b>\$1,001,762</b>
Freight, mining, etc., expenses ..	\$764,024	\$905,547			\$895,821
Taxes ..	9,384	7,955			7,179
Improvements ..	15,790				15,929
Interest on 1st mortgage bonds ..	4,690	5,040			5,237
Dividends ..	(3½%) 65,944	(4½%) 84,775	(3½%) 65,932		
<b>Total payments ..</b>	<b>\$862,812</b>	<b>\$1,003,317</b>			<b>\$990,098</b>
<b>Balance, surplus ..</b>	<b>\$29,562</b>	<b>\$29,270</b>			<b>\$11,664</b>

The balance sheet Jan. 1, 1897, was as follows:

### GENERAL BALANCE SHEET JAN. 1, 1897.

Cr.	1897.	Dr.	1897.
Real estate ..	\$2,000,000	Capital stock—common	\$11,100

<b>Total ..</b>	<b>\$2,352,206</b>	<b>Total ..</b>	<b>\$2,352,206</b>

Bonds outstanding Dec. 31, 1896, \$27,000, of which nine have been paid since and one will be on presentation.—V. 62, p. 455.

## GENERAL INVESTMENT NEWS.

**Reorganizations, Etc.**—Latest Data as to Defaults, Reorganization Plans, Payment of Overdue Coupons, Etc.—All facts of this nature appearing since the publication of the last issues of the INVESTORS' and STREET RAILWAY SUPPLEMENTS may be readily found by means of the following index. This index does not include matter in to-day's CHRONICLE.

For some small street railway companies see index in CHRONICLES of December 26, 1896, and January 16, 1897.

**NOTE.**—Full-face figures under street railways refer to Volume 64.

**Baltimore City Passenger Ry.—Certificates of Indebtedness.**—The stockholders of this company have the privilege of subscribing at par on or before Feb. 23 to the \$500,000 of  $4\frac{1}{2}$  per cent gold certificates of indebtedness.—V. 64, p. 328.

**Brigantine Transit.—Sold in Foreclosure.**—On Feb. 4 H. La Barre Jayne, representing the reorganization committee, purchased this property at foreclosure sale for \$50,000, subject to a mortgage of \$15,500 held by local parties. The reorganization plan in V. 63, p. 837, has received the assent of about 95 per cent of the creditors, and will be carried out as rapidly as possible. The new company will be the Brigantine R. R. and Steamboat Co.—V. 63, p. 837.

**Brooklyn Rapid Transit—Nassau Electric RR.—Brooklyn Elevated RR.—Kings County Elevated RR.—Consolidation Talked of.**—Negotiations looking to a consolidation of all the surface and elevated street railways in Brooklyn have been renewed, but have not reached a point where any definite plan can be announced.—V. 64, p. 329.

**Camden & Burlington County RR.—Refunding Bonds.**—The stockholders on Feb. 6 authorized the issue of \$350,000 of 4 per cent bonds to take up a like amount of 6 p. cts. due this year.

**Called Bonds.**—The following bonds have been called for payment. The numbers may be learned at the offices of the respective companies. (Last list in V. 63, p. 1114).

**CHICAGO & NORTHWESTERN.**—Sinking fund bonds of 1879, fives and sixes. The numbers of bonds drawn (interest ceasing Feb. 1, 1897), were published in the CHRONICLE advertising columns Feb. 6.

**CHICAGO & WESTERN INDIANA.**—Eighty-five bonds will be redeemed May 1.

**CLEVELAND & PITTSBURG.**—Seventy-one construction and equipment bonds have been drawn for payment July 1, 1897.

**DULUTH MISSABE & NORTHERN.**—Sixty-three first consol. mort. bonds; interest ceased Feb. 10.

**IND. BLOCK COAL.**—Three bonds; interest ceasing July 1.

**OREGON RAILROAD & NAV.**—Thirty first mort. bonds have been drawn for payment; interest ceased Jan. 1.

**PENNSYLVANIA COMPANY.**—Fifty-five bonds of the secured loan due 1907; interest ceased Jan. 26.

**WESTERN UNION TELEGRAPH.**—Forty-one bonds have been called for payment, interest ceasing May 1.

**Central Vermont RR.—Foreclosure.—Reorganization Matters.**—The Secretary of the Committee of the Consolidated RR. of Vermont 5 per cents, replying to our inquiry, says:

"The receivers, as you know, are C. M. Hays and E. C. Smith, and they were appointed under the bill brought last March by the Grand Trunk Ry. Co. as creditor. As there was no default until Jan. 1 the work of this committee was to protect the interests of the bondholders. On Saturday the American Loan & Trust Co., the trustee under the mortgage, filed a bill at Montpelier asking for a foreclosure of the 5s mortgage. There is no reorganization plan at present.

"The time for the deposit of bonds under the committee's agreement expired on the 5th of January last and the committee have in their hands considerably more than a majority of the bonds. No penalty has yet been fixed for the deposit of bonds in the future. The American Loan & Trust Co., the trustee under our mortgage, is also the depository for the bonds."—V. 64, p. 82.

**Charleston (S. C.) Street Ry.—Consolidation.**—Parties interested in the Charleston Street Ry. Co. (the new company which has been building a trolley road in Charleston, S. C.) have purchased the entire capital stock and bonds of the Charleston City Ry. Co. and a controlling interest in the Enterprise Railroad. The price paid for the \$100,000 stock and \$100,000 bonds of the City Railway is \$150,000, in addition to which the surplus of the City Railway Company is to be divided among its stockholders, giving them a dividend of 14 per cent (\$7 per share). The three companies are to be consolidated under whichever charter is found most favorable, and the system will be equipped with trolley and modern appliances. Frederick B. Jennings of the firm of Stetson, Tracy, Jennings & Russell, of this city, is one of the chief movers in the consolidation.

**Columbus Hocking Valley & Toledo Ry.—Rumored Probable Default in Interest Due March 1 on Consol. 5s.**—The consolidated 5 per cent bonds and general mortgage 6s have scored a decline this week of 10 to 15 per cent on the rumored likelihood of a default on the coupon due March 1 on the consols. It is not denied by the officials that the money required for the payment of the interest has not yet been provided. Whether parties in interest will come to the company's relief is the question, and it is thought that this will be determined by the coming Wednesday. The company's fiscal agents, as is well known, went into liquidation some weeks ago on account of the fall in value of the railroad company's stock and bonds, but their loans were reported to have been trusted, removing the danger of the collateral being forced on the market.—V. 63, p. 1162.

**Erle Railroad.—Quarterly.**—Earnings for the quarter and the six months ending Dec. 31, 1896, have been reported as follows. The road was not turned over to the present company until Dec. 1, 1895; so no comparison is given.

	Gross earnings.	Net earnings.	Other income.	Interest, taxes, etc.	Balance surplus.
3 mos. to Dec. 31, 1896.....	\$7,423,551	\$2,398,300	\$22,870	\$2,109,078	\$310,932
3 mos. to Sept. 30, 1895.....	7,435,296	2,615,717	12,049	2,153,734	472,032
Total, 6 mos.....	\$15,308,847	\$5,012,017	\$34,919	\$4,264,812	\$782,124

V. 64, p. 180.

**Lake Street Elevated RR.—Decision as to the Trustee of Mortgage.**—At Chicago, Feb. 11, the Appellate Court of the State of Illinois affirmed the decree of the Superior Court of Cook County removing the Farmers' Loan & Trust Co. from the position of co-trustee of the first mortgage, the Court holding that an outside trust company must deposit \$300,000 with the Illinois State Auditor in the same manner as Illinois trust companies are compelled to do, and failure to do that makes them liable to removal. The decision is looked upon as a victory for the company in its litigation with William Ziegler, at whose instance the Farmers' Loan & Trust Co. asked for a receiver for the company.—V. 64, p. 177.

**Lehigh Valley RR.—Bear Raid on Stock.**—The stock of this company has been subjected to an attack which has carried the price down during the week about five dollars a share. John R. Fanshawe, the Secretary of the Lehigh Valley, makes this official statement concerning the affairs of the company:

"The decline in Lehigh Valley stock is the result of an unjustifiable bear raid. The condition of the company has in no wise changed from what it has been for the last year or so. We have met every obligation that has matured and are prepared to meet all those maturing. The \$210,000 interest due March 1 on our second mortgage 7 per cent bonds is already in bank, and if any one would make it worth our while to do so we could pay it tomorrow. We are not embarrassed in any particular, and have recently declined to borrow money offered to us at  $3\frac{1}{4}$  per cent."

The following from the Philadelphia "Ledger" is confirmed by a director as substantially correct:

If, as has been suggested, the ultimate object has been by this bear raid on Lehigh Valley to dislodge the Packer estate stock, which is pledged by the trustees as collateral for loans, it has failed, as the large resources of the estate have enabled them to put up additional collaterals, which have margined the loans down to 15. Several of the lending parties on these loans who were seen yesterday expressed no fears about their loans, and similar expressions were also made by lenders on the Lehigh Valley's own notes. These are all time loans, and are being carried at the lowest rates made for the best collateral loans. The Lehigh Valley's business, while poor in January, as all railroads were, has improved decidedly in February, though this will not be made apparent until the statement for February is issued. We understand that the floating debt and accounts payable of the Lehigh Valley do not exceed \$2,500,000. It has about \$2,000,000 bills and accounts receivable, \$2,000,000 worth of coal mined and in process of sale and over \$1,000,000 cash on hand. Its monetary position is so easy that it has been recently paying off maturing notes without renewals.—V. 64, p. 131, 136.

**Long Island RR.—Change of Place for Coupon Payments.**—The coupons of the Long Island Railroad Co. and its affiliated companies will be paid hereafter at the office of the United States Mortgage & Trust Co.

**New Directors.**—On Feb. 12 August Belmont, Geo. W. Young and Theodore Havemeyer were elected directors to succeed E. R. Reynolds, W. B. Kendall and James D. Campbell. A. C. Bedford, Treasurer of the company, was elected to the office of Secretary to succeed D. L. Voorhees. The new directors represent the syndicate that recently purchased a large interest in the company's capital stock.—V. 64, p. 234.

**Louisville New Albany & Chicago Ry.—Third Installment Due on Stock.**—The third cash payment of 20 per cent was payable at the Central Trust Co. Feb. 15, being \$150 on each 100 shares of old preferred stock and \$50 on each 100 shares of old common stock.—V. 64, p. 234.

**Manhattan Railway, N. Y. City (Elevated).—Quarterly.**—Earnings for the quarter and the six months ending Dec. 31:

	3 mos. end- ing Dec. 31—	Gross earnings.	Net earnings.	Other income.	Interest, taxes, etc.	Balance for divs.
1896.....	\$2,432,990	\$1,135,600	\$42,500	\$305,334	\$371,281	
1895.....	2,498,114	1,039,912	65,603	846,390	309,125	
6 months—						
1896.....	\$4,443,458	\$1,938,652	\$93,193	\$1,410,942	\$119,003	
1895.....	4,572,307	1,844,976	139,940	1,613,130	371,736	

Dividends for the six months (at 6 p. c. per annum) call for \$900,000. Loans and bills payable Dec. 31, 1896, \$774,000, against \$490,000 on June 30.—V. 64, p. 134.

**Memphis & Charleston RR.—Southern Ry.—Ordered Sold in Foreclosure.**—Judge Lorton of the Federal Court at Memphis, Tenn., on February 11 ordered the sale of the Memphis & Charleston RR. under foreclosure of the consolidated mortgage of 1877, "unless the principal and interest be paid within a short day," the date of sale to be fixed by the court. The holders of the general mortgage bonds sought to prevent the entering of the decree, but without success. It is understood that an appeal will be taken. The Iselin Committee, at whose instance the foreclosure suit was brought, holds over 98 per cent of all the company's 7 per cent bonds. With the foreclosure effected their plan for a lease of the road to the Southern Railway would be consummated.—V. 64, p. 83, 331.

**New Orleans & Western RR.—Second Mortgage Authorized.**—The company has authorized a second mortgage of \$2,000,000, of which about \$750,000 will be issued at the present time, to provide for the erection of another cotton compress, extensions of wharves, erection of electric cranes, etc., at Port Chalmette, near New Orleans. These improvements will be made during the spring and summer months, so that the company can handle a larger business during the coming cotton year. We are told that 44 per cent of the cotton received at the port of New Orleans has gone to the presses of the Port Chalmette Company.—V. 63, p. 601.

**New York Central & Hudson River RR.—New Harlem Kierr Bridge and Viaduct in Use.**—Trains began running regularly on Monday over the Park Avenue Viaduct and the new four-track drawbridge across the Harlem River.—V. 64, p. 287.

**New York Chicago & St. Louis RR.—Quarterly.**—Earnings for the quarter ending December 31 have been reported as follows. Statement for the full year is given on a previous page.

3 months ending Dec. 31—	Gross earnings.	Net earnings.	Other income.	Interest, taxes, etc.	Balance, surplus.
1896.....	\$1,476,246	\$484,410	\$1,852	\$314,752	\$125,410
1895.....	1,200,941	362,410	3,475	296,147	209,398

**New York New Haven & Hartford RR.—Floating Debt Funded.**—The company has sold to a syndicate composed of Kidder, Peabody & Co., R. L. Day & Co. and Estabrook & Co., of Boston, a large block of bonds sufficient to provide for the floating debt of the New Haven and its allied companies and to meet obligations maturing in the near future. The block of bonds sold includes the \$5,000,000 New England guaranteed 5 and a new New Haven non-convertible 4 per cent bond to be issued. By means of the negotiation the company funds its floating debt on a four per cent basis. This debt is about \$2,000,000, mainly incurred in the acquisition of the New England road. The funds required for the extensive improvements of the last few years were provided from the sale several years ago of stock and debenture bonds.—V. 64, p. 330.

**New York Ontario & Western Ry.—Quarterly.**—Earnings for the quarter and the six months ending Dec. 31:

3 mos. ending Dec. 31—	Gross earnings.	Net earnings.	Other income.	Interest, taxes, etc.	Balance, surplus.
1896.....	\$911,79	\$311,877	\$20,663	\$230,710	\$121,830
1895.....	1,008,296	309,28	21,250	225,641	138,537
6 months—					
1896.....	\$2,126,705	\$766,917	\$41,415	\$471,306	\$337,026
1895.....	2,047,227	743,048	40,090	457,093	306,042

Loans and bills payable Dec. 31, 1896, \$501,833, against \$434,583 on June 30.—V. 63, p. 280.

**Norfolk & Western Ry.—New Securities Ready Feb. 24.**—On and after Feb. 24, 1897, holders of reorganization certificates issued by the Mercantile Trust Company for bonds and stocks of the Norfolk & Western RR. Co., the Roanoke & Southern Ry. Co. and the Lynchburg & Durham Ry. Co. may exchange the same at the office of the Trust Company, Equitable Building, New York, for the securities of the new company. See advertisement in another column.

**Abstract of Mortgage.**—An abstract of the first consolidated mortgage, securing the new bonds to be issued Feb. 24 is given on page 376 to 380 of to-day's CHRONICLE. The official statement to the New York Stock Exchange says:

The first consolidated mortgage bonds of 1896 cover the entire railroad system, comprising 1,570 miles formerly operated by the Norfolk & Western RR. Co., together with all their equipment. The bonds are further secured by pledge of the stock of the Columbian Connecting & Terminal RR. Co. and of \$4,117,000 par value of equipment mortgage 5 per cent bonds of 1898, issued by the Norfolk & Western RR. Co. under its trust deed of June 1, 1898, and of \$2,322,929 of additional equipment obligations issued by the Norfolk & Western RR. Co. in respect of various equipment. It further covers all railroad, equipment, stock, bonds and other property which the company may hereafter acquire with the bonds reserved for new construction, improvements, etc. It is a first lien on the following properties: Norfolk Terminal Division; Clinch Valley Division; Lynchburg & Durham Division; Roanoke & Southern Division; Maryland & Washington Division; Ohio Extension; Roanoke Machine Works; the stock of the Columbian Connecting & Terminal Railroad Co., and also the equipment obligations above mentioned, amounting in the aggregate to \$6,489,929. [Including the North Carolina Extension here accidentally omitted, the lines of railway on which the mortgage is now a first lien aggregate 840 miles.—Eds.]

The remainder of the system is subject to prior charges aggregating \$23,388,200, which, the mortgage provider, cannot be increased, but may be extended at a rate of interest not in excess of the rate now payable thereon. The first consolidated mortgage provides for the creation, under certain conditions, of a prior lien mortgage to secure an issue of not to exceed \$3,500,000. The total authorized issue of first bonds is \$62,500,000, and the bonds are to be issued as follows:

\$23,322,000	to the reorganization committee in consideration of the first sale of the property.
23,986,880	reserved to take up the above-mentioned outstanding undisturbed prior obligations
3,500,000	reserved for the purchase or payment of car trust obligations and other charges for the creation of a reserve fund for special improvements and for any other necessary purposes of the railway company
9,690,311	reserved under carefully guarded restrictions for new construction and acquisitions and for betterments and improvements, such bonds to be issued at a rate not exceeding \$1,000,000 per annum.

**Financial.**—The entire present annual fixed charges of the company, including interest on all undisturbed bonds of the old company, and outstanding car trust obligations, and on all the new bonds issued pursuant to the reorganization plan, are \$2,263,194 per annum. The outstanding car trust obligations amount to \$695,000. The company has no floating debt. The company began its operations on Oct. 1, 1896, and on that date its cash assets, including a balance to be received from the reorganization committee, was materially in excess of the current obligations. A substantial amount of securities is

also in the treasury. The first balance sheet is in course of preparation, and a copy will be furnished as speedily as possible. [The statement of earnings for 1896 is given in the INVESTORS' SUPPLEMENT of Jan. 30, 1897.]—V. 64, p. 331.

**Northern Central Ry.—New Officers.**—Mr. Frank Thomson has been elected President to fill the vacancy caused by the death of Mr. Roberts. The following officers have also been elected: John P. Green, First Vice President; Charles E. Pugh, Second Vice President; Sutherland M. Provost, Third Vice President; J. B. Hutchinson, General Manager. The company's annual report will be found on subsequent pages of to-day's CHRONICLE.—V. 64, p. 330.

**Ogdensburg & Lake Champlain RR.—Decision as to Interest Payment.**—Judge Wheeler, in the United States Circuit Court for the District of Vermont, has rendered a decision on the petition of the bondholders of the Ogdensburg & Lake Champlain RR. Co. to have the net earnings earned since the road went into the hands of the receivers applied to interest on the first mortgage bonds. The Judge sums up in the following language: "According to these considerations the net earnings set apart since the receivership seem to be free of all claims prior to that of the bondholders and to be properly payable over to them." These earnings now aggregate about \$125,000, and an effort was made by certain floating-debt holders to have their claims satisfied before interest should be paid on the bonds. This Judge Wheeler refuses to allow. The decision says, however, that as the figures upon which these views rest have not all been received, no final order for the payment of the interest will be made till the next term.—V. 63, p. 1116.

**Ohio Southern RR.—Receivers' Certificates Offered.**—The receivers give notice that in pursuance of an order of the Court of Common Pleas of Allen County Ohio, having charge of the property, they will sell \$365,000 receivers' certificates. Sealed bids for a portion or the whole of the issue may be addressed to room 65, 40 Wall Street, New York City, up to twelve o'clock noon, Feb. 23, 1897.

These certificates are for \$1,000 each, are dated Feb. 15, 1897, bear interest at the rate of 6 per cent per annum, payable semi-annually, and are a first lien upon all the property of the Ohio Southern RR. Co. in the State of Ohio, saving only such taxes as may be hereafter found entitled to priority. The receivers are N. E. Matthews and F. P. Graff. See advertisement in another column.

The purposes for which the receivers' certificates were authorized are: To take up engine and car trust due with interest to Jan. 1, 1897, \$257,255; car mileage, \$15,000; gravel, etc., for improvements, \$15,000; wages, \$32,552; fuel bills, \$26,181; freight bills, \$21,724; construction of spur, \$3,000.—V. 64, p. 331.

**Oregon Short Line & Utah Northern Ry.—Sale Confirmed.**—The recent foreclosure sale (V. 63, p. 1010) has been confirmed by Judge Bellinger.—V. 64, p. 331.

**Reading Company.—New Officers.**—The directors on Wednesday elected William R. Taylor Vice-President. He was also elected Vice-President of the Reading Coal & Iron Company. Mr. Taylor has been connected with the Reading for many years, and has proved himself a most efficient and obliging official. Mr. W. G. Brown was elected Secretary of the Reading Company and Assistant Secretary of the Coal & Iron Company, to fill the vacancy caused by Mr. Taylor's promotion.—V. 64, p. 288.

**Terre Haute & Logansport RR.—Coupon Payment.**—The receiver of the Terre Haute & Indianapolis RR., as ordered last week by the United States Circuit Court at Indianapolis, is paying through the Farmers' Loan & Trust Co. the coupons due July 1, 1896, on the Terre Haute & Logansport guaranteed bonds. Interest for the bonds deposited with the Scudder Committee can be obtained on presenting the certificates representing the bonds to the New York Security & Trust Co., 46 Wall Street. The amount payable on each bond is \$31.11, being the coupon of July 1, 1896, and interest thereon to Feb. 12, 1897.—V. 64, p. 288.

**Wheeling & Lake Erie Ry.—Preliminary Report of Stockholders' Committee.**—Charles Fairchild, of Charles Fairchild & Co., and Alexander McNeill, of Thompson, Adams & McNeill, announce that the committee for the stockholders has prepared a preliminary report of its investigations which is now ready for distribution to stockholders of the company. See advertisement in another column.

**Floating Debt.**—The committee's report contains a balance sheet of Nov. 30, 1896, furnished by the receivers, which shows car trusts outstanding to the amount of \$626,031, which were not known to be in existence, and current liabilities as follows:

Bills payable.....	\$523,093	Interest accrued.....	\$103,866
Accounts payable.....	270,796	Taxes accrued.....	16,500
Wages.....	149,537	Rent.....	3,299
Interest and div'd due.....	4,516	Pass. balances, etc.....	32,870

Total of all.....\$1,106,482  
The assets include: Cash and cash assets, \$11,453; company's bonds in treasury, \$383,000 (of the \$7,724,000 reported as outstanding June 30, 1896); accounts receivable, \$191,016; due from W. & L. E. Ry. Coal Co. (old account), \$401,752; W. L. E. & P. Coal Co., \$207,203; investment in securities, \$1,266,585. The balance sheet of June 30, 1896, was in the CHRONICLE of Sept. 19, 1896, and showed no floating debt whatever, merely items of "net current assets" of \$277,955 and accrued interest on bonds of \$132,413.—V. 64, p. 333.

## Reports and Documents.

### NORTHERN CENTRAL RAILWAY CO.

FORTY-SECOND ANNUAL REPORT—FOR THE YEAR  
ENDING DECEMBER 31, 1896.

OFFICE OF NORTHERN CENTRAL RAILWAY CO., }  
BALTIMORE, February 17th, 1897. }

To the Stockholders of the Northern Central Railway Co.:

The Directors respectfully submit the following report of the operations of the main line and of the railroads now operated under lease or otherwise by this Company for the year ending December 31st, 1896.

EARNINGS.	
From freight.....	\$4,767,227 35
" passengers.....	1,094,518 54
" exprees.....	118,039 77
" mails.....	92,381 84
" miscellaneous.....	214,434 52
Total earnings.....	\$6,286,602 02
EXPENSES.	
For maintenance of way and structures.....	\$825,706 52
" maintenance of equipment.....	1,029,647 82
" conducting transportation.....	2,668,654 16
" general expenses.....	119,096 51
Total expenses.....	4,643,105 01
Net earnings.....	\$1,643,497 01
The gross earnings from operation of the Northern Central Railway and railroads controlled by it, for the year ending December 31st, 1896, were.....	\$6,286,602 02
And for the previous year.....	6,506,027 86
Showing a decrease in gross earnings of.....	\$219,425 84
The expenses for the same period were.....	\$4,643,105 01
And for the previous year.....	4,598,519 09
Showing an increase in expenses of.....	\$44,585 93
The net earnings for the same period were.....	\$1,643,497 01
And for the previous year.....	1,907,508 78
Showing a decrease in net earnings of.....	\$264,011 77
INCOME ACCOUNT.	
In addition to the net earnings as above stated.....	\$1,643,497 01
There was received from dividends and interest.....	324,384 00
Interest on equipment.....	27,928 95
Proportion of losses in operating Elmira and Canandaigua Divisions received from Pennsylvania Railroad Co.....	47,762 24
Total net receipts.....	\$2,043,572 20
From which deduct the following amounts:	
Rental Shamokin Valley & Pottsville RR.....	\$202,093 34
Rental Elmira & Williamsport Railroad.....	154,381 26
Rental Lykens Valley Railroad.....	18,923 60

	\$1,606,980 05
Deduct—	
Interest on funded debt.....	\$779,705 00
Interest on real estate mortgages and ground rents.....	20,887 06
Interest on car trusts.....	43,039 79
Interest account, exchange, &c.....	416 78
Taxes.....	81,277 86
Sundry expenditures.....	10,340 04
Amount advanced Mineral Railroad & Mining Co. for losses in operation in 1896.....	47,000 00
Amount advanced to Elmira & Lake Ontario Railroad Company:—	
For interest.....	\$25,029 26
For taxes, &c.....	15,426 76
	40,456 02
	1,003,122 53
Balance to credit of Income Account for 1896.....	\$603,857 52
Out of which were paid cash dividends of seven per cent.....	526,267 00
Leaving amount to be transferred to credit of Profit and Loss account for 1896.....	\$77,590 52
Amount to credit Profit and Loss Account, December 31st, 1895.....	\$1,744,395 27
Add net profit realized on investments.....	237,393 34
	1,981,788 61
Balance to credit of Profit and Loss Account December 31st, 1896.....	\$2,059,379 13

The total number of passengers, irrespective of the division over which they were carried, the passenger mileage, and the revenue derived from the same, on all lines of the company, were:

	Passengers.	Passengers One Mile.	Earnings.	Rate per Passenger per Mile.
1896.....	3,443,833	51,156,003	\$1,094,518 54	2.140
1895.....	4,112,526	51,951,285	1,133,453 97	2.182
Decrease.....	268,693	795,277	38,935 43	.042
Percentage.....	6.41	1.53	3.44	1.92

The total number of tons, irrespective of the divisions over which they were moved, and tonnage mileage, and the revenue from the same, on all lines of the Company, were:

	Tons.	Tons one mile.	Earnings.	Rate per ton per mile.
1896.....	13,253,431	885,552,936	\$4,767,227 35	.538
1895.....	13,605,493	875,691,749	4,910,555 16	.561
Increase.....	352,062	9,871,247		
Decrease.....			\$143,357 81	.023
Percentage.....	2.558	1.127	2.919	4.100

The earnings per mile of road were as follows:

Main line, 148 miles.....	\$27,569 98
Lykens Valley Railroad, 20 miles.....	5,525 97
Shamokin Division, 28 miles.....	14,858 92
Elmira Division, 78 miles.....	13,002 44
Canandaigua Division, 103 miles.....	6,461 02

The tonnage of the main line of the Northern Central Railway decreased 285,397 tons, with a decrease in earnings of \$205,468 23.

The coal tonnage of the main line in 1896 was 4,074,658 tons, and in 1895, 4,570,039 tons, a decrease of 495,381 tons. There was a decrease in the traffic delivered to the Pennsylvania Railroad at Marysville and Rockville of 252,693 tons. The total coal tonnage to Baltimore was 819,036 tons, a decrease of 54,903 tons.

The coal tonnage of the Lykens Valley Railroad was 535,784 tons in 1896 and 558,351 tons in 1895, a decrease of 22,567 tons.

The coal tonnage of the Shamokin Division was 1,363,492 tons and in 1895 1,601,929 tons, a decrease of 239,437 tons.

The coal tonnage of the Elmira Division was 1,938,575 tons and in 1895 2,055,284 tons, a decrease of 66,709 tons. In the northbound anthracite trade there was an increase of 48,914 tons and in the bituminous a decrease of 115,623 tons.

On the Canandaigua Division the coal tonnage was 955,265 tons, and in 1895 1,032,091 tons, a decrease of 106,825 tons.

The aggregate movement of bituminous coal was 2,616,598 tons, a decrease of 103,618 tons, and of anthracite coal 3,874,430 tons, a decrease of 421,344 tons. The tonnage of both classes amounted to 6,491,028 tons, as against 7,015,990 for the preceding year, being a decrease of 524,962 tons in the actual aggregate of coal transported, irrespective of the number of divisions over which it was moved.

The amount of grain received at the elevators at Canton, as compared with the previous year, was:

	Bushels.
1896.....	14,662,337
1895.....	6,005,957

An increase of..... 8,656,380

The amount of grain received at the local elevator, No. 2, in the City of Baltimore during the year was 1,441,223 bushels, as against 1,708,828 bushels in 1895.

The main items of tonnage, besides coal and grain, were lumber, iron ore, manufactures of iron and petroleum.

The tonnage mileage shows an increase of 1.13 per cent, while the gross receipts from freight traffic show a decrease of 2.92 per cent.

The average receipts from freight on your main line, leased lines and branches were .538 cent per ton per mile—a decrease of .023; the cost per ton per mile was .400 cent, an increase of .002 cent; and the net profit per ton per mile was 1.38 mills, as against 1.63 mills for 1895.

The passenger business for the year shows a decrease in mileage of \$1.3 per cent, while the revenue received therefrom decreased \$38,935.43, or 3.44 per cent. As appears from the preceding tables, there was a loss per passenger per mile of .10 mill, as compared with a profit in 1895 of .41 mill.

The net charges to Capital Account for the year amounted to \$249,163.90, made up as follows:

EQUIPMENT.	
On account of 250 long gondola cars.....	\$104,126 15
150 box cars.....	79,912 50
	\$184,038 65
CONSTRUCTION AND REAL ESTATE.	
Freight yards, Baltimore.....	\$28,914 23
Freight yard, York.....	9,058 90
Principal sum of sundry ground-rents capitalized.....	29,352 10
	\$67,325 25
Less amount credited for sale of property in Shamokin.....	2,200 00
	65,125 25
Total.....	\$249,163 90

The work of renewing the bridges and trestles was continued on the various divisions of your line; and in the aggregate 794 feet of Howe truss and other bridges, which had become too light for the traffic, were replaced by steel deck girder and like permanent structures. The most important of these renewals were of two bridges, one on the Baltimore Division, 136 feet long, and the other on the Canandaigua Division, 323 feet long.

There was a net increase in Company's sidings of about one mile. There were 4,217 tons of new steel rails and 261,636 cross-ties used for renewals and repairs, and the track on the Canandaigua Division was much improved by the use of cinder ballast.

The terminals at Canton were improved by dredging so as to give 27 feet of water at low tide, and there were considerable renewals of the piers and approaches thereto at that point.

The condition of the motive power and passenger equipment is about the same as in the previous year; 113 freight cars were rebuilt to replace vacant numbers.

There were added to the equipment 150 box and 164 gondola cars.

A new freight yard was opened at Chase Street, in Baltimore, on the Union Railroad, which provides the needed facilities for that section of the city. A piece of property was also purchased at King Street, York, for a freight delivery yard at that point.

During the past year the advances to the Mineral Railroad & Mining Company amounted to \$47,000, which sum was charged against your income account.

The amount of bonds outstanding under your Consolidated General Mortgage was reduced through the operations of the Sinking Fund by the drawing, July 1st, 1896, in accordance with the terms of the mortgage, of \$129,000 of Series A and B.

Dividends amounting to 7 per cent were paid during the year, and a fair surplus carried to credit of Profit and Loss.

The arrangement with the Summit Branch Railroad Company, under which your Company operated the Lykens Valley Railroad, extending from Millersburg to Williams-town, Pennsylvania, expired April 20th, 1896, by reason of the default of the Summit Branch Railroad Company in paying the rental due to its lessor, the Lykens Valley Railroad and Coal Company; but under a temporary contract with the latter, your Company continues to operate this road at a reduced rental more nearly corresponding to the value of the property.

The Board have to regret the loss of one of your most valued officers, Mr. Robert Neilson, who died October 12th, 1896. Mr. Neilson entered your service as Superintendent of the Elmira & Canandaigua Division in 1874, became General Superintendent of that portion of your line north of Harrisburg in 1881, and two years later of your whole line, and continued to hold this position until his death. His devotion to duty, high character and marked ability make his loss one to be deeply regretted by the Company.

Mr. John M. Wallis was appointed General Superintendent October 26th, 1896, to fill the vacancy caused by Mr. Neilson's death.

Mr. John Scott, who had been for many years your Solicitor, and who had been compelled by failing health to retire from that office in 1895, died on the 29th of November, 1896. Mr. Scott had won an enviable reputation by his discharge of the varied and responsible duties confided to him, and by the stainless integrity that marked his personal and official career, and the Board desire to place upon record their high appreciation of the great ability displayed by him during his long connection with the legal department of the Company.

Your Board have also to regret the loss by death, on the 19th of December, 1896, of Mr. Henry D. Welsh, who had been a Director since 1891. Mr. Welsh, during his entire connection with the management, had been indefatigable in the performance of his duties, and had won the regard of his associates, not only by his faithful attention to the interests of the Company and the sound judgment and valuable business experience that he brought to its service, but by the many attractive personal qualities which characterized his intercourse with them.

Mr. Charles E. Pugh was elected a Director to fill the vacancy thus created.

While fully appreciating the loss to the service through the deaths already mentioned, the Board feel that the event most deeply to be deplored is the death of your late President, Mr. George B. Roberts, on the 30th of January, 1897. The Company has thus been deprived of a wise counselor, a faithful overseer and an able executive, who, during the seventeen years in which he was your President, devoted to your interests a matured and exceptional experience in railway administration that signally contributed to the welfare and prosperity of your property.

Mr. Frank Thomson, formerly First Vice-President, was elected President to fill the vacancy caused by the death of Mr. Roberts, and in accordance with the revised organization the following officers were also elected: Mr. John P. Green, First Vice-President; Mr. Charles E. Pugh, Second Vice-President; Mr. S. M. Prevost, Third Vice-President.

Mr. J. B. Hutchinson was appointed General Manager to fill the vacancy caused by the election of Mr. Prevost as Third Vice-President; Mr. Michael Trump, General Superintendent Transportation, vice Mr. J. B. Hutchinson, appointed General Manager; Mr. W. H. Joyce, Freight Traffic Manager; Mr. Samuel Rea, First Assistant, and Mr. W. A. Patton and Mr. E. T. Postlethwaite additional Assistants to the President.

Mr. W. B. McAleah was appointed Superintendent of the Shamokin Division December 10, 1896, to fill the vacancy caused by the transfer of Mr. Almet E. Reed to the Altoona Division of the Pennsylvania Railroad.

The following statements of the Treasurer accompany this report: Income Account, General Financial Statement and Statement of Bonds and stocks owned by the Company. There is also appended to the report the Statement of the Insurance Fund. Your attention is also called to the reports of the General Manager and Auditor, showing in detail the operations of the year.

It gives the Board great pleasure to acknowledge the zeal and fidelity displayed by the various officers and employees in the discharge of their duties during the past year.

By order of the Board of Directors,

FRANK THOMSON,  
President.

## NORFOLK & WESTERN RAILWAY CO.

ABSTRACT OF FIRST CONSOLIDATED MORTGAGE,  
DATED OCTOBER 22, 1896,  
SECURING \$62,500,000 OF 4 PER CENT GOLD BONDS,  
DUE OCTOBER 1, 1906.

### PARTIES.

The NORFOLK & WESTERN RAILWAY COMPANY, of Virginia (the "Railway Company"), party of the first part, and the MERCANTILE TRUST COMPANY, of New York (the "Trustee"), party of the second part.

### PREAMBLE.

Whereas, the property and franchises covered by the One Hundred-Year mortgage and the Maryland & Washington Division mortgage of the Norfolk & Western Railroad Company have been sold [on Sept. 15 and Sept. 16, 1896], under foreclosure of said mortgages, and duly conveyed to the Railway Company; and

Whereas, the property and franchises also of the Lynchburg & Durham and Roanoke & Southern railroad companies have been sold under foreclosure of their first mortgages and conveyed respectively to the Norfolk Lynchburg & Durham and the Norfolk Roanoke & Southern Railroad companies, which companies were thereupon leased to the Railway Co., their capital stock surrendered, and their property and franchises vested in the Railway Company; and

Whereas, pursuant to a decree of the Circuit Court of the United States for the Southern District of Ohio, Western Division, the portion of the Norfolk & Western RR. conveyed to it July 22, 1890, by the Scioto Valley & New England RR. Co. was sold subject to the mortgage thereon and conveyed to the Railway Company; and

Whereas, pursuant to a decree of the same court there have been sold and conveyed to said Railway Company an agreement dated Aug. 4, 1894, with the Union Depot Co. of Columbus, Ohio, and all the capital stock (except an amount to qualify directors) of the Columbus Connecting & Terminal RR. Co., and also a lease of said property dated May 4, 1892, subject to \$600,000 outstanding bonds; and

WHEREAS, the Railway Company has acquired all the shares of the capital stock and all the bonds of the Roanoke Machine Works, a corporation of the State of Virginia [and has caused its property to be conveyed to the Trustee—EDS.]; and

WHEREAS, certain portions of the aforesaid property are subject to prior mortgages or liens. [See a table of the prior liens below in Article 1, Section 3.—EDS.]

### DESCRIPTION OF THE FIRST CONSOLS HEREBY SECURED.

AND WHEREAS, the Directors and Stockholders of the Railway Company have duly authorized this issue of "First Consolidated Mortgage 4 per cent gold bonds" [hereinafter in this abstract called consols.—EDS.] to an aggregate amount not exceeding \$62,500,000, the principal payable October 1, 1906, in gold coin of the United States of the present standard of weight and fineness at the office or agency of the Railway Company in the City of New York, with interest from October 1, 1896, at the rate of 4 per cent per annum, payable semi-annually on the first days of April and October in each year in like gold coin at said office or agency. Both such principal and interest are to be payable without deduction for any tax or taxes which the Railway Company may be required to pay or retain therefrom under or by reason of any present or future law of the United States or any State or Municipality thereof. The bonds are to be coupon bonds of the par value of \$1,000, or \$500, or \$100 each, with provision for registration as to principal, and registered bonds without coupons, each of the par value of \$1,000, or such multiples of \$1,000 as the Railway Company, from time to time, may prescribe by resolution of its Board of Directors. The coupon bonds to be of the following tenor and the registered bonds similar, but without coupons, and containing the provisions regarding transfer which are stated in this abstract under the heading "registration:"

### FORM OF COUPON FIRST CONSOLIDATED MORTGAGE GOLD BOND.

#### UNITED STATES OF AMERICA.

No.

#### STATE OF VIRGINIA.

#### NORFOLK & WESTERN RAILWAY COMPANY.

#### FIRST CONSOLIDATED MORTGAGE FOUR PER CENT GOLD BOND.

KNOW ALL MEN BY THESE PRESENTS, THAT NORFOLK & WESTERN RAILWAY COMPANY, a corporation hereinafter called the "Railway Company," for value received, promises to pay to the bearer, or, if registered, to the registered holder of this bond, \_\_\_\_\_ dollars, gold coin of the United States of America of the present standard of weight and fineness, on the first day of October, in the year 1906, at the office or agency of the Railway Company in the City of New York, N. Y., and to pay interest thereon, at the rate of four per cent per annum from October 1st, 1896, payable semi-annually at said office or agency, in like gold coin, on the first days of April and October in each year, but only upon presentation and surrender, as they severally mature, of the coupons therefor annexed, and to be annexed hereto. Upon presentation of this bond on or after October 1st, 1916, the Railway Company will attach thereto sheets of coupons representing the interest installments to become due after that date, proper endorsement thereof being made on the bond.

Both the principal and interest of this bond are payable without deduction for any tax or taxes which the Railway Company may be required to pay, or to retain therefrom, under any present or future law of the United States or any State or Municipality thereof.

This bond is one of a series of First Consolidated Mortgage Four Per cent Gold Bonds (coupon and registered) of the Railway Company, issued and to be issued, to an amount not exceeding in the aggregate \$62,500,000 at any one time outstanding (of which amount \$25,986,-

899 of bonds are reserved to take up bonds secured by prior mortgages), under and in pursuance of, and all equally secured by, a mortgage or deed of trust dated October 22d, 1896, executed by the Railway Company to The Mercantile Trust Company, a corporation of the State of New York, as Trustee, of all the property and franchises of the Railway Company mentioned in said mortgage or deed of trust, to which reference is hereby made for a description of the property and franchises mortgaged and the nature and extent of the security and the rights of the holders of said bonds under the same, and the terms and conditions upon which said bonds are issued and secured.

This bond shall pass by delivery unless registered in the owner's name on the books of the Railway Company at its office or agency in the City of New York, such registry being noted on the bond by the bond registrar of the Railway Company. After such registration no transfer shall be valid unless made on the Company's books by the registered owner, and similarly noted on the bond; but the same may be discharged from registry by being transferred to bearer, after which transferability by delivery shall be restored; but it may again from time to time be registered or transferred to bearer as before. Such registration, however, shall not affect the negotiability of the coupons, but the same shall continue to be transferable by delivery merely. The holder may also, at any time, at his option, surrender for cancellation this bond with the coupons for future interest thereon in exchange for a registered bond with coupons, as provided in said mortgage or deed of trust.

This bond shall not become obligatory for any purpose until it shall have been authenticated by the certificate hereon endorsed of the Trustee under said mortgage or deed of trust.

IN WITNESS WHEREOF the Norfolk & Western Railway Company has caused these presents to be signed by its President or one of its Vice-Presidents, and its corporate seal to be hereunto affixed, and to be attested by its Secretary or an Assistant Secretary, and coupons for said interest maturing up to October 1st, 1946, with the engraved signature of its Treasurer, to be attached herunto, this twenty-second day of October, 1896.

NORFOLK & WESTERN RAILWAY COMPANY,

By

President.

Attest

Secretary.

FORM OF INTEREST COUPON, OF WHICH THE FIRST IS TO BE PAYABLE  
APRIL 1, 1897.

No. \_\_\_\_\_ \$ \_\_\_\_\_  
On the first day of \_\_\_\_\_, Norfolk & Western Railway Company will pay to bearer at its office or agency in the City of New York, N. Y., \_\_\_\_\_ dollars and \_\_\_\_\_ cents, without deduction for taxes, being six months' interest then due on its First Consolidated Mortgage Four Per Cent Gold Bond No. \_\_\_\_\_.

Treasurer.

#### FORM OF TRUSTEE'S CERTIFICATE.

This bond is one of the series of bonds described in the within-mentioned Mortgage or Deed of Trust executed by the Norfolk & Western Railway Company to the undersigned.

THE MERCANTILE TRUST COMPANY, Trustee.

By

Vice-President.

#### PROPERTY CONVEYED AS SECURITY.

Maryland & Washington Division—Hagerstown, Md., to Roanoke, Va.....	238
Branches to ore mines, etc., on Maryland & Washington Div.....	19
Ohio Extension, Kyle, W. Va., to Coal Grove, Ohio.....	191
Branches and spurs on above lines.....	16

Total mileage on which this mortgage is a first lien.....840

NOTE—Of the Maryland & Washington Division the 11 miles in Maryland have been conveyed to the Trustee as provided in the mortgage.

#### LINES SUBJECT TO PRIOR LIENS.

Under General Mortgage of 1891, Improvement and Extension Mortgage, and old Divisional Mortgages.	Miles.
Norfolk, Va., to Bristol, Va., (412 m.), and branch to City Point, 10 miles.....	422
Other branches and spurs, viz: Saltville, Norfolk, Money Point, Olmerton, Lynchburg Belt, Durham Division connecting, Roanoke Belt, Kingston and Radford.....	19
Under New River Division Mortgage:	
Radford, Va., to Kyle, West Va. (95 m.), and branches to coal mines (18 miles).....	103
Cripple Creek Extension, Pulaski to Ivanhoe (30 miles), and branches to ore mines (20 miles).....	50
Under Scioto Valley & New England Mortgage:	
Columbus, O., to Coal Grove (formerly Petersburg) opposite Ashland, Ky.....	131½
Also certain lots of land in Franklin County, Ohio, and the shop grounds leased in Portsmouth, O., etc., but excepting lot No. 442 in Columbus, O.	
Total mileage, subject to prior liens.....	725½
Grand total of all mileage conveyed at date of mortgage.....	1,565½

Also the following properties and rights in properties:

#### COLUMBUS, OHIO, TERMINAL PROPERTIES.

All leasehold and other estate in the following companies:

Union Depot Co. of Columbus, O., under agreement of Aug. 4, 1890.  
Columbus Connecting & Terminal RR. under lease of May 4, 1892.

#### A FIRST LIEN ON ROANOKE MACHINE WORKS.

All interest in the lands, shops, machinery, etc., at Roanoke, Va., now in the name of the Roanoke Machine Works, which property the Railway Company covenants to convey [and has conveyed—Eds.] to the Trustee by a proper conveyance. [These are large and fully equipped works for the construction of locomotives and cars.—Eds.]

#### ALL OTHER RAILWAY PROPERTY ACQUIRED UNDER SAID DECREES.

All other railway and telegraph lines, real estate, rolling stock, franchises, vessels, etc. (but not including money, bonds, stocks and choses in action except as herein specifically mentioned) which have been conveyed to the Railway Company under said decrees now or hereafter entered.

#### PROPERTY HEREAFTER ACQUIRED WITH PROCEEDS OF THESE BONDS.

All lines of railway, rolling stock, bonds, stocks, etc., hereafter acquired in the manner provided in Section 5 of Article One, or with bonds issued under Section 4 of Article One, or under the Prior Lien Mortgage.

#### ALL ROLLING STOCK, FRANCHISES, ETC.

All road beds, rights of way, tracks, bridges, buildings, depots, engine houses, machine shops, and all other things now or hereafter owned appertaining to any of said lines of railway and all leases and contracts in connection therewith.

All locomotives, cars, and other rolling stock and equipment acquired or to be acquired for use on such railways.

All privileges and franchises now or hereafter acquired.

All profits and other income of the mortgaged premises.

CAR TRUSTS, ETC., [COVERING EQUIPMENT VALUED AT OVER \$6,500,000.—Eds.]

#### The following equipment obligations:

Norfolk & Western RR. equipment 5 per cent bonds of 1888 for \$4,117,000.

Other equipment obligations of said company for \$2,322,929.  
All other equipment bonds of 1888 and car trusts or other equipment obligations of the Norfolk & Western RR. Co. hereafter acquired.

#### SHARES OF STOCK.

#### The following shares of stock are also conveyed:

Columbus Connecting & Terminal RR., 6,000 shares of \$100 each, upon which there has been paid \$65 per share, aggregating \$390,000.  
Scioto Valley & New England RR., 5,000 shares of \$100 each, to be held as a unit of title to the property, formerly of said company, hereby mortgaged and conveyed.

#### RIGHT TO ACQUIRE PROPERTY FREE FROM LIEN OF THIS MORTGAGE.

Nothing in this indenture shall limit the right of the Railway Company in any manner except by the use of the bonds reserved under Sections 4 and 5 of Article I. of this indenture, or the Prior Lien Bonds hereinafter mentioned, to acquire other lines of railway, or interests therein, free from the lien of this indenture; and

#### ALL THE CONSOLS WHENEVER ISSUED TO BE EQUALLY SECURED.

BUT IN TRUST, for the equal and proportionate benefit and security of all present and future holders of the bonds and interest obligations to be issued under this indenture.

#### ARTICLE ONE.

##### ISSUE OF CONSOLS LIMITED TO \$62,500,000.

SECTION 1. The aggregate amount of the bonds issued under this indenture shall never exceed \$62,500,000.

CONSOLS FOR \$23,322,600 TO BE ISSUED FOR REORGANIZATION PURPOSES.

SECTION 2. Of the bonds authorized \$23,322,600 shall be delivered forthwith to the Reorganization Committee of the Norfolk & Western Railroad Co.

CONSOLS FOR \$25,986,989 RESERVED TO RETIRE \$23,388,200 OF PRIOR LIENS.

SECTION 3. Of the remainder of the issue there shall be reserved by the Trustee bonds to the amount of \$25,986,989 for the acquisition or redemption of all the \$23,388,200 "outstanding old bonds" as follows:

Title of Lien.	Amount now Outstanding.
Norfolk & Petersburg Second Mortgage of 1868.....	\$496,000
Southside Railroad Consolidated Mortgage of 1869.....	1,013,300
Virginia & Tennessee Railroad Enlarged Mortgage of 1855	985,000
Lien to secure 6 per cent preferred stock of the Virginia & Tennessee Railroad.....	10,900
Virginia & Tennessee Railroad Fourth Mortgage of 1866.....	1,000,000
Norfolk & Western RR. General Mortgage of 1881.....	7,383,000
New River Division First Mortgage of 1892.....	2,000,000
Improvement and Extension Mortgage of 1883.....	5,000,000
Scioto Valley & New England First Mortgage of 1889.....	5,000,000
Columbus Connecting & Terminal RR. First Mortgage.....	600,000
Total.....	\$23,388,200

The consols so reserved shall be issued on resolution of the Board of Directors of the Railway Company, as follows, and not otherwise, viz:

(a) Whenever the Railway Company shall tender any such outstanding old obligations the Trustee shall in exchange therefor deliver to the Railway Company an amount of the consols equal to the amount thereof which the Chairman of the Board of Directors, or the President of the Railway Company, shall certify that it has used to acquire such obligations tendered to the Trustee, but not more than \$1,000 par value of the bonds hereby secured for each \$900 par value of such old outstanding obligations received by the Trustee.

(b) Whenever the Railway Company, on or after the maturity of any of such outstanding old bonds, or on or after a date eight months prior to such maturity, shall tender cash sufficient to purchase the same at par, the Trustee shall in consideration thereof deliver to the Railway Company \$1,000 par value of the consols reserved under this Section for each \$900 of cash so received.

(c) Every outstanding old bond so received by the Trustee shall by it be stamped with the words "Not negotiable. Held in trust for the purposes declared in the First Consolidated Mortgage of the Norfolk & Western Railway Company, dated October 22d, 1896," and shall be held by the Trustee as additional security for the payment of the bonds hereby secured until not less than 99 per cent of the issue shall have been canceled, or shall have been received by the Trustee, whereupon upon the written request of the Railway Company, it may, in its discretion, cancel the same.

CONSOLS FOR \$3,500,000 RESERVED TO RETIRE OLD CAR TRUSTS, PRIOR LIEN BONDS (IF ISSUED) AND FOR OTHER PURPOSES.

SEC. 4. Of the bonds hereby secured, \$3,500,000 shall be used as follows:

(a) Any of such consols not previously set apart for the retirement of Prior Lien bonds (if issued as hereinafter in this section provided, may be used for the redemption of old car trust bonds and other purposes, viz.:

- (1) For the purchase or payment of car trust bonds or obligations upon any equipment or other property formerly of the Norfolk & Western R.R. Co. subject to the lien hereof.
- (2) As a reserve fund for special improvements.
- (3) For any other necessary purposes.

The Trustees shall deliver such bonds upon resolution, approved by two-thirds of the Directors of the Railway Company, specifying the particular purposes for which the bonds are to be used. The Railway Company, whenever requested by the Trustee, shall furnish to it certificates, signed by the Chairman of the Board of Directors, or the President, and by the Comptroller, or the Treasurer, of the Railway Company, showing the purposes for which the consols delivered under this section have been used.

(b) In case the Railway Company shall execute a Prior Lien Mortgage to secure \$1,500,000 of Prior Lien gold bonds or £700,000 of Prior Lien sterling bonds, the Trustee shall thereupon set apart from said \$3,500,000 par value of bonds reserved under this Section, an amount thereof equal at par to the amount of such Prior Lien bonds for the redemption of such Prior Lien bonds as follows:

Whenever the Railway Company shall tender any of such Prior Lien bonds, the Trustee in exchange therefor shall deliver to the Railway Company, an amount thereof equal to the amount of such Prior Lien bonds received by the Trustee.

The Railway Company may sell any of the consols so set apart, provided the net proceeds (but not less than 95 per cent of their par value) shall be paid to the Trustee in exchange for Prior Lien bonds. And the Railway Company covenants that whenever it shall receive a binding offer for not less than \$100,000 par value of such consols, at not less than 95 per cent of their par value, together with accrued interest, it will within ten days sell the same and pay the proceeds to the Trustee. The Railway Company shall thereupon, if practicable, purchase at a price below 105 per cent and accrued interest, or shall cause to be drawn for redemption with the funds so derived, an amount of Prior Lien bonds equal, at par, to the amount of the consols sold as aforesaid, the Railway Company paying the difference between the net proceeds of the bonds sold and the sums payable to retire an equal amount of such Prior Lien bonds. All Prior Lien bonds thus purchased or redeemed shall forthwith be canceled.

REMAINING CONSOLS (\$9,690,511) MAY BE ISSUED, AT NOT EXCEEDING \$1,000,000 YEARLY, FOR EXTENSIONS, ADDITIONS, IMPROVEMENTS (INCLUDING AIR BRAKES AND BALLASTING) ETC.

SEC. 5. The remainder of the authorized issue of consols, amounting to \$9,690,511, shall be reserved as follows:

(a) For the construction or acquisition, after Oct. 1, 1896, of branch lines, extensions, terminal properties, rolling stock or other additional property appurtenant to the properties owned and subject to the lien of this indenture, or belonging to any company of whose capital stock at least a majority in amount shall have been pledged hereunder.

(b) And for betterments or improvements upon any property hereby mortgaged, or which shall belong to any company of whose capital stock a majority shall have been pledged hereunder (including the application of air brakes and automatic couplers to rolling stock not supplied therewith, the fencing and ballasting of track not previously fenced or ballasted, the substitution of stone or iron for wooden viaducts and bridges, etc.

(c) For the acquisition of the stock, bonds and indebtedness of any company owning any such branch line, or other additional property, provided that a majority of all the stock of such company shall be pledged hereunder, and provided further, that no shares or bonds or indebtedness thereafter created by such company shall be acquired hereunder, unless the entire sum used on account of such acquisition shall be expended for new property, or for betterments or improvements, by such company.

STRINGENT REGULATIONS AS TO ISSUE OF THESE \$9,690,511 CONSOLS.

The consols so reserved shall be certified by the Trustee and delivered to the Railway Company, as follows:

(1) Only upon a receipt of a copy of a resolution of the Board of Directors of the Railway Company, certified by its Secretary or Assistant Secretary, authorizing the issue.

(2) At a rate not exceeding \$1,000,000 of bonds on or before June 30th, 1897, and \$1,000,000 additional, on or after each succeeding first day of July, beginning with July 1st, 1897.

(3) At any time the Railway Company may sell bonds within the limit of the amount authorized under (2), provided that the net proceeds of the bonds when sold shall simultaneously be deposited with the Trustee, to be by it paid over to the Railway Company from time to time, in amounts equal to the cash expenditures made by the Railway Company, pursuant to the terms of this section. The par value of the bonds so sold and the proceeds of which shall be held by the Trustee shall not at any one time exceed \$1,500,000.

(4) Of the bonds so authorized the Railway Company shall be entitled to receive and hold, at all times, as an advance, \$500,000, par value (but not more), and additional bonds shall be delivered to it only as the bonds previously advanced or their proceeds shall have been used as herein authorized. The Railway Company shall set apart from its other assets all bonds so received.

(5) Before the Trustee shall deliver any bonds or pay over any cash under this section (5), the Railway Company shall furnish a certificate of one or more of its officers, stating:

(a) The amount of the consols previously certified under this section (and not accounted for in previous certificates) and the amount of any expenditure for which reimbursement is claimed.

(b) The particular branches, extensions, terminal properties, rolling stock or other property, acquired or constructed, or stock, bonds or indebtedness of any other company acquired, and the kind or class of betterments or improvements made—specifying as to each the amount of bonds or cash expended therefor.

(c) Whether such acquisition, construction or improvement was in the name or on the property of the Railway Company or by or for account of any other company as herein authorized.

(d) That the price paid for such construction, etc., was not excessive, and that the bonds were disposed of at not less than their fair market value.

(e) That such expenditures were not included in any previous certificate and were not furnished out of the bonds reserved under Section 4 of this Article, or out of any Prior Lien bonds.

(f) In the case of new property, the certificate shall state whether the property so acquired is subject to any lien prior to this indenture, and the amount of any such prior lien; also in case of the acquisition of the stock or bonds of any other company, whether the property of such other company is subject to any lien, charge or indebtedness and the amount of the same.

CONSOLS MUST BE RESERVED FOR LIENS ON PROPERTY ACQUIRED.

(6) In case any such prior liens or charge exists there shall be set apart out of the bonds, which can then be issued within the limit authorized by paragraph (2) of this Section, an amount of consols equivalent at par to such certified liens, charges and indebtedness.

OFFICERS MUST FILE WRITTEN STATEMENT AS TO PROPER APPLICATION OF BONDS.

(7) Every such certificate unless signed (1) by the President or a Vice-President, or the General Manager, or the Chief Engineer, and (2) by the Comptroller, or Auditor, or Treasurer, of the Railway Company, shall be accompanied by a written statement of one of the officers first-above designated and one of the officers secondly-above designated that they believe (a) that such certificate is true and that such bonds have been used and the expenditures certified have been made only for purposes authorized by this Section and (b) that none of the expenditures were reported in any annual report of the Railway Company as charged to operating expenses.

BONDS AND STOCK SO ACQUIRED SHALL BE TRANSFERRED TO TRUSTEE.

Together with these statements and verified certificates, there shall be delivered to the Trustee all bonds and shares of stock so-acquired, and such further instruments as may be necessary to vest in the Trustee all new property so acquired. Also there shall be furnished the written opinion of counsel of the Railway Company to the effect that such instruments and conveyances are sufficient for that purpose.

REGISTERED BONDS WITHOUT COUPONS.

SEC. 6. Coupon bonds amounting to \$1,000 or to any multiple of \$1,000 shall be exchangeable at the option of the holder for registered bonds without coupons.

Whenever any such registered bonds shall be surrendered for transfer, the Trustee shall deliver to the transferee a like amount of new registered bonds; but no registered bond may be converted into a coupon bond.

For any exchange of coupon bonds for registered bonds, and for any transfer of registered bonds without coupons, the Railway Company, at its option, may make a charge not exceeding 50 cents for each new registered bond issued in exchange for any surrendered bonds.

BONDS MUTILATED OR DESTROYED MAY BE REPLACED.

In case any bond issued hereunder shall become mutilated or shall be destroyed, upon the surrender of any such mutilated bond to the Trustee, or upon filing with the Trustee satisfactory evidence of such destruction, the Railway Company upon receiving indemnity satisfactory to it may in its discretion issue a new bond bearing the same serial number.

ARTICLE TWO.

RIGHT RESERVED TO ISSUE \$3,500,000 PRIOR LIEN BONDS.

SECTION 1. The Railway Company expressly reserves the right at any time prior to the delivery of all of the \$3,500,000 of bonds reserved under Section 4 of Article One of this indenture, to execute a mortgage which shall be superior in lien to this indenture, to secure an issue of prior lien four per cent fifty-year bonds.

The amount of such prior lien bonds is limited to a sum equal to the portion of the \$3,500,000 of consols reserved under Section 4 then unissued; and the Railway Company covenants that it will not issue such Prior Lien bonds unless an equivalent amount of these consols reserved under Section 4 of Article One hereof shall be forthwith set apart for the redemption of such Prior Lien bonds; but no failure to comply with this requirement shall affect the holders of such Prior Lien bonds.

Such mortgage shall provide for the issue of Prior Lien bonds upon resolution of two-thirds of the Board of Directors of the Railway Company (1) for the purpose of taking up any car trust bonds or obligations or other charges (other than said outstanding old bonds) upon any equipment or other property, formerly of the Norfolk & Western Railroad Co., which shall have been acquired by the Railway Company and subjected to the lien hereof; (2) for the creation of a reserve fund for special improvements; and (3) for any other necessary purposes of the Railway Company, as determined by the Board of Directors of the Railway Company.

Such Prior Lien bonds shall be redeemable at 105 per cent at any time when drawn by lot.

ANY OF THE OUTSTANDING OLD BONDS MAY BE EXTENDED AT MATURITY IN CASE THE CONSOLS RESERVED FOR THEM (\$1,000 IN CONSOLS FOR \$400 OF OLD BONDS) WILL NOT SUFFICE TO RETIRE THEM.

SEC. 2. In case any of said outstanding old bonds amounting to \$23,388,200, cannot, at their maturity, be acquired by use of the bonds hereby secured, set apart for that purpose, then the Railway Company hereby reserves to itself full right to extend such outstanding old bonds for such period and at such rate of interest, not in excess of the

rate now payable, as its Board of Directors may determine. The principal and interest of such extended bonds may be made payable in gold coin.

### ARTICLE THREE.

#### BONDS TO BE TAX EXEMPT; NEW COUPON SHEETS.

SECTION 1. As stated fully in the text of the bond given above, the company covenants to pay promptly the principal and interest, tax free, as they mature, and on or after Oct. 1, 1946, to attach to the coupon bonds the coupon sheets to represent the remaining instalments of interest. All coupons when paid shall be canceled.

PROPERTY HEREAFTER ACQUIRED WITH THESE CONSOLS TO BE IMMEDIATELY SUBJECT TO THIS MORTGAGE.

SEC. 2. All property hereafter acquired with consols shall immediately be subject to the lien of this indenture.

#### DEEDS OF FURTHER ASSURANCE.

SEC. 3. The Railway Company will execute such further deeds and assurances in the law as the Trustee shall reasonably require for better securing these consols.

#### OFFICE FOR REGISTRATION OF BONDS IN NEW YORK CITY.

SEC. 4. The Railway Company will maintain in New York City a registry office for the registering upon presentation of coupon bonds and registered bonds issued hereunder. [For further provisions respecting registration see Sec. 6 of Article 1 and also the copy of the bond above.—Eds.]

#### OUTSTANDING OLD BONDS AT MATURITY MUST BE PAID OR EXTENDED.

SEC. 5. The Railway Company will pay or will cause to be extended the outstanding old bonds mentioned in Section 3 of Article One hereof. It will not consent to any funding of interest on any of such outstanding old bonds or Prior Lien bonds; but it will pay such interest punctually. It will not permit any additional bonds to be issued under the mortgages securing the outstanding old bonds.

#### THE RAILWAY COMPANY NOT TO SUFFER PRIOR LIENS TO BE CREATED.

SEC. 6. The Railway Company will not voluntarily suffer any lien which would be prior to the lien of these presents.

#### TAXES, ASSESSMENTS TO BE PROMPTLY PAID.

SEC. 7. The Railway Company will also from time to time pay all taxes, assessments and governmental charges lawfully imposed, the lien of which would be prior hereto.

#### ACTS WHICH WOULD IMPAIR THE VALUE OF THE SECURITY FURNISHED BY PLEDGED SHARES PROHIBITED.

SEC. 8. Except subject to the lien hereof, or as herein otherwise expressly provided, the Railway Company (1) will not part with or encumber any shares, or the voting power thereon, of any Company a majority of whose stock shall have been pledged hereunder, and (2) will exercise its voting power thereon in such manner that it shall retain in itself the rights of the majority stockholder therein; and (3) will at all times preserve each Company's corporate existence.

It will not permit any increase of stock by any such Company, or the creation of any indebtedness, or the guaranty of any bonds, unless effective provision be made that such indebtedness and such bonds guaranteed and all such additional stock (or such part as is proportionate to the part of such entire capital stock previously pledged hereunder) shall immediately be pledged with the Trustee.

SEC. 9. All claims which the Railway Company may have against any such company shall be subject to the lien hereof. COMPANY WILL APPLY CONSOLS AS HEREIN PROVIDED.

SEC. 10. The Railway Company will not issue these consols or apply their proceeds in any manner other than in accordance with the provisions of this indenture.

### ARTICLE FOUR.

#### TREATMENT OF STOCKS AND BONDS PLEDGED.

SEC. 1. The Trustee may cause to be registered in its name as Trustee all coupon bonds pledged with it hereunder, or to be exchanged for registered bonds, or to be stamped "Not negotiable. Held by The Mercantile Trust Company, as Trustee, under the First consolidated mortgage of the Norfolk & Western Railway Co., dated Oct. 22, 1896."

SEC. 2. Unless, in default in the due performance of some covenant of this indenture, the Railway Company shall be entitled to receive all interest paid and dividends declared in respect of any bonds or stocks pledged with the Trustee. It is provided, however, as follows:

(1) the Trustee shall not pay over to the Railway Company any principal of any bond pledged hereunder; (2) nor any principal or interest collected out of the property in case of foreclosure sale or liquidation. (3) The Railway Company shall not transfer any right to interest or dividends, except subject to this indenture; and (4) shall not collect any such interest, or other indebtedness, by legal proceeding, except with the assent of the Trustee, and (5) until actually paid, every such right to interest or dividends, and such other indebtedness, shall remain subject to the lien of this indenture.

SEC. 3. Any sum paid on account of the principal of any bonds, car trusts, etc., pledged hereunder shall be paid over to the Railway Company for expenditures by it made for any of the purposes for which bonds may be used under Section 5 of Article One hereof, upon certificates signed by the President or a Vice-President, or the General Manager, or Chief Engineer, and by the Comptroller, or Auditor, or Treasurer, of the Railway Company.

SEC. 4. Unless the Railway Company shall be in default it shall have the right to vote upon all shares of stock pledged for all purposes not inconsistent with this indenture.

SEC. 5. In case of default in the payment of the principal or interest of any bonds or car trust obligations at any time

pledged hereunder, then, in any such case, the Trustee, if it holds more than 85 per cent of the entire issue, shall, upon the written request of the Railway Company, and in other cases upon such request, may, cause proper proceedings to be instituted to foreclose the mortgage by which such bonds are secured.

[Then follow explicit directions as to the course which shall be pursued in order to secure for the bondholders hereunder their full rights in the event of foreclosure sale, liquidation, reorganization or consolidation of any of the companies whose securities are pledged with the Trustee.]

### ARTICLE FIVE.

#### COUPONS PLEDGED APART FROM BONDS TO HAVE SUBORDINATE LIEN.

SEC. 1. No interest obligation belonging to any bond hereby secured which on and after maturity shall be transferred or pledged apart from its bond shall be entitled to any benefit from this indenture, except after the prior payment in full of the principal of all bonds issued hereunder, and of all coupons not so transferred or pledged.

#### UPON DEFAULT FOR SIX MONTHS, TRUSTEE MAY TAKE POSSESSION.

SEC. 2. In case (1) of default for six months in the payment of any interest on any bond secured by this indenture, or in the performance of any of the covenants contained in Section 5 of Article Three hereof, or (2) of default in the punctual payment of the principal of any of said bonds; or (3) of default for six months in the due performance of any other covenant herein contained, after written notice from the Trustee or from the holders of 5 per cent in the amount of the consols; then in every such case the Trustee, personally or by its agent, may enter upon all or any part of the property hereby conveyed, and operate the same. Thereafter the Trustee may, at the expense of the trust estate, maintain and insure the rolling stock, tools and machinery and other property to the same extent as is usual with railway companies, and may make all necessary repairs and useful additions as to it may seem judicious.

After deducting the expenses of operating said railways, and of all renewals, additions, betterments and improvements, and all taxes, assessments and prior charges, including any interest paid on bonds prior in lien to those secured hereby, as well as compensation for its own services, the Trustee shall apply the income of the railway as follows:

In case the principal of the bonds hereby secured shall not have become due, to the payment of the interest remaining in default, in the order of its maturity, with interest thereon at the rate of 4 per cent per annum; such payments to be made ratably to the persons entitled thereto, without discrimination or preference.

In case the principal of the bonds hereby secured shall have become due by declaration or otherwise, first to the payment of the accrued interest (with interest thereon at the rate of 4 per cent per annum) in the order of its maturity, and next to the payment of the principal of all bonds hereby secured. In every instance such payments shall be made ratably without discrimination.

The Trustee shall also in such case exercise the right to vote on all shares of stock pledged hereunder, and, for the benefit of the holders of bonds hereby secured, shall receive all interest moneys and dividends payable upon all pledged bonds and stocks. If a Receiver shall have been appointed, the Trustee, in its discretion, may and, if requested by holders of a majority in amount of the bonds, shall turn over the interest moneys so collected to such Receiver, and may co-operate with the Receiver in operating the system as the Trustee shall deem best for the bonds hereby secured.

#### UPON DEFAULT FOR SIX MONTHS IN THE PAYMENT OF INTEREST, THE TRUSTEE, ON REQUEST OF A MAJORITY OF THE BONDS, SHALL DECLARE THE PRINCIPAL DUE.

SEC. 3. In case of default for six months in the payment of any interest on any bond hereby secured, or in the performance of any of the covenants of the Railway Company contained in Section 5 of Article Three hereof, then, upon the written request of the holders of a majority in amount of the consols then outstanding, the Trustee, by notice in writing delivered to the Railway Company, shall declare the principal of all bonds hereby secured to be due and payable immediately. But if subsequently all arrears of interest, with interest at the rate of 4 per cent per annum on overdue instalments of interest, shall either be paid by the Railway Company or be collected out of the mortgaged premises before any sale of the mortgaged premises, then the holders of a majority in amount of the consols then outstanding, by written notice, may waive such default and its consequences. UPON DEFAULT THE TRUSTEE MAY SELL THE PROPERTY AT AUCTION OR INSTITUTE FORECLOSURE OR OTHER SUITS.

SEC. 4. In case of default made and continued as specified in Section 2 of this article, the Trustee (a) may sell to the highest and best bidder, all and singular the mortgaged property and premises, bonds and stocks, rights, franchises and interests, lands and appurtenances, in one lot, unless a sale in parcels shall be required under the provisions of Section 6 of this Article, which sale shall be made at public auction at such place in the City of Norfolk, Va., or at such other place, and at such time and upon such terms, as the Trustee may fix in the notice of sale to be given as herein provided; or (b) the Trustee may proceed to protect the rights of bondholders under this indenture, by suits in equity or at law, whether for the foreclosure of this indenture, or for the enforcement of any other appropriate legal or equitable remedy, as the Trustee, being advised by counsel learned in the law, shall deem most effectual.

**TRUSTEE MUST ACT WHEN REQUESTED BY 25 PER CENT OF THE CONSOLS.**

Upon the written request of the holders of 25 per cent in amount of the bonds hereby secured, it shall be the duty of the Trustee, when indemnified as hereinafter provided, to take all needful steps for the protection of the bondholders and to exercise the powers of entry or sale herein conferred, or both, or to take appropriate judicial proceedings as the Trustee, advised by counsel, shall deem most expedient.

**HOLDERS OF 75 PER CENT OF THE OUTSTANDING BONDS SHALL HAVE THE RIGHT TO DIRECT FORECLOSURE AND OTHER PROCEEDINGS.**

SEC. 5. The holders of 75 per cent in amount of the consols then outstanding shall have the right to direct and control the method and place of conducting all proceedings for any sale of the premises, or for the foreclosure of this indenture, or for the appointment of a receiver, or of any other proceedings hereunder.

**PROVISIONS REGARDING ANY SALE.**

SECS. 6 TO 13. The property shall be sold as an entirety, including railroads, leases, stocks and bonds, etc., unless the holders of a majority in amount of the consols then outstanding shall in writing request the Trustee to cause said premises to be sold in parcels, in which case the sale shall be made in such parcels as may be specified in such request.

Notice of any sale shall be advertised once a week, for four successive weeks prior to the sale, in New York, N. Y., Norfolk and Roanoke, Va., Charleston, West Va., Columbus, Ohio, and Durham and Winston-Salem, N. C.

In case of such sale, or in case the premises, or any part thereof, shall be sold by foreclosure of any mortgage securing any of the outstanding old bonds mentioned in Section 3 of Article One hereof, or under the Prior Lien Mortgage, then in any such case the principal of all the consols shall forthwith become due and payable.

The proceeds of any such sale shall be applied as follows:

*First*—To the payment of the expenses of such sale, including a reasonable compensation to the Trustee, and of all expenses incurred in managing the property, and all taxes or prior liens, except those to which such sale shall have been made subject.

*Second*—To the payment of the whole amount then owing upon the consols for principal and interest, with interest at the rate of 4 per cent per annum on the overdue instalments of interest. In case such proceeds shall be insufficient to pay in full the whole amount so due, then to the payment of such principal and interest, without preference or priority of principal over interest, or of interest over principal, or of any instalment of interest over any other instalment of interest, ratably, to the aggregate of such principal and interest; subject, however, to the provisions of Section 1 of this article.

At any sale hereunder the purchasers in making payment shall be entitled to turn in any bonds and any matured and unpaid coupons hereby secured, estimating the value of such bonds and coupons at the sum payable out of the net proceeds of such sale to the holders thereof as their ratable share of such net proceeds.

**THE TRUSTEE MAY RECOVER JUDGMENT ON BEHALF OF ALL THE BONDHOLDERS.**

SEC. 14. In case of default for six months in the payment of principal or interest when due, the Railway Company covenants on demand to pay the full amount so owing, with interest thereon at 4 per cent, and in case of failure so to do the Trustee shall be entitled to recover judgment.

**COMPANY WAIVES ALL RIGHTS UNDER EXTENSION, VALUATION AND REDEMPTION LAWS.**

SEC. 15. The Railway Company will not take advantage of any stay or extension, valuation or redemption law now or hereafter in force, and will not hinder the execution of any power herein granted to the Trustee.

**RECEIVER MAY BE APPOINTED ON COMMENCEMENT OF JUDICIAL PROCEEDINGS.**

SEC. 16. Upon commencement of any judicial proceedings to enforce any right of the bondholders under this indenture, the Trustee shall be entitled to exercise the right of entry herein conferred, and to secure the appointment of a Receiver of the premises, with such powers as the Court shall confer; but notwithstanding the appointment of any Receiver, the Trustee shall be entitled, as pledgee, to retain possession of the stocks, bonds, etc., pledged hereunder.

**PRIOR TO DEFAULT COMPANY MAY SURRENDER POSSESSION TO THE TRUSTEE.**

SEC. 17. The Railway Company whenever it shall deem expedient for the better security of the consols, although there be then no default, may, with the consent of the Trustee, surrender to the Trustee possession of the whole or any part of the property hereby conveyed, for any period fixed or indefinite. The Trustee shall thereupon manage the property in accordance with the provisions of this indenture, and shall apply the income thereof as provided in Section 2 of this article. Upon application of the Trustee, and with consent of the Railway Company, a Receiver may be appointed to take possession of said property, with all the rights and duties by this section conferred upon the Trustee.

SEC. 18. No holder of any bond or coupon shall have the right to institute any action in equity or at law for the foreclosure of this indenture or for the appointment of a receiver or for any other remedy hereunder unless the holders of 25 per cent in amount of the bonds hereby secured and then outstanding shall have made written request of the Trustee, and shall have afforded it reasonable opportunity to exercise the powers hereinbefore granted; it being intended that no holders of bonds or coupons shall enforce any right here-

under except in the manner herein provided, and for the equal benefit of all such outstanding bonds and coupons.

**REMEDIES CUMULATIVE.**

SEC. 19. Except as herein expressly provided to the contrary, no remedy herein conferred is exclusive of any other remedy, but every such remedy shall be in addition to every other remedy existing at law or in equity or by statute.

**ARTICLE SIX.****NO RECOURSE AGAINST STOCKHOLDERS OR OFFICERS.**

No recourse under any agreement of this indenture, or of any bond or coupon hereby secured, shall be had against any incorporator, stockholder, officer or director of the Railway Company.

**ARTICLE SEVEN.****PROOF OF REQUESTS OF BONDHOLDERS.**

This article provides methods of proving the execution of requests and other instruments by bondholders and of the ownership of bonds by persons executing any such request or instrument.

**ARTICLE EIGHT.****THE BEARER OF AN UNREGISTERED COUPON BOND OR OF ANY COUPON MAY BE TREATED AS THE OWNER THEREOF.**

The Railway Company and the Trustee may treat the bearer of any coupon bond which shall not at the time be registered, and the bearer of any coupon whether the bonds shall be registered or not, as the absolute owner of such bond or coupon. Neither the Railway Company nor the Trustee shall be affected by any notice to the contrary.

**ARTICLE NINE.****RELEASE OF PROPERTY FROM LIEN HEREOF.**

Upon the written request of the Railway Company, approved by resolution of its Board of Directors or Executive Committee, the Trustee shall release from the lien of this indenture any part of the mortgaged premises; provided (1), that no part of the lines of track shall be released unless the Railway Company shall have ceased to use the same, and no part shall be released if thereby the continuity of the lines of railway of the Railway Company shall be broken; and (2) that nothing appurtenant to the maintenance or operation of the railway shall be released unless the same shall no longer be expedient to be retained. All moneys received for any property subject to this indenture taken by power of eminent domain shall be applied, with the approval of the Trustee, to the purchase of other property, real or personal, which shall then be subject to this mortgage, or in betterments of, or improvements upon, any part of the mortgaged premises.

**ARTICLE TEN.****TRUSTEE MUST BE INDEMNIFIED.**

SEC. 1. The Trustee shall not be under any obligation to take any action hereunder likely to involve expense unless the bondholders shall furnish it reasonable indemnity.

**TRUSTEE MAY BE REMOVED BY HOLDERS OF 75 PER CENT IN AMOUNT OF THE BONDS.**

SEC. 2. The Trustee may be removed at any time by an instrument in writing signed by three quarters in amount of the holders of the bonds then outstanding.

**APPOINTMENT OF NEW TRUSTEE.**

SEC. 3. A new Trustee may be appointed by the holders of a majority in amount of the consols outstanding, by instruments in writing. The Railway Company, however, may appoint a Trustee to fill such vacancy until a new Trustee shall be appointed by the bondholders or as hereinafter authorized. Notice of such appointment by the Railway Company shall be advertised for six successive weeks in New York, London and Amsterdam, and any new trustee so appointed shall immediately be superseded by a trustee appointed in the manner above provided by the bondholders prior to the expiration of six months after such publication of notice. Every such trustee shall always be a trust company in good standing, doing business in the City of New York, and having a capital and surplus aggregating at least \$2,000,000. If necessary, however, to comply with the law of any State, an individual may be appointed to act as co-trustee, with certain limited powers.

**ARTICLE ELEVEN.****PEACEABLE POSSESSION—RELEASE OF MORTGAGE.**

SEC. 1. The Railway Company shall have the right to retain possession of the mortgaged property until default.

SEC. 2. Upon payment of all the consols the mortgage shall be released.

**ARTICLE TWELVE.****RIGHT OF SUCCESSOR CORPORATION TO ISSUE BONDS HEREUNDER.**

In case the Railway Company shall be consolidated or merged with any other corporation or its property be sold subject to this indenture, the successor corporation upon executing an indenture satisfactory to the Trustee, assuming said bonds and the performance of all the covenants and conditions of this indenture, shall be substituted for the Railway Company, party of the first part hereto, and thereupon it may issue, either in its own name or in the name of the Norfolk & Western Railway Co., any or all of such bonds which shall not theretofore have been delivered subject to all the terms, conditions and restrictions herein prescribed.

## The Commercial Times.

## COMMERCIAL EPITOME

FRIDAY NIGHT, Feb. 19, 1897.

The European political situation was a disturbing feature at the opening of the week, and in speculative circles had considerable influence upon the course of prices. Subsequently, however, it was dismissed as an unimportant factor, as the outcome, it is believed, will not be serious. The milder weather experienced during the week has had a favorable influence in several lines of merchandise, and as the spring season approaches a gradual broadening of trade is perceptible. The arbitration treaty is still before the Senate and the prospects are considered very remote of that body taking favorable action upon it during the present session. The Greater New York Commissioners have agreed upon a report to the Legislature to accompany the draft of the charter for the new city. The investigation of the State Senate Committee into the methods of business pursued by the trusts has been resumed and is meeting with much ridicule, both from the press and public. At the decline in price following the rupture of the steel rail pool a large business has been transacted both with the home trade and for export.

The demand for lard on the spot has continued slow, and although prices have advanced they are relatively on a lower basis than in the Western markets, closing at 4.20c. for prime Western, 3.80c. for prime City and 4.40c. for refined for the Continent. The local market for lard futures has been neglected. At the West the trading has been fairly active. There has been some buying for investment account and prices have advanced. The close was firm.

## DAILY CLOSING PRICES OF LARD FUTURE.

	Feb. 19	Mar. 1	Apr. 1	May 1	Jun. 1	Jul. 1	Aug. 1	Sep. 1	Oct. 1	Nov. 1	Dec. 1
May.....	4.15	4.30	4.20	4.20	4.30	4.35					

Pork has had only a limited sale but values have held steady, closing at \$8.25@8.75 for mess, \$8.50@10 for short clear and \$9.50@10 for family. Cut meats have been in good demand and firm, closing at 4½¢ for pickled bellies, 12¢@10 lbs. average, 5c. for pickled shoulders and 8½¢@9c. for pickled hams. Beef has been quiet but steady, closing at \$7.00@8 for mess, \$7.50@9 for packet, \$9@11 for family and \$13@14 for extra India mess. Beef hams have been firm at \$18@18.50. Tallow has sold slowly and the close was easy at 3½¢. The demand for oleostearine has been quiet and the close was flat at 4.1-16c. Lard stearine has been dull and unchanged at 4½¢. Cotton-seed oil has had a limited sale and prices have advanced slightly, closing firm at 29@20½¢. 1 for prime crude and 23½¢@24c. for prime yellow. Butter has had a moderate sale, but at lower prices, closing at 18@20c. for creamery. Cheese has been in fairly good demand and steady at 9@12½¢. for State factory, full cream. Fresh eggs have advanced and the close was firm at 18½¢. for choice Western.

The demand for the Brazil growths of coffee has been quiet and as there have been offerings prices have weakened slightly, closing at 9½¢. for Rio No. 7. Mild grades have had only a limited sale, but values have held steady at 16½¢. for good Cucuta and 23¼¢@24½¢. for standard Java. There has been continued a slow market for contracts, and as the offerings have been fairly liberal, prices have tended downward. The close was barely steady.

The following were the final asking prices:

Feb.....	9.05c.	May.....	9.15c.	Aug.....	9.20c.
March.....	9.10c.	June.....	9.20c.	Sept.....	9.20c.
April.....	9.15c.	July.....	9.20c.	Dec.....	9.20c.

There has been a further advance of 1-16c. in the prices for raw sugar, and it is reported that refiners have quietly made large purchases the particulars of which have been kept private, closing at 3½¢. for centrifugals 96-deg. test and 2½¢. for muscovado 89-deg. test. Refined sugars have been in increased demand and firmer: granulated closed at 4½¢. Tea has been quiet but steady.

Kentucky tobacco has been in demand, but owing to small stock only a limited volume of business has been transacted. Sales 220 hhd. Seed leaf tobacco was in demand at full values. Sales for the week were 2,775 cases, including: 350 cases 1895 crop, New England Havana, 12½¢@20c.; 400 cases 1895 crop, Zimmers, 12@15c.; 350 cases 1895 crop, Wisconsin Havana, 5½¢@9c.; 435 cases 1893 crop, Wisconsin Havana, 7 to 9½¢.; 250 cases 1894 crop, Pennsylvania Havana, 11@11½¢.; also 850 bales Havana at 75c. to \$2.75 in bond and 350 bales Sumatra at 70c. to \$1.75 in bond.

There has been a quiet market for Straits tin and prices have weakened in response to easier foreign advices, closing quiet at 13.35@13.50c. Ingot copper has received a moderate amount of attention and prices have been unchanged and firm, closing at 12c. for lake. Lead has been without decided change, closing steady at 3.25@3.30c. for domestic. Spelter has weakened slightly and closed quiet at 4@4.05c. for domestic. Pig iron quiet but steady at \$11@12.50 for domestic.

Refined petroleum has advanced, closing at 6.30c. in bbls., 3.80c. in bulk and 7.00c. in cases; naphtha dull at 6½¢. Crude certificates have been neglected. Credit balances have been firmer at 9c. Spirits turpentine has sold slowly, and prices have declined to 28½¢@30c. Rosins have been dull and unchanged at \$1.70. Wool has been in fair demand and held at firm prices. Choice hops have been in demand for export at steady prices.

Figures in cotton cover exact week, last week's figures having been adjusted.

## COTTON.

FRIDAY NIGHT, February 19, 1897.

THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening the total receipts have reached 84,934 bales, against 119,423 bales last week and 101,564 bales the previous week, making the total receipts since the 1st of Sept., 1896, 5,855,814 bales, against 4,364,552 bales for the same period of 1895-6, showing an increase since Sept. 1, 1896, of 1,491,262 bales.

Speculation in cotton for future delivery has been much more active, and at times the fluctuations in prices were somewhat violent. The net changes in values for the week, however, are unimportant. Saturday the market was weak. Foreign advices were discouraging, as a result of the unsettled political situation, and this prompted selling, under which prices declined 8 to 15 points. The uneasiness felt over the European political situation appeared to have largely subsided on Monday. There was fair buying both for foreign and local account, and this, together with a small movement of the crop, resulted in an advance of 11 to 14 points for the day. On Tuesday the buying continued, as foreign advices were favorable and the crop movement was light, prices closing at an advance of 5 to 9 points for the day. Wednesday the market again turned weaker as the foreign demand, which it appeared was largely to cover contracts, had subsided, and there was a disposition shown on the part of longs to realize profits. The net change in prices for the day was a decline of 7 to 8 points. A firmer tone dominated the market on Thursday, particularly for this crop, and on moderate buying prices advanced 6 to 8 points. The advance in prices for the next crop futures was only 2 points, as the belief that acreage for the new crop will be large has prompted selling by the South in Liverpool, and that market in turn has been hedging here. To day the market opened unchanged to 1 point lower, but immediately rallied and advanced 8 to 14 points, on a demand from shorts to cover contracts, stimulated by reports from Southern markets advising scarcity of actual cotton. Later in the day, however, under estimates being received from New Orleans of a larger overland movement of the crop for the week than expected and war talk from Europe, prices weakened, and the advance was more than lost, closing at a decline of 1 to 7 points for the day. Cotton on the spot has been quiet. Saturday prices declined 5-16c., but on Wednesday and Thursday advanced 1-16c. To-day the market was unchanged and steady, middling uplands closing at 7 1/8c.

The total sales for forward delivery for the week are 893,100 bales. For immediate delivery the total sales foot up this week 3,786 bales, including 100 for export, 3,286 for consumption, — for speculation and 400 on contract. The following are the official quotations for each day of the past week—February 13 to February 19.

On the basis of the rates on and off middling as established by the Revision Committee, the prices for a few of the grades would be as follows:

UPLANDS.						
	Sat.	Mon	Tues	Wed	Th.	Fri.

The imports into Continental ports the past week have been 94,000 bales.

The above figures indicate an increase in the cotton in sight to-night of 67,333 bales as compared with the same date of 1896, a falling off of 949,749 bales from the corresponding date of 1895 and a decrease of 552,193 bales from 1894.

AT THE INTERIOR TOWNS the movement—that is the receipts for the week and since September 1, the shipments for the week and the stocks to-night, and the same items for the corresponding period of 1895-96—is set out in detail below.

TOWNS.	Receipts				Shipments				Stock			
	Movement to February 19, 1897.				Movement to February 21, 1896.							
	This week.	Since Sept. 1, 96.	Since This week.	Stock Feb. 19.	This week.	Since Sept. 1, 95.	Since This week.	Stock Feb. 21.

\* This year's figures estimated.

† Last year's figures are for Newberry, S. C.

The above totals show that the interior stocks have decreased during the week 27,189 bales and are now 33,582 bales less than at same period last year. The receipts at all the towns have been 12,733 bales more than same week last year and since Sept. 1 they are 826,022 bales more than for same time in 1895-96.

QUOTATIONS FOR MIDDLING COTTON AT OTHER MARKETS.—Below are closing quotations of middling cotton at Southern and other principal cotton markets for each day of the week.

RECEIPTS FROM THE PLANTATIONS.—The following table indicates the actual movement each week from the plantations. The figures do not include overland receipts nor Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the outports.

Week Ending—	Receipts at the Ports.			St'k at Interior Towns.			Rec'pts from Plant'ns.		
	1897.	1896.	1895.	1897.	1896.	1895.	1897.	1896.	1895.
Jan. 15.....	151,841	119,537	200,806	532,119	552,608	530,021	131,755	107,035	171,179
" 22.....	130,100	112,395	213,026	502,917	533,688	507,480	100,958	93,475	150,482
" 29.....	138,302	122,902	199,835	471,186	505,878	489,801	106,571	95,092	182,156
Feb. 5.....	101,564	113,586	155,098	444,460	479,143	468,453	74,778	86,554	131,750
" 12.....	119,423	106,446	132,989	420,094	458,279	442,289	104,117	85,582	108,825
" 19.....	81,394	109,395	91,807	401,905	438,477	420,269	57,745	89,693	69,787

The above statement shows: 1.—That the total receipts from the plantations since Sept. 1, 1896, are 6,137,125 bales; in 1895-96 were 4,770,339 bales; in 1894-95 were 6,961,193 bales.

2.—That although the receipts at the outports the past week were 54,394 bales, the actual movement from plantations was only 57,745 bales, the balance being taken from the stocks at the interior towns. Last year the receipts from the plantations for the week were 89,603 bales and for 1895 they were 69,787 bales.

OVERLAND MOVEMENT FOR THE WEEK AND SINCE SEPT. 1.—We give below a statement showing the overland movement for the week and since September 1. As the returns reach us by telegraph late Friday night it is impossible to enter so largely into detail as in our regular monthly report, but all the principal matters of interest are given. This weekly publication is of course supplementary to the more extended monthly statements. The results for the week ending Feb. 19 and since Sept. 1 in the last two years are as follows.

February 19.	1896-97.		1895-96.	
	Week.	Since Sept. 1.	Week.	Since Sept. 1.
Shipped—				
Via St. Louis.....	12,068	418,977	11,392	413,255
Via Cairo.....	7,122	222,979	5,469	191,097
Via Parker.....	1,124	12,484	90	13,368
Via Evansville.....	3,787	2,175	60	60
Via Louisville.....	3,787	111,239	3,915	103,969
Via Cincinnati.....	7,182	105,396	3,048	65,592
Via other routes, &c.....	2,695	97,456	1,087	71,451
Total gross overland.....	35,078	970,708	23,001	858,792
Deduct shipments—				
Overland to N. Y., Boston, &c..	5,792	261,317	5,286	189,686
Between interior towns.....	19	3,152	69	2,556
Inland, &c., from South.....	517	25,203	1,250	33,428
Total to be deducted.....	6,328	299,707	6,605	225,670
Leaving total net overland*..	28,750	681,001	16,396	633,122

\* Including movement by rail to Canada.

The foregoing shows that the week's net overland movement this year has been 28,750 bales, against 16,396 bales for the week in 1896, and that for the season to date the aggregate net overland exhibits an increase over a year ago of 45,879 bales.

* Decrease during week.				

**WEATHER REPORTS BY TELEGRAPH.**—Our telegraphic advices from the South this evening denote that the weather has been favorable as a rule the past week. In the greater part of the Southwest there has been little or no rain and farm work has been actively pushed. The temperature has been quite satisfactory.

**Galveston, Texas.**—The weather has, on the whole, been favorable for farming pursuits during the week. Plowing has been rushed and planters are well up with their work generally. It has rained on one day of the week, the rainfall being sixty-seven hundredths of an inch. The thermometer has averaged 58, the highest being 69 and the lowest 48.

**Palestine, Texas.**—We have had light rain on one day of the past week, the precipitation reaching four hundredths of an inch. The thermometer has averaged 54, ranging from 36 to 72.

**Huntsville, Texas.**—There has been rain on one day of the past week, to the extent of three hundredths of an inch. The thermometer has ranged from 33 to 73, averaging 56.

**Dallas, Texas.**—The weather has been favorable for farming operations, and planters are busy plowing. Work is well advanced. It has rained very lightly on one day of the week, the rainfall being inappreciable. Average thermometer 54, highest 79 and lowest 30.

**San Antonio, Texas.**—Farmers are busy plowing. Work is well up. There has been only a trace of rain. The thermometer has averaged 63, the highest being 83 and the lowest 40.

**Luling, Texas.**—There has been but a trace of rain during the week. The thermometer has averaged 62, ranging from 40 to 83.

**Columbia, Texas.**—It has rained to an inappreciable extent during the week. The thermometer has ranged from 38 to 74, averaging 56.

**Cuero, Texas.**—The weather has been very satisfactory for farm work. We have had light rain on one day during the past week, the rainfall being two hundredths of an inch. Average thermometer 60, highest 78 and lowest 41.

**Brenham, Texas.**—Farmers are pushing their work. There has been rain on one day of the week, to the extent of twenty-three hundredths of an inch. The thermometer has averaged 58, the highest being 75 and the lowest 40.

**Fort Worth, Texas.**—We have had only a trace of rain during the past week. The thermometer has ranged from 30 to 78, averaging 54.

**Weatherford, Texas.**—We have had dry weather all the week. Average thermometer 51, highest 79, lowest 30.

**New Orleans, Louisiana.**—We have had rain on three days during the week to the extent of ninety-four hundredths of an inch. The thermometer has averaged 63.

**Shreveport, Louisiana.**—There has been no rain the past week. The thermometer has averaged 61, ranging from 39 to 81.

**Columbus, Mississippi.**—We have had no rain during the week. The thermometer has ranged from 35 to 68, averaging 58.

**Leland, Mississippi.**—There has been no rain during the week. The thermometer has averaged 54.5, the highest being 79 and the lowest 32.

**Vicksburg, Mississippi.**—We have had but a trace of rain the past week. The thermometer has averaged 60, ranging from 40 to 78.

**Little Rock, Arkansas.**—There has been no rain during the past week. The thermometer has averaged 54, ranging from 35 to 78.

**Helena, Arkansas.**—The weather has been dry and warmer all the week and trees are putting out shoots. The thermometer has ranged from 33 to 71, averaging 52.4.

**Memphis, Tennessee.**—The weather has been dry and pleasant all the week, and plowing has begun. Average thermometer 53.2, highest 75 and lowest 38.

**Nashville, Tennessee.**—There has been rain on one day during the week, the rainfall being fifteen hundredths of an inch. The thermometer has averaged 52, the highest being 73 and the lowest 32.

**Mobile, Alabama.**—It has rained on three days of the week, the precipitation reaching one inch and eighty-one hundredths. The thermometer has averaged 60, ranging from 43 to 71.

**Montgomery, Alabama.**—Rain fell on two days in the early part of the week, but since then the weather has been warm and dry. The rainfall reached thirty-seven hundredths of an inch. The thermometer has ranged from 50 to 65, averaging 59.

**Madison, Florida.**—Telegram not received.

**Savannah, Georgia.**—There has been rain on six days of the week, the precipitation reaching two inches and twenty-four hundredths. The thermometer has averaged 61, ranging from 44 to 76.

**Augusta, Georgia.**—Rain has fallen on three days of the week, to the extent of ninety-one hundredths of an inch. Average thermometer 57, highest 75, lowest 33.

**Charleston, South Carolina.**—There has been rain on four days during the week, the precipitation reaching one inch and twenty-one hundredths. The thermometer has averaged 59, ranging from 48 to 74.

**Stateburg, South Carolina.**—Too much wet weather has retarded plowing. We have had rain on three days of the week, to the extent of seventy-three hundredths of an inch. The thermometer has ranged from 43 to 75, averaging 56.9.

**Wilson, North Carolina.**—We have had rain on two days of the week, the precipitation reaching fifty-two hundredths of an inch. The thermometer has averaged 53, ranging from 34 to 70.

The following statement we have also received by telegraph, showing the height of the rivers at the points named at 3 o'clock February 18, 1897, and February 20, 1896.

Total 1895-96.....	1,723	75	1,798	30,324	5,848	35,972	1,743	31,912

Quotations Feb. 19 at Savannah, for Floridas, common, 90.; medium fine, 11½c.; choice, 14½c. Charleston, Carolinas. medium fine, 17½@19c.; fine, 19@20c.; fully fine, 21@23c.; extra fine, 28 to 35c.

**JUTE BUTTS, BAGGING, &c.**—The market for jute bagging has been inactive during the week under review at last week's quotations, viz.: at 4½c. for 1¾ lbs., 5c. for 2 lbs. and 5½c. for standard grades in a jobbing way. Car-load lots of standard brands are quoted at 4½c. for 1¾ lbs., 5c. for 2 lbs. and 5½c. for 2¼ lbs. f.o.b. at New York. Jute butts are in very light demand at 11-16c. for paper quality, 1'40@1½c. for mixing and bagging, 1 and 1½c. for spinning butts, all to arrive.

**EUROPEAN COTTON CONSUMPTION TO FEBRUARY 1.**—We have received to-day (Friday) by cable Mr. Ellison's figures brought down to February 1. We have also received the revised totals for last year and give them for comparison. The spinners' takings in actual bales and pounds have been as follows:

October 1 to February 1.	Great Britain.	Continent.	Total.
<b>For 1896-97.</b>			
Takings by spinners...bales	1,205,000	1,561,000	2,766,000
Average weight of bales, lbs.	503	487	497.4
Takings in pounds.....	615,515,000	760,207,000	1,375,722,000
<b>For 1895-96.</b>			
Takings by spinners...bales	1,172,000	1,386,000	2,558,000
Average weight of bales, lbs.	502	487	494
Takings in pounds.....	588,598,000	675,016,000	1,263,614,000

According to the above, the average weight of the deliveries in Great Britain is 503 pounds per bale this season, against 503 pounds during the same time last season. The Continental deliveries average 487 pounds, against 487 pounds last year, and for the whole of Europe the deliveries average 497.4 pounds per bale against 494 pounds last season. Our dispatch also gives the full movement for this year and last year in bales of 500 pounds.

Oct. 1 to Feb. 1. Bales of 500 lbs. each, 000s omitted.	1896-97.			1895-96.		
	Great Britain	Continent.	Total.	Great Britain	Continent.	Total.

In January.....	64.0	80.0	144.0	64.0	79.0	143.0

The foregoing shows that the weekly consumption is now 144,000 bales of 500 pounds each, against 143,000 bales of like weights at the corresponding time last year. The total spinners' stocks in Great Britain and on the Continent have increased 65,000 bales during the month, but are now 94,000 bales less than at the same date last season.

**EAST INDIA CROP.**—Messrs. Gaddum, Bythell & Co., of Bombay, make the following telegraphic report under date of February 4:

The plague shows no signs of diminution yet, but it is hoped that the approaching warmer weather will effect a speedy and beneficial change in the rate of mortality. More mills have closed, owing to the lack of hands, and it is very probable that ere long there will be a complete stop in the Bombay spinning industry. The effect of this further reduction in the output from our Cotton Green has been favorable to exporters, who are enabled to make considerable purchases without driving prices up, dealers being satisfied to let their holdings go at a fair market value; for the state of complete uncertainty now felt with regard to the future of all business here makes it most advisable to close off every transaction with the utmost possible dispatch. For the same reason all quotations for forward delivery are kept at a prohibitive level, since no one cares to incur the responsibility of having to deliver cotton months ahead under present circumstances.

**SHIPPING NEWS.**—The exports of cotton from the United States the past week, as per latest mail returns, have reached 118,629 bales.

## BREADSTUFFS.

FRIDAY, February 19, 1897.

The trade brands of wheat flour have received slightly increased attention from the home trade; still the volume of business transacted has been only very moderate, but as stocks in sellers' hands have been small, more particularly of winter-wheat grades, there has been no attempt on their part to hurry business and values have been well maintained. Rye flour has declined, and at the concession has had a better sale. The demand for buckwheat flour has been slow, but prices have held about steady. Corn meal has had a fair sale, but at slightly lower prices. To-day the market for wheat flour was fairly active and firmer.

The speculative dealings in the market for wheat futures have been moderately active, and although the fluctuations in values have been within a fairly wide range the net changes for the week are unimportant, showing only fractional advances. Saturday there was a decline of ½¢ @ 1½¢ in prices. Foreign advices were disappointing and traders generally were selling. During early 'Change on Monday there was an advance in prices, based on the war talk from Europe. Subsequently, however, there was renewed selling, and the improvement was lost. Tuesday the prospects of serious complications arising out of the Greco situation were not considered probable, and as foreign advices came weaker prices declined sharply, closing ¾¢ @ 1½¢ off for the day. Wednesday and Thursday, however, the market turned stronger. Foreign advices came firmer, and this stimulated a demand from shorts to cover contracts, with the result that prices for the day made a net advance of 1¢ @ 1½¢. To-day the market was fairly active and prices further advanced 1¢ @ 1½¢ on general buying, stimulated by stronger foreign advices and renewed war talk from Europe. In the spot market only a limited amount of business has been transacted. To-day the market was quiet. The sales included No. 1 Northern at 80½¢ f. o. b. afloat; No. 1 hard Duluth and No. 2 red winter was quoted at 92½¢ f. o. b. afloat.

DAILY CLOSING PRICES OF NO. 2 RED WINTER WHEAT.

	Feb.	Mon.	Tues.	Wed.	Thurs.	Fri.
February delivery.....c.	81½	81½	80½	81½	82½	83½
March delivery.....c.	82½	82½	81½	82½	82½	83½
May delivery.....c.	80½	80½	79½	80½	81½	82½
June delivery.....c.	79½	79½	78½	79½	80½	81½
July delivery.....c.	77½	77½	76½	77½	78½	79½
September delivery.....c.	75½	75½	74½	75½	76½	77½

There has been a quiet market for Indian corn future, and, despite the break in wheat early in the week prices held steady; in fact they gradually worked upward, and yesterday on stronger foreign advices, which stimulated something of a demand from "shorts" to cover contracts, they made something of an advance. A prospective falling off in the crop movement also has had a strengthening influence upon values. To-day the market further advanced on continued buying by shorts to cover contracts. In the spot market there has been a further shrinkage in the export demand. To-day the market was firm. The sales included No. 2 mixed for March loading on private terms and on the spot at 30½¢ delivered; also steamer mixed at 27½¢, in elevator.

DAILY CLOSING PRICES OF NO. 2 MIXED CORN.

	Feb.	Mon.	Tues.	Wed.	Thurs.	Fri.
February delivery.....c.	29½	29½	29½	28½	28½	29½
May delivery.....c.	29½	29½	29½	29½	29½	30½
July delivery.....c.	30½	30½	30½	30½	30½	31½

Oats for future delivery have been dull. The fluctuations in prices have been within the narrowest limits, and the net changes for the week are unimportant. In the spot market a moderate amount of business has been transacted, as there was some buying by exporters early in the week, and there has been a limited demand from the home trade. To-day the market was firmer but quiet. In the spot market a limited amount of business was transacted at firm prices. The sales included No. 2 mixed at 21½¢ in elevator and No. 3 white at 23½¢ in elevator.

DAILY CLOSING PRICES OF NO. 2 MIXED OATS.

	Feb.	Mon.	Tues.	Wed.	Thurs.	Fri.

## THE DRY GOODS TRADE.

NEW YORK, FRIDAY, P. M., Feb. 19, 1897.

There has been less progress made in the market during the past week than generally looked for and less than warranted by the expectations based upon the attendance of buyers. The latter have been here in large numbers but the retail trade and small jobbers have been mostly represented, so that the primary market has not benefited to any material extent. Even in jobbing circles the business secured has not been such as might reasonably have been counted upon from the large number of buyers operating. In this respect the week's results have been disappointing. Last week there was an impression that the extraordinary business in print cloths would induce freedom of action in other directions, but it must be acknowledged that there has been but little indication this week on the part of buyers to throw off the reserve which has characterized their actions for so long a time past. The woolen and worsted goods division has been fairly busy and generally steady in price. Collections are favorably reported upon.

**DOMESTIC COTTON GOODS.**—The exports of cotton goods from this port for the week ending Feb. 16 were 1,158 packages, valued at \$63,735, their destination being to the points specified in the tables below:

NEW YORK TO FEB. 16.	1897.		1896.	
	Week.	Since Jan. 1.	Week.	Since Jan. 1.
Great Britain .....	7	363	9	254
Other European .....	1	571	45	993

Total .....	1,158	42,427	799	30,283

\* From New England mill points direct.

The value of the New York exports for the year to date has been \$1,393,217 in 1897 against \$1,332,595 in 1896.

Business in brown goods has been irregular. Light-weight coarse yarn makes have been in relatively best request and steady, whilst in heavier goods the demand has been indifferent, and in the matter of four-yard sheetings prices have favored buyers. The sales of brown ducks and oenaburghs have been on a quiet scale only at previous prices. In coarse colored cottons, denims are dull and generally in buyers' favor, ticks are quietly steady, cottonades and camel jeans have in some makes been cleaned up at low prices, while a limited demand is reported for plaids, checks and stripes, etc. Low-grade bleached cottons are firm but quiet, and in medium and fine grades rather more business has been done at previous prices. Lower prices have been quoted occasionally for wide sheetings and sales have improved as a result. Cotton flannels and blankets dull and unchanged. There has been a steady business of about average proportions in printed goods, both fancy and more staple varieties. Ginghams have been dull and unchanged. The market for print cloths has relapsed into a quiet condition, following last week's abnormal sales, but prices have been maintained on the basis of 2 11-16c. for extras.

	1897.	1896.	1895.	1894.
At Providence, 64 squares .....	147,000	204,000	36,000	179,000
At Fall River, 64 squares .....	608,000	410,000	23,000	250,000
At Fall River, odd sizes .....	420,000	353,000	93,000	58,000

Total stock (pieces) .....

**WOOLEN GOODS.**—There has been considerable progress made during the past week in business in men's wear woolens and worsteds in heavy-weights, and although the season is still very backward in these the outlook has undoubtedly improved to some extent. This is particularly the case with low and medium grades of all-wool goods in chevots and cassimeres, upon which the demand has mainly run. In grades at \$1 and upwards business has been comparatively quiet in both plain and fancy goods. Reorders for light weights continue good for late stage of the season. Satinets and cotton-warp cassimeres are selling moderately for fall; doeskins and cotton worsteds quiet. In plain-faced overcoatings a fair demand is reported, but rough faced goods are dull; cloakings in improving demand. Flannels and blankets are more looked after at last season's prices. In dress goods reorders for spring are moderate and chiefly for fancies in medium and low-priced grades.

**FOREIGN DRY GOODS.**—There has been fully an average amount of business reported in spring lines in dress goods—silks, ribbons and laces—at generally steady prices. Linens are firm but still quiet. Hosiery and underwear dull and unchanged. Fall dress goods are being ordered in moderate quantities.

**Importations and Warehouse Withdrawals of Dry Goods.**

The importations and warehouse withdrawals of dry goods at this port for the week ending February 18, 1897, and since January 1, 1897, and for the corresponding periods of last year are as follows:

IMPORTS ENTERED FOR CONSUMPTION FOR THE WEEK AND SINCE JANUARY 1, 1897 AND 1896.	Week Ending Feb. 18, 1897.		Since Jan. 1, 1897.		Week Ending Feb. 20, 1896.		Since Jan. 1, 1896.

# STATE AND CITY DEPARTMENT.

## TERMS OF SUBSCRIPTION.

THE INVESTORS' SUPPLEMENT will be furnished *without extra charge* to every annual subscriber of the **COMMERCIAL AND FINANCIAL CHRONICLE.**

THE STATE AND CITY SUPPLEMENT will also be furnished *without extra charge* to every subscriber of the **CHRONICLE.**

THE STREET RAILWAY SUPPLEMENT will likewise be furnished *without extra charge* to every subscriber of the **CHRONICLE.**

THE QUOTATION SUPPLEMENT, issued monthly, will also be furnished *without extra charge* to every subscriber of the **CHRONICLE.**

TERMS for the **CHRONICLE** with the four Supplements above named are Ten Dollars within the United States and Twelve Dollars in Europe, which in both cases includes postage.

## Terms of Advertising—(Per inch space.)

One time.....	\$3 50	For Months (13 times)...	\$25 00
One Month (4 times)...	11 00	Six months (26 times)...	43 00
Two Months (8 times)...	18 00	Twelve Months (52 times)...	58 00

(The above terms for one month and onward are for standing cards.)

The purpose of this State and City Department is to furnish our subscribers with a weekly addition to and continuation of the **STATE AND CITY SUPPLEMENT.** In other words, with the new facts we shall give, the amplifications and corrections we shall publish, and the municipal laws we shall analyze in the "State and City Department," we expect to bring down weekly the information contained in the **STATE AND CITY SUPPLEMENT** to as near the current date as possible. Hence every Subscriber will at all times possess a complete and fresh cyclopædia of information respecting **Municipal Debts.**

**Bond Proposals and Negotiations.**—We have received through the week the following notices of bonds recently negotiated and bonds offered and to be offered for sale.

**Alabama.**—*Bonds Authorized.*—The State Legislature has authorized the Governor to refund the entire bonded debt of the State by issuing new fifty-year bonds.

**Albany County, N. Y.**—*Bond Sale.*—On February 16, 1897, the \$71,000 of war loan refunding bonds of this county were awarded as follows:

Albany Savings Bank.....	\$35,000	110 3/8
Albany Savings Bank.....	6,000	108 5/8
Albany Savings Bank.....	10,000	107 00
Albany County Savings Bank.....	10,000	104 48
National Savings Bank of Albany.....	10,000	101 81

The securities are registered and bear interest at the rate of 4 per cent, payable semi-annually. Thirty-six thousand dollars of the principal will mature from March 1, 1893, to March 1, 1915, inclusive, at the rate of \$2,000 annually, and the remainder on March 1, 1916.

The present bonded indebtedness of Albany County, not including this issue, is \$361,000, and the assessed valuation for 1896 was \$96,639,394 45.

**Allentown, Pa.**—*Bonds Proposed.*—It is reported that the city of Allentown proposes to issue \$350,000 of improvement bonds.

**Hartford, Vt.**—*Bond Sale.*—On February 13, 1897, the \$39,000 of 4 per cent refunding electric-light bonds of this village were awarded to E. H. Rollins & Sons, of Boston, at par, accrued interest and \$135 premium. The other bidders were: National Life Insurance Co., of Montpelier, Vt.; N. W. Harris & Co., of Boston, W. J. Hayes & Sons, of Boston, and James W. Longstreet & Co., of Boston. The securities are dated January 1, 1897, interest is payable semi-annually on the first days of January and July at the Hancock National Bank, of Boston, Mass., and the principal will mature January 1, 1927, the bonds being subject to call after 1907. The total debt of the village, including this issue, is \$55,000; assessed valuation, \$113,311, real valuation, \$826,622, and the population about 1,100.

**Bay City Union School District, Mich.**—*Bonds Authorized.*—The Board of Education of this district has decided to issue \$10,000 of school bonds. The securities are to be dated Feb. 15, 1897; interest at a rate not exceeding 5 per cent will be payable semi-annually on the 15th days of February and August at the City Treasurer's office, and the principal will mature at the rate of \$5,000 each year, beginning with Feb. 15, 1899. The bonds are to be of the denomination of \$5,000 and are part of an authorized issue of \$15,000.

**Beatrice, Neb.**—*Bond News.*—Action has been brought in the District Court asking for an injunction to prevent the holders of \$40,000 of refunding bonds of this city from collecting the principal and interest on the same as they become due. The securities were issued to retire an old series of paving and curbing bonds, and their legality is attacked at several points.

**Bentonville, Ark.**—*Bond Offering.*—Proposals will be received until 12 o'clock, noon, March 6, 1897, by Jas. M. Bohart, Chairman of the Water Works Improvement District Board, for the purchase of \$24,000 of bonds of Bentonville. The securities will bear 6 per cent interest and the principal will mature from 1898 to 1909, inclusive, at the rate of \$2,000 annually. The denomination of the bonds will be \$100.

**Calhoun County, Ala.**—*Bonds Authorized.*—The Alabama State Legislature has authorized this county to issue \$75,000 of bonds to pay off its indebtedness. The county commissioners have made no definite arrangements as yet for the sale of the securities.

**Camden, N. J.**—*Bond Offering.*—The Finance Committee has decided to ask for proposals for the purchase of \$400,000 of 4 per cent thirty-year water bonds until February 24, 1897. The securities will be dated June 1, 1896, and the interest will be payable semi-annually on the first days of June and December. Each proposal must be accompanied by a certified check of 5 per cent of the amount bid for. These bonds were awarded to E. C. Jones Co. at a private sale on February 9, their bid being 101 for \$200,000 and 103 for the remainder, providing the city is placed on the New York State Savings Fund list. Certain members of the committee thinking that better terms could be obtained at a public sale petitioned the Court to grant an injunction to prevent the sale of the bonds to E. C. Jones Co. at the above price and their request was granted.

**Charlottesville, Va.**—*Bond Election.*—It is reported that an election will be held in this city in May, 1897, to decide the question of issuing \$30,000 of water bonds. The securities, if authorized, will be coupon bonds; they will bear interest at the rate of 5 per cent, and the principal will mature in from ten to forty years from date of issue.

**Chelmsford, Mass.**—*Bond Sale.*—The \$12,000 of notes of this town were sold to E. H. Gay & Co. of Boston at par. The loan is in the form of one to ten year serial notes of \$1,200 each, and bears interest at the rate of 4 per cent.

**Cincinnati, Ohio.**—*Bond News.*—On account of the delay of the Citizens' National Bank of Cincinnati in taking the \$75,000 of 4 per cent school bonds which were recently awarded to them, the Board of Education has reconsidered their action in accepting their bid. It is probable that S. Kuhn & Sons, the next highest bidders, will purchase the bonds for \$78,975, the price they offered for them.

**Colbert County, Ala.**—*Bonds Proposed.*—A bill has been introduced in the State Legislature authorizing the citizens of the county to vote on March 15, 1897, on a proposition to issue \$100,000 of road improvement bonds.

**Craven County, N. C.**—*Bonds Proposed.*—This county will probably issue \$35,000 of bridge bonds.

**Easton, Pa.**—*Bonds Defeated.*—City Clerk James McCauly reports that the City Council has voted against the proposition to issue \$155,000 of paving bonds. The ordinance will therefore not come before the people at the election next Tuesday, as was expected.

**Elsinore, Cal.**—*Bonds Authorized.*—The citizens of this place have voted in favor of the proposition to issue \$20,000 of water-works bonds. The securities will be serial bonds of the denomination of \$500 and dated July 1, 1897. Interest at the rate of 6 per cent will be payable semi-annually on the first days of January and July at the office of the City Treasurer, and the principal will mature at the rate of \$500 yearly. Principal and interest will be payable in gold. A special assessment will be levied each year for the payment of the securities.

**Flagstaff, A. T.**—*Bonds Authorized.*—F. W. Smith, Town Clerk, reports to the **CHRONICLE** that the bill authorizing this town to issue \$65,000 of water-works bonds has been passed by the Senate, approved by the President and was endorsed by the people at a special election held on February 8. The securities will bear interest at the rate of 6 per cent, payable semi-annually, and the principal will mature in thirty years from date of issue.

**Franklin, Minn.**—*Bond Sale.*—It is reported that this municipality has sold \$4,000 of water bonds to Trowbridge & Co., of Chicago. The securities bear 6 per cent interest and mature in fifteen years from date of issue.

**Gallup, New Mexico.**—*Bonds Authorized.*—It is reported that the water-works bonds of this municipality to the amount of \$10,000 have been voted.

**Galveston County, Texas.**—*Bonds Proposed.*—It is expected that this county will issue \$250,000 of bonds, the proceeds of which will be applied to the construction of a new court house and an addition to the county jail.

**Glen Ridge, N. J.**—*Bonds Defeated.*—The citizens of this borough decided in 1895 to issue \$60,000 of bonds, the proceeds of which were to be applied to the improvement of roads. Action was brought in the Supreme Court by certain parties asking for an injunction to set aside the resolution calling for the sale of the bonds, and the request has been granted. The taxes which the borough raises annually are

only sufficient to meet the running expenses, and it was the intention of those who were desirous of issuing the bonds to thus provide better roads than could otherwise be obtained.

**Gloversville, N. Y.—Bond Sale.**—On February 17, 1897, the \$14,000 of local improvement bonds of this city were awarded to E. C. Jones Co. at par, accrued interest and \$141 premium. The securities are dated February 1, 1897; they bear interest at the rate of 4½ per cent, payable annually on February 1 at the Fourth National Bank of New York, and the principal will mature at the rate of \$2,800 yearly on February 1, from 1898 to 1902 inclusive. The denominations of the bonds are \$100, \$500 and \$1,000.

**Bonds Unsold.**—This city also offered for sale on February 17, 1897, \$37,000 of 3½ per cent refunding bonds, but no bids for the same were received.

**Holland City, Mich.—Bond Election.**—It is reported that an election will be held in Holland City to vote on the question of issuing water-works and sewer bonds to the amount of \$30,000.

**Holden, Mo.—Bond Offering.**—Electric-light bonds of this city to the amount of \$12,000 will be ready for sale about March 1, 1897. The securities will bear interest at the rate of 5 per cent and will mature in from five to twenty years from date of issue.

**Jeffersonville, Ind.—Bond Sale.**—Bonds of this city to the amount of \$128,000 have been awarded to Rodolph Kleybolte & Co. of Cincinnati. The securities bear interest at the rate of 5 per cent, and the principal will mature in 1923.

**Johnstown, N. Y.—Correction.**—The statement in last week's CHRONICLE that there was some doubt as to the legality of the \$5,000 of town bonds awarded to Walter Stanton & Co. was erroneous. The remark should have been applied to the \$17,000 of city bonds previously issued. Messrs. Stanton & Co. advise us as follows: "The \$5,000 of bonds referred to were issued by the town of Johnstown, N. Y., were found legal in every respect, and have been taken up and paid for. We are advised that on January 26 the city of Johnstown, N. Y., sold \$17,000 4 per cent bonds. Upon investigation it was discovered that the city charter did not authorize the issue, and that a bill is before the Legislature to remedy the defect."

**Juniata, Pa.—Bond Sale.**—It is reported that the borough of Juniata has awarded the \$11,000 of water bonds to Robinson Bros., of Pittsburg, at 100-60. The securities bear interest at the rate of 5 per cent, payable semi-annually, and the principal will mature in from fifteen to thirty years from date of issue.

**Lancaster, Pa.—Bonds Defeated.**—At the election held on February 16, 1897, the citizens of this municipality defeated the proposition to issue \$125,000 of water-works bonds.

**Lewes, Del.—Bonds Proposed.**—Dredging bonds of this town to the amount of \$30,000 are under consideration.

**Lincoln, Neb.—Bonds Illegal.**—Action was recently brought in the Supreme Court of this State to prevent the issuance of certain bonds of this city, because the same had been made payable in gold. The Court decided that the bonds were illegal on a technicality, but did not touch on the validity of bonds payable in gold.

**Marletta, Ohio.—Bond Offering.**—Proposals will be received until 12 o'clock noon, March 8, 1897, by Carl Becker, City Clerk, for the purchase of twenty 6 per cent bonds of \$940 35 each to be issued by this city. The securities are dated Feb. 1, 1897, interest will be payable semi-annually, and the principal will mature at the rate of \$940 35 every six months, beginning with Aug. 1, 1897. The bonds are to be issued for street improvements and no bid for less than par and accrued interest will be considered. The present bonded debt of the city amounts to \$811,895; sinking funds, \$20,042; net indebtedness, \$291,853. The assessed valuation (about 50 per cent of real value) is \$3,850,000 and the population for 1896 is estimated at 15,000.

**Masillon, Ohio.—Bond Sale.**—On Feb. 15, 1897, the \$8,000 of refunding bonds of this city were awarded to Dietz, Denison & Prior, of Cleveland, for \$8,307. There were fifteen other bids received.

**Montgomery, Ala.—Bond Sale.**—On February 15, 1897, the \$150,000 of paving bonds of this city were awarded to Sperry, Jones & Co. of Baltimore at 103¼. The City Council changed the rate of interest on the securities from 6 to 5 per cent. The principal will mature in thirty years from date of issue.

**Moultrie, Ga.—Bond Election.**—On March 9, 1897, the citizens of this place will vote upon the proposition to issue \$5,000 of 6 per cent twenty-year school bonds.

**Muskingum County, Ohio.—Bond Offering.**—Proposals will be received until 12 o'clock noon, March 1, 1897, by J. L. Starkey, County Auditor, for the purchase of \$25,000 of 5 per cent coupon bonds of this county. The securities will be dated March 1, 1897, interest will be payable semi-annually on the first days of March and September, at the County Treasurer's office at Zanesville, Ohio, or at the Nassau Bank of New York City, and the principal will mature March 1, 1919.

The bonds will be of the denomination of \$1,000, and are to be issued for the purpose of funding part of the floating debt of the county. No bid for less than par and accrued interest will be considered, and all proposals must be accom-

panied by a certified check for \$1,000, payable to the order of the Muskingum County Commissioners.

The total bonded debt of the county, including this issue, amounts to \$481,000; floating debt about \$10,000; total debt, \$491,000; sinking fund, \$25,000; net debt, \$466,000. The assessed valuation is \$23,233,139, and the real valuation is estimated at \$35,000,000. The population of the county is about 60,000.

**Newport, R. I.—Bond Sale.**—On Feb. 15, 1897, the \$40,000 of bonds of this city were awarded to the Savings Bank of Newport at 110-25 and \$50 premium. The other bids received were as follows:

Lee, Higginson & Co., Boston.....	110-331
Estabrook & Co., Boston.....	110-270
E. H. Rollins & Sons, Boston.....	110-159
E. C. Stanwood & Co., Boston.....	110-000
N. W. Harris & Co., Boston.....	109-590
Blodget, Merritt & Co., Boston.....	109-567
R. L. Day & Co., Boston.....	109-059
Providence Institution for Savings.....	109-050
James W. Longstreet & Co., Boston.....	109-039
Dietz, Denison & Prior, Boston.....	108-399
W. J. Hayes & Sons, Boston.....	108-330
Blake Bros. & Co., Boston.....	108-300
Farson, Leach & Co., New York.....	108-020
Abram White, New York.....	106-100

The securities are dated Feb. 15, 1897, interest at the rate of 4 per cent is payable semi-annually in gold, and the principal will mature Feb. 15, 1927. The bonds are of the denomination of \$1,000 and were issued to provide funds for the building of the new Harbor Park. The bonded debt of the city, including this issue, amounts to \$551,000.

**New York.—Bond News.**—The bill to exempt canal improvement bonds of this State from taxation will come up before the State Legislature for final passage on February 24, 1897.

**New York, N. Y.—Bonds Proposed.**—A bill has been introduced in the State Legislature authorizing this city to issue \$2,500,000 of bonds, the proceeds of which are to be applied to the construction of a library building which will contain the Lenox, Tilden and Astor libraries.

**Pierce County, Wis.—Bond Issue.**—It is reported that Pierce County will issue \$75,000 of refunding bonds. The securities are to bear interest at the rate of 5 per cent and mature in twenty years from date of issue.

**Pueblo, Col.—Bond Election.**—It is reported that a proposition to issue \$70,000 of park bonds will be submitted to a vote of the people of this city.

**Quincy, Ill.—Bond Offering.**—Proposals will be received until two o'clock P. M., March 31, 1897, by L. J. Harris, City Comptroller, for the purchase of \$314,000 of 4½ per cent bonds of this city. The securities will be dated July 1, 1897, interest will be payable annually on July 1 at the office of the State Treasurer in Springfield, Ill., or at his fiscal agency in the City of New York; \$300,000 of the bonds will mature at the rate of \$50,000 per annum from July 1, 1911, to July 1, 1916, inclusive, and the remainder, \$14,000, will be due July 1, 1917.

The bonds are to be issued to refund \$314,000 of the \$372,800 of 6 per cent bonds of the city maturing July 1, 1897, the remainder of the loan to be paid off. All bids must be accompanied by a certified check payable to the city or by a good and sufficient bond for 5 per cent of the amount of bonds bid for. The sum of \$50,000 is paid annually towards a sinking fund to retire the outstanding bonds of the city, and the total indebtedness now amounts to \$1,344,230, having been reduced \$578,431 since 1831. The assessment of taxable property in 1896 was \$5,153,242, and the actual value about \$35,000,000. The population of the city in 1890 was 31,494 and is now estimated at 45,000.

**Santa Cruz, Cal.—Bond News.**—Charles E. Williams, City Treasurer, reports to the CHRONICLE that this city is now in litigation over its refunding bonds, which it refuses to pay, claiming error in issue, fraud, and various other points. The case will come up for trial in April.

**Stamford, Conn.—Bond Sale.**—On February 15, 1897, the \$75,000 of funding bonds of this town were awarded to the New York Security & Trust Co. at 107-143 and accrued interest.

The other bids received were as follows:

N. W. Harris & Co.....	107-129
E. H. Gay & Co.....	107-070
E. H. Rollins & Sons.....	106-779
Dietz, Denison & Prior.....	108-7228
George A. Fernald & Co.....	106-164
W. J. Hayes & Son.....	105-870
W. U. Warren & Co.....	105-170
E. C. Jones Co.....	105-150
Norwich Savings Society.....	104-660
R. L. Day & Co.....	104-587
New Milford Savings Bank (\$10,000).....	104-480
E. B. Sheppard & Co.....	104-250
Farson, Leach & Co.....	104-125
Blodget, Merritt, & Co.....	104-037
Stamford Savings Bank (\$10,000).....	104-000
Blake Bros. & Co.....	102-570
Columbia Trust Co., Middletown (\$25,000).....	102-300
James W. Longstreet & Co.....	100-039
Cushman, Fisher & Phelps.....	\$79,447 56
Street, Wykes & Co.....	\$3,333 premium

The securities are dated February 1, 1897. Interest at the rate of 4 per cent is payable semi-annually on February 1 and August 1 at the office of the Town Treasurer and the principal will mature February 1, 1927.

The denomination of the bonds is \$1,000 and both principal and interest are payable in gold.

The total indebtedness of the town on January 14, 1897, was \$403,360 and the sinking funds amounted to \$32,665. The latest assessed valuation was \$10,067,290, which is about 50 per cent of the actual value of property taxed; the town owns real property to the value of \$400,000. The present population is estimated at 20,000.

**Sammerville, Ga.—Bond Election.**—The citizens of this city will vote on March 1, 1897, on a proposition to issue \$50,000 of water-works bonds.

**Syracuse, N. Y.—Bonds Defeated.**—M. Z. Haven, city clerk, reports to the CHRONICLE that the Common Council at its last meeting passed a resolution against the proposition to issue \$210,000 of high-school bonds.

**Tiffin, Ohio.—Bond Sale.**—Extension bonds of this city to the amount of \$19,500 have been awarded to C. S. Bretz, a local bidder, at a premium of \$1,224. The securities bear interest at the rate of 6 per cent, and the principal will mature in ten years from date of issue.

**Toledo, Ohio.—Bond Offering.**—Proposals will be received until 7:30 o'clock P. M., March 8, 1897, by H. W. Compton, Clerk of the Board of Education, for the purchase of \$90,000 of 4 per cent school bonds of this city. The securities will be dated March 8, 1897; interest will be payable semi-annually at the Importers & Traders' National Bank of New York City, and the principal will mature thirty-two years from date of issue. No bid for less than par and accrued interest will be received, and all proposals must be accompanied by a certified check or an amount of money equal to 5 per cent of the amount bid for. The bonds will be of the denomination of \$1,000, and are to be issued to provide funds for the improvement of public school property.

**Tremont, Pa.—Bonds Defeated.**—The citizens of this borough have defeated the proposition to issue bonds for the purchase of an electric-light plant.

**Unionville Fire District, Conn.—Bonds Proposed.**—It is reported that this district proposes to issue sewer bonds to the amount of \$20,000. The loan, if authorized, will bear interest at a rate not exceeding 5 per cent, and mature in not more than twenty years from date of issue.

**Ulster County, N. Y.—Bond Sale.**—On February 16, 1897, the \$75,000 of 4 per cent refunding bonds of this county were awarded to the Ulster County Savings Institution at 108<sup>46</sup>/<sub>100</sub>. The securities are dated March 1, 1897; interest is payable semi-annually on the first days of March and September and the principal will mature at the rate of \$3,000 yearly from March 1, 1898, to March 1, 1923, inclusive. The denomination of the securities is \$1,000, and they are exempt from all taxation.

**Upper Sandusky, Ohio.—Bond Offering.**—Proposals will be received until 12 o'clock noon March 8, 1897, by A. F. Leser, Village Clerk, for the purchase of \$7,000 of 6 per cent bonds of this village. The securities will be dated April 1, 1897, interest will be payable semi-annually and the principal will mature April 1, 1905, both principal and interest being payable at the Ninth National Bank of New York City. The bonds will be of the denomination of \$1,000 and are to be issued for the purpose of refunding certain loans maturing April 1, 1897. No bid for less than par and accrued interest will be considered.

**Valentine, Neb.—Bonds Proposed.**—It is reported that this city proposes to issue bonds to the amount of \$10,000 for the erection of a new school-house.

**Wellsburg, W. Va.—Bond Call.**—Notice has been given that bonds of this town dated November 21, 1885, and numbered from 29 to 35 inclusive, each amounting to \$500, have been called for payment, and will be redeemed upon presentation at the bank of Wellsburg. The securities will cease to bear interest after February 20, 1897.

**White Plains, N. Y.—Bond Sale.**—Farson, Leach & Co. have been awarded \$47,000 of bonds of this town at 103<sup>27</sup>/<sub>100</sub>.

**Wilkesburg, Pa.—Bond Sale.**—On February 2, 1897, street improvement bonds of this city to the amount of \$60,000 were sold at 103<sup>15</sup>/<sub>100</sub>. The securities bear interest at the rate of 4<sup>1</sup>/<sub>2</sub> per cent, and the principal will mature in twenty years from date of issue.

**York, Pa.—Bond Sale.**—It is reported that this city has awarded \$40,000 of coupon bonds to Townsend, Scott & Son at 102<sup>075</sup>/<sub>100</sub>. The securities bear interest at the rate of 6 per cent, and the principal will mature in from ten to twenty years from date of issue.

ST. LOUIS COUNTY BONDS			
ASSUMED.			
PARK PURPOSES—			
6s, g. A&O, \$1,900,000g.	Apr. 1, 1905		

**GOLD BONDS.**—All the city's bonds are payable, principal and interest, in gold, except the \$245,000 6s issued for purchase of Block 121.

**INTEREST** on all bonds is payable in New York City—on the Tower Grove Park 6s, and on the Purchase of Block 121 6s, at the National

Bank of the Republic; on the Park bonds at the National Bank of Commerce. Interest on all other bonds is payable at the National Bank of Commerce, N. Y., or at the office of J. S. Morgan & Co., London, at the option of the holder; on the bonds payable in £ sterling at the National Bank of Scotland (Limited), London, or in United States gold dollars at the rate of \$4.8665 for the pound sterling at the National Bank of Commerce, New York, at the option of the holder.

**TOTAL DEBT, SINKING FUNDS, ETC.**—The subjoined statement shows St. Louis's total municipal debt and the water debt, included in the total, on the dates indicated.

	1897. Feb. 1.	1896. April 13.	1893. April 10.
Total bonded debt.....	\$20,352,278	\$20,647,711	\$21,376,021
Water, debt included.....	5,808,000	5,808,000	5,808,000

Under the charter the Municipal Assembly must appropriate \$1,200,000 annually, with which to pay debt and the interest thereon. That portion of each annual appropriation not required for the payment of the interest constitutes the sinking fund for redemption of the debt existing April 7, 1890, and bonds issued in renewal thereof. On the basis of renewing the city's bonded debt at 4 per cent, the debt for which this sinking fund was established will be extinguished in 1927. The sinking funding on April 13, 1896, amounted to \$84,598.

**CITY PROPERTY.**—The city owns its water works, the revenue from which for water rates, permits, etc., for the fiscal year 1895-96 was \$1,312,378 and operating expenses and cost of collecting water rates were \$473,250. For the year 1892-93 the revenue was \$1,235,933; net operating expenses and costs of collecting water rates, \$416,824. For 1893-94 the corresponding amounts were \$1,251,301 71 and \$441,924 24, and for 1894-95, \$1,266,513 05 and \$493,647 68. In addition to the water works the city owns its hospitals, insane asylums and poor house, city hall, court house, jail, house of correction and work house, engine houses, markets, police stations, parks, etc.

**ASSESSED VALUATION.**—The city's assessed valuation (about 3-5 cash value) and tax rate have been as follows in the years named:

Years.	Real Estate and Personal Property.	City tax per \$1,000—		Bonded Debt, in April.
		New Limit.	Old Limit.	
1896.....	\$341,087,650	\$10 00	\$13 80	\$20,647,711
1895.....	324,375,000	10 00	13 80	21,024,711
1894.....	310,341,850	10 00	13 80	21,196,711

**POPULATION.**—In 1890 population was 451,770; in 1880 it was 350,518; in 1870 it was 310,864.

### THE FINANCIAL SITUATION.

Beyond question general business is improving. We have this week more decided indications of the progress made. Yet it is true that one can easily draw too broad a conclusion from the more manifest evidences. Buyers for instance are seen to have increased in number in all our markets, but their purchases still show great conservatism, supplying only immediate wants. Current production in the dry goods trade is believed to be fully absorbed now, but the old accumulations have not been drawn down much yet. Probably the best trade outlook and by far the most promising conditions prevail in the iron industry. Prices of steel and iron in all their forms are now so low that they could hardly be expected to go lower, while the demand for export of rails, billets and pig helps the home market. The "Iron Age" says that the hopeful feeling in the iron trade is spreading, and in those departments which are close to the raw material moderate advances are being recorded. It adds that the total tonnage placed thus far must be heavy when it is considered "that very large orders were booked during the halcyon days of the billet pool, and that now this has been swelled by the volume of business done in track material". The activity in iron and steel must soon extend to their allied industries, and then there is good reason to expect a material improvement in the earnings of our oppressed railroads.

It is really too bad that the Cuban agitators in our Senate at Washington got themselves into such a very bad hole this week; too bad we mean for themselves but not for the public. The New York "Herald" of February 26 (under date of Washington, February 25,) lets the cat out of the bag. It states that when the resolution for the pardon of Julio Sanguilly "was prepared by the Committee on Foreign Relations it was fully understood that the Spanish Government had determined on this course" [a pardon] "and that the granting of the pardon was probably a matter of but a few days." In other words, the fury into which the honorable Senators lashed themselves must in the first place have been wholly put on because they knew Spain had already determined to grant the pardon they demanded, and in the second place it showed a total lack of feeling for Sanguilly because they knew that abuse of Spain at that moment could not but endanger his speedy release. The "Herald's" account goes on to say that the resolution was prepared and pushed in the face of these facts because the question of damages might possibly be embarrassed if Sanguilly was pardoned rather than released by the Government. That is to say, these Senators would rather run the risk of the man's longer imprisonment and death even than to risk a few dollars, more or less. Would not the natural impulse of every true sympathizer be, get the man out of his horrible dungeon as quickly as possible and after that the Government will be fully able to take care of the question of damages.

There is in this city and elsewhere in the country warm and deep sympathy for the imprisoned Americans in Cuba and for those who are struggling for freedom there and everywhere. But that body of our fellow citizens has nothing in common with these agitators in the Senate, the quality of whose feelings is so well illustrated by the little incident of this week. All through the session they have conducted themselves as if they were alone intent on disturbing confidence

and the business of the country and had little care for the true interests of Americans or Cubans. Fortunately the Fourth of March will bring to a close the power of that body as now constituted, and the belief is that the coming Senate will be a little more conservative. There is hope in that fact. Even so, it is to be regretted that an extra session of Congress must be held. Business interests cannot be free to expand so long as it lasts. At the same time it should be remembered, as we have said on previous occasions, the progress of legislation where the tariff changes are upward ought not to produce depression. Buying goods when prices are likely to rise is a very different matter from buying them when they are likely to decline.

Foreign exchange continues firm, with the inclination to advance rather than decline. This is so unusual a condition in face of our large trade balance that we have made special inquiry with reference to the cause. It has all along been known that the firmness was in part due to speculation in exchange, that is, buying long exchange for investment. But the trade balance has run up to such full figures that this explanation cannot account for it wholly. These purchases since the buying began, toward the middle of November, have not been as large as some have estimated them. Our bankers regard it as doubtful if the maximum running at any time has exceeded £10,000,000. The bills are what are known as single name bills, not having the acceptance of the banker upon whom they are drawn, and it is believed to be improbable that the bankers who have been drawing these bills could find a market for any greater amount than the total named. There has been another demand for bills and we have reason to suppose it has exceeded our previous estimates; we refer to a demand for remittance on account of the sale here of securities on European account; these have recently been comparatively free. The enlarged movement it is said has been due to the attacks on capital which so many of our State legislatures have engaged in the past winter. An especially harmful influence has been the Trust Investigating Committee in session in this city. It has been given far greater importance than it merits. Besides these influences, inducing foreigners to part with their securities, the movement to sell out has been favored by the high prices the best class of railroad bonds have commanded in New York and the good market there has been here for them at those prices.

The trust investigation by the Joint Legislative Committee of the State Legislature reached the climax of absurdity this week when the committee undertook to explore the "Anthracite Coal Trust," the object in this case of course being the same as in the others, namely to show that the "trust" was compelling consumers to pay exorbitant prices for its product and thus making enormous profits for itself. There is something closely bordering on the ludicrous in the suggestion that the coal roads are experiencing great prosperity, and we imagine that the coal "barons" when they received their subpoenas must have found it difficult to restrain their mirth at the thought that they were to be subjected to the terrors of a legislative inquisition for their part in bringing about this prosperity. The idea of large profits in connection with the coal business at the present time could have originated only in the fertile brain of a legislator. Only a legislator, too, could have been so completely oblivious of the developments going on all around, which show that adversity, not prosperity, is the

ailment that is afflicting these properties. Not one among the managers of the coal roads but wishes that the reverse were true and that there was some slight and tangible basis for the reports of large profits. His pathway through life in that case would be rendered much easier. He would willingly face the displeasure of the legislator if only he could show the security holders a balance sheet with the balance on the right side of the account.

From their examination of the coal magnates the Legislative Committee learned that in January of last year some sort of tacit understanding was reached among the coal interests for restricting the coal output with the view to seeing if better prices could not be obtained as a consequence. They also learned that the practical result of this agreement or understanding thus far has been nil. That of course to the public at large was no new fact, but it is well that the wise men from Albany should have had it brought to their notice. The newspaper reports say that throughout the proceedings the Chairman of the Committee displayed a listless air. He might certainly with advantage have inserted the legislative probe while he was about it a little deeper. If he had he would have discovered that the Reading, one of the members of the "coal trust," has only just emerged from the tender care of receivers and that its junior securities, even after the payment of heavy assessments, find few takers; that the stock of the Lehigh Valley road, which for thirty-five years had continuously earned a return for its holders, has now passed off the dividend list and become a speculative football; that the Delaware & Hudson, one of the staunchest of the anthracite roads, has recently had to reduce its dividends, and that the Delaware Lackawanna & Western, another prime investment property, is only able to keep up its old rate of distribution by drawing on accumulated surplus. He would also have learned that every one of the coal companies is groaning under the large stocks of unsold coal which they are carrying, that the money tied up in this way is seriously crippling their resources, and that as to prices all pretense of observing the schedules has been abandoned. All this, however, would hardly have been to the liking of the Committee. That is not the kind of facts they want. The truth is, the whole investigation has been little better than a farce, and there was never any legitimate basis for it. There is consolation, however, in the thought that the affair will not have been entirely without good if it serves to reveal how silly and nonsensical all the talk about the oppressions of trade combinations has been.

Returns of railroad earnings for current weeks are beginning to make somewhat better comparisons. In no week of January did the aggregate in our weekly summaries show an increase. For February thus far there has been an increase each week, though the gains of course have been moderate. Some of the returns of net earnings for January, which are now coming in, also contain encouraging features, the losses being smaller than for the months immediately preceding. The principal feature disclosed, however, by these January statements is the disposition to economize in the expense accounts, leading in a number of cases to improved net on diminished gross. The Southern Railway with \$78,106 decrease in gross has \$28,236 increase in net;

the Northern Central with only \$14,677 increase in gross has \$45,451 increase in net; the Allegheny Valley with \$11,319 decrease in gross has \$8,136 increase in net; the Pittsburg Youngstown & Ashtabula with \$10,489 decrease in gross has \$6,738 increase in net, and the Philadelphia Reading & New England with \$8,571 decrease in gross has \$8,282 increase in net. The following furnishes a four-year comparison for a number of roads which have this week submitted returns for January.

The Pennsylvania Railroad statement for January was also issued late yesterday afternoon. It shows a very decided improvement as compared with the months immediately preceding, there being only \$238,100 loss in gross on the lines directly operated east of Pittsburg and Erie, with \$82,400 increase in the net; while on the lines west of Pittsburg there is \$374,900 decrease in gross with \$5,100 increase in net. In other words, on the combined system there is \$613,000 decrease in gross and \$87,500 increase in net. The loss in the gross is the smallest of any month since last July, while there has been no increase previously in the net since June. The result is the more noteworthy as there had been gains in January both last year and the year before. Below is a six-year comparison.

LINES EAST OF PITTS. & ERIE.	1897.	1896.	1895.	1894.	1893.	1892.
January.	\$	\$	\$	\$	\$	\$

Operating expenses	3,699,474	3,949,974	3,696,874	3,515,323	4,422,940	3,945,189
Net earnings....	1,126,137	1,043,797	981,397	614,506	500,306	1,074,552

It is stated that there has been about \$500,000 gold turned into the Sub-Treasury this week for which legal tenders have been exchanged. Much of this gold, as was the case last week, has come from San Francisco to the banks and by them has been sent to the Sub-Treasury. The reason for the recent large movement of gold from San Francisco is said to be that considerable amounts of the metal (about \$9,000,000) were received at that point during September, October, November and December from Australia and New South Wales for the account of bankers at the East. It has been held there until recently, when it was sent hither, partly to avoid State taxation. In some cases legal tenders have been shipped to New York; indeed it is stated that in one case gold was turned over to the San Francisco Sub-Treasury and somewhat mutilated silver certificates taken in exchange, which certificates were sent here because of the large express charges on gold. The net gold in the Treasury, officially reported from Washington on Friday of last week, was \$147,281,113. The amount so reported yesterday, Friday, was \$148,318,532.

Money on call representing bankers' balances has loaned generally at  $1\frac{1}{2}$  and at  $1\frac{3}{4}$  per cent at the Stock Exchange this week, with some few and small transactions at 2, and it is thought that fully 75 per cent of the loans were at  $1\frac{1}{2}$  per cent, making the average about  $1\frac{1}{2}$  per cent. Banks still seek to maintain 2 per cent as the minimum, but a few loan at the current Stock Exchange rates, and the trust companies also loan at these figures. The demand for time contracts for periods beyond four months is good and business is increasing. Some loans have been made at 2 per cent on sterling collateral, but rates on good mixed Stock Exchange security are 2 per cent for thirty to sixty days,  $2\frac{1}{2}$  per cent for ninety days and 3 per cent for four to six months. Some brokers quote  $3\frac{1}{2}$  per cent for seven to nine and 4 per cent for twelve months. There is a moderate demand for commercial paper and some very good names are offering. It is reported that six months' choice single names have been sold at 3 per cent. Quotations are 3 per cent for sixty to ninety day endorsed bills receivable;  $3\frac{1}{2}$  @ 4 per cent for first class and 4 @ 5 for good four to six months single names. The tone of the market is firm and the indications point to higher rates.

The strained condition of affairs in Crete has had more or less influence upon the European security markets this week, but comparatively little effect upon discount rates. The Bank of England minimum rate of discount remains unchanged at 3 per cent. The Bank of Germany has reduced its rate from 4 to  $3\frac{1}{2}$  per cent. The cable reports sixty to ninety day bank bills in London  $1\frac{1}{2}$  per cent, against  $2\frac{1}{2}$  per cent early in the week. The open market rate at Paris is  $1\frac{1}{2}$  per cent and at Berlin and Frankfort it is  $2\frac{1}{2}$  per cent. According to our special cable from London the Bank of England gained £545,874 bullion during the week and held £39,029,270 at the close of the week. Our correspondent further advises us that the gain was due to the receipts of £400,000 net from the interior of Great Britain and imports of £146,000, of which £139,000 were from Australia and £7,000 were from Portugal.

The foreign exchange market has been dull but generally firm this week. Some run-off bills have been exchanged for long sterling, others have been exchanged for short and canceled, and there have been some new investments in long sterling. Bankers also note a good demand to remit for securities sold for European account. The offerings have been chiefly confined to grain bills and to options on maturing exchange deliverable within the next ten days. The range for nominal rates on Tuesday, Monday being a holiday, was unchanged compared with the close of Friday of last week at  $4\ 85\frac{1}{2}$  @  $4\ 86$  for sixty-day and  $4\ 87\frac{1}{2}$  @  $4\ 88$  for sight, and there was no change in the range during the week, though on Thursday Brown Bros. & Co. and Heidelbach, Ickelheimer & Co. advanced the long rate to  $4\ 86$ , while the Bank of British North America on the same day and the Bank of Montreal yesterday moved both long and short upward half a cent. Rates for actual business were entirely unchanged throughout the week, remaining at  $4\ 85$  @  $4\ 85\frac{1}{2}$  for long,  $4\ 87$  @  $4\ 87\frac{1}{2}$  for short and  $4\ 87\frac{1}{2}$  @  $4\ 87\frac{1}{2}$  for cable transfers. Bankers quoted the market strong on Thursday and steady on Friday, with a good demand to remit by Saturday's steamer. The following shows the daily posted rates for exchange by some of the leading drawers.

#### CRETE AND GREECE VS. EUROPE.

Of course it is impossible for an outsider to know the motives and incentives controlling the action of European diplomatists. We are always inclined to give to crowned and uncrowned heads of governments, and to their representatives, the benefit of any doubt which exists with reference to their unexplained acts. Yet in some measure they invite and are amenable to the same kind of criticism that private individuals have meted out to them. Within certain limits the public is justified in judging diplomatists by their works, and that, too, even when they claim the peace of Europe is at stake. We cannot say that peace at any price may not at times be too dear a purchase.

What are the known facts to-day with regard to this latest European question? We see a little State, the smallest kingdom on the map of Europe, exciting the hostile action against it of a confederation including every large Power in Europe. What does that situation suggest? Such perfect accord among so many leading Powers against another nation we might almost say has never been known before. One would think Greece must have shocked the civilized world in a most outrageous manner to have forced such unanimity. The situation almost forbids any deduction except one that makes the movement a matter of conscience—a spontaneous uprising in presence of and to

put down a great moral wrong. On examination it is found not to be that at all. Oh, no, say the diplomats, worse than that; this grand combination and hostile work of fleets and forces is because the action of Greece and Crete, though all right in itself, threatens the peace of Europe. In other words, affairs have reached such a pass that the Powers in this combination, made up of the same parties that will be the principals in a general European war if there is to be one, cannot be stopped short of actually going to work killing and destroying one another unless they turn their guns on poor little Greece. Settling the existing differences between themselves, and so securing a permanent peace, is not favored by this combination; or at least the necessary assumption is, that course is less easy than for these Powers to keep vast navies and standing armies, employing them to intimidate and injure little States that seek to consummate a natural union, like Crete and Greece, but not daring to use them against Turkey, although cruelty, violence and butchery may be going on there the like of which has not been seen for many generations.

Crete, as we all know, is a Province of Turkey, and consequently under the rule of Turkish officials. At the same time its population, its customs and its religion have nothing in common with the country under whose control Europe forces it to be; its inhabitants are mainly of Greek descent and desire union with Greece, a union they have been promised and have long and eagerly looked forward to. Naturally enough, too, this desire has recently become almost a frenzy under the fear which the terrible slaughter of the Armenians and Christians by the Sultan's officers during the past two years has inspired. It is not difficult to imagine the situation these conditions impose. But there is another fact foreboding greater possibilities of evil than all these, and which in our opinion makes the act of Europe towards Greece and Crete a crime. What we refer to we have already mentioned; it is that the European Powers making up this combination have not only failed in their effort to stop this slaughter by Turkey of helpless men, women and children, but they have confessed to the world that they are unable to do it and have substantially protected Turkey in its bloody work by refusing to allow any other Government to undertake what they cannot do.

But the Powers tell us that Greece and Crete could not stand against Turkey, and since the intervention of Greece in Crete has resulted in anarchy in the island they are merely seeking to restore order; after this has been accomplished autonomy will be granted to Crete under a Greek Prince, the island being only in some slight way under the control of Turkey. Facts do not support these statements. So far as the evidence is available it was the interference of the Powers and the bombardment of Canea that induced anarchy so far as it exists. There is no proof at all that there would have been any considerable opposition in Crete to carrying out the plan of union if the Powers had not encouraged it by their presence and by their acts. Then, too, the promise of autonomy, etc., is not what is wanted or needed for the good of the island. Crete is too small a territory to be burdened with a separate Government. Besides the restrictions on the grant of autonomy have not been stated; it is enough to justify its unconditional rejection to know in advance that Turkey, the Great Octopus of the East, which used to be called the European devil fish, would have its

tentacles in the new kingdom's body still; and as it has been proved that no one in the combination has the courage to fire a gun at Turkey, Christians in Crete under the new arrangement could feel no security. Finally, there is no good reason why the idea of union should not be carried out. It would be of material benefit both to Greece and Crete, and it is the desire of both.

As to whether Greece and Crete would be able to withstand Turkey's attack, it will be time to meet that question when it arises. This, at least, can be said: it is in the interest of civilization that the Government of Greece should be strengthened by the addition of Crete and of Macedonia, too, and that Turkey should be made to feel that it cannot kill helpless men and women in mass without losing the sympathy of the world and being shorn of its power to do evil by the disintegration of its territory. The loss of a few provinces may prove to be of benefit even to Turkey by enabling it to realize that it must change its practices and reconstruct its methods of government throughout if it wants to retain a position among the nations of the world. As to Greece, no doubt friends will be found to help it in its extremity if such a contingency should arise.

The world is not going to move backwards even at the bid of the armies and navies of Europe. Little cases of friction will occur which may cause a hitch now and then in the onward progress, such as the affair in Turkey appeared to be. They can be only a temporary hindrance. The combination of the leading Powers of Europe, if the Turkey incident and the Greece incident are to be samples of their work in the future, can delay but for a brief time the forward movement; affairs will in some way break from their control and the movement go forward in spite of them.

#### THE ANTI-TRUST DECISION IN TEXAS.

It seems singularly appropriate at the present time when a legislative committee of our own State is still engaged in the questionable practice of harassing trade combinations, that a decision should be reported from one of the courts of the United States which must go far towards rendering impotent legislation which aims to bring under the ban of the law perfectly legitimate enterprises of that description. We say must go far towards that end because there were exceptional features in the Anti-Trust law of Texas, now declared unconstitutional, which place that statute in a class by itself, and the trained legal mind, therefore, will be careful not to give the decision a broader import and construction than it really warrants, or seek to apply it in cases where the circumstances and conditions are not similar. It is true that some other States have enacted laws which do not differ greatly from the Texas statute—the Georgia law is almost an exact copy of it—but it is equally true that in still other instances the legislative prohibition has taken a much narrower scope, and in these cases the measures, if equally powerless to reach the practices aimed at, may at least escape judicial condemnation. In any event, however, the Texas decision will have a wholesome effect in clarifying views and in teaching that public frenzy, incited by demagogic appeals, is neither a sound basis for nor a safe guide to legislation.

To speak truthfully, the Texas Anti-Trust law was one of the worst legislative enactments that have ever

been entered upon the statute books of a modern State. It was at once a monstrosity and an absurdity. It was not only the product of perverted but of immature minds. It was passed in great haste, without consideration or reflection. It contained not merely unusual but extraordinary provisions—provisions which besides doing violence to the moral sense would make impossible (could they be enforced) ordinary mercantile business as it is carried on to day. It was conceived in an utterly wanton and a wholly reckless spirit, and it afforded an exhibition of rank selfishness and sectional discrimination seldom seen even in these times—exempting certain persons and industries from the operation of the law, so that in effect it would apply only to outside enterprises and not to those in which the State's own citizens were engaged. It was withal drawn in such a clumsy manner and was so full of crudities that it stands as a monument to the folly and ignorance of its author. In a word the legislator in this effort overreached himself and blundered so fatuously that it was plain from the first that the law when subjected to judicial dissection would fall of its own weight.

That this is not too sweeping a characterization will appear from a very brief examination of the law. Nor did the Texas people themselves of the better class fail to see its absurdity and untenable character. The Galveston "News" at the time pointed out as one illustration of its workings that under it one would not have to pay a cent for anything he bought of merchants if he could show that any two of them had agreed to mark their goods up or down. "One's agreement to pay in such a case is not enforceable 'either in law or equity.' The fact that one buys the goods eagerly at a fair and satisfactory price has nothing to do with the case. The agreement to pay for them is 'absolutely void' according to Chapter 83 of the general laws of the Twenty-fourth Legislature".

The Act was passed at the 1895 session of the Legislature, being approved April 30 of that year. It was called an act to define trusts, etc., and it was an amendment of an act approved March 30, 1889. It defined a trust as "a combination of capital, skill or acts by two or more persons, firms, corporations or associations of persons, or either two or more of them", and it made it illegal and criminal for such a combination, "(1) To create or carry out restrictions in trade or commerce, or aids to commerce". "(2) To increase or reduce the price of merchandise, produce or commodities. (3) To prevent competition in manufacture, making, transportation, sale or purchase of merchandise, produce or commodities, or to prevent competition in aids to commerce. (4) To fix at any standard or figure, whereby its price to the public shall be in any manner controlled or established, any article or commodity of merchandise, produce or commerce intended for sale, use or consumption" in the State. "(5) To make or enter into or execute or carry out any contract, obligation or agreement of any kind or description by which they shall bind or have bound themselves not to sell, dispose of or transport any article or commodity, or article of trade, use, merchandise, commerce or consumption below a common standard figure, or by which they shall agree in any manner to keep the price of such article, commodity or transportation at a fixed or graded figure, or by which they shall in any manner establish or settle the price of any article or commodity or transportation between them or themselves and others to preclude a

free and unrestricted competition among themselves or others in the sale or transportation of any such article or commodity, or by which they shall agree to pool combine or unite any interest they may have in connection with the sale or transportation of any such article or commodity that its price might in any manner be affected".

We have quoted these parts of the law in full to show how broad and unqualified its provisions are in these respects—so much so that under the language used it would be illegal for the partners of a firm to agree among themselves as to the prices at which they would sell their wares. Domestic corporations were to forfeit their charters and franchises for violations of the provisions of the Act; foreign corporations were to be denied the right of doing business in the State. The penalties of the Act were to extend to any one "who shall as principal, manager, director, agent, servant or employe, or in any other capacity knowingly carry out any of the stipulations, purposes, prices, rates, directions, conditions or orders of such combinations." For offending against the statute in this way the punishment was to be "by fine of not less than \$50 nor more than \$5,000, and by imprisonment in the penitentiary not less than one nor more than ten years, or by either such fine or imprisonment." It was made the duty of the "Attorney General or district or county attorney, or either of them, upon his own motion and without leave or order of any court or judge, to institute suit or quo warranto proceedings"; and it was declared that in an indictment under the Act it was "sufficient to state the effects or purposes of the trust or combination and that the accused was a member of, acted with or in pursuance of it, without giving its name or description, or how, when or where it was created". Furthermore, the character of the trust or combination might be established "by proof of its general reputation as such". Any contract or agreement in violation of the Act was to be "absolutely void and not enforceable either in law or equity".

But after thus devising this stringent body of restrictions, a little proviso was inserted in the twelfth section to the effect that "this act shall not be held to apply to live stock and agricultural products in the hands of the producer or raiser, nor shall it be understood or construed to prevent the organization of laborers for the purpose of maintaining any standard of wages". In other words, the law was not to apply to the pursuits of the citizens of Texas. In the final section (Section 16) it was declared that such urgency existed for the passage of the measure that the Constitutional rule which requires that all bills shall be read on three several days must be suspended.

What followed the enactment of this remarkable statute is well known. The machinery of the law was at once set in motion to catch offenders outside the State, demands being made in several instances upon the executives of the States where the accused persons were residing or abiding to extradite them. The present decision was reached in the case of William Grice, who was indicted by the Grand Jury of McLennan County as the agent of John D. Rockefeller and other Standard Oil people. In the course of the litigation the case was appealed to the United States Court on a writ of habeas corpus for the release of Grice. On this appeal the case came before Judge Charles Swayne, District Judge of the Northern District of Florida,

sitting by special designation in the Northern District of Texas. The act was attacked on the ground of its unconstitutionality, and this plea Judge Swayne has now sustained. Judge George Clark, of Waco, and Judge J. D. Johnson, of St. Louis, appeared for the Standard Oil Company, and the brief prepared by them and the company's solicitor in this city, Mr. S. O. T. Dodd, was a paper of uncommon ability. Judge Swayne, in his opinion, follows very closely the language of this brief.

Judge Swayne says that the two vital questions involved in the case are: (1) Can the State of Texas prohibit all contracts, of whatever character or nature, among its citizens when they tend to contravene the intended prohibition of the Act, and (2) if it can do so, is it class legislation to exempt 80 per cent of the whole population from the pains and penalties of the Act when dealing with the agricultural products or live stock in the hands of the producer or raiser? In regard to the first proposition it was contended that the act violated the Fourteenth Amendment to the Constitution of the United States, because it denies to citizens of the United States the right to make valid contracts with respect to their business and property. On that point the opinion quotes approvingly from the argument of counsel for the accused, saying that one of the most sacred rights of liberty is the right of contract. All of the rights of contract which are necessary for the carrying on of ordinary business affairs are protected by the Constitution and are not capable of being restrained by legislative action. Among these rights is that of forming business relations between man and man. A man may form business relations with whom he pleases, and in the conduct of such business he or they may fix and limit the character and amount of their business, the price they will charge for the produce which they offer to the public, or about which they contract.

From the title of the Act as well as from the argument of the State, says the opinion, "it would seem to be the impression that the Act was intended only to prevent oppressive and unreasonable combinations. There is no such limit, however, within its four corners. It embraces the combination of two or more persons, consequently the partnership of two persons. Neither is there any limitation to the amount of capital combined with skill and acts. A small capital with a minimum of skill is as much prohibited as the largest amount". An agreement between two or more persons is made as criminal as an agreement between a hundred. It is not sought to condemn merely acts which are oppressive by reason of their magnitude; it is made criminal for two persons to combine as partners, corporators or otherwise in the ordinary business of life, to increase or reduce the price of commodities or fix the standard thereof, or to agree to limit or reduce the production of commodities. More than that, it would seem that citizens cannot enter into a joint-stock association or corporation, for that precludes competition between those combined. The fault of the Act in regard to restraint of trade is the same as in regard to competition, says Judge Swayne; it makes no distinction between legal and illegal combinations and agreements which prevent competition. Those which have always been held legal and which have always been an essential part of the liberty of the citizen are made criminal equally with those which the law has always condemned.

As to whether the statute is class legislation, it clearly is. "It is not that character of legislation which, in carrying out a public purpose, is limited in its application and within the sphere of its operation, affects alike all persons similarly situated. It may affect, and does affect, individuals of the same class in an opposite way. It favors some individuals of a certain class and denounces other individuals of the same class." \* \* It seeks to exempt certain classes of property, which is carrying the doctrine beyond any case to which we have had access. All property in the State is entitled to equal protection, and no special property is entitled to or ought to receive any special favors. \* \* \* The right to hold or sell property and to make agreements and contracts concerning it, which may be believed by the owner to be for his betterment, is the most essential right of property. With some citizens this right is taken away; with others it is encouraged. \* \* \* If there is any one thing evident from a careful study of the Act it is that it is aimed to favor the agricultural class and is against the merchant and mechanic and all the others, without either reason or justice."

In conclusion, the Court says: "This law that deprives the citizen of all of his rights of contract, and that seeks to divide citizens, not exactly by the calling they follow, but by the source of the property they hold, and exempts 80 per cent of them from the penalties it visits upon the remainder, is not sustained by any good reason or excuse, is not just, is utterly without support in law and can have no just purpose, is vicious class legislation, depriving the citizen of his Constitutional right of life, liberty and property without due process of law, contrary to the law of the land, and is therefore declared to be null and void".

#### THE LEGISLATURE AND THE NEW YORK CHARTER.

On Monday of the present week the Charter for the consolidated New York City was formally placed in the State Legislature's hands. On the same day the printed copies of the document as approved by the Commission were for the first time placed in the hands of the newspapers and the people. We say that this was the public's first opportunity to know with certainty what the Commissioners' conclusions were, because, although printed drafts of the Charter have for seven weeks been in circulation, the Commission has made so frequent and so vital alterations in its original plan that nobody was at any moment able to say, off-hand, what actual conclusions had been reached. These changes were made invariably in private session. No one, so far as we know, has at any time been informed of the motive governing the amendments. Public hearings were granted during several days in January; but the chapters of fundamental law as set forth in the Charter were allotted only one day each, thus inevitably excluding from a hearing many citizens whose public criticism would have been of the highest value. In short, the singular spectacle has been presented of a scheme of government in process of construction so managed that none of the governed could obtain, until too late for effective criticism, any clear idea of what was being done.

During nearly four weeks of this period of deliberation, the Commissioners themselves refrained from any public discussion of the charter. Their preliminary

statement had announced that much of the agreement was a compromise. In one or two chapters of the Charter—notably that affecting the Police Board—this first report had bluntly stated that some of the committee dissented from the provisions as adopted. But why this minority had expressed dissent, and what it would have substituted for the majority's provisions, no outsider had any opportunity to learn. If this committee's work had been similar in nature to the work, for instance, of the committees of the Federal Senate, this unwillingness to meet inquiry and discussion might be understood. A Senatorial committee merely submits a framework of legislation, which is then altered and modified, in the course of a more or less prolonged discussion, by the general body. The astonishing part of the Greater New York Committee's policy is that prediction was plainly made that the State Legislature would adopt the Charter exactly as it should come from the Commission. This being accepted as a probable result, it certainly appeared as if the people of New York and Brooklyn were being hurried blindly and unwillingly into a new form of city government.

The Commissioners at length appeared to recognize the anomalous character of such a situation. A few weeks since some of the well-known citizens serving on that board broke silence to enter on personal explanations in the case. As might have been expected under the circumstances, their statements largely took the form of a reply to criticism in the press. This criticism, as our readers are aware, has chiefly concerned three provisions of the Charter: the creation of a municipal assembly with 89 members; the division of this body into two separate houses; and the assignment of the city's police management to a board of commissioners rather than to a single head.

General Tracy, in a published interview of February 3, declared himself positively in favor of the proposed municipal assembly. The present city government he describes as "autocratic, bureaucratic"; the present municipal legislature, having "neither positive nor negative powers, can neither enact nor defeat matters of the slightest importance". The double-chamber plan, in General Tracy's judgment, "lessens more effectually than any other device the danger of hasty legislation"; the large membership of the proposed assembly he defends on the ground that in large bodies of this kind "combinations form less easily and bribery becomes more expensive and difficult". In general, Mr. Tracy declares that "the new departure is educational and may even be regarded as experimental". His own opinion is, however, that "the time has arrived when we may try this experiment of entrusting the people, through their direct representatives, with a larger share in the management of their municipality".

This statement, which we have very briefly summarized, we believe to be the best defence which can be made of the proposed municipal assembly. In saying this, however, we do not admit that General Tracy's arguments are conclusive. He objects, for instance, to the "bureaucratic" form of our present city government; yet every observer of New York's municipal history knows that the city has derived from precisely that feature in its administration the best results gained under any one of its successive systems. It is moreover a matter for surprise that General Tracy should base an argument for a new and powerful municipal assembly on the im-

potency of the present Board of Aldermen. This board enjoyed originally powers quite as large as those proposed in the new Charter; it was the people themselves who stripped it of all these powers and reduced it to a position where it could "neither enact nor defeat matters of importance". This suppressing of the aldermanic powers was done deliberately, and with equal deliberation, as a result of bitter municipal experiences during the last three decades, the people resorting to the very "bureaucratic" government which General Tracy criticizes. It seems to us strange that the Commission should be unwilling to recognize these perfectly well-known facts in the city's history. If political experience has any value, it certainly ought to be respected in the reconstruction of a government.

Mr. Seth Low gave out his own views to the public the day after General Tracy gave his. Mr. Low, although approving the assembly plan in general, opposes the proposition of a double chamber, believing that a single chamber "lends itself to efficiency, and in the work of a city efficiency is a very important factor". This, it will be observed, is a wholly different point of view from that taken by General Tracy. Mr. Tracy wishes a double chamber in order to check hasty legislation; Mr. Low wishes a single house in order to expedite legislation. We call attention to these conflicting conceptions of the municipal assembly's character, because they seem to us to reflect very accurately the general doubt over what this governing body would turn out to be. We must confess to sharing this perplexity. Considered in the most impartial light, this proposed city legislature has appeared to us a factor in city government extremely hard to classify. The Commission clothes it with all the semblance of authority, only to strip it forthwith of the accompanying power. It is certainly not a law-making body; for it is not permitted to originate any important measure. Yet it possesses all the forms of such a body, and much of the argument of its defenders is based on tacit assumption that it does make laws. If it is a fifth wheel in the machinery of city government—and such it certainly has seemed to us—people need hardly wonder at this doubt among the experts.

We have, however, pointed out hitherto the positive element of danger in the assembly as projected. The power which that assembly actually would possess is the power of veto. It cannot originate legislation, but it may obstruct any measure proposed by the Board of Public Improvements; indeed, with a double chamber whose concurrence is required, the assembly might be said to possess a double opportunity of obstruction. It is conceivable that this veto power would be discreetly and judiciously employed; such is General Tracy's expectation, or at all events his hope. In our own opinion it would be quite as logical to expect discriminating vetoes from our present Board of Aldermen. The veto power might on the other hand be used to obstruct all measures which had no immediate inducement for the vote of individual assemblymen. By such inducement we do not refer to bribery. We agree with General Tracy that the chance of bribery is diminished with a large assembly. But as a matter of fact, it is not bribery which has brought so many of our State legislatures to their present questionable status. It is the far more insidious influence which demands support for one member's measure as the price of that member's vote on other propositions. If such exchange of favors be refused, a general block-

ade is possible; if it be granted, practically every bill proposed is rushed into legislation.

So far as State experience goes, the second of these alternatives is the invariable outcome. But the tendency in that direction which exists in a State legislature would be emphasized in the projected city legislature a hundred fold. With every assemblyman sitting first in the council which initiates plans for public expenditure in his district and next in the full assembly whose approval is necessary for such measures, the course of events may easily be imagined. Let it be noticed, also, that the alternative of complete blockade of legislation or the right of way to every member's bill is presented to the administrative boards as well as to the municipal assembly. The Board of Estimate and Apportionment is indeed to have a veto power, even over measures passed by the assembly. On this provision chiefly Mr. Low bases his own approval of the general legislative plan. But how far will such a board, or the board which has initiatory powers over public projects, dare to exercise that veto, when the assembly has the power to retaliate by vetoing any or all other measures favored by the administration? We are unable to avoid the conclusion that such a plan would graft upon this city the very worst vices which have afflicted legislation in the States.

In short, we fail entirely to sympathize with the notion that New York ought to try this cumbersome scheme of a city legislature ostensibly weak but actually all-powerful; subject to veto and able to retort with veto; whose legislation one commissioner wishes to curb and another to expedite; a plan which may result in deadlock of city business or in the breaking down of every barrier against municipal extravagance. We freely confess our disbelief in plans of government which are "experimental" or even "educational." New York has had a century of both; it is high time now to cease discussing new experiments and to begin applying some of the lessons of the past. Among the wholly discarded experiments with which New York's path is strewn, the most conspicuous is this very project of a powerful city legislature. The scheme of a double chamber certainly makes the matter worse, leading directly, as Mr. Low and Mayor Strong observed in their open letter of last week, "to vexatious and costly delay." The answer of the Commission's majority, citing Chancellor Kent and James Madison in favor of the double chamber, argues wholly beside the question. Nothing could better illustrate this fact than the words there quoted from the "Commentaries" of the authority first mentioned. In this citation the good effect of a double-chamber legislature is defined as resting in its influence "to destroy the evil effects of sudden and strong excitement and of precipitate measures springing from passion, caprice, prejudice, personal influence and party intrigue." The applicability of this description to the work of State and federal legislatures is obvious; equally plain upon its face is its total inapplicability to the corporation business with which municipal government is concerned. The further argument of the majority, that a bicameral municipal assembly is required because the governed community numbers three million souls, with an annual budget of \$60,000,000, seems to us equally beside the point. On similar grounds of reasoning the Pennsylvania Railroad Company ought to multiply a dozen times the membership of its directing board and to divide

that board into separate deliberative bodies. As a matter of fact, such a conception of corporation work is so grotesque that nothing but ridicule would greet the proposition. The greater corporations manage their affairs precisely as do the smaller companies; the difference between the two in organization falling, not by any means on the directing board—the legislature of the company—but on the working force. Cities whose business runs on lines quite parallel to those of business corporations may properly take a leaf out of this book of business men. Indeed, the common sense of municipal development has long since repudiated any such complicated plans. It has been lately pointed out that not one of the European city governments has tried this plan of a double-chamber legislature, and that, according to the latest authority, only 82 out of the 376 incorporated cities of the United States over 8,000 in their population have adopted such a plan.

Mr. Low and Mr. Strong have put on record also their objection to the Board of Police Commissioners and to the qualified power of removal by the Mayor, both of which principles are embodied in the Charter as it stands. They argue for a single head to the police department, and here again experience is entirely in favor of the opposition. Not only has practically every first-rate American and foreign city except New York adopted without question this plan of a single head to the police—thus answering the argument that such one-man control is dangerous—but New York's own experience has been as unfavorable to the board of commissioners as it has been to the municipal assembly. The Board, in its existing form, has alternated in its history between political "deals" of the smallest sort, and continuous bickering and deadlock. The present Board, the best that the city has in many years obtained, is almost unanimous in protesting against its own perpetuation. As Mr. Low points out, the creation of the police department into a bureau of elections has regularly been "the principal excuse for putting a board of four men, selected for political reasons, at the head of the police department, instead of one man to be selected simply because of his capacity to be a good police commissioner".

We have taken with some reluctance an attitude of opposition to these several chapters in the Charter. The importance of the general plan we do not underestimate, nor have we failed to recognize the many excellent provisions of the other chapters. The plan of borough councils, for initiating legislation in the five prescribed divisions of the city, seems to us excellent; so excellent in fact that we should be content to see the entire municipal assembly project swept aside, with its anomalies, complications and contradictions, and replaced, so far as its legislative purpose is concerned, by these borough boards with their initiatory powers. The provisions of the franchise chapter are equally commendable, notably in the clauses which withhold power to grant perpetual rights to occupy the city's streets; a move which New York City ought to have made a generation since, and which other municipalities, large and small, will be wise in imitating promptly. Provisions for the administrative boards in general merit equal praise; in all of these departments the work of the distinguished lawyers on the Charter committee has been thorough and effective.

But we are not ready to admit that these good elements are sufficient to offset the radical evils which we have criticized. Nor do we believe

that decent respect for the greatness of the enterprise, or for the virtual unanimity of intelligent opinion in the city, will be shown if the Legislature hurries this Charter, without debate, amendment, or ample public hearing, into law. The Charter, as we have said already, was not put forth in shape such that the people could learn its actual provisions until last Monday. In its printed form, it constitutes a volume of some 828 pages; there are numerous chapters of important bearing on the future, concerning which outside opinion has as yet had no opportunity even to form itself. Under such circumstances it is surely not unreasonable to ask a proper extension of the time during which the Legislature may give hearings on the general plan and form its own mature opinion. We are glad to learn that the Cities Committee of the State Assembly has decided to grant some public hearing to outside critics on the charter. The hearings ought to be sufficiently prolonged to give the widest possible opportunity, not only for intelligent criticism but for study of that criticism by the public.

### OUR STEEL AND STEEL RAIL PRODUCTIONS.

In connection with the recent developments in the steel-rail trade and the large orders for rails which have been placed as the result of the break in prices, it has been quite generally stated by the press that last year's output of rails in the United States had been 800,000 tons. Information received by the CHRONICLE indicated that this estimate was too low, and hence we have from the first reported the production of Bessemer rails for the calendar year 1896 at 1,100,000 tons. This latter figure proves to have been almost exactly right. Mr. James M. Swank, the General Manager of the American Iron & Steel Association at Philadelphia, has this week furnished complete statistics for the year, and he finds from official returns made to him by all the producers in the country that the actual product of Bessemer rails for the twelve months was 1,102,892 tons.

It will be observed that we are careful to speak of the production as the *Bessemer* rail production. There is a reason for this in the fact that the total production of rails, if we could have the figures, would be a little larger than the sum here given. Besides the amount of rails rolled by the producers of Bessemer steel ingots a small quantity of rails is made each year from other kinds of steel. The addition in this way, however, is not very considerable, and does not materially affect the final results. The production of steel by the open-hearth process has in recent years advanced with great strides, but the amount of rails made from that kind of steel is almost inconsequential, having been in 1895 less than a thousand tons—actually only 697 tons; the quantity of rails "rolled from purchased blooms and old steel rails" in the same year was 33,517 tons, and these two items cover the full amount of the additions. Whether the addition in 1896 was even as large as this may be questioned.

At 1,102,892 tons the Bessemer rail production is somewhat larger than in 1894 and 1893, but barring these two years it is smaller than in any other twelve-month period since 1885. In 1895 the output was 1,266,081 tons; in 1894, 904,020 tons; in 1893, 1,036,333 tons; in 1892, 1,458,732 tons; in 1891, 1,219,874 tons; in 1890, 1,797,489 tons. The year of maximum production was 1887, the output then having been

2,041,819 tons, and as compared with that total the 1896 product shows a contraction of nearly one-half. But it should not be forgotten that 1887 marked the culmination of the era of railroad expansion, and that in that year nearly 13,000 miles of new road were built in the United States, or more than ever before in the country's history. In 1896 the aggregate of new railroad construction reached only about 1,800 miles, or fully eleven thousand miles less. This difference in the relative activity of new railroad building in the two periods will account for the great contraction in the output of rails. However, the aggregate of railroad mileage now is very much larger than it was a decade ago, and hence the requirements for rails for renewals and repairs must also be larger. Obviously, therefore, there is room for a heavier output of rails than that for the late year, even if the low prices should not have the effect of greatly stimulating the construction of new road. The following shows the Bessemer rail production by the producers of Bessemer ingots for each year back to 1887.

#### PRODUCTION OF BESSEMER STEEL RAILS.

	Gross Tons.		Gross Tons.
1896.....	1,102,892	1891.....	1,219,874
1895.....	1,266,081	1890.....	1,797,489
1894.....	904,020	1889.....	1,470,267
1893.....	1,036,333	1888.....	1,365,921
1892.....	1,458,732	1887.....	2,041,819

It will be interesting now to go a step further and see what the course of steel production has been in recent years. The output of steel now varies independently of the rail output. Only a short while ago the changes in the one were largely controlled by the changes in the other. In fact, up to within a few years ago the demand for steel for rails constituted the bulk of the whole demand for steel, very little being used for other purposes. Under the cheapening in the price of steel, however, a great increase in its use has sprung up, and the quantity consumed in general and miscellaneous ways hence greatly exceeds that consumed in the manufacture of rails.

We have frequently dwelt upon this as a new feature in the steel trade, and noted the expansion which had taken place in the requirements for steel for general purposes, even under a lverse business conditions. In 1896 of course it was inevitable that some set back should occur under the great depression in all our industries, bringing, as it did, operations almost to a standstill in many lines of business. Hence it is not surprising to find that, though as compared with 1895 the 1896 output of rails fell off only 163,189 tons, Mr. Swank reports that the output of steel fell off almost a million tons—that is, he makes the production for 1896 of Bessemer ingots 3,919,906 tons against 4,909,128 tons for 1895. To understand the true significance of these comparisons, however, it should be remembered that the 1895 output of rails was itself small (nearly 40 per cent below that for 1887, as we have seen), while on the other hand the 1895 output of Bessemer ingots had been by far the largest in the country's history. If we exclude 1895, the 1896 output of ingots excels that of any other year, with the exception only of 1892, when we produced 4,168,435 tons, as against the 3,919,906 tons for 1896. And this is the result in a year when all our industries were prostrated and when the output of rails was next to the lowest for a long term of years. The record is certainly an encouraging one and augurs well for the future when the wheels of commerce shall again move with their accustomed speed. Below we show the production of Bessemer ingots for each of the last ten years.

## PRODUCTION OF BESSEMER STEEL INGOTS.

Year—	Gross tons.	Year—	Gross tons.
1896.....	3,919,908	1891.....	3,247,417
1895.....	4,909,129	1890.....	3,688,871
1894.....	3,571,313	1889.....	2,930,204
1893.....	3,215,636	1888.....	2,511,161
1892.....	4,168,435	1887.....	2,936,033

It will be useful and instructive to undertake to separate the rail production from the total steel production, so as to see how much steel has remained for use in other ways. For this purpose we pursue the method followed by us in other years—that is, starting with the production of Bessemer ingots we make an allowance of 12½ per cent for loss through conversion in order to show the quantity of finished steel to be obtained from the output of ingots; from the result thus obtained we deduct the product of Bessemer rails for the year, and the remainder, of course, shows the general consumption of steel. The following is a comparison prepared on that basis.

## BESSEMER STEEL PRODUCTION, HOW USED.

Tons of 2,240 lbs.	1894.	1895.	1896.	1897.	1898.	1899.	1900.
Bessemer ingots	3,919,908	4,909,129	3,571,313	3,215,636	4,168,435	3,247,417	2,930,204
Less 12½ p. c. for oxid'n, &c.	489,985	613,641	440,414	401,960	521,054	405,927	360,276
Finish'd steel	3,429,918	4,295,487	3,134,899	2,813,726	3,647,381	2,841,490	2,569,928
Bessemer rails	1,102,892	1,206,081	904,020	1,036,353	1,408,732	1,219,874	1,470,267
Steel for other purposes.....	2,327,026	3,029,406	2,230,879	1,777,373	2,238,649	1,621,616	1,099,661

The foregoing brings out in a striking way the growth in the general use of steel. There has been, as already noted, a great falling off as compared with the amount consumed in 1895—the figures standing 2,327,026 tons for 1896, against 3,029,406 tons for 1895; but if we leave out the year 1895 the 1896 total, notwithstanding this falling off, stands higher than in any previous year without any exception. As recently as 1889 the amount of steel used outside of that converted into rails was but little over a million tons, as against the 2½ million tons for 1896.

It is proper to state that we are here dealing simply with the steel produced by the Bessemer process. Independent of this there has been a rapid development in the growth of steel by the open-hearth process, the amount produced by that process having risen from 322,069 tons in 1887 to 1,137,182 tons in 1895. No data are yet available to show the amount of that kind of steel turned out in 1896. The aggregate production of all kinds of ingots in 1895 was 6,114,834 tons; the loss of a million tons in the Bessemer product for 1896 would seem to point to an aggregate steel production for that year of only about five million tons. At that figure, however, it will still stand ahead of that of any other country.

## RAILROAD GROSS AND NET EARNINGS FOR 1896.

We present to-day our compilation of the earnings of United States railroads for the late calendar year so far as it is possible to secure returns of both gross and net. The statement, as usual, is very comprehensive, it covering 204 roads operating 136,852 miles of line (including two Canadian and five Mexican roads), with aggregate gross earnings in excess of a thousand million dollars. Besides the roads which report both gross and net, we have quite a number which report only gross, and we intend another week to combine the two, thus furnishing an exhibit comprising substantially the whole railroad mileage of the country as far as the gross alone is concerned. In the present article we shall confine ourselves to the roads making returns as to gross and net alike.

As in the case of our preliminary tabulation in the issue of the CHRONICLE of January 16th, the fact which stands out prominently in the final result is that there has been very little change in either gross or net as compared with the year preceding. The gross is \$1,011,120,892 for 1896 against \$1,011,927,754 for 1895, and the net \$301,319,169 against \$306,622,527. In the former instance the loss is only \$806,862, or less than one-tenth of one per cent; in the latter it is \$5,303,358, or 1.73 per cent. The following presents the figures in tabular form.

	January 1 to December 31. (204 roads.)		Inc. or Dec. Amount.		P. C.
	1896.	1895.			
Miles of road Dec. 31.	136,852	136,353	499	0.35	
Gross earnings.....	\$1,011,120,892	\$1,011,927,754	-\$806,862	0.08	
Operating expenses..	709,801,723	705,305,227	+4,496,496	0.64	
Net.....	301,319,169	306,622,527	-\$5,303,358	1.73	

In the previous year, it will be remembered, there had been a very substantial increase in both gross and net—\$61,740,688, or 6.44 per cent, in the gross, and \$26,451,609, or 9.15 per cent, in the net. But these gains, large though they were, were merely a partial recovery of the tremendous losses sustained by the railroads of the United States in 1894. In brief, then, the roads in 1896 (speaking of them as a whole) retained the improvement which they had made in 1895 on the bad showing of 1894. The following carries the comparisons back for a series of years.

Year & No. of roads.	Gross Earnings.			Net Earnings.		
	Year Given.	Year Preceding.	Increase or Decrease.	Year Given.	Year Preceding.	Increase or Decrease.
12 mos	\$	\$	\$	\$	\$	\$
'90(206)	1,007,510,768	985,399,238	+22,111,530	328,009,153	313,790,560	+14,228,593
'91(219)	1,103,636,503	1,050,568,923	+53,067,580	353,353,318	330,797,494	+22,666,424
'92(210)	1,083,688,637	1,037,394,855	+46,293,782	345,840,027	328,133,575	+17,706,452
'93(196)	957,538,272	954,058,370	+3,479,902	297,907,025	308,330,667	-10,423,642
'94(206)	909,003,527	1,091,975,721	-182,972,194	291,502,707	332,128,310	-40,625,603
'95(209)	1,207,674,752	959,331,061	+248,343,691	315,388,153	285,938,514	+29,449,639
'96(204)	1,011,120,892	1,011,927,754	-\$806,862	301,319,169	306,622,527	-\$5,303,358

While the year as a whole shows very little change from the year preceding a sharp distinction must be made between the exhibits for the early months and those for the later months. As pointed out in our review on January 16th, the general tendency in 1896 was just the reverse of that in 1895; in 1896 the conditions and comparisons grew more unfavorable as the year progressed; in 1895 they had steadily improved. A statement for the six months to June 30, published in our issue of August 22, showed nearly 18 million dollars gain in gross and over 4 millions gain in net, from which it is evident that in the last six months there were very considerable losses in both gross and net. A summary of the monthly results is subjoined.

## GROSS AND NET EARNINGS.

Month	Gross Earnings.				Net Earnings.			
	1896.	1895.	Inc. or Dec.	P. c.	1896.	1895.	Inc. or Dec.	P. c.

Oct...	67,166,439	71,148,284	-3,981,845	5.59	25,043,733	20,720,163	+4,323,570	20.87
Nov...	57,217,256	62,895,707	-5,678,451	9.09	19,069,027	22,879,558	-3,810,531	16.71
Dec...	54,227,519	55,895,138	-1,667,619	2.98	18,270,126	18,354,711	-84,585	0.46

NOTE.—The number of roads included in January was 141; in February 136; in March 142; in April 136; in May 125; in June 127; in July 136; in August 133; in September 143; in October 137; in November 134; in December 133.

January and February recorded very large gains, roughly 9 per cent in the gross in both months, and 17 and 18 per cent respectively in the net; but after that the comparisons became less and less favorable, and from August to December

both inclusive, there was a loss each month in gross and net alike. The poorest month of all was November, with a loss of 9 per cent in gross and of nearly 15 per cent in the net, business in election week having come almost to a standstill.

In the case of the separate roads, considerable irregularity is observable. The anthracite coal companies, the roads running through the iron districts, and those in the great manufacturing sections of the Middle and Middle Western States as a rule have fallen behind; on the other hand, some of the grain-carrying roads are able to show quite substantial gains. The Pennsylvania reflects the effects of the prostration of our leading industries very plainly, having lost \$5,940,900 in gross and \$3,540,700 in net; this is for the lines directly operated east and west of Pittsburg and Erie. On all lines operated or controlled the loss would be \$6,918,000 in gross and \$4,237,000 in net. The Reading (including the Coal & Iron Company) has fallen \$1,906,895 behind in gross for the ten months to October 31, but, owing to a great reduction in the expenses of the Coal & Iron Company, has only a small loss in the net. The Southern Pacific (for the eleven months), with \$1,747,992 decrease in gross, has only \$308,113 decrease in net. The Canadian Pacific, with \$1,740,561 increase in gross, has \$626,631 increase in net. The Atchison on the other hand, with only \$915,263 increase in gross, has \$2,575,790 increase in net. Again, the Baltimore & Ohio, which under the receivers has greatly enlarged its business, with \$1,254,610 increase in gross, has \$1,453,804 decrease in net, caused by the heavy outlays for repairs and renewals of track and equipment. The Norfolk & Western in 1895 had suffered from a strike of the miners along its lines; for 1896, with the absence of that disturbing feature, it reports a large increase in gross—namely, \$1,419,779; in the net the increase is only \$243,209.

On the roads in the spring-wheat districts, the showing for the twelve months is much less favorable than it was for the six months to June 30. This is due to the fact that the spring-wheat crop of 1896 fell below the phenomenal crop of 1895, so that in the later months the roads lost a portion of the heavy gains made in 1895. One illustration will suffice: The Milwaukee & St. Paul for the twelve months records \$744,383 increase in gross, \$972,849 decrease in net; but in the six months to June 30 its record was \$2,073,827 gain in gross, \$144,872 gain in net. The following is a full list of the gains and losses above \$200,000, both in gross and net.

\* For eleven months. † For year ended October 31. ‡ Covers lines directly operated east and west of Pittsburg; the net on Eastern lines decreased \$1,479,300 and on Western lines \$2,061,400. § For year ended November 30.

When the roads are arranged in groups, the difference between the conditions in the East and those in the West becomes very apparent. East of Chicago, on account of the predominance of manufacturing industries, the depression in trade has been very severely felt. West and south of Chicago, on the other hand, manufacturing is a less prominent feature, and at the same time those sections had the advantage of large grain crops as a rule in both 1896 and 1895—with the exception of the spring-wheat districts already referred to. Hence we find the New England group, the trunk line group, the anthracite coal group, and the Middle and Middle Western groups all recording losses in gross, while in the same way the Northwestern group, the Southwestern, the Pacific Coast and the Southern all have gains. It is noticeable that neither the gains nor the losses are of large ratio; outside of the Mexican group the largest percentage of change is furnished by the Southern group, with an increase of 3½ per cent.

In the case of the net a like distinction between the results on Eastern and Western roads is observable, with this difference, that the Northwestern group, like the New England, the trunk lines, the anthracite coal, and the Middle and Middle Western, has a loss. Here, too, the percentages of change are quite moderate, the largest being 13.88 per cent increase by the Southwestern group, due to the great improvement established by the Atchison. Following is a summary of the totals for the various groups. At the end of this article will be found a detailed statement giving separately the results for all the roads grouped under each head.

## SUMMARY BY GROUPS.

SECTION OR GROUP.	Gross Earnings.		Net Earnings.		
	1896.	1895.	1896.	1895.	Inc. or Dec.
Jan. 1 to Dec. 31.					
New Eng'd. (13)	73,255,979	73,960,699	22,064,639	22,443,826	-384,187
Trunk lines (18)	290,696,515	297,951,367	83,013,121	87,061,453	-4,048,332
Anthrac. coal (13)	132,186,074	140,793,124	39,911,107	31,506,974	+8,404,133
East. & Mid. (23)	33,495,794	34,244,031	9,889,583	10,292,429	-402,846
Mid. West'n. (35)	64,395,460	65,116,403	18,307,008	20,100,942	-1,793,934
Northwest'n. (15)	131,399,981	124,891,543	47,214,500	48,577,769	-1,363,269
Southwest'n. (20)	63,442,656	62,455,174	19,051,207	16,729,574	+2,321,633
Pacific Coast (19)	98,361,491	97,040,933	34,021,149	33,301,066	+720,083
Southern (43)	98,117,195	95,036,041	29,400,826	28,559,792	+841,034
Mexican (5)	19,467,534	17,836,079	7,447,094	7,431,262	+15,832
Tot. (204 roads)	101112892	1011227754	301,319,199	306,622,527	-5,303,328

MILEAGE.—The mileage for the above groups is as follows: New England, 5,173 miles against 5,130 miles to 1895; Trunk lines, 24,408 against 24,408; Anthracite coal, 6,034 against 6,034; Middle States, 3,744 against 3,748; Middle Western, 11,960 against 11,839; Northwestern, 25,812 against 25,447; Southwestern, 14,924 against 15,127; Pacific Coast, 20,661 against 20,537; Southern, 19,939 against 19,579; Mexican, 4,166 against 4,124; grand total, 136,852 against 136,353.

As regards the exhibit for the month of December there is very little to say, except that the comparison is considerably better than in the months immediately preceding, the loss in gross being only \$1,637,619, or

less than 3 per cent, and in net only \$84,324, or less than one-half of one per cent. This is the more noteworthy as in December of the previous year there had been quite a heavy gain in both gross and net as will appear from the following.

Year and number of roads.	Gross Earnings.			Net Earnings.		
	Year Given.	Year Preceding.	Increase or Decrease.	Year Given.	Year Preceding.	Increase or Decrease.
December.						
1891 (132)	\$4,137,168	\$3,870,658	+5,266,510	\$2,107,107	\$1,406,852	+2,044,245
1892 (132)	\$2,613,259	\$1,501,807	+1,111,452	\$2,704,504	\$2,739,862	-\$34,358
1893 (131)	\$7,992,776	\$6,283,436	+8,301,160	\$15,738,388	\$14,423,657	+3,215,269
1894 (132)	\$7,871,695	\$4,883,120	+1,936,425	\$15,044,636	\$16,296,650	-\$251,014
1895 (137)	\$8,382,246	\$2,764,783	+5,617,463	\$19,527,087	\$16,584,851	+2,942,816
1896 (131)	\$4,227,519	\$5,866,138	-1,637,619	\$18,270,420	\$18,354,741	-\$84,324

A feature in the returns is the tendency towards economy in expenditures manifested in a good many cases. The separate roads by no means all show losses even in the gross—a considerable number have gains. Below is a list of the changes above \$30,000.

#### PRINCIPAL CHANGES IN GROSS EARNINGS IN DECEMBER.

Increases.		Decreases.	
Baltimore & Ohio	\$118,764	Pennsylvania	\$1,045,000
Union Pacific	115,232	Phil. & Read. and C. & I.	561,823
Mexican Central	114,328	Chic. Mil. & St. Paul	193,776
Norfolk & Western	103,767	Southern Railway	136,780
Louisv. & Nashv.	97,115	Wabash	104,781
Ches. & Ohio	89,202	Illinois Central	102,085
Atch. Pop. & S. Fe.	85,982	Burl. Ced. Rap. & Nor.	61,746
Clev. Cin. Ohio. & St. L.	45,025	Denver & Rio Grande	55,137
San Ant. & Aran. Pass.	40,514	Cin. N. O. & Tex. Pac.	43,833
Okla. & Gulf	39,331	Northern Pacific	41,251
Georgia & Alabama	37,058	Northern Central	39,064
Ohio. Burl. & Quin.	33,252	Elgin Jol. & Eastern	31,489
Total (representing 16 roads)	\$917,569	Total (representing 21 roads)	\$2,147,775

Covers lines directly operated east and west of Pittsburg; the gross on Eastern lines decreased \$447,300 and on Western lines \$397,700.

#### PRINCIPAL CHANGES IN NET EARNINGS IN DECEMBER.

Increases.		Decreases.	
Norfolk & Western	\$110,739	Pennsylvania	\$240,100
Chic. Burl. & Quin.	78,780	Illinois Central	107,135
Phil. & Read. and C. & I.	68,741	Mexican Central	99,306
Chesapeake & Ohio	49,684	Burl. Ced. Rap. & Nor.	91,745
Canadian Pacific	49,667	Erie	73,994
West Jersey & Seashore	47,242	Baltimore & Ohio	67,109
Oregon Imp't.	45,255	Denver & Rio Grande	65,374
Clev. Cin. Ohio. & St. L.	44,208	Southern Railway	55,319
St. Louis southwest	36,556		
Atch. Pop. & S. Fe.	35,905	Total (representing 12 roads)	\$300,082
Okla. & Gulf	35,999		
Chic. & East. Ills.	35,544		
Total (representing 13 roads)	\$647,519		

† Covers lines directly operated east and west of Pittsburg; the net on Eastern lines decreased \$61,500 and on Western lines \$178,800.

When classified in groups, five out of the nine groups have losses in gross, but only three losses in net, as shown herewith.

SECTION OR GROUP.	Gross Earnings.		Net Earnings.		Inc. or Dec.
	1896.	1895.	1896.	1895.	
December.					
Trunk Lines (11)	\$15,424,656	\$16,441,424	\$4,480,371	\$4,795,866	-\$309,185 0.45

## Monetary: Commercial English News

LONDON, SATURDAY, February 13 h, 1897.

[From our own correspondent.]

Europe has been passing through a period of intense political apprehension this week. A fortnight ago Mr. Chamberlain's statement in the House of Commons that the Transvaal Volksraad had passed measures distinctly contravening the Convention of London checked the recovery that was beginning in markets, and induced a fear of renewed troubles in South Africa. Then the resumption of fighting between Christians and Mohammedans in Crete increased the apprehension. The disturbances in Crete have become so serious that all the Powers have sent warships to the island, and Greece has sent not only ships but torpedo boats, with a Royal Prince in command; and naturally it is feared that a collision will take place between the Greeks and the Turks.

At the end of last week the Chancellor of the Exchequer made a statement respecting Egypt which intensified the alarm, as it was feared that the French Government might recriminate. On the top of all this came reports that new massacres were likely to occur in Turkey. And then came another report that the Russian fleet at S. bastopol was being eagerly prepared for all emergencies. As a consequence there was a panic upon the St. Petersburg Bourse at the beginning of this week, and, though the uneasiness in Paris has not been quite so great, it threatened to become acute, and there was

a sharp fall in all departments of the Bourse, while French holders sold securities on a large scale here in London.

All this led to a general decline in prices in every market. Of course there have been in circulation the most alarmist rumors. Unfortunately the Great Powers are apparently doing nothing, though we are again assured that the concert is complete, that the Ambassadors in Constantinople have concluded their negotiations and that everything necessary will be done. But these assurances are followed by no action, and the public everywhere is, in consequence, losing patience as well as hope.

In French business circles there seems to be growing up a somewhat bitter feeling against Russia. It is estimated in France that the French holdings of Turkish, Servian and Bulgarian bonds, Ottoman Bank shares and the like, amount to about two milliards, or, roughly, 80 millions sterling, or 400 million dollars. All these securities have depreciated greatly in consequence of the anarchy in Turkey, and every body knows that that anarchy has continued for nearly two years now, solely because Russia would not consent to any effective measures being taken to compel the Sultan to grant the reforms required. In private conversation French bankers and brokers bitterly complain that, while France has lent thousands of millions of dollars to Russia, and has supported her policy loyally in every part of the world, Russia cynically refuses to do anything or even to permit anything to protect the interests of French investors in the Southeast of Europe. As the week is drawing to a close there is a somewhat better feeling, but how long it will last nobody dares to say.

Money is very abundant and cheap, and is likely to continue so. Trade is good, except the Lancashire cotton trade, which is suffering from the cessation of Indian purchases because of plague, famine and money stringency. But though the general trade of the country is good, there is very little demand for banking accommodation. Gold, too, is coming in from abroad in large amounts. There was an exceptional export to Egypt to move the cotton crop four or five months ago, and now a very exceptional return is certain to take place. Because of the failure of the wheat crop and the small wool clip Australian exports of commodities will be small, and therefore Australia will need to send to London more gold than usual, and in spite of the difficulties in South Africa the usual remittances from that country will go on. Upon the Continent political apprehension is checking business in every direction, and therefore it is probable that gold will be sent from the Continent, too, to London. It looks at present, therefore, as if low rates will continue for several months.

At the end of last week the Bank of Bombay raised its rate of discount from 10 to 12 per cent, the reserve of the bank having fallen in a single week from a little over a crore and a quarter to three-quarters of a crore. It is not known to what this extraordinary decrease is due; all that is certain is that the present reserve is the lowest on record. The general assumption is that the quarantine measures taken all over Europe, as well as the plague in Bombay, prevent the export of Indian cotton, that the growers and the merchants are, in consequence, compelled to carry the cotton and that the Bank of Bombay has found itself compelled to finance them. The outlook in India everywhere is very dark.

There is hardly anything to be said respecting the Stock Exchange, except that it is sound, that there is very little speculation, and that prices are all lower for the week. The fortnightly settlement began on Tuesday. There was exceedingly little demand for loans, and the banks on the average had to content themselves with rates ranging from 2½ to 2¾ per cent.

In Paris the monthly settlement passed off easily, as the scare had not then begun. Now, however, the losses incurred have been very heavy. Still a serious breakdown is not feared. But it is apprehended that there must be many liquidations. As said above, French holdings of the securities of Southeastern Europe are estimated at about 80 millions sterling; French holdings of Spanish securities, including the railways, are estimated at about 160 millions sterling, making together 240 millions sterling, or not very much short of 1,000 million dollars, and the depreciation of these securities has been grievous during the past year and a-half. Add to this the immense losses of French investors consequent upon the break-down of the South African boom, and it will be under-

stood how great, in many cases, must be the embarrassment. Last of all it is believed that the great Chinese loan and some of the Russian loans have not yet been placed.

The following return shows the position of the Bank of England, the Bank rate of discount, the price of consols, &c., compared with the last three years:

Messrs. Pixley & Abell write as follows under date of February 11:

Gold—No change has taken place since we last wrote, either in the character of the demand or in the prices offered. The Bank has received during the week £195,000, chiefly from Australia. Arrivals: South Africa, £115,000; Australia, £112,000; Bombay, £63,000; Chili, £22,000; total, £297,000. Shipments: Japan, £368,400; Bombay, £32,500; total, £399,900.

Silver—With a very slack demand and some fairly large arrivals the market has given way a little, but is steady at the reduction. The latest Indian price is 80 1/2 Rs. per 100 Tola. Arrivals: New York, £177,000; Australia, £2,000; Chili, £11,000; total, £220,000. Shipments: Hong Kong, £25,000; Bombay, £250,300; total, £275,300.

Mexican Dollars—With small dealings in these coin the nearest rate is 29 1/2d. Arrivals from New York, £16,000. Shipments to Penang, £17,000.

The quotations for bullion are reported as follows:

## Commercial and Miscellaneous News

NATIONAL BANKS.—The following information regarding national banks is from the Treasury Department:

### INSOLVENT.

738—The First National Bank of Franklin, Ohio, was, on February 17, 1897, placed in the hands of J. D. Miller, Receiver.

3,024—The First National Bank of Olympia, Washington, was, on February 17, 1897, placed in the hands of Albert A. Phillips, Receiver.

3,043—The First National Bank of Griswold, Iowa, was, on February 17, 1897, placed in the hands of Ira F. Hendricks, Receiver.

IMPORTS AND EXPORTS FOR THE WEEK.—The following are the imports at New York for the week ending for dry goods Feb. 18 and for the week ending for general merchandise Feb. 19; also totals since the beginning of the first week in January.

### FOREIGN IMPORTS AT NEW YORK.

For week.	1897.	1896.	1895.	1894.
Dry goods.....	\$2,734,904	\$2,911,138	\$4,569,178	\$2,368,022
Gen'l mer'dise.....	6,682,219	5,993,310	7,089,785	4,762,073
Total.....	\$9,417,123	\$8,904,448	\$11,658,963	\$7,130,095
Since Jan. 1.				
Dry goods.....	\$17,603,647	\$22,334,308	\$24,985,608	\$14,074,875
Gen'l mer'dise.....	47,808,732	46,736,408	43,604,368	38,306,847
Total 7 weeks.....	\$65,412,379	\$69,070,712	\$68,589,976	\$52,381,722

The following is a statement of the exports (exclusive of specie) from the port of New York to foreign ports for the week ending Feb. 22 and from January 1 to date:

### EXPORTS FROM NEW YORK FOR THE WEEK.

	1897.	1896.	1895.	1894.
For the week.....	\$8,030,334	\$8,100,353	\$5,826,372	\$6,473,292
Prev. reported.....	46,652,421	46,322,182	41,343,967	42,821,904
Total 7 weeks.....	\$54,682,755	\$54,422,535	\$47,170,339	\$49,295,196

The following table shows the exports and imports of specie at the port of New York for the week ending Feb. 20 and since January 1, 1897, and for the corresponding periods in 1896 and 1895:

### EXPORTS AND IMPORTS OF SPECIE AT NEW YORK.

Gold.	Exports.		Imports.	
	Week.	Since Jan. 1.	Week.	Since Jan. 1.
Great Britain.....				\$10,177
France.....				10
Germany.....				182,733
West Indies.....	\$40,000	\$256,390	\$6,099	1,500
Mexico.....				19,308
South America.....	31,545	71,986	3,997	71,353
All other countries.....				14,018
Total 1897.....	\$71,545	\$331,376	\$11,596	\$297,595
Total 1896.....	8,250	11,880,085	3,690,927	16,236,207
Total 1895.....	101,985	26,776,948	1,272,805	2,031,282

—The Mutual Life Insurance Company of New York continues its marvelous growth. Its annual report of business for the year ending December 31, 1896, shows that the company possesses net assets aggregating \$331,744,149 43. The

Liabilities on the risks in force amount to \$305,010,633 72, leaving a surplus fund of \$29,733,514 70. This shows an increase in admitted assets during 1896, according to the New York State standard, of \$15,040,005 22, and an increase in surplus of \$2,833,467 04. The total income of the company for the year was \$49,702,695 27. The amount paid to policyholders aggregated \$25,437,569 50. Since the date of its organization, in 1843, the Mutual Life Insurance Company has paid to living members \$254,959,451 53, and to the beneficiaries of deceased members \$178,045,743 76, making a total of \$437,005,195 29. The company has insurance in force amounting to over \$918,000,000.

—The fifty-first annual report of the Connecticut Mutual Life Insurance Company was issued this week. As usual, President Greene takes the opportunity in presenting the annual report to explain at length the company's affairs and incidentally to discuss the theory and right purposes of life insurance, viz., pure life insurance at the lowest possible cost consistent with absolute safety. The remarks of the President are given at length on subsequent pages and will be found interesting reading. Regarding the position of the Connecticut Mutual, Col. Greene remarks: "So far as the absolute safety of every present policy-holder is concerned, or so far as his future dividends would be affected, it is not necessary that we should ever write another new policy. The company would pay out to the very last man and maintain the same relative high dividends without it. The only reason for taking new business is that we may give to new families the same secure and cheap protection that those of our present members are getting. The latter have no need whatever for any new business."

—Messrs. Winslow, Lanier & Co. will pay dividends on a number of securities, a list of which will be found in another column.

**Breadstuffs Figures Brought From Page 432.**—The statements below are prepared by us from the figures of the New York Produce Exchange. We first give the receipts at Western lake and river ports, arranged so as to present the comparative movement for the week ending Feb. 20, 1897, and since August 1, for each of the last three years:

WALL STREET, FRIDAY, FEB. 26, 1897—5 P. M.

**The Money Market and Financial Situation.**—Aside from some activity in investment securities, business has been dull in Wall Street during this week, and the introduction of one or two additional holidays would evidently have made but little difference in results. The foreign political situation has been watched with interest. As that improved, attention was turned to Cuban affairs and the discussion of that subject in the United States Senate.

For one reason or another there seems to be a general disposition to delay operations in all departments until the incoming Administration shall have become established, its foreign policy somewhat definitely defined and its tariff measures fixed or better understood. In the meantime there is an unusual quiet in financial circles, which was only momentarily disturbed by the passing of the Columbus Hooking Valley & Toledo Railroad into the hands of a receiver. The latter movement was not unexpected, however, and the announcement that a receiver had been appointed was followed by the statement that the speedy and successful rehabilitation of the company is assured.

The progress and completion of the work of the Senate Committee in its investigation of Trusts have not been regarded with especial interest, as it was apparent soon after the investigation began that no startling developments were likely to follow. If this inquiry should result in lessening the feeling of antagonism which exists in some quarters towards corporations in general, and railroads in particular, it will not have been in vain.

There is a fair proportion of recently-reported railway earnings which make a favorable showing, but a new impetus to general business is needed to make them satisfactory. Progress in the right direction may now be looked for, as the improvement in the iron industry, which was assured by the breaking up of the steel rail combination, is beginning to be felt. The foreign exchange market has been unusually featureless during the week and there is no change to note in the money market.

The open market rates for call loans during the week on stock and bond collaterals have ranged from 1½ to 2 per cent. To-day's rates on call were 1½ to 1¾ per cent. Prime commercial paper is quoted at 8 to 4 per cent.

The Bank of England weekly statement on Thursday showed an increase in bullion of £545,874, and the percentage of reserve to liabilities was 53.41, against 53.76 last week; the discount rate remains unchanged at 3 per cent. The Bank of France shows an increase of 845,000 francs in gold and 1,089,000 francs in silver.

The New York City Clearing-House banks in their statement of Feb. 20 showed an increase in the reserve held of \$5,176,600 and a surplus over the required reserve of \$55,665,950, against \$51,639,225 the previous week.

	1897. Feb. 20.	Difference from Prev. week.	1896. Feb. 21.	1895. Feb. 23.
Capital.....	59,772,700		61,122,700	61,622,700

**Foreign Exchange.**—The market for foreign exchange has continued dull and firm without material change in rates. There was a better inquiry for bills to-day and the market showed a hardening tendency.

To-day's actual rates of exchange were as follows: Bankers; sixty days' sterling, 4.85@4.85½; demand, 4.87@4.87½, cables, 4.87½@4.87½.

Posted rates of leading bankers follow:

February 26.	Sixty Days.	Demand.
Prime bankers' sterling bills on London..	1.85½@4.86	4.87½@4.88
Prime commercial.....	4.84½@4.84¾	.....
Documentary commercial.....	4.83½@4.84½	.....
Paris bankers' (francs).....	5.18¾@18½	5.10½@16¾
Amsterdam (guilder) bankers.....	40½@40½	40½@40½
Frankfort or Bremen (reichsmark) bankers	95 @95½	95½@95½

The following were the rates of domestic exchange on New York at the under-mentioned cities to-day: Savannah, buying 1-16 discount, selling par; Charleston, buying par, selling ½ premium; New Orleans, bank, \$1.00 premium; commercial, 25c. per \$1,000 discount; Chicago, 55c. per \$1,000 discount; St. Louis, 25@40c. per \$1,000 discount.

**United States Bonds.**—The market for Government bonds has been active and prices advanced. Sales at the Board include \$397,000 4s. coup., 1925, at 122½ to 123½; \$21,000 4s. reg., 1925, at 122½; \$162,000 4s. reg., 1907, at 111½ to 112; \$200,000 5s. coup., at 113 to 113½; \$5,000 5s. reg., at 113½, and \$10,000 currency 6s. at 106½. The following are the closing quotations:

**Coins.**—Following are the current quotations in gold for coins:

Sovereigns.....	\$4.86 @ \$4.89	Fine silver bars.....	64½ @ 65½
Napoleons.....	3.86 @ 3.89	Five francs.....	93 @ 95½
X & Reichmarks.....	4.74 @ 4.78	Mexican dollars.....	50½ @ 51½
25 Pesetas.....	4.77 @ 4.81	Do uncom'cial.....	— @ —
Spanish Doubloons.....	15.55 @ 15.75	Peruvian sols.....	45½ @ 47½
Mex. Doubloons.....	15.50 @ 15.75	English silver.....	4.84 @ 4.88
Fine gold bars.....	par @ ¼ prem.	U.S. trade dollars.....	65 @ 75

**State and Railroad Bonds.**—Sales of State bonds at the Board are limited to \$10,000 Virginia 6s deferred trust receipts stamped at 6, \$9,500 Virginia 2-3s of 1991 at 62 to 62½ and \$1,000 Alabama Class C at 98½.

The market for railway bonds has been strong and generally steady through the week on a fair volume of business, the activity in this department being more noticeable than in the stock market. Investors continue to take freely good bonds when offered, but such offerings are limited and a large proportion of the business is in the speculative issues. Kansas Pacific 1st consols. and the Hooking Valley issues have been the principal features; the former have advanced 2½ per cent on the prospective value of the new securities to be allotted under the plan of reorganization, and the latter were bid up from 5½ to 10 per cent on the appointment of a receiver. The active list includes also Atchison, Missouri Kansas & Texas, St. Louis & San Francisco, San Antonio & Aransas Pass, Union Pacific, Denver & Rio Grande, Rock Island, Milwaukee & St. Paul, Northern Pacific, Oregon Short Line, St. Paul Minn. & Manitoba, Chesapeake & Ohio, Erie, New York Ontario & Western, Reading, Mobile & Ohio, Wabash and West Shore bonds, in which fractional advances and declines are about equal.

**Railroad and Miscellaneous Stocks.**—Except some speculative manipulation of the industrials, the stock market presents almost no feature of interest. The entire group of coal stocks has been weak and Central of New Jersey declined nearly 2 points, which it recovered to-day. Hooking Valley advanced to 6½ on Tuesday but declined to 3½ on Thursday, when it was announced that a receiver for the company had been appointed. The grangers have been strong and steady as a group, although Mo. Kansas & Texas preferred declined about a point. To-day's market was the best of the week. Lake Shore advanced 2½ points to 160, Central of N. J. advanced 2½ points, Manhattan El. 2 points and Burlington & Quincy 1½ points.

The decline of the Trust stocks noted in our issue of the 13th inst., which followed the opening of the Senate Committee's investigation of Trusts, has been recovered in most cases, the Committee having completed its inquiry. American Tobacco has gained 3½ points within the week. United States Leather preferred declined on the announcement of a one per cent dividend and the annual statement of the company, but has more than recovered the loss and closes 2 points higher than last week. American Sugar has fluctuated between 118 and 116½, closing at 116½.

## NEW YORK STOCK EXCHANGE—ACTIVE STOCKS for week ending FEB. 26, and since JAN. 1, 1897.

## Railroad Intelligence.

### RAILROAD EARNINGS.

The following table shows the gross earnings of every STEAM railroad from which regular weekly or monthly returns can be obtained. The first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the period from January 1 to and including such latest week or month.

The returns of the street railways are brought together separately on a subsequent page.

ROADS.]	Latest Gross Earnings.				Jan. 1 to Latest Date.

**Net Earnings Monthly to Latest Dates.**—The following shows the gross and net earnings to latest dates of all STEAM railroads furnishing monthly statements. The compilation includes every road from which we can get returns of this character, and in that form is given once a month. Early returns are published from week to week, as soon as issued, but for the convenience of our readers all the roads making returns are brought together here in the week in which we publish our monthly article on net earnings—say on or about the 20th of the month. Besides the roads furnishing monthly returns, we have added this time the roads which make quarterly returns.

The returns of the street railways we give by themselves under a separate head at the extreme end of these tabulations—see page 420.

a Net earnings here given are after deducting taxes.

b Net earnings here given are before deducting taxes.

c Deducting other expenditures for repairs, replacements and general expenses, net income applicable to interest on bonds in November was \$125,143, against \$101,052 last year, and from January 1 to November 30 \$1,223,139, against \$979,751. This is the result in Mexican dollars treated (according to the company's method of keeping its accounts) as equivalent to 80 cents in United States money—that is, all depreciation beyond 20 per cent has already been allowed for.

d Prior to July 1, 1896, taxes were included in expenses for 1893 only, but since then they have been included for both 1893 and 1895.

e Results of coal mining operation only.

f Increase in expenses due to expenditures for permanent improvements.

g After allowing for other income received net from January 1 to December 31 was \$341,199, against \$440,952, and from July 1 to December 31 \$345,233, against \$304,905.

h Lower net due chiefly to increase in maintenance of way and maintenance of equipment.

i Includes besides Atlantic System the Houston & Texas Central, Austin & Northwestern, Central Texas & Northwestern and Ft. Worth & New Orleans.

j Floods in December, 1895, decreased earnings and increased expenses then.

k St. Louis Alton & Terre Haute not included in 1893 for the three months from July 1 to October 1.

l Includes Chicago Burlington & Northern for both years.

m For December, 1896, taxes and rents amounted to \$3,520,99, against \$205,011, and from July 1 to December 31, 1896, \$960,531, against \$985,743, after deducting which net for December, 1896, was \$838,404, against \$609,797, and from July 1 to December 31, 1896, \$1,923,059, against \$2,560,172.

n Includes only one-half of lines in which Union Pacific has a part interest. Figures are given exclusive of results on Oregon Railway & Navigation, Union Pacific Denver & Gulf, Fort Worth & Denver City, Leavenworth Topeka & Southwestern, Montana Union and Kansas City & Omaha.

o St. Louis Alton & Terre Haute included for the full period in both years.

p Figures for 1893 do not include results on Albany Fla. & Northern while those for 1895 include them to August 31 only.

q Including income from ferries, &c.

† After allowing for other income from Jan. 1 to Dec. 31 there was a deficit of \$35,727.

\* After allowing for other income received.

#### STREET RAILWAYS AND TRACTION COMPANIES.

The following table shows the gross earnings for the latest period of all STREET railways from which we are able to obtain weekly or monthly returns. The arrangement of the table is the same as that for the steam roads—that is, the first two columns of figures give the gross earnings for the latest week or month, and the last two columns the earnings for the calendar year from January 1 to and including such latest week or month.

#### STREET RAILWAYS AND TRACTION COMPANIES.

**Street Railway Net Earnings.**—In the following we show both the gross and the net earnings to latest dates of all STREET railways from which we have been able to procure monthly returns. As in the case of the steam roads, the returns of the different roads are published by us each week as soon as received, and once a month (on the third or the fourth Saturday of the month) we bring all the roads reporting together as is done to-day. We add also those roads which make quarterly reports.

Roads.	Gross Earnings. 1896-7.	Net Earnings. 1896-7.	Gross Earnings. 1895-6.	Net Earnings. 1895-6.

a Net earnings here given are after deducting taxes.  
b Net earnings here given are before deducting taxes.  
c All renewals and b items charged to expenses.  
d Decrease in earnings due to factories being shut down.  
e Gross earnings represent cash fares and do not include receipts from sale of power, advertising, &c. In expenses, however, amount received from sale of power amounting to \$100,000 per year is credited to the cost of operating.  
f Method of reporting expenses changed; each month now being charged with its full proportion of all expenses.  
g Expenses this year include \$3,000 paid for insurance premiums &c.  
h Net earnings are after deducting taxes and fire and accident insurance.

**Interest Charges and Surplus.**—The following STREET railways, in addition to their gross and net earnings given in the foregoing, also report charges for interest, &c., with the surplus or deficit above or below those charges.

### St. Louis Vandalia & Terre Haute Railroad.

(Report for the year ending October 31, 1896.)

The report says in part:

**Receivership of Lease Company.**—The Terre Haute & Indianapolis R.R. Co., lessee of your property, in consequence of the continued depression of business, became unable to meet its obligations to the various leased lines, and on November 12, 1896, was placed in the hands of V. T. Matott, as receiver. The order appointing the receiver provided that he should continue to operate the various leased lines, your road among the number, and comply with the terms of the various leases to the extent that it might be able so to do, until further orders of the court. The receivership suit was brought by certain bondholders of the Terre Haute & Peoria R.R. Co. Since then the trustees for bondholders of other leased lines—viz., Terre Haute & Logansport and Indiana & Lake Michigan railroad companies have the bills to foreclose the mortgages securing the bonds of those companies.

**Bonds Due.**—On Jan. 1, 1897, the first mortgage bonds of your company, amounting to \$1,899,000, matured. As your company was without the means to pay these bonds the Pennsylvania R.R. Co. on behalf of the guarantors took said bonds and holds the same until some provision can be made for their final payment.

**Physical Condition.**—There were laid in the track during the year 2,575 tons, equal to 19 miles of 55-pound steel; and 949 tons or 10 miles of 60 and 70-pound repair steel. At the close of the year 41 miles of the track were laid with 55-pound steel rails, 43 miles with 70-pound steel rails and the remainder, 72 miles, with 60-pound steel rails. There were also used in repairs of the track 52,914 cross ties and 41 miles of track were re-ballasted with gravel. The increase in maintenance of way and structures and maintenance of equipment, as reported by the lessee, was mainly due to the above expenditures.

**Decreased Revenue.**—The large decrease in tonnage and revenue is mainly attributable to the general depressed condition of the business of the country during the past year, under which manufacturing and commercial transactions were curtailed. [Of the 1,221,035 tons carried in 1896, 332,071 tons were bituminous coal.]

**Earnings, Etc.—Operations, earnings, &c., have been :****OPERATIONS AND FISCAL RESULTS—LESSEE'S REPORT.**

**Summit Branch Railroad.**

(Report for year ending Dec. 31, 1896.)

Vice-President Isaac J. Wistar says in substance :

**General Results.**—During 1896 there were 290,679 tons of coal produced and shipped as against 347,471 tons in 1895, a decrease in production of 56,774 tons, or 16.34 per cent.

The large amount of \$98,755 has been charged in the mining expenses for rebuilding the only existing breaker and opening new coal. This expenditure was necessary since in case of the destruction of the breaker or the exhaustion of accessible coal, all productive operations must cease, and the mines, both of the Summit Branch and Lykens companies, filled with water; a catastrophe which would virtually destroy the property.

**Reorganization.**—To assure continued production of coal will require the expenditure of quite \$100,000, which cannot probably be obtained in the present condition of the company without foreclosure and reorganization which may be vigorously deferred by litigation. Your management is advised that a committee, representing both bond and stockholders have made a thorough examination of the property and prepared a plan of reorganization, which it was assured by nearly all the bondholders and a large majority of stockholders would receive their concurrence. [Completion of the reorganization has been delayed through the application for a receiver and an association. —Eos.]

**Directors.**—The following directors were elected: Frank Thompson, John P. Green, Samuel Rea, N. Parker Shortridge, Amos R. Little, George Wood, William H. Barnes, A. J. Cassatt, William H. West, George F. Swift, each receiving 44,101 votes.

**Earnings, Etc.**—Results for three years were as below given:

	1896.	1895.	1894.
Gross earnings from sale of coal.....	\$350,285	\$1,138,503	\$965,720
<b>Operating expenses—</b>

<b>Balance for year.....</b>	<b>(def.) \$4,975</b>	<b>(def.) \$42,281</b>

—V. 58, p. 81.

**Brooklyn Wharf and Warehouse Company.**

(Report for the year ending Jan. 31, 1897.)

President Thomas A. McIntyre in the report says:

"The business of the company at the commencement of its third year is in a more satisfactory condition than at any period since the organization of the company, as we have at this time 30 per cent more general merchandise and 50 per cent more grain in store than we had at the commencement of the second year's business. The first section of the railroad terminal system, which lies between Fulton and South ferries, is completed, and the third section, which is located at Atlantic Basin, is nearly finished. We have operated the railroad on the first section only to a small extent, for the reason that the necessary details and equipments are not yet fully completed, but the results have, even with this limited operation, demonstrated to the management that these facilities will be of material advantage in retaining and increasing the business of the company. While constructing the railroad a large part of the bulkheads has been virtually rebuilt. The company acquired the Robinson property during the last six months, which, with the improvements made during the year, will make it possible for us to give better facilities for handling the business more economically and satisfactorily, both to ourselves and to our customers."

**PROFIT AND LOSS ACCOUNT FOR YEAR ENDING JAN. 31.**

	1897.	1896.
Gross receipts from storage, merchandise and grain, wharfage, rents, etc.....	\$1,859,190	\$1,675,637
Expenses, including rents, labor, insurance, coal, gas, repairs, office salaries, taxes, dredging, stationery, and all other general expenses, including depreciation of tools and machinery, etc.....	813,431	654,520
<b>Net earnings.....</b>	<b>\$1,045,759</b>	<b>\$1,021,117</b>
Interest on bonds.....	837,500	800,000
<b>Balance, surplus for year.....</b>	<b>\$173,258</b>	<b>\$221,117</b>

**United States Leather Company.**

(Report for year ending Dec. 31, 1896.)

The report of the United States Leather Company for the year 1896 furnishes little detailed information, consisting merely of a statement of the assets and liabilities, which we compare as follows:

Assets—	1896.	1895.	1894.
Cash	2,091,184	1,000,159	2,634,878
Due by customers	3,479,083	3,037,154	3,616,566
Bills receivable	115,411	96,791	30,240
Doubtful debts, value	19,343	15,353	.....
Other debtors	31,065	65,155	.....
Hides and leather	7,335,333	11,118,374	6,564,114
Hark and tanneries	1,324,150	1,455,918	1,811,669
Sundries, personal prop., etc.	438,342	1,76,351	137,969
Advances to other companies	15,506,358	15,405,505	12,189,965
Railroad bonds	99,158	99,458	.....
Earnings on stocks of other cos.	.....	.....	1,000,000
Tannery plants, etc.	6,314,192	6,159,609	5,559,291
Stocks of other companies	35,438,123	35,267,057	28,575,945
Treasury stock	100,000	100,000	.....
Good will, etc.	62,461,259	62,475,007	55,315,298
<b>Totals</b>	<b>134,757,191</b>	<b>136,576,721</b>	<b>117,556,993</b>

Liabilities—	1896.	1895.	1894.
Accrued interest, etc.	56,220	65,070	63,000
Unpaid dividends	3,003	2,994	.....
Current accounts, etc.	132,806	123,100	135,659
Acceptances on hand notes	.....	261,530	588,394
For exchange, not yet due	592,682	.....	.....
Bills payable	.....	3,000,000	.....
Bonds, less in treasury	5,290,000	5,520,000	5,769,000
Preferred stock	62,111,103	61,621,900	52,361,500
Common stock	62,711,100	62,221,900	52,061,500
Stock to be issued	318	607,213	4,900,185
Surplus	3,869,962	3,152,994	.....
Net profits	.....	.....	786,756
<b>Total</b>	<b>134,757,191</b>	<b>136,576,721</b>	<b>117,556,993</b>

The "quick" assets are as follows:

	1896.	1895.	1894.
Cash	2,091,181	1,000,159	2,634,878
Bills receivable	115,411	96,791	30,240
Due by customers	3,479,083	3,037,154	3,616,566
Hides and leather	7,335,333	11,128,374	6,564,114

**St. Louis (Texas) Rapid Transit Co.—Receiver Appointed.**—On application of the International Trust Company of Boston, the mortgage trustee, United States Circuit Judge McCormick, at Austin, Texas, Feb. 23, appointed Ira H. Evans receiver of the company.

**Baltimore & Ohio RR.—Purchase of Rails.**—The receivers have purchased 28,000 tons of 80-lb. steel rails at a cost of about \$1,000,000. It is stated that by fall the tracks between Baltimore and the Ohio River will practically be entirely relaid with new steel rails and new oak ties. As fast as the old rail is taken up it will be relaid on the less important branches, or used for side-tracks. —V. 64, p. 331.

**Capital Ry. of Frankfort, Ky.—Foreclosure Set for March 22.**—The foreclosure sale of this property is advertised for March 22, the upset price being \$12,000.

**Central Ohio RR.—Baltimore & Ohio RR.—Address to Central Ohio Stockholders.**—The Directors of the Central Ohio RR. have submitted an address to the stockholders, which is in the nature of a reply to the circular sent out by the stockholders' committee—see CHRONICLE of January 16, 1897, page 135. The address says it is a mistake to suppose that the B. & O. receivers are operating the Central Ohio under the lease. For the time being the lease is suspended and they are operating the road under the order of the United States Court in accordance with which the income of the road is kept separate and the net earnings are applied, first, to the payment of interest on the bonds and, second, any balance is held for account of the Central Ohio RR. Co.

The address says in conclusion:

Before the stockholders commit themselves to the adoption of hostile measures they should carefully consider the following facts:

First—The demand for the return of the property and its restoration would mean the destruction of the lease.

Second—The receivers cannot be compelled to adopt the lease.

Third—Even if there were net earnings over and above the interest of the mortgage bonds of the company, the board could not at present declare a dividend on the stock, for the reason that the Sandusky Mansfield & Newark RR. Co. and parties interested in the Columbus & Cincinnati Midland RR. Co. have given notice that they, as creditors of the Central Ohio RR. Co., claim any such net earnings.

Fourth—At present the receivers have expressed the intention of paying the interest upon the mortgage bonds of the Central Ohio RR. in order to prevent the disintegration of the Baltimore & Ohio system, even if the earnings of the line in any one half year be not sufficient for the purpose. The receivers are at present forwarding over the Central Ohio RR. a large portion of the through traffic to and from the West which it is perfectly feasible for them to send over other portions of their system. They are also doing all possible, so far as we can see, to prevent the obligations of the Sandusky Mansfield & Newark lease from becoming a burden upon the Central Ohio, especially by sending over that road traffic it would not receive except as a part of the Baltimore & Ohio system.

Whenever it becomes necessary for the board to act through litigation or otherwise, the most vigorous action will be taken, but at present the wise course seems to be to prevent any hostile proceedings. The board has a firm conviction in the ultimate value of the property, but the reorganization of a great system of railroads requires time. The directors believe the lease to the Baltimore & Ohio RR. is a valuable one to the Central Ohio Co., and they have been careful to do nothing to jeopardize the rights under that lease.

**Earnings.**—The earnings for the first nine months of the receivership, viz., March 1, 1896, to Nov. 30, 1896, were:

Tonnage revenue	\$589,289	General expenses	\$57,142
Passenger revenue	272,503	Conducting transportation	424,252
Mall revenue	32,498	Maintenance of equip't	208,250
Express revenue	27,781	Maintenance of way	152,372
Miscellaneous	15,030		
<b>Total gross earnings</b>	<b>\$937,101</b>	<b>Net earnings</b>	<b>95,085</b>
		Construction	11,809
		Taxes	28,675

The receivers also state that there was due to the Central Ohio Railroad Company, as reorganized, under the terms of the lease, on March 1, 1896, the sum of \$863,314, and that upon the basis of 35 per cent of the gross earnings, the books of the company (not if the receivers) showed that there was due to the Central Ohio RR. Co. Oct. 31, 1896, the sum of \$775,295.—V. 64, p. 180, 330.

**Central Pacific RR.—Commission Bill.**—A press dispatch from Washington says:

The Commission Bill to settle the indebtedness of all the bond-aided railways to the Government, except the Union Pacific Road, against which foreclosure proceedings have already been instituted, is dead for this session. It will not be given a day in the House. If the similar bill now on the Senate calendar should pass the Senate, the Senate bill might be considered by the House, but this contingency is outside of probability.—V. 64, p. 286.

**Chesapeake Ohio & Southwestern RR.—Illinois Central RR.—Equipment Ordered Sold.**—At Louisville, Feb. 20, Judge Lorton, in the United States Circuit Court, ordered the sale of the equipment securing the equipment bonds of the old Chesapeake Ohio & Southwestern to be sold at auction to satisfy a judgment of \$300,914 entered in favor of the mortgage trustee. The Illinois Central holds nearly all the bonds, and by the sale will perfect its title to the equipment, the road itself being already owned by it.—V. 64, p. 233.

**Chicago & Eastern Illinois RR.—Purchase Ratified.**—New Bonds.—The stockholders on Feb. 7 ratified the purchase of the Chicago Paducah & Memphis RR. On account of the C. P. & M., which is 100 miles in length, and the extension of 24 miles which has been built to connect it with the Chicago & Eastern Illinois, the latter company will issue its general consolidated mortgage bonds of 1887 at the rate of \$18,000 per mile, or in all \$2,210,000.—V. 63, p. 1158.

**Chicago Lake Shore & Eastern RR.—Consolidation.**—The Calumet & Blue Island Ry. of Chicago and the Chicago Lake Shore & Eastern RR. have been consolidated as the Chicago Lake Shore & Eastern Ry. Co. The company's capital stock has been increased to \$250,000 and an enlargement of the objects of incorporation permits the extending of the road to include territory from the north boundary of Lake County; also to points in Illinois, Indiana and Wisconsin. New bonds are proposed.—V. 63, p. 1114.

**Citizen's Traction Co., San Diego, Cal.—Receiver Appointed.**—A dispatch from San Diego, Feb. 9, says that on application of the Union Saving & Trust Company of Cincinnati the Citizens' Traction Co. has been placed in the hands of A. D. Noman as receiver. The Traction Company is successor of the San Diego Cable Co. foreclosed in April, 1895.

**Columbus Hocking Valley & Toledo RR.—Receiver Appointed.**—The company having failed to raise the \$231,000 due for interest March 1 was on Thursday, with the consent of all parties concerned, placed in the hands of Vice-President Montserrat as receiver. The appointment was made by Judge Sage of the United States Circuit Court at Columbus, on the application of the Central Trust Company, trust-

tee under the 5 p. c. consol. mortgage of 1881, interest on the \$3,000,000 outstanding being due March 1. The floating debt amounts to only about \$275,000, and the road is in good physical condition, but the company's credit was seriously impaired by the bituminous coal war and the financial embarrassment of several of its competitors among the coal-carrying roads. As the roads are now doing a good business under the recent agreement, it is hoped that a speedy re-adjustment of the company's difficulties may be effected.

**Reorganization—Purchase of Coupons.**—The reorganization of the company's affairs has been undertaken by J. P. Morgan & Co., who will purchase at their face value the consolidated mortgage coupons due March 1. Mr. Morgan is reported to be one of the largest individual holders of the company's consol. fives and preferred stock. Pending the preparation, if necessary, of a reorganization plan, the holders of all classes of the company's bonds are requested to deposit their holdings with the above-named firm, in accordance with the following notice:

In view of the appointment of a receiver and the default admitted by the company to be inevitable in payment of coupons due March 1, 1897, on the five per cent bonds, holders of all classes of bonds of said company are invited to deposit same with us for mutual protection. A suitable agreement looking to the reorganization of the property, if necessary, will be prepared and submitted to all depositors for approval. Pending a determination in this respect, we are prepared to advance \$25 on each \$1,000 5 per cent bond deposited with us.

Negotiable receipts will be issued for bonds deposited, for which in due course a quotation on the New York Stock Exchange will be asked.

J. P. MORGAN & CO.

**Official Statement as to Company's Embarrassment.**—Samuel D. Davis, of Samuel D. Davis & Co., fiscal agents of the Hocking Valley, Thursday issued the following statement:

In view of the present financial depression and the great loss of credit from which the Hocking Valley Railroad Company is suffering, the railway's immediate requirements demand the prompt assistance of capable parties in restoring the credit of the company by a liberal advancement of funds or a re-adjustment of its fixed charges to meet the changed conditions of the railroad and coal traffic now prevailing.

The annual meeting of the company is set for March 18 in this city and the transfer books for recording stock were closed last week, thirty days prior to the meeting.

At the time of the issue of 4 per cent bonds in July last, the situation warranted the statement that the property was on a divided basis, since which time, however, and particularly during the last four months of 1896, the unparalleled competition for traffic among the coal roads in Ohio produced so great a demoralization in rates that several of our competitors have been forced into the hands of receivers, and the Hocking Valley management is now confronted with the problem of financing for the large coupon payments to be made upon the first of next March, and a proper provision for the retirement of \$1,401,000 underlying 7 per cent bonds maturing in October next.

An active inquiry on our part among the security holders of the road has convinced us that it will not be possible to secure from them sufficient aid to provide for its present necessities, and at the same time place it upon a financial basis that will enable it to maintain its proper proportion of traffic during the coming years.

The management have therefore secured the assistance of Messrs. J. P. Morgan & Co. to the end that a reorganization may be brought about under their direction, believing that in this way all interests will be equitably adjusted.—V. 64, p. 373.

**Columbus Sandusky & Hocking RR.—Reorganization Committee—Deposits Called for.**—At the request of holders of a large amount of the first and the general mortgage bonds, a committee for the protection of the interests of the bondholders and for the reorganization of the company's affairs, has been formed, consisting of Louis Fitzgerald, Chairman, President Mercantile Trust Co.; Thomas Hulhouse, President Metropolitan Trust Co.; L. C. Weir, President Adams Express Co.; F. K. Sturgis (Strong, Sturgis & Co., Bankers), and John G. Dasher, Vice-President Dasher National Bank, Columbus, Ohio, with Alvin W. Krech as Secretary, 120 Broadway, N. Y. The committee represents the entire issue of the receiver's certificates, and more than one-third of the first and general mortgage bonds.

The company has been unable to dispose of the first mortgage or prior lien bonds, and consequently the receiver's certificates and other preferential liens remain unpaid. A reorganization is deemed inevitable, and the committee is formed before default upon the bonds in order that there may be prompt and united action. It is hoped to avoid the expense and damage to the road's business necessarily consequent upon the operation of the property by a receiver. The receivership recently created has been dissolved, as stated in the CHRONICLE of Jan. 30, 1897, p. 233. The committee will secure an expert's report upon the property and its earning capacity, and will then submit a plan of reorganization.

In the meantime the committee will act for those bondholders who may deposit their bonds under a bondholders' agreement dated Feb. 20, 1897, for which negotiable certificates will be issued. All bonds deposited may be withdrawn in case the plan of reorganization is not acceptable without expense or charge to the non-assenting depositors. A copy of the bondholders' agreement can be obtained at the office of the Mercantile Trust Co., New York, depository for first mortgage bonds, and the Metropolitan Trust Co., New York, depository for general mortgage bonds. The Dasher National Bank, Columbus, Ohio, will receive deposits as agent for the depositaries.—V. 64, p. 233.

**Delaware Lackawanna & Western RR.—Quarterly.**—Earnings of the D. L. & W. leased lines in New York State for the quarter and the six months ending December 31:

3 months end. Dec. 31—	Gross earnings.	Net earnings.	Interest, taxes, etc.	Balance, surplus.
1896.....	\$2,351,111	\$1,289,931	\$651,189	\$633,642
1895.....	2,907,672	1,761,667	552,578	1,209,089
6 months—				
1896.....	4,912,826	2,593,235	1,271,938	1,321,297
1895.....	5,412,632	3,172,927	1,173,327	1,999,600

—V. 64, p. 231.

**Duluth Gas & Water Co.—Discharge of Receiver.**—Treasurer A. W. Hartman writes us as follows: "The application for a receiver for the company was granted by Judge Lochran on ex parte application of attorneys claiming to represent a majority of consolidated bonds. The receiver was obtained by concealment of some of the provisions of the mortgage. A hearing being granted and proof being produced the Judge discharged the receiver. All interest and the taxes not in litigation have been paid. The company is not in the hands of a receiver and no reorganization plan has been formulated."—V. 64, p. 237.

**East Tennessee Land.—Ordered Sold.**—This property, consisting, it is stated, of 100,000 acres of land and city property at Harriman, Tenn., has been ordered to be sold under foreclosure of the \$1,000,000 mortgage to the Central Trust Co. and the purchase money mortgages.—V. 61, p. 1155.

**Englewood & Chicago Electric Street Ry.—Receiver's Certificates.**—Receiver Condict has obtained permission to issue \$325,000 receiver's certificates to pay off liens and to complete the road, \$60,000 to be Series A and \$265,000 Series B.—V. 64, p. 330.

**Evansville & Richmond RR.—Foreclosure Sale March 23.**—The date for the sale of this road under the foreclosure of the general mortgage has been fixed for March 23. The bonds have been mostly exchanged for Evansville & Terre Haute preferred stock.—V. 62, p. 413.

**Grand Trunk Ry. (Canada)—Earnings.**—Earnings for the half-year and the twelve months ending Dec. 31 have been reported as follows, the results being given in sterling:

6 mos. end. Dec. 31—	Gross earnings.	Net earnings.	Interest, taxes, etc.	Balance, surplus.	Advances under guar.
1896.....	\$2,079,700	\$616,100	\$484,700	\$131,400	\$2,400
1895.....	1,984,000	544,200	485,400	58,800	91,900
12 mos.—					
1896.....	\$3,787,200	\$1,105,400	\$969,400	\$136,000	\$179,000
1895.....	3,637,100	1,026,220	963,504	62,716	189,899

\* To Chicago & Grand Trunk under traffic guarantee and Detroit Grand Haven & Milwaukee under guarantee of bonds.—V. 63, p. 652.

**Hartford & Connecticut Western Ry.—Philadelphia Reading & New England RR.—New Mortgage.**—The directors of the Hartford & Connecticut Western have decided to petition the Connecticut Legislature for authority to issue a general mortgage of \$1,500,000, of which \$700,000 shall be used to retire at maturity the bonds outstanding, and the balance for the construction of the branch from Tariffville, northeast 17 miles, to West Springfield, Mass. The road is leased by the Phila. Reading & New England.—V. 64, p. 235.

**Hendersonville & Brevard Railway, Telegraph & Telephone Co.—Receiver Appointed.**—This property, extending from Hendersonville to Brevard, N. C., 21 miles, has been placed in the hands of W. E. Shuford, of Asheville, as receiver. The road's capital stock is \$250,000; funded debt \$150,000; gross earnings for 1895-96 \$5,539; rolling stock, 1 engine and 6 cars.

**Heywood Brothers & Wakelield (Rattan) Company—Consolidation.**—A dispatch from Boston, Mass., says that under this title, with authorized capital of \$6,000,000 (\$4,000,000 six per cent cumulative preferred stock and \$2,000,000 common stock), are to be consolidated the Wakefield Rattan Co. of Boston, the Heywood Brothers & Co. of Gardner, Mass., and the Heywood & Morrill Rattan Co. of Chicago, thus placing the rattan manufacturing business of the country under one head.

**Lake Shore & Michigan Southern Ry.—Quarterly.**—Earnings for the quarter ending Dec. 31 have been reported as follows. Results for the year 1896, with the month of December partly estimated, were given in V. 63, p. 1155, and the actual figures now at hand (from quarterly reports) differ but slightly therefrom:

3 mos. end. Dec. 31—	Gross earnings.	Net earnings.	Other income.	Interest, taxes, etc.	Balance for div.
1896.....	\$5,042,531	\$1,800,323	\$20,553	\$1,212,870	\$608,006
1895.....	5,849,571	1,594,474	60,067	1,099,514	555,027

The balance sheet Dec. 31, 1896, shows profit and loss surplus of \$11,449,859, against \$11,652,219 in 1895.—V. 63, p. 1155.

**Lehigh & Hudson River Ry.—Quarterly.**—Earnings for the quarter and the six months ending December 31 have been:

3 months ending Dec. 31—	Gross earnings.	Net earnings.	Interest, taxes, etc.	Balance, surplus.
1896.....	\$98,165	\$40,345	\$37,817	\$2,528
1895.....	99,090	41,788	36,250	5,536
6 months—				
1896.....	\$175,980	\$80,170	\$72,554	\$7,586
1895.....	194,355	79,634	70,596	9,038

Loans and bills payable Dec. 31, 1896, \$413,500, against \$398,500 on June 30. Car trusts D. C. 3, \$73,717.—V. 64, p. 83.

**Lima Ry.—Lima & Honeoye Falls RR.—Reorganized Company.**—The Lima Ry. Co. has been incorporated at Albany as a reorganization of the Lima & Honeoye Falls RR. The road runs from Lima to Honeoye Falls, 4 miles.

**Louisville Evansville & St. Louis Consolidated—New Albany Belt Bonds Purchased.**—The receiver of the Louisville Evansville & St. Louis Consolidated has applied for authority to issue \$200,000 certificates to acquire a controlling interest in the New Albany Belt & Terminal Co. The application is approved by the Reorganization Committee, who have secured a majority of the \$300,000 of bonds at 57½ cents. The Belt has been operated by the Kentucky & Indiana Bridge Co., with which it connects the lines entering Louisville by way of New Albany. The Air Line will operate the Belt, and

and will use it to secure an entrance to the Union Station, via the Kentucky & Indiana Bridge, abandoning the Pennsylvania bridge and station.—V. 64, p. 42.

**Marsden (Cellulose) Company.**—Incorporated.—Articles of incorporation were filed at Trenton, N. J., Feb. 18, incorporating this company with an authorized capital stock of \$50,000,000, \$35,000,000 common and \$15,000,000 6 per cent cumulative preferred, to manufacture and deal in products from corn stalks under the patent of Mack Marsden. The capital stock paid up is \$10,000. The incorporators are: John H. Williams, Merchantville; Richard C. Edis, John McCormick and Peter H. Evans, Philadelphia, and James Huber Clark, of Philadelphia.

**Montreal & Western RR.—Canadian Pacific Ry.**—New Mortgage.—The shareholders of the Montreal & Western will vote at Montreal, March 1, on a proposition to make a new mortgage to secure bonds for the payment of the company's indebtedness. The road extends from St. Jerome to Labelle, Que., 70 miles, and is leased for five years from Sept. 1, 1892, to the Canadian Pacific at a rental of 40 per cent of its gross earnings.—V. 64, p. 329.

**Natchez Red River & Texas RR.**—Sold in Foreclosure.—This road, which extends from Vidalia, Miss., to Black River, La., 35 miles, was sold at Vidalia on Feb. 13 by order of the United States Court, and was bought in by the Hale estate, the original owners. The Farmers Loan & Trust Co. was trustee under the mortgage for \$300,000.

**New Jersey Zinc.**—Consolidation.—New Mortgage.—The Lehigh Zinc & Iron Co., the New Jersey Zinc & Iron Co., the Florence Zinc & Iron Co., the Passaic Zinc & Iron Co. and the Mineral Point Zinc Co., of Wisconsin, have consolidated under the name of the New Jersey Zinc Co., with a capital of \$10,000,000, and S. S. Palmer as President. The new corporation has made a mortgage for \$1,700,000 to the Farmer's Loan & Trust Co. as trustee, to secure 5 per cent gold bonds due Feb. 1, 1917. Of the amount authorized \$200,000 is reserved to retire at maturity an old mortgage still outstanding.

**New York & Brooklyn Tunnel Co.**—New Brooklyn Tunnel.—This company, of which Herman C. Hilmer is the leading spirit, has an office at 35 Broadway, New York City. The company filed articles of incorporation March 6, 1895, with capital stock of \$100,000, and has authority from the Legislature of that year (Chapter 1014, Laws of 1895), to construct a tunnel under the East River.—V. 60, p. 1010.

**New England RR.**—Quarterly.—Earnings for the quarter and the six months ending Dec. 31 have been as follows:

3 mos. end- ing Dec. 31.	Gross earnings.	Net earnings.	Other income.	Interest, taxes, etc.	Balance, surp. or def.
1896.....	\$1,373,555	\$318,977	\$8,046	\$388,244	def. \$61,321
1895.....	1,850,358	507,641	6,213	360,140	sur. 153,714
6 months—					
1896.....	\$2,730,276	\$568,796	\$14,459	\$777,001	def. \$193,748
1895.....	3,291,728	1,035,427	7,528	819,845	sur. 223,110

Loans and bills payable Dec. 31, 1896, \$125,000, against \$160,000 on June 30.—V. 64, p. 83.

**New Jersey & New York RR.**—Quarterly.—Earnings for the quarter and the six months ending Dec. 31:

3 months ending December 31—	Gross earnings.	Net earnings.	Interest, taxes, etc.	Balance, sur. or def.
1896.....	\$63,327	11,540	\$14,012	def. \$12,472
1895.....	86,215	10,337	11,257	def. 3,920
6 months—				
1896.....	\$141,397	\$34,717	\$28,027	sur. \$6,690
1895.....	191,340	38,342	27,750	sur. 10,562

There have been no important changes in the balance sheet since June 30.—V. 63, p. 968.

**New York Central & Hudson River RR.**—Reconstruction of the Grand Central Station.—The alteration and enlargement of the Grand Central Station, it is stated, will be begun as soon as the weather permits. The estimated cost, which is about \$700,000, will be divided among the several roads using the station. The plan submitted contemplates the consolidation of the passenger business of all the roads in a general waiting room with the necessary auxiliary rooms and a general outbound baggage room. The office capacity of the building will be increased by the erection of additional stories and elevators. New steam heating and electric light and power plants will be provided.—V. 61, p. 374.

**New York Ontario & Western Ry.**—\$250,000 Refunding Bonds Listed.—Refunding bonds for \$250,000 have been listed on the New York Stock Exchange, making the total listed to date \$3,375,000. The new bonds were issued to represent expenditures made for equipment, betterments, &c.—V. 64, p. 374.

**New York Susquehanna & Western RR.**—Earnings for Half-Year.—Earnings for the six months ending December 31 have been reported as follows:

6 months end Dec 31—	Gross earnings.	Net earnings.	Other income.	Interest, taxes, etc.	Balance, surplus.
1896.....	\$1,239,623	\$566,001	\$21,949	\$456,307	\$131,733
1895.....	1,118,425	512,186		422,858	89,328

**Northern Pacific RR.**—Decrease Value of Unassented Bonds.—The foreclosure sale and the transfer has been formally completed and the new company has paid into court the sum of \$450,550 to be applied to the payment as follows of the bonds that failed to come into the reorganization: \$138,000 for \$138,000 old general second mortgage bonds, with all unpaid coupons attached; \$163,350 for the \$159,000 general

third mortgage bonds; \$208,950 for the \$597,000 consolidated mortgage bonds and \$250 for one collateral trust bond. The dividend scrip, if any, would receive the same treatment as the general third mortgage bonds.—V. 64, p. 331.

**Ohio Southern RR.**—Receivers' Certificates Sold.—The receivers have sold the \$365,000 receivers' certificates to J. S. Bache & Co. of this city at 100.53 and interest. The bids for the certificates aggregate \$1,500,000. The committee representing the first mortgage bondholders, it is understood, acquiesced in the issue of the certificates. The proceeds of the certificates will be used for the several purposes specified in our last issue and will not be applicable for the interest on the first mortgage bonds due Dec. 1. Under the terms of the mortgage the company has three months in which to pay that interest before foreclosure proceedings can be instituted.—V. 64, p. 374.

**Oregon Short Line RR.**—Officers Elected.—The officers of the new company are: Samuel Carr, President; W. H. Bancroft, Vice-President and General Manager; T. Jefferson Coolidge, Jr., Vice-President; Henry G. Nichols, General Counsel; T. K. Cummins, Jr., Secretary and Treasurer.—V. 64, p. 374.

**Philadelphia & Reading Ry.**—Reading Company.—Payment of Coal & Iron Co. Bonds.—The \$203,000 bonds of the Philadelphia & Reading Coal & Iron Co. maturing March 1, 1897, secured upon land known as the Glentworth tract, will be paid at maturity either by J. P. Morgan & Co., New York, or Drexel & Co., Philadelphia.—V. 64, p. 374.

**St. Joseph & Grand Island Ry.**—New Officers.—The directors of the new company are: William L. Bull, President; Henry Budge, Vice-President; F. P. Olcott, J. Kennedy Tod, Gordon Abbott, C. H. Shaffer, Henry M. Robinson, Ulysses G. Life and Edwin McNeil.—V. 64, p. 181.

**St. Louis Iron Mountain & Southern Ry.**—Extension and Redemption of Maturing Bonds.—Arrangements have been concluded for the extension of the \$4,000,000 first mortgage five per cent bonds and the \$5,000,000 second mortgage sevens, both of which issues mature May 1. The bonds are to be extended fifty years, the firsts at four and a-half per cent interest and the seconds at five per cent. They will be redeemable at 105 on six months' notice. The \$1,450,000 Cairo Arkansas & Texas first mortgage sevens maturing June 1 will be paid. Official announcement of the above will be made in a few days.—V. 62, p. 548.

**Syracuse Binghamton & New York RR.**—Quarterly.—Earnings for the quarter and the six months ending December 31 have been reported as follows:

3 months end- ing Dec. 31—	Gross earnings.	Net earnings.	Other income.	Interest, taxes, etc.	Balance, surplus.
1896.....	\$220,137	\$94,406		\$45,088	\$49,339
1895.....	238,133	82,211		49,657	32,554
6 months—					
1896.....	\$460,137	\$215,841	\$8,672	\$91,473	\$133,040
1895.....	501,962	220,523		94,562	131,961

There are no important changes in the balance sheet since June 30, 1896.—V. 63, p. 891.

**Tennessee Central.**—Sale April 5.—The foreclosure sale has been set for April 5.—V. 64, p. 288.

**Union Pacific Ry.**—Kansas Pacific Consols Accept Modified Plan.—At the meeting Wednesday the holders of certificates representing over \$5,000,000 of the Kansas Pacific consols voted to accept the proposition of the Union Pacific Railroad Reorganization Committee to receive 50 per cent in new 4 per cent bonds and 110 per cent in preferred stock in exchange for their securities, no allowance being made for defaulted interest. Less than \$100,000 of the bonds voted against the proposition, and the action of the meeting was subsequently made unanimous.

**Modified Terms to K. P. Consols and Sinking Fund 8s.**—The Union Pacific Reorganization Committee gives notice that more than 90 per cent of each of these issues have accepted the modified allotments and that no withdrawals of the same deposited under the agreement will be permitted after March 30, 1897. The time for deposit without penalty of additional bonds of the two issues has also been extended to the same date.

The new allotments are as follows:

Each \$1,000 bond with all defaulted coupons detached.	Will receive—	New first M 4s.	New Pref. Stock.
Kansas Pacific consols .....	\$500		\$1,100
Sinking fund 8s.....	750		1,000

**Interest on First Mortgage.**—An order, it is stated, has been signed for the payment of the January, 1897, coupon on the Union Pacific first mortgage bonds. This payment will call for the disbursement of over \$816,000.—V. 64, p. 331.

**West Chicago Street RR.**—Sale of Bonds.—Regarding the sale of \$6,000,000 of consolidated mortgage five per cent 40-year bonds to the Hallgarten & Co. and Central Trust Co. syndicate, referred to in our issue of the 13th, it is stated that the proceeds will be used to pay off the floating debt and to retire the \$2,700,000 outstanding debentures, which are subject to call on sixty days' notice and will be redeemed before May 1. Of the \$6,000,000 consols sold \$3,500,000 are to be delivered at once, and will shortly be listed on the New York Stock Exchange.

The consolidated mortgage authorizes \$12,500,000 bonds, of which \$3,960,000 are reserved for the first 50 of 1893 and \$3,500,000 are to be used for improvements and extensions at not exceeding 75 per cent of the cost thereof.—V. 64, p. 238.

## Reports and Documents.

### CONNECTICUT MUTUAL LIFE INSURANCE COMPANY.

#### FIFTY-FIRST ANNUAL REPORT

##### To the Members:

The year 1896 was marked by almost unremitting commercial depression, affecting every interest, and by serious disturbances in the public finances, producing apprehensions more or less approaching panic, for nearly the entire period, both conditions having their origin largely in those questions which became the issues in a political campaign which, for the critical gravity of the results involved and the intensity of feeling engendered, has had no parallel in our history.

In such a year enterprise loses much of its usual reward, and the best results in nearly any business are those accomplished at least cost while maintaining the efficiency of the working machinery and awaiting such favorable change as will allow a satisfactory amount of business to be done at usual cost and without strain.

##### EFFECT ON BUSINESS.

Especially is this true in the business of life insurance. Its cost is usually reckoned as a part of one's expenses; and when money is hard to come at and profits are little, and perhaps nothing, new expenses are not readily undertaken, the usual ones are often curtailed and business shrinks. Under such conditions a large volume of new business can be maintained in only one way: by such concessions on the first premium as tempt a new insurer to take a policy which costs him little or nothing the first year, and which he gets at the expense of the older policy-holders whose money has to make up the deficiency caused by what the "low blood" costs but fails to pay.

Were any given quantity of new business in any one year necessary to the stability of a company—as it might be were the company new and its amount at risk as yet too small for a safe average experience—there might be a reason for keeping up a pace even at increased cost, if the business so gotten were likely to stay by. But there is no company of our class doing business to-day in any such situation; nor any which cannot afford to let its new business vary with the conditions affecting the volume of every other business, except those which have attached to the simple methods of legitimate life insurance certain wholly extraneous features which create necessities of their own and dominate the situation. The "accumulated dividend" companies, some of which are losing \$125,000,000 and upward of old business every year, and must keep a very great amount of business going in order to keep up the lapses and forfeitures necessary to provide their "accumulated surplus" or "tontine fund," have tried to educate the public to believe that a great "new business" and a great "amount at risk" were the true measures of success, and may feel that their choice lies between keeping up the inflow at any cost, by any effective means, and such a shrinkage as they cannot contemplate with equanimity. However that may be, the vicious and costly methods of competition are continued.

##### AN IDEAL POSITION.

The Connecticut Mutual is happily under the stress of no circumstances, natural or artificial, requiring it to force its business beyond the conditions of the time. Its position is ideal, and that to which every company ought to strive to attain, a business so large as to give absolute stability in its average experience, yet not so large but that in good times and under fair conditions it can be maintained without difficulty, even allowing for occasional and considerable shrinkages in bad times, a standard of solvency beyond question, investments worthy such a trust, and an expense account so small as to give the largest possible saving to policy holders and so adjusted that, whether its business increases or shrinks, it will not have to cut its dividends on that account.

That is the position we occupy. So far as the absolute safety of every present policyholder is concerned, or so far as his future dividends would be affected, it is not necessary that we should ever write another new policy. The company would pay out to the very last man and maintain the same relative high dividends without it. The only reason for taking new business is that we may give to new families the same secure and cheap protection that those of our present members are getting. The latter have no need whatever for any new business. And therefore it is that, among all the struggles for first place as to new business and amount at risk among the large companies, and those of the smaller ones to keep somewhere in the race, the Connecticut Mutual has steadily refused to compete for new business at the cost of present policy-holders. What we can get without reducing their dividends we take; what we can't go to those whose inducements to agents, and whose speculative proposals and momentary temptations to new men are great, but whose dividends to old members are smaller. In good times we more or less enlarge our business. In hard times we husband our strength, indifferent to all considerations except maintaining our standard of excellence.

We are thus explicit, not only because the matter is apt to these times, but also because in the competition of business it is commonly represented by those whose only point of comparison with us is in respect of new business and amount at risk, that it is undesirable to insure in a company which is not rapidly increasing its business; that expenses would be less, dividends larger, and security greater if we were pushing harder for new business and getting more of it; a statement which is false in every aspect and particular. There must come a point with every company, no matter how rapid its present growth, beyond which it cannot force an increase of size. And several of the largest companies are rapidly approaching that point. What will be their status then? Should the public, therefore, turn from them? If they will be then undesirable companies, why should they be built up at all?

If a company be truly desirable, prosperous, and safe only while and only as it is increasing its risks, then the more rapidly a company is growing to-day the faster it is approaching the time when it will be no longer desirable, prosperous, or safe. If that be so, life insurance should be summarily suppressed as an inevitable swindle.

But, as our expense rate is less than that of any other company, and only about half that of the great pushers, while our results to policy-holders are very much larger than theirs, and our stability greater and more conservatively based, the advantage to be derived from following their example would seem more than doubtful, especially

in view of the heavy and continuous reductions they have made and are still making in their dividends, while we have maintained our scale. The reproach of such a conservatism we are very content to bear. The vigor of the oak is of an enduring sort.

##### REVIEW OF THE YEAR.

Notwithstanding the dullness of the year 1896, the affairs of the company in every essential particular were as prosperous as could be reasonably expected under the conditions. A gain in income, assets and surplus, while earning an increased dividend—an increase of strength more than corresponding with the increase in liabilities, while decreasing the cost of insurance—may, in such times, well be regarded as fairly satisfactory.

The operations of the year as covered by our report to the Insurance Department are as follows:

Net assets January 1, 1896.....	\$60,764,020 64
Received—	
For premiums.....	\$4,743,236 75
For interest and rents.....	3,139,405 22
Balance, profit and loss.....	50,140 75
Total income.....	7,932,782 72
	\$68,696,803 36
Disbursed—	
For claims by death and matured endowments.....	\$4,508,018 25
Surplus returned to policy holders.....	1,274,658 62
